EMBETRONICS

Your Techno Partner

OBJECTIVE OF THE FIRM

To provide World-class design services for complete end-to-end electronic product development from concept definition till production for numerous application areas such as Embedded System, IoT, Embedded Vision and AI.

EV CHARGING STATION USING SOLAR

Vehicles are fully charged and are environmentally safe by a solar charging station. This technique transforms solar power to electricity and stores it in a battery bank. The solar charging station gives the electricity to charge the battery

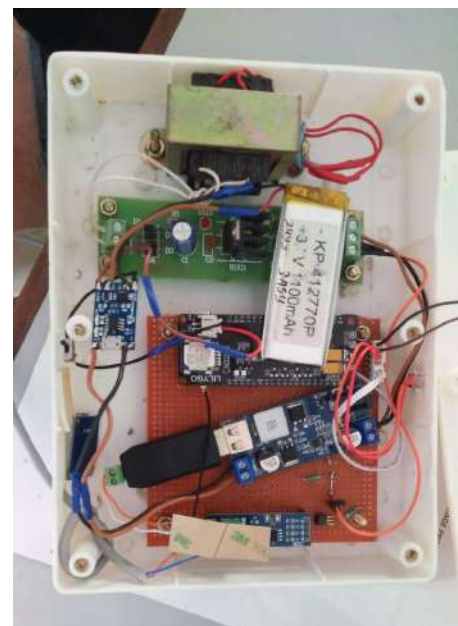

DOCUMENT SCANNER

OCR is used to recognize the text from scanned documents and images. Digitized government documents are scanned and uploaded to the cloud which can be easily accessed by many people easily and efficiently.

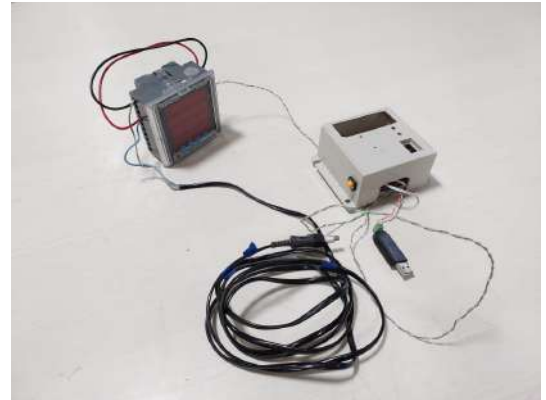

SMART MAXIMUM DEMAND CONTROLLER FOR CONSUMER LOADS USING GSM

Smart Energy Meter is to monitor the conditions of loads of industries or homes continuously. It also keeps a track of devices which are present in particular load. It sends the message to the customer when it is on over usage

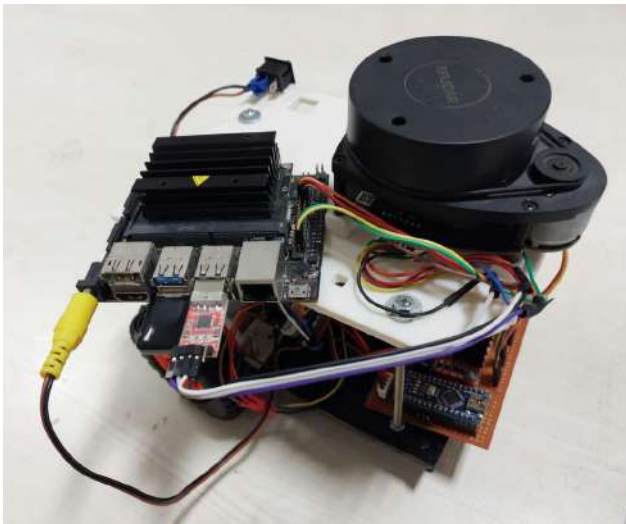

SMART MAXIMUM DEMAND CONTROLLER FOR CONSUMER LOADS USING WIFI

WIFI is used to manage the loads. Its work is to monitor the conditions of loads of industries or homes continuously. It also keeps a track of devices which are present in particular load

SELF-DRIVING ROBOT USING OPENCV

Self-driving cars use CV to detect objects. The convolutional Neural Network CNN works by getting an image, designating it with some weightage based on the different objects of the image, and then distinguishing them from each other

LOW COST ENERGY SAVING SYSTEM

The Motion Sensor is small in size and it looks like spot light. It is a PIR motion sensor and it is ideal for your bathroom, lobby, passage area, corridor etc. PIR or Passive Infrared motion sensors are designed to reliably detect people, large pets & other large warm moving objects.. Motion sensors are used primarily in home and business security systems. Motion sensors do not work through glass. Benefits are, it is more Convenience, Energy Savings & Cost Savings. It consumes less energy (0.8W to 1.0W) compared to a microwave sensor.

ACTION PLAN FOR THE UPCOMING MONTHS

- * To design and fabricate Smart Gate. It has the features of sensing of human body temperature, BITBOT-ROS and face mask dispensing. It is planned to complete in 3 months.
- * To develop AI-driven grocery product recognition models for vending machines.

FIRST CHOICE AC SOLUTIONS

Service at your Doorstep

FACULTY INCHARGE
Dr. M RAVIKUMAR

OBJECTIVE OF THE FIRM

- To develop a diverse set of design and real time problem solutions in our domain and extend to address the social problems.
- To provide high quality service and maintenance support with low cost in the area of renewable energy and HVAC.
- To generate revenue by doing consultancy work for industries/ commercial sectors.

ELECTRIFIED CHIMNEY FOR COMMERCIAL APPLICATION

The burning process in restaurants (cooking) and other businesses, such as mills, results in the production of smoke. Emissions contain more oil particles and pollutants such as CO_2 , NO_x , CO , SO_2 and particulate in hotels and mills. These gasses are harmful to the environment in many different ways. An electrostatic precipitator operated in the electric field is developed to reduce the number of hazardous gasses emitted by hotels through chimneys. Electrostatic precipitation is a common technique for cleaning airflow of minute particles by eliminating contaminants. The particles that are suspended in the air stream are given an electrical charge in an electrostatic precipitator. This charge is then removed from the particles when they enter the device by the impact of an electric field. The primary objective is to use electrical precipitators in hotel chimneys to remove dust particles and to remove gas stream particles by electrically charging them either positively or negatively. This will be accomplished through the use of electrical precipitators

ACTION PLAN FOR THE UPCOMING MONTHS

- * Fabricating solar operated vapor absorption cum vapor compression refrigerator,
- * Refrigerant gas leakage detector,
- * Solar Desalination System ,
- * Solar Water Heater.

IOT TECHNO SOLUTIONS

Automate Everything

FACULTY INCHARGE
Mr. S TAMILSELVAN

OBJECTIVE OF THE FIRM

IoT Techno Solutions is a internet of things (IOT) development solutions provider that delivers the most innovative and agile solutions that enable you to automate, inspire and impress. We dedicate hours of painstaking analysis to develop solutions that not only cater to our customers' current requirements but also scale seamlessly for future needs. Most importantly, we always aim to build solutions that Focus on design and development of IoT enabled technologies & solutions which are cost effective and socially relevant on increasing your productivity.

HOME SECURITY SYSTEM

The security system will help you keep an eye on your home while you're away and will notify you if an intruder tries to enter. It will also send you a photo of the intruder on your smartphone. So that you may take the right action. An additional feature has also been added to this project where a user can also capture a photo from his/her smart phone remotely

ACTION PLAN FOR THE UPCOMING MONTHS

* To enhance the existing products based on user needs and develop new products such as Pet Feeder and IoT-based water level Indicator using ESP8266.

* IoT Based Water Level Indicator using ESP8266 could be used to detect and indicate the water level in an overhead tank or any other water container. The buzzer will ring if the water touches the base of the transistor.

i Foods

பகிர்ந்துண்டு பலலுயிர் ஓம்புக

FACULTY INCHARGE

Dr. R BALAKRISHNA RAJA

OBJECTIVE OF THE FIRM

- To plan to develop healthy food with fortified nutraceuticals
- To enhance the quality of functional foods using the concept of waste to wealth
- To create the customer base through the WA & other social sites. (if possible will develop app based order & bill maintenance)

COFFEE BEAN SYRUP

Coffee syrup can be brewed with a big quantity of hot coffee and sugar, or by straining hot water and sugar through coffee grounds. Pulverized coffee beans are first soaked for a while, followed by the sugar in a cold-process. Coffee syrup is a type of flavoring used in cafes and coffee shops. It can be added to hot or cold coffee, coffee beverages, sparkling water, baked products like cakes and pieces of bread, or as a drizzle over ice cream to improve the flavor

MOONG DAL CHIPS

The iron concentration of Moong dal reduces the risk of anemia. Consuming organic moong dal in your diet regularly boosts your immunity and reduces your risk of getting sick. The ability of moong dal to promote weight loss is one of its most well-known advantages. Moong dal lentils are a good source of plant-based protein, but they require more time to digest. Its fiber content keeps people satisfied for a long time and stifles unexpected hunger pains, which eventually promotes weight loss. Turning it into Namkeens will help to boost the nutritious value of the customers

ACTION PLAN FOR THE UPCOMING MONTHS

* We would like to focus on the functional enrichment on traditional foods and native foods

HEART2ART

Giving heart to art

FACULTY INCHARGE
Mrs. D. V. SARANYA

OBJECTIVE OF THE FIRM

- To develop meticulously handcrafted products with a sustainable approach. To cater to the customized design needs of users.
- To develop digital designs - digital art, package designs, logos, and graphics.

TEA COASTERS

These Macrame Coasters are perfect for Table Décor and Rustic Décor which bring a lovely bohemian vibe. This can be a perfect idea for a New Home Gift. This Macrame Coaster Set is handcrafted/ hand woven with Eco-Friendly Pure Cotton Cord. Making tea coasters usually follows a geometric pattern

MACRAME BAG

Macramé is a form of textile produced using knotting (rather than weaving or knitting) techniques. The most common rope for macrame is twisted three-ply cotton which is strong and fringes into a lovely wavy pattern. Macrame bags are the best alternative to replace plastic bags.

SILK THREAD JEWELRY

A silk thread necklace is made up of one or many silk threads of vibrant colours, which makes them highly attractive. One of the trendiest jewelry pieces available in the market today is silk thread jewelry that offers a vivid yet sophisticated look to the wearer

ACTION PLAN FOR THE UPCOMING MONTHS

* To design and Develop Technological products with a defined functionality.

i-PRINT

Print Anything

FACULTY INCHARGE
Mr. S. K. DHINESH

OBJECTIVE OF THE FIRM

- To design and fabricate low cost CNC based machines to match the need of the customer.
- To develop next-generation machines that would otherwise be impossible/impractical to manufacture, including the creation and incubation of new applications for additive manufacturing and attendant first-to-market advantages.

BRILLE EMBOSSEER PRINTER

BLIMP UAV

Skye is a helium-filled sphere of diameter 2.7m with an inelastic outer hull and an impermeable elastic inner hull. 4 tetrahedrally-arranged actuation units (AU) are mounted on the hull for locomotion with each AU having a thruster that can be rotated around a radial axis through the sphere center. This design provides redundant control in the six degrees of freedom of motion, and Skye can move omnidirectionally and rotate around any axis. A multi-camera module is also mounted on the hull to capture aerial imagery or live video stream according to an 'eyeball' concept - the camera module is not itself actuated, and the whole blimp is rotated to obtain the desired camera view. Skye has a varied motion vocabulary such as swooping and bobbing, plus internal LEDs for visual effect. Experimental results show dexterous maneuvers in indoor and outdoor environments and non-dangerous impacts between the blimp and humans

In fact, 36 million people are blind, and more than 80% are below the poverty line. The visually impaired individuals can read and write using a set of 3x2 matrix of dots called Braille Code. Commercial Braille printers are available to print the given text and this is the reason why we have decided to develop an IoT-enabled device to print the spoken words and written text in Braille Code. Braille Code generates text from both the teacher's speech and written texts. GUI development for controlling stepper motors is accustomed to print Braille Code from the text entered. A solenoid plunger is used for embossing the sheet, and an embossing pin is attached at the end of the solenoid plunger. The toothed belt transforms the rotary motion of the X-axis stepper motor into linear motion.

ACTION PLAN FOR THE UPCOMING MONTHS

- * we have planned to fabricate survey and multi-purpose drones. As per the Government Drone Policy, there is a huge requirement for drone manufacturing and servicing sectors.
- *Our firm is also involved in developing full-fledged software open-source software for our 3D printers.

SKY VIEW

Fly above and Beyond

FACULTY INCHARGE
Mr. D LAKSHMANAN

OBJECTIVE OF THE FIRM

Sky View aims at developing quality drone parts and provide expert drone services. Sky View design and develop drone parts and assemble them to meet customer requirements. We are capable of building drone for applications like Agricultural Drones, Pesticide Spraying Drones, Crop Monitoring Drones, Surveillance Drones, Drones Camera, and Photography Drones. As a service provider the company offers solutions in Drone Manufacturing, Aerial Photography, Surveillance Drone, and Digital Photography services to the customers. We also aims in providing intelligent solutions to industry by promoting the usage of drone

HYBRID DRONE

Hybrid Drone-designed with Paper Composite for making Structure of an RC plane unit, and it has the capability to execute Vertical Take-Off and Landing operations. Though the battery power is lost, remaining power available in the Drone system will easily safeguard the entire structure with the Gliding principle

ANTI-DRONE SYSTEM

The Anti-Drone System is equipped with Jamming Technology to support the defense and Military sectors. SWARM technology can be demonstrated during the flight test and it will progress the Data Recording process

ACTION PLAN FOR THE UPCOMING MONTHS

* A professional and sophisticated modern Drone will be developed and It can be operated at any Environment

SMILO BIO

SMIOBIO CARE FOR YOU

FACULTY INCHARGE
Dr. M KIRUPA SANKAR

OBJECTIVE OF THE FIRM

- To deliver a healthy and quality product. To reveal the traditional food as per today needs and acceptance.
- To serve the society with simplicity.

BIOBAGS

Paddy straws are waste which are incinerated in many places. The paddy straw can be used as a raw material for making up biodegradable bags which can lift up to 10 Kgs

BIO STORE

Plastic bottles are threatening the environment and spoiling the quality of life. The Bio store containers are made from Seaweed agar which could be casted to different shapes based on requirement. Presently it is planned to store water and juice for which the plastic bottles are used in maximum quantity

ACTION PLAN FOR THE UPCOMING MONTHS

* Biodegradable containers are planned to replace the use of plastic. The containers are planned mainly for water bottles and juice bottles.

TECHNO WILDLIFE

Technology for Wildlife

FACULTY INCHARGE:
Dr. R. SARAVANA KUMAR

OBJECTIVE OF THE FIRM

To design and development various wildlife and nature conservation technologies through in-depth R&D. Research outreach to forest department, farmers and NGOs through consultancy

SMS BASED ANIMAL ALERT SYSTEM

Our SMS operated speaker is designed to be interfaced with our Elephant Early Warning System detection units in the field. A 12-volt module with customized announcement and can be linked with many detection units

ACTION PLAN FOR THE UPCOMING MONTHS

Our future plan is to develop the

- (i) low cost LASER based elephant detection and alarm system to train drivers
- (ii) Hand held high personal safety sparking device and
- (iii) Motion Triggered Acoustic Safety Device.

TRACE ROBOTICS

Build The Future

FACULTY INCHARGE:
Dr. P SENTHILKUMAR
Mr. R VELNATH

OBJECTIVE OF THE FIRM

- Trace Robotics is a Mobile Robotics technology firm that designs, manufactures and deploys robotics systems for Industry and educational sector.
- We combine expertise in robot hardware and robot software engineering to solve operational issues in automation.

EMBEDDED TRAINER KIT

To understand the basics of this technology we have developed a variety of solutions which includes development & training platforms and interfacing modules. Trace robotics also provides extensive learning material with all solutions for better understanding. Working on these platforms will help users to understand the imperative need of embedded systems in this electronic world and will motivate users to work on them.

INDUSTRIAL ROBOT

The Industrial robot educative cell is a platform that includes a 6-axis robotic arm, an electronic control circuit and programming software. This platform is an introduction to the world of industrial robotics. Through this product, we offer an affordable but quality solution to all those who would like to learn more about this fascinating field. This product is an excellent opportunity to develop various knowledge and skills in the fields of mechanics, electrical as well as computer science

ACTION PLAN FOR THE UPCOMING MONTHS

*Planned to sell embedded trainer Kit through online.

* Planning to provide the trainer kit for school students

ABOUT THE FIRM

The purpose of our company is to make cosmetics available to any age people to build their confidence without compromising their health. Our product is a standalone charcoal prepared from single source that scientifically possess the best adsorption (cleansing) potency.

ACTION PLAN FOR THE UPCOMING MONTHS

* We are trying to create a product which is available to all kind of people.

ABOUT THE FIRM

The product is an amalgam of sodium free herbal emulsifiers and anti-germchemicals that can fill throughout the buccal cavity while chewing and killing the germs. The yielding salivary emulsion is safe to swallow (best spit out) as the germs are killed and there are no sodium containing foaming agents that could harm the esophagus or digestive tract. Herbal emulsifiers like salted Bacopamonnieri are added along with essential oils of Mint and Meswak. The salt stimulates the saliva which forms the aqueous phase for the emulsion which de-anchors the germs. The chlorobenzyl alcohol and metacresol derivatives kill the germs effectively.

ABOUT THE FIRM

The principal motive of this startup is to solve day-to-day problems by creating new machinery, which provides an easy solution for small-scale farmers. Unlike conventional machinery, our machinery is cost-efficient, user-friendly, and low maintenance. Our venture focuses on the agricultural revolution the founder wants to bring into the market. It has been established to encourage farm mechanization and usage of technology and hi-tech products in agriculture to optimize yield in fewer man-hours.

PORTABLE LIFT

This invention deals with a portable lifter of the kind designed to lift two to three people which can hold upto 300kg and it can lift upto 9 feet to do many works. In automobile applications they use ladders to do painting and other works but using this the work can be done more efficiently and safely . The device of the instant invention is fabricated from light-weight metal such as aluminum and we have used an 1 inch thickness aluminum wire to lift the people. It is believed by the inventor herein that this device is most useful in cleaning, painting and many such works.

ACTION PLAN FOR THE UPCOMING MONTHS

- *Our initial focus on the consumer space with our launch product is just the first step in our long-term roadmap to growth
- * In order to capture a larger market share and continue scaling the company exponentially, we are planning on rolling out a back to back updated model in the future
- *This will provide E- Agri India with new revenue streams and will offer a valuable, tech-driven solution for businesses.

ABOUT THE FIRM

Alearnr is a completely free guide to help learners learn a new skill every day in five simple steps. We make you a skilful person by 1% every day. We also provide best-in-class motivation and simple challenges to bring your skills into action

- * Making the world more skilful and happy

ABOUT THE FIRM

At Zenexta, We are here to make marketing simple and efficient. We are here to make your design Universe. EVERY people in this world are born with some special and unique talents, but not everyone makes use of it. Some people are good at arts, crafts, and developing products for people but they don't know how to showcase their products to the world and sell them to the people who are really in need of them. That's where ZENEXTA plays an important role. We help those people who are struggling with the development of their company (small/medium) by using our 100% working strategies and tools

Handmade paddy straw bag

Our product aims to reduce the use of plastic bags and utilise the waste paddy straws to convert it into a paper bags. These bags can be recycled and reused with high rigid nature. Zero utilisation of chemicals during manufacturing and completely eco-friendly. A better alternative to the existing paper bags manufacturing from the tree pulp which causes deforestation

ACTION PLAN FOR THE UPCOMING MONTHS

- * To produce more Eco-friendly products in a profitable way
- * To build our startup for all kind of peoples in the world.

ABOUT THE FIRM

To increase the bioavailability and o transform traditional whole pulses and grains containing health mix into a potential functional food, Vegetable Microgreen contributes our product with a good amount of vitamins, minerals, and dietary fiber, which makes our health mix a highly nutrient-dense superfood
