

**B.Tech. (Artificial Intelligence and Data Science)**

**2022 Regulations, Curriculum &  
Syllabi**

**BANNARI AMMAN INSTITUTE OF TECHNOLOGY, SATHYAMANGALAM**  
**REGULATIONS 2022**

**(CHOICE BASED CREDIT SYSTEM)**

(Common to all B.E./B.Tech. Degree Programmes)

Regulations 2022 have been prepared in accordance with the guidelines given by the University Grants Commission, All India Council for Technical Education and affiliating Universities incorporating the features of the Choice Based Credit System (CBCS). The Regulations 2022 is applicable to the candidates admitted to the Bachelor of Engineering (B.E.) / Bachelor of Technology (B.Tech.) Degree Programmes of the Institution in the Academic Year 2022-2023 for Regular admission (Academic Year 2023-2024 for Lateral Entry) and subsequently.

*The regulations hereunder are subjected to amendments as may be decided by the Academic Council of the Institution from time to time. Any or all such amendments will be effective from such date and to such batches of students (including those already in the middle of the programme) as may be decided by the Academic Council.*

**1. ADMISSION**

Candidate, seeking admission to the B.E./B.Tech. Programme, shall satisfy the conditions of admission prescribed by the Directorate of Technical Education (DoTE) and Anna University, Chennai as given below.

**1.1 Regular Admission**

Candidates, for admission to the first semester of the eight semesters B.E./B.Tech. Degree Programmes, shall be required to have passed:

Higher Secondary Examination (10 +2) of curriculum (Regular Academic Stream) prescribed by the Government of Tamil Nadu with Mathematics, Physics, and Chemistry as three of the four subjects of the study prescribed under Part-III or any other examinations of any Board or University or authority accepted by the Syndicate of the University / DoTE, Chennai as equivalent thereto.

(or)

Should have passed Higher Secondary Examination of Vocational Stream (Engineering/Technology), prescribed by the Government of Tamil Nadu.

## **1.2 Lateral Entry Admission**

- 1.2.1** The candidates who possess Diploma in Engineering / Technology awarded by the State Board of Technical Education and Training, Tamil Nadu or its equivalent are eligible to apply for lateral Entry admission to the third semester of B.E. / B.Tech. programmes in the branch of study as per the eligibility criteria prescribed by the DoTE from time to time.

(or)

The candidates who possess the Bachelor Degree in Science (B.Sc.) (10+2+3 stream) with Mathematics as a subject in B.Sc. is eligible to apply for lateral entry admission to the third semester of B.E./B.Tech. programmes, as per the eligibility criteria prescribed by the DoTE from time to time. Such candidates shall undergo two additional Engineering subject(s) one each in third and fourth semesters, as bridge courses.

## **2. PROGRAMMES OFFERED**

A candidate may be offered admission to any one of the programmes offered by the Institution for the candidates specified in Clause 1.1 and as per the eligibility criteria of DoTE for the candidates under Clause 1.2 from the list given below:

### **B. E. Programmes**

1. Biomedical Engineering
2. Civil Engineering
3. Computer Science and Design
4. Computer Science and Engineering
5. Electrical and Electronics Engineering
6. Electronics and Communication Engineering
7. Electronics and Instrumentation Engineering
8. Information Science and Engineering
9. Mechanical Engineering
10. Mechatronics

### **B. Tech. Programmes**

1. Agricultural Engineering
2. Artificial Intelligence and Data Science
3. Artificial Intelligence and Machine Learning
4. Biotechnology

5. Computer Science and Business Systems
6. Computer Technology
7. Fashion Technology
8. Food Technology
9. Information Technology
10. Textile Technology

### 3. STRUCTURE OF THE PROGRAMME

- 3.1** Every programme shall have a distinct curriculum with syllabi consisting of theory, laboratory, project, soft-skills and personality development courses, as prescribed by the respective Boards of Studies, broadly categorized under:

**Basic Science (BS)** courses including Mathematics, Physics, Chemistry and further specialization in these subjects

**Engineering Science (ES)** courses including Engineering Graphics, Basics of Electrical / Electronics / Civil / Mechanical, Engineering Mechanics and Computer Programming.

**Humanities and Social Sciences (HSS)** courses including Language Courses, Management Courses, Soft Skills and Professional Ethics.

**Professional Courses(PC)** include Discipline Core Courses, Professional Electives, and Open Electives.

**Employability Enhancement Courses (EEC)** includes Project Work, Mini Project and /or Internship, Seminar, Industrial /Practical Training, Startup Management, Value Added, and Certificate Courses.

The medium of instruction is English for all the Courses (except Tamil), examinations, seminar presentation, projects, and any other courses that a student registers for.

- 3.2** Each course is normally assigned a certain number of credits based on the following.

| Contact period per week   | Credit(s) |
|---|-----------|
| 1 Lecture / 1 Tutorial period                                     | 1         |
| 2 laboratory Periods (Laboratory / Seminar / Project Work / etc.) | 1         |

- 3.3** All the B.E. / B.Tech. Students will study Communicative English I during the firstsemester. In the second semester, they will be provided an option to enroll and

study Communicative English II / German / Japanese / French / Hindi. while the lower segment will study Communicative English II.

- 3.4** Every student shall be required to opt for 10electives from the list of electives. Students can opt for the electives (Core / Professional) from his / her own discipline courses, during IV to VII Semesters, if he/she satisfies the prerequisite for that particular course.
- 3.5** However, out of ten electives, every student shall be required to opt for, a minimum of one and subject to a maximum of three courses as open electives from the list of electives of the branch / branches other than his / her branch of specialization, if he/she satisfies the prerequisite for that particular course. The course / content should not be covered in their own curriculum and syllabi.
- 3.6** Students can also opt for **one-credit courses** of 15 to 20 hours duration, which will be offered by the experts from the industry on specialised topics. Students can opt for such **one-credit courses** during the semesters I to VI as and when these courses are offered. A student will also be permitted to register the **one-credit courses** offered by other departments, provided the student has fulfilled the necessary prerequisites or the courses that may not require any prerequisites. Under no circumstances, the same one credit course shall be repeated in subsequent semesters in any department / centre for the same batch of the students and a maximum batch size for a given course shall not exceed 40. In case of disciplines with multiple divisions (intake more than 60) multiple batches/ different course(s) shall be offered to other batch(es) of students.

On successful completion of one credit courses, credits will be indicated in the grade sheet, but will not be considered for computing the Cumulative Grade Point Average (CGPA). However, if a student wishes to avail the exemption from any one of the electives (other than open elective) of the semester VII, he / she can do so by exercising his / her option in writing to the respective Head of the Department during the beginning of the VII semester, following the equivalence norm, that one **regular elective** (in the **VII Semester**) is equivalent to **three one-credit courses** completed by the student during the previous semesters, III to VI. Details of the one credit courses offered by the department shall be forwarded to the Office of the Controller of Examinations. However, one credit courses completed during I to II semesters shall be maintained in the Grade sheet as “Additional credits earned” (not considered for the computation of SGPA/CGPA).

- 3.7** A student can register for Self-Study Elective(s) over and above the electives from any branch of Engineering / Technology at the rate of one per semester starting from V semester onwards provided he/she maintains a Cumulative Grade Point Average (CGPA) of 8.50 or above till the previous semesters with no current arrears. Credits will be indicated for such courses in the grade sheets (additional credits) but will not be considered for computing the CGPA.
- 3.8** A Student may be permitted to credit three online courses with the approval of the Departmental Consultative Committee constituted by the Head of the Department, subject to a maximum of 9 credits. The Head of the Institution shall form a 3-member committee with one of the members as HoD and two senior faculty members to ensure that the student has not studied such courses and would not repeat it again as Professional Core/Professional Elective/Open Elective courses. A student can get exemption for a maximum of 9 credits (refer amendments of R2022 approved in 29<sup>th</sup> ACM) during the entire programme (in lieu of core elective or open elective). These online courses shall be chosen from the SWAYAM NPTEL platform, provided the offering organisation conducts regular examination and provides marks. The credits earned shall be transferred and the marks earned shall be converted into grades and transferred, provided the student has passed in the examination as per the norms of the offering organisation.

For online courses the following grading pattern is applicable in case of credit transfer and CGPA calculations

| Range of percentage of total marks | Letter Grade | Grade Point |
|------------------------------------|--------------|-------------|
| 91 - 100                           | O            | 10          |
| 81 - 90                            | A+           | 9           |
| 71 - 80                            | A            | 8           |
| 61 - 70                            | B+           | 7           |
| 51 - 60                            | B            | 6           |
| 40-50                              | C            | 5           |
| < 40                               | U            | 0           |

### 3.9 Industrial Training / Internship

The students may undergo Industrial training / Internship optionally for a period as specified in the table during summer / winter vacation and the credits earned will be indicated in the grade sheet. If the student earns three credits in Industrial Training / Internship, the student may drop Professional Elective subjected to a maximum of one. In such cases, Industrial Training / Internship need to be undergone continuously from one organization only. However, if the number of credits earned is 1 or 2, these credits shall not be considered for classification of the degree. The students may also undergo Internship at Research organization / University (after due approval from the Department Consultative Committee) during summer / winter vacation.

| Duration of Training / Internship | Credit(s) |
|-----------------------------------|-----------|
| 2 Weeks                           | 1         |
| 4 Weeks                           | 2         |
| 6 Weeks                           | 3         |

### 3.10 Socially Relevant Projects

A student may be permitted to carry out socially relevant projects during semester II to semester VI in consultation with the faculty guide and submit the project report, in the prescribed format, at the end of the Semester for valuation.

On successful completion of socially relevant project work, one credit will be indicated in the grade sheet (Additional credits), but these credits will not be considered for computing the CGPA.

### 3.11 Mandatory courses

The student shall study the mandatory courses prescribed by the institute which will be mentioned in the Grade Sheet. However, it will not be considered for computation of CGPA.

For the students who complete the Mandatory Course satisfying the attendance requirement, the title of the Mandatory Course will be mentioned in the Grade Sheet.

### 3.12 Choice of Professional Elective Courses

The professional Elective Courses are listed in the Curriculum in Table format as verticals (Specialisation groups). A student can choose all the Professional Elective

Courses either from one of the verticals or a combination of courses from all verticals in a semester. However, students irrespective of enrolling for additional Insertion of New Clause 6.3 are not permitted to choose more than one course from a row. Students are permitted to enroll in more than one elective course from the same vertical in a semester. In the subsequent semesters students are permitted to enroll one more course in a row, provided if he/she has cleared the earlier course of the same row. For a professional elective course and open elective course, the minimum number of students enrolment permitted shall be 10. However, the minimum number is not applicable for students enrolling B.E. / B. Tech. (Hons) and B.E. / B. Tech. Minor. For the offer of each professional elective at least two choices shall be offered.

#### **4. VALUE ADDED COURSES**

A student can opt for the Value Added Courses offered by the various departments from semester II to VII. A separate certificate will be issued on successful completion of the value added course by the competent authority.

#### **5. DURATION OF THE PROGRAMME**

- 5.1** A regular student (admitted after 10+2) or equivalent is normally expected to satisfactorily fulfil the requirements for award of the degree B.E. / B.Tech. within four academic years (8 semesters) from the date of admission but in any case not more than 7 years (14 Semesters); lateral entry students shall fulfil such requirements within three academic years (6 semesters) from the date of admission but in any case not more than six years (12 semesters) leading to the award of Degree of Bachelor of Engineering (B.E.) / Bachelor of Technology (B.Tech.) of Anna University, Chennai.
- 5.2** The total period for completion of the programme from the commencement of the semester, to which the student was admitted, shall not exceed the maximum period (Clause 5.1), regardless to the break-of-study (vide Clause 15) or period of prevention in order.
- 5.3** Each semester shall consist of minimum 75 working days. Head of the Department shall ensure that every faculty member teaches the course as prescribed in the approved curriculum and syllabi.
- 5.4** Special Theory / Practical Sessions may be conducted for students who require additional inputs (remedial classes) over and above the number of periods normally

specified, as decided by the Head of the Department, within the specified duration of the semester / programme.

## **6. COURSE ENROLLMENT AND REGISTRATION**

**6.1** Each student, on admission shall be assigned to a faculty advisor (vide Clause 8) who shall advise / counsel the student about the details of the academic programme and the choice of course(s) considering the student's academic background and career objectives.

**6.2** Each student shall register for all courses to be undergone in the curriculum of a particular semester (with the facility to drop courses to a maximum of 8 credits (vide clause 6.6)). The courses dropped in earlier semesters can be registered in the subsequent semesters when offered.

Every student shall enrol for the courses of the succeeding semester, in the current semester. However, the student shall confirm the enrolment by registering for the courses within the first five working days after the commencement of the semester concerned.

**6.3** The courses that a student registers in a particular semester may include

- i. Courses of the current semester.
- ii. Courses dropped in the lower semesters

**6.4** The maximum number of credits that can be registered in a semester is 30. However, this does not include the number of Re-appearance (RA) and Withdrawal (W) courses registered by the student for the appearance of the examination.

**6.4.1** From the V to VIII semesters, the student has the option of registering for additional courses in a semester. With regard to enrolling for B.E. / B. Tech. (Hons) or B.E. / B. Tech. Minor. Maximum number of credits enrolled in a semester (Honours and Minor) shall not exceed 36. The online courses registered for B.E. / B. Tech. (Hons.) and B.E. / B. Tech. minor shall be over and above this 36 credits.

### **6.5 Flexibility to Drop Courses**

**6.5.1** A student has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if a student wishes, the student is permitted to earn more than the total number of credits prescribed in the curriculum by opting for one credit courses, self-study electives, or additional courses.

**6.5.2** From the III to VII semesters (from IV to VII semesters in case of lateral entry students), the student has the option for dropping existing courses. The number of

courses a student can drop is limited to 2 in a given semester. The student is permitted to drop the course(s) within 30 days of the commencement of the academic schedule. In such cases, the attendance requirement as stated in Clause 7 is mandatory.

- 6.5.3** The student shall register Project work I in semester VII and Project work II in semester VIII only.

## **6.6 Reappearance Registration**

- 6.6.1** If a student fails in a theory course, the student shall do reappearance registration (examination) for that course in the subsequent semesters or when it is offered next.
- 6.6.2** On registration, a student may attend the classes for the reappearance registration courses, if the student wishes, and the attendance requirement (vide Clause 7) is not compulsory for such courses.
- 6.6.3** If the theory course, in which the student has failed, is either a professional elective or an open elective, the student may register for Semester End Examinations of the same professional elective or open elective course, respectively in the subsequent semesters.
- 6.6.4** In this case (Clause 6.6.3), the student shall attend the classes, satisfy the attendance requirements (vide Clause 7), earn Continuous Assessment marks and appear for the Semester End Examination.
- 6.6.5** The student who fails in any continuous assessment courses shall register for the same in the subsequent semesters or when offered next, and **repeat** the course as per Clause 6.6.4.
- 6.6.6** If a student is prevented from writing the Semester End Examination of courses due to lack of attendance, the student has to repeat the semester when it is offered next time.

## **7. REQUIREMENTS FOR APPEARING FOR THE SEMESTER END EXAMINATIONS OF A COURSE**

A student who has fulfilled the following conditions (vide Clause 7.1 and 7.2) shall be deemed to have satisfied the attendance requirements for appearing for Semester End Examination of a particular course.

- 7.1** Every student is expected to attend all the periods and earn 100% attendance. However, a student shall secure not less than 80% overall attendance.
- 7.2** If a student, secures overall attendance between 70% and less than 80%) in the current semester due to medical reasons (prolonged hospitalization / accident / specific illness) or participation in Institution/ University/ State/ National/ International level extra and co-curricular activities, with prior permission from the Head of the Department, shall

be permitted to appear for the current semester examinations subject to the condition that the student shall submit the medical certificate / participation certificate attested by the Head of the Institution (along with condonation form). Such certificates along with the condonation forms shall be forwarded to the Office of the Controller of Examinations for verification and permission to attend the examinations. However, during the entire programme of study, a student can avail such condonation in any two semesters only.

- 7.3** A student shall normally be permitted to appear for Semester End Examination of the course(s) if the student has satisfied the attendance requirements (vide Clause 7.1 – 7.2) and has registered for examination in those courses of that semester by paying the prescribed fee.
- 7.4** Students who do not satisfy Clause 7.1 and 7.2 and who secure less than 70% overall attendance would not be permitted to move to the higher semester and has to repeat the current semester in the next academic year as per the norms prescribed.
- 7.5** In the case of reappearance (Arrear) registration for a course, the attendance requirement as mentioned in Clauses 7.1 - 7.3 is not applicable. However, the student has to register for examination in that course by paying the prescribed fee.
- 7.6** A student who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of grades.

## **8. FACULTY ADVISOR**

To help the students in planning their courses of study and for general advice on the academic programme, the Head of the Department will attach a certain number of students to a faculty member of the department who shall function as faculty advisor for those students. The faculty advisor shall advise and guide the students in registering of courses, reappearance of courses, monitor their attendance and progress and counsel them periodically. The faculty advisor also discusses with or informs the parents about the progress / performance of the students concerned.

The responsibilities of the faculty advisor are:

- To inform the students about the various facilities and activities available to enhance the student's curricular and co-curricular activities.
- To guide student enrolment and registration of the courses.
- To authorize the final registration of the courses at the beginning of each semester.

- To monitor the academic and general performance of the students including attendance and to counsel them accordingly.

## **9. COMMITTEES**

### **9.1 Common Course Committee**

- 9.1.1** A theory course handled by more than one faculty member including the discipline with multiple divisions (greater than or equal to 2 ) shall have a “Common Course Committee” comprising of all members of faculty teaching that course with one of the members as the Course Coordinator, nominated by the Head of the Institution (Head of the Department in the case of multiple divisions of a discipline) and student representatives (one per specialization or division) registered for that course in the current semester. First meeting of the Common Course Committee shall be held within fifteen days from the date of commencement of the semester. Two subsequent meetings in a semester may be held at suitable intervals. During these meetings, the student members shall meaningfully interact and express their opinions and suggestions of all the students to improve the effectiveness of the teaching learning process. It is the responsibility of the student representatives to convey the proceedings of these meetings to all the students.
- 9.1.2** In addition to this, Common Course Committee (without the student representatives) shall meet to ensure uniform evaluation through the common question papers during continuous assessment and Semester End Examinations.

### **9.2 Class Committee Meeting**

For all the courses taught, prescribed in the curriculum, Class Committee meeting shall be convened thrice in a semester (first meeting within 15 days from the commencement of the semester and other two meetings at equal interval after the first meeting) comprising members of the faculty handling all the courses and two student representatives from the class.

One of the members of the faculty (preferably not handling any courses to that class), nominated by the Head of the Department, shall coordinate the activities of the committee. During these meetings, the student members shall meaningfully interact and express their opinions and suggestions of all the students to improve the effectiveness of the teaching learning process. It is the responsibility of the student representatives to convey the proceedings of these meetings to all other students.

## **10. SYSTEM OF EXAMINATION**

- 10.1** Performance in each course of study shall be evaluated based on (i) Continuous Assessment throughout the semester and (ii) Semester End Examination at the end of the semester for the regular courses or as given in the Clause 17.
- 10.2** Each course, both theory, theory with lab component and laboratory including project work, shall be evaluated as per the scheme of assessment given in Clause 17.
- 10.3** The Semester End Examinations shall normally be conducted after satisfying the Clause 5.2.
- 10.4** For the Semester End Examinations, both theory, theory with lab component the internal and external examiners (from Academia) shall be appointed by the Controller of Examinations as per the guidelines given by the Examination cum Evaluation committee of the Institute.

## **11. PASSING REQUIREMENTS AND PROVISIONS**

- 11.1** The Passing requirement for a student in a course is determined based on the marks obtained both in continuous assessment and Semester End Examinations. A student who secures not less than 50% of total marks prescribed for the course [Continuous Assessment + Semester End Examinations] with a minimum of 45% of the marks prescribed for the Semester End Examinations, shall be declared to have passed the course and acquired the relevant number of credits.
  - 11.1.1** If a student fails to secure a pass in a particular course, i.e., failing to obtain minimum marks, as stated above, it is mandatory that he/she shall reappear for the examination in that course in the subsequent semester(s) whenever the examinations are conducted for that course, till he / she secures a 'Pass'.

Continuous Assessment (CA) marks obtained by the student in the first appearance shall be retained and considered valid for one subsequent attempt, except Clause 6.6.4, 6.6.5, 6.6.6 and 6.6.7. However, from the third attempt onwards, the student shall be declared to have passed the course if he/she secures a minimum of 50% in the course prescribed during the Semester End Examinations.
- 11.2** If a candidate fails in the seventh semester examinations of Project work I, he/she has to resubmit the Project Report within 30 days from the date of declaration of the results. If he / she fails in the Semester End examination of Project work II, he/she shall resubmit the Project Report within 60 days from the date of declaration of the results. The resubmission of the project report and the subsequent viva-voce

examination will be considered as reappearance with payment of exam fee. In case a student fails in the resubmission of a project report and subsequent viva-voce examination, the student shall register for the course again, when offered next.

- 11.3** The passing requirement for the courses which are assessed only through continuous assessment (Laboratory and EEC courses except project work), shall be fixed as minimum 50% and the remaining grades are decided as per clause 12.4. If a candidate fails in EEC courses (Except Project work), he/she has to register and repeat the course within 30 days from the date of declaration of the results. In case a student fails to register within 30 days, he/she shall register for the course again, when offered next.
- 11.4** The minimum number of total credits to be earned by a student to qualify for the award of degree in the various branches of study as prescribed by the respective Boards of Studies is given below:

| Branch of Study                              | Minimum Credits   |               |
|--|-------------------|---------------|
|  | Regular Admission | Lateral Entry |
| <b>B.E. Programmes</b>                       |                   |               |
| Biomedical Engineering                       | 163               | 121           |
| Civil Engineering                            | 164               | 122           |
| Computer Science and Design                  | 163               | 119           |
| Computer Science and Engineering             | 163               | 119           |
| Electrical and Electronics Engineering       | 163               | 121           |
| Electronics and Communication Engineering    | 163               | 121           |
| Electronics and Instrumentation Engineering  | 163               | 121           |
| Information Science and Engineering          | 162               | 118           |
| Mechanical Engineering                       | 164               | 122           |
| *Mechatronics / *Mechatronics Engineering    | 165               | 123           |
| <b>B.Tech. Programmes</b>                    |                   |               |
| Artificial Intelligence and Data Science     | 165               | 121           |
| Artificial Intelligence and Machine Learning | 163               | 119           |
| Biotechnology                                | 165               | 123           |

|                                       |     |     |
|---------------------------------------|-----|-----|
| Computer Science and Business Systems | 163 | 123 |
| Computer Technology                   | 163 | 119 |
| Fashion Technology                    | 163 | 121 |
| Food Technology                       | 163 | 121 |
| Information Technology                | 163 | 119 |
| Textile Technology                    | 163 | 121 |

\*-applicable to candidates admitted during the AY.:2022-2023

#-applicable to candidates admitted during the AY.:2023-2024 onwards

- 11.5** Total number of credits to be earned by the student shall be more than or equal to the total number of credits prescribed in the curriculum in force. If the credit assigned for L T P of the courses are not same in two Regulations under consideration, then equivalence shall be arrived as per the credit assignment followed in the Regulations in force.
- 11.6** Student Migration and Credit Transfer: Normalization of the credits will be carried out in consultation with the Board of Studies of the programme concerned and approved by the Head of the Institution, if a student migrates from other affiliated institutions to Bannari Amman Institution of Technology or rejoins from previous regulation to this regulation.
- 11.7** A student shall be declared to have qualified for award of B.E/B.Tech. degree if he/she successfully completes the course requirements (vide Clause 7, 10 and 11) and passed all the prescribed courses of study of the respective programme (listed in Clause 2), within the duration specified in Clause 5.1.

## **12. ASSESSMENT AND AWARD OF LETTER GRADES**

- 12.1** The assessment shall be based on the performance in the Semester End Examinations and/or Continuous Assessments, carrying marks as specified in Clause 17. Letter Grades (based on Credits and Grades) are awarded to the students based on the performance in the evaluation process.
- 12.2** Credit Point is the product of Grade Point and the number of credits for a course and Grade Point is a numerical weight allotted to each letter grade on a 10-point scale (as specified in Clause 12.4), while the Letter Grade is an index of the performance of a student in a said course.

### 12.3 Condition for Relative Grading

The students' strength is greater than 30, the relative grading method shall be adopted. If the students' strength is less than or equal to 30 then the absolute grading system shall be followed with the grade range as specified below. The relative grading system shall not be applicable for laboratory, project works and continuous assessment courses.

| <b>O</b> | <b>A+</b> | <b>A</b> | <b>B+</b> | <b>B</b> | <b>C</b> | <b>U</b> |
|----------|-----------|----------|-----------|----------|----------|----------|
| 91-100   | 81- 90    | 71- 80   | 61-70     | 56- 60   | 50-55    | <50      |

**12.4** The performance of a student will be reported using Letter Grades, each carrying certain points as detailed below: A student who earns a minimum of 5 grade points in a course is declared to have successfully passed the course.

| <b>Description</b>     | <b>Letter Grade</b> | <b>Grade Points</b> |
|------------------------|---------------------|---------------------|
| Outstanding            | O                   | 10                  |
| Excellent              | A +                 | 9                   |
| Very Good              | A                   | 8                   |
| Good                   | B +                 | 7                   |
| Average                | B                   | 6                   |
| Satisfactory           | C                   | 5                   |
| Reappearance           | U                   | 0                   |
| Withdrawal             | W                   | 0                   |
| Absent                 | AB                  | 0                   |
| Shortage of Attendance | SA                  | 0                   |

‘U’ ---Reappearance is required for that particular course

‘SA’ --- shortage of attendance (Clause 7) and hence prevented from writing end semester examination.

**12.5** After completion of the evaluation process, Semester Grade Point Average (SGPA), and the Cumulative Grade Point Average (CGPA) are calculated using the formula:

$$SGPA/CGPA = \frac{\sum_1^n C_i * g_i}{\sum_1^n C_i}$$

Where

$C_i$  : Credit allotted to the course.

$g_i$  : Grade Point secured corresponding to the course.

$n$  : number of courses successfully cleared during the particular semester in the case of SGPA and all the semesters, under consideration, in the case CGPA.

RA grades will be excluded for calculating SGPA and CGPA.

**12.6** A student who does not appear for the Semester End Examinations in a course, after registering for the same, shall be deemed to have appeared for that examination for the purpose of classification (Subject to Clause 14 and 15).

**12.7** For the non-credit courses grades shall be indicated as given in Clause 17 and shall not be counted for the computation of SGPA/CGPA.

For the co-curricular activities such as NCC / NSS / NSO / YRC etc., a completed status will appear in the grade sheet. Every student shall put in a minimum of 75% attendance in the training and attend the camp compulsorily. The training and camp shall be completed before registering for the fifth semester courses. A completed status in the co-curricular activities is compulsory for the award of a degree.

**12.8 Revaluation:** A student, who seeks the revaluation of the answer script, is directed to apply through proper application to the Office of the Controller of Examinations in the prescribed format through the Head of the Department. The Office of the Controller of Examinations shall arrange for the revaluation and declare the results. Revaluation is not permitted for the courses other than theory courses. In the case of theory courses with laboratory component, a student can seek revaluation for the theory component only, following the procedure stated above.

**12.9 Eligibility for the Award of Degree**

A student shall be declared to be eligible for the award of the B.E. / B.Tech. degree provided the student has

- i. Successfully gained the required number of total credits as specified in the curriculum corresponding to the student's programme within the stipulated time.

- ii. Successfully completed the course requirements, appeared for the Semester End Examinations and passed all the courses prescribed in all the 8 semesters within a maximum period of 7 years for regular / 6 years for lateral reckoned from the commencement of the first semester to which the candidate was admitted.
- iii. Successfully completed the NCC / NSS / NSO / YRC / Extra-curricular/ Co-curricular requirements.
- iv. No disciplinary action is pending against the student.
- v. The award of degree must have been approved by the Syndicate of the University.

#### **12.10 Conduct of Academic Audit**

The purpose of the academic audit is to encourage departments to evaluate the quality of their education processes, thereby assure and regularly improve the quality of teaching learning process and the outputs. A regular academic audit is conducted in the Institute to evaluate the performance of various departments so that the issues that need attention can be identified to improve the overall quality of curriculum design, teaching learning process, and evaluation. The academic audits are conducted by internal and external academic experts.

#### **12.11 Conduct of Special Examination**

The special or makeup exams may be conducted for the students who missed the regular examination due to participation / representing the institute in various activities and the schedule may be included in the academic calendar. The special or makeup exams may be conducted after the completion of Semester End Examinations and prior to publishing the results of semester end examinations.

- 12.12** In the consolidated grade sheet the CGPA earned shall be converted into Percentage of marks as follows:  $\text{Percentage of Marks} = \text{CGPA} \times 10$

### **13. CLASSIFICATION OF THE DEGREE AWARDED**

For the purpose of the 'Award of Degree', the duration of completion of the programme shall be the total duration taken by a student for completing first time registration of all the required courses and satisfying Clause 11, regardless of the period of Break of study as per Clause 15 and satisfy any one of the conditions required as given below.

- 13.1 First Class with Distinction:** A student who satisfies the following conditions shall be declared to have passed the examination in **First class with Distinction**:

- Should have passed the examination in all the courses of all the eight semesters (six semesters for lateral entry students) in the student's First Appearance within five

years / four years for lateral, which includes authorised break of study of one year. Withdrawal from examination (vide Clause 15) will not be considered as an appearance.

- Should have secured a CGPA of **not less than 8.50**
- Should **NOT** have been prevented from writing Semester End Examination due to lack of attendance.

**13.2 First Class:** A student who satisfies the following conditions shall be declared to have passed the examination in **First class**:

- Should have passed the examination in all the courses of all eight semesters (six semesters for lateral entry students) within five years / four years for lateral, which includes one year of authorized break of study (if availed) or prevention from writing the Semester End Examination due to lack of attendance (if applicable).
- Should have secured a CGPA of **not less than 6.50**

**13.3 Second Class:** All other students (not covered in clauses 13.1 and 13.2) who qualify for the award of the degree shall be declared to have passed the examination in **Second class**.

## **14. WITHDRAWAL FROM THE EXAMINATION**

**14.1** A student may, for valid reasons, be granted permission by the Head of the Department to withdraw from appearing in the examination in any course(s) only once during the entire duration of the degree programme. The application shall be sent to the office of the Controller of Examinations through the Head of the Institution with required documents.

**14.2** Withdrawal application shall be valid only, if the student is eligible to write the examination as per Clause 7 and, if it is made within 10 working days before the commencement of the Semester End Examination in that course or courses and also recommended by the Head of the Department.

**14.3** Notwithstanding the requirement of mandatory 10 working days notice, applications for withdrawal for special cases under extraordinary conditions will be considered on the merit of the case.

**14.4** If a student withdraws a course or courses from writing Semester End Examinations, he/she shall register the same in the subsequent semester and write the Semester End Examination(s).

**14.5** Withdrawal shall not be considered as an appearance in the examination for the eligibility of a student for First Class with Distinction or First Class.

**14.6** Withdrawal is permitted for the Semester End Examinations in the final semester, only if the period of study of the student concerned does not exceed 5 years (for regular) / 4 years (for lateral) as per clause 13.1 & 13.2.

## **15. AUTHORIZED BREAK OF STUDY FROM A PROGRAMME**

**15.1** A student is permitted to go on break of study for a fixed period of one year as a single break in the entire course of study.

**15.2** A student is normally not permitted to break the period of study temporarily. However, if a student happens to discontinue the programme temporarily during the middle of programme of study, for reasons such as personal accident or hospitalization due to ill health or in need of health care, he/she shall apply to the Head of the Institution in advance, in any case, not later than the last date for registering for the semester examination, through the Head of the Department stating the reasons for the break of study. However, a student detained for want of minimum attendance requirement as per Clause 7 shall not be considered as permitted 'Break of Study' and Clause 15.3 is not applicable for such case.

**15.3** The student is permitted to re-join the programme after the break / prevention due to lack of attendance, shall be governed by the curriculum and regulations in force at the time of rejoining. The students re-joining in new regulations shall apply to the Academic In charge in the prescribed format through the Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in force, so as to bridge the curriculum in force and the old curriculum.

**15.4** Authorized break of study will be counted towards the duration specified for passing all the courses (vide Clause 5.1 and 5.2) and for the purpose of classification of degree (vide Clause 13).

**15.5** The total period for completion of the programme reckoned from the commencement of the first semester to which the student is admitted shall not exceed the maximum period specified in Clause 5.1, irrespective of the period of break of study in order that he / she may be eligible, for the award of the degree (vide Clause 13).

- 15.6** In case of valid reasons (as stated in Clause 15.2) extended break of study may be granted by the Head of the Institution for a period not more than one year in addition to the earlier authorized break of study.
- 15.7** If a student does not report back to the Institute, even after the extended break of study, the student's name shall be permanently deleted from the college enrollment. Such students are not entitled to seek readmission under any circumstances.

## **16. IMPLEMENTATION OF HONOURS / MINOR DEGREE**

### **16.1 B.E. / B.Tech. (Hons.)**

- The students should have earned additionally a minimum of 18 credits from more than one vertical of the same programme.
- Should have passed all the courses in the first attempt.
- Should have earned a minimum CGPA of 7.50.

### **16.2 B.E. / B.Tech. Minor in another discipline**

The student should have earned additionally a minimum of 18 credits in any one of the verticals of other B.E/B.Tech. programmes.

- B.E / B.Tech. (Hons.) and B.E./B.Tech. Minor in another discipline will be optional for students and the students shall be permitted to select any of them only.
- B.E/B.Tech. (Hons.) or B.E./ B.Tech. Minor shall be offered by the Department irrespective of the number of students enrolled.

If the student has failed in the additional courses or faced a shortage of attendance, they will not be printed in the grade sheet and will not be considered for CGPA calculation and classification of degree.

- 16.3** Students can earn a maximum of 6 credits in online mode (SWAYAM NPTEL platform), out of these 18 credits with the approval of the Departmental Consultative Committee constituted by the Head of the Department.
- 16.4** B.E./ B. Tech. (Honours) in the same discipline, B.E. / B.Tech. Honours and B.E. / B.Tech. Minor in another discipline degrees will be optional for students.
- 16.5** For category 16.1, the students will be permitted to register for the courses from V Semester onwards provided the CGPA earned by the students until semester III should be of 7.50 and above and cleared all the courses in the first attempt.

- 16.6** For category 16.2, the students will be permitted to register the courses from semester V onwards provided the CGPA earned by the students until semester III is 7.50 and above.
- 16.7** If a student decides not to opt for Honours, after completing a certain number of additional courses, the additional courses studied shall be considered instead of the professional elective courses which are part of the curriculum. If the student has studied more number of such courses than the number of Professional Elective courses required as per the curriculum, the courses with higher grades shall be considered for the calculation of CGPA. Remaining courses shall be printed in the grade sheet, however, they will not be considered for the calculation of CGPA.
- 16.8** If a student decides not to opt for Minor degree, after completing a certain number of courses, the additional courses studied shall be considered instead of open elective courses which are part of the curriculum. If the student has studied more of such courses than the number of open electives required as per the curriculum, the courses with higher grades shall be considered for calculation of CGPA. Remaining courses shall be printed in the grade sheet, however, they will not be considered for the calculation of CGPA.
- 16.9.** If a student successfully completes all the requirements of the programme and also meets the requirements of B.E. / B. Tech. (Hons) or B.E. / B. Tech. Minor but desires not to opt for the additional qualification, then he/she has to submit a declaration with regard to the same 30 days before the completion of VIII semester.

**16.10 Classification of the Degree Awarded**

The conditions for First Class with Distinction, First Class, and Second Class are the same as Clause 13.1, 13.2 and 13.3 except the following classification.

**First Class:** A student who satisfies the following conditions shall be declared to have passed the examination in First class for the purpose of the 'Award of Degree', of **B.E. / B.Tech.** Honors should have secured a CGPA of not less than 7.50.

## 17. SCHEME OF ASSESSMENT

Courses offered under B.E. / B.Tech. Programmes are assessed as given below:

### I CO- CURRICULAR /EXTRACURRICULAR ACTIVITY

#### a. CO-CURRICULAR ACTIVITY

| Component   | Applicable from academic year<br>2024-2025 onwards |
|---|--|
|   | Marks  |
| <b>Continuous Internal Assessment (CIA)</b>   | <b>100</b>   |
| <b>Distribution of marks for CIA</b>  |  |
| <i>Programme Organization / Participation</i>   | 20   |
| <i>Member of Technical society<br/>(International / National reputed like IEEE, IET etc.)</i> | 20   |
| <i>Brief Report of event</i>  | 20   |
| <i>Sharing of Views / Presentation / Seminar</i>  | 20   |
| <i>Attendance</i>   | 10   |
| <i>Coordinator Assessment</i>   | 10   |
| <b>Total Marks</b>  | <b>100</b>   |

#### b. EXTRACURRICULAR ACTIVITY (NCC/NSS/ NON-TECHNICAL CLUBS)

| Component   | Applicable from academic year<br>2024-2025 onwards |
|---|--|
|   | Marks  |
| <b>Continuous Internal Assessment (CIA)</b>                       | <b>100</b>   |
| <b>Distribution of marks for CIA</b>                              |  |
| <i>Activity plan and Programme Organization</i>                   | 20   |
| <i>Participation (National / State / Regional<br/>/Institute)</i> | 20   |
| <i>Activity Report</i>  | 20   |
| <i>Achievements</i>   | 20   |
| <i>Attendance</i>   | 10   |
| <i>Coordinator Assessment</i>                                     | 10   |
| <b>Total Marks</b>  | <b>100</b>   |

c. EXTRA CURRICULAR ACTIVITY (SPORTS AND GAMES)

| Component   | Applicable from academic year<br>2024-2025 onwards |
|---|--|
|   | Marks  |
| <b>Continuous Internal Assessment (CIA)</b>                   | <b>100</b>   |
| <b>Distribution of marks for CIA</b>                          |  |
| <i>Participation (National / State / Regional /Institute)</i> | 20   |
| <i>Regular practice</i>                                       | 20   |
| <i>Skill Development</i>                                      | 20   |
| <i>Sportsmanship (sports ethics) and Teamwork</i>             | 20   |
| <i>Achievements</i>   | 10   |
| <i>Coordinator Assessment</i>                                 | 10   |
| <b>Total Marks</b>  | <b>100</b>   |

**II COMPREHENSIVE WORK**

| Component                      | Applicable till academic year 2022-<br>2023 |
|--------------------------------|---|
|                                | Marks                                       |
| <i>Concept Application</i>     | 50  |
| <i>Comprehensive Interview</i> | 50  |
| <b>Total Marks</b>             | <b>100</b>                                  |

**III ENGINEERING DRAWING**

| Component                                   | Applicable till<br>academic year<br>2023-2024 | Applicable from<br>academic year 2024-<br>2025 onwards |
|---|---|--|
|   | Marks   | Marks  |
| <b>Continuous Internal Assessment (CIA)</b> | <b>100</b>                                    | <b>50</b>  |

| <b>Distribution of marks for CIA</b>              |            |            |
|---|------------|------------|
| <i>Exercise (Minimum 10 Exercises /Modelling)</i> | 60         | -          |
| <i>Model Examinations</i>                         | 40         | 25         |
| <i>Class work</i>                                 | -          | 05         |
| <i>Assignments (Minimum 8)</i>                    | -          | 20         |
| <b>Semester End Examinations (SEE)</b>            | -          | <b>50</b>  |
| <b>Total Marks</b>                                | <b>100</b> | <b>100</b> |

#### IV ENVIRONMENTAL SCIENCE

| Component                                       | Applicable till<br>academic year<br>2023-2024 | Applicable from<br>academic year<br>2024-2025 onwards |
|---|---|---|
|   | Marks   | Marks   |
| <b>Continuous Internal Assessment (CIA)</b>     | <b>100</b>                                    | <b>100</b>  |
| <b>Distribution of marks for CIA</b>            |   |   |
| <i>Periodical Test I</i>                        | 25  | 25  |
| <i>Periodical Test II</i>                       | 25  | 25  |
| <i>Innovative Practices / Case studies (50)</i> | 50  | -   |
| <i>Assignments / Case studies</i>               | -   | 50  |
| <b>Total Marks</b>                              | <b>100</b>                                    | <b>100</b>  |

#### V HOSPITAL TRAINING

| Component                                   | Applicable till<br>academic year<br>2023-2024 | Applicable from<br>academic year<br>2024-2025 onwards |
|---|---|---|
|   | Marks   | Marks   |

| <b>Semester End Examinations (SEE) <sup>#</sup></b><br><b>Courses with L T P C: 3 0 2 4, 2 1 2 4, 3 1 2 5</b><br>a. Theory Examinations<br>b. Laboratory Assessment | -   | 35<br>15  |
| <b>Total Marks</b>  | <b>100</b>                                      | <b>100</b>  |

## XVII VALUE-ADDED / CERTIFICATE COURSES

| Component                      | Marks      |
|--------------------------------|------------|
| <i>Daily Assessment</i>        | 50         |
| <i>Final Evaluation / Test</i> | 50         |
| <b>Total Marks</b>             | <b>100</b> |

**Optional Test:** A student becomes eligible to appear for an optional test conducted after the Periodical Test II, only under the following circumstances: (i) absent for Test I or Test II or both on account of medical reasons (hospitalization / accident / specific illness), or (ii) participation in the College / University / State / National / International level Sports events with prior permission from the Head of the Institution and (iii) on satisfying the conditions (i) or (ii), the student should have registered for the Optional Test, through the concerned member of faculty who handles the course or through the respective Head of the Department, submitted to the Controller of Examinations. Such Optional Tests are conducted for the courses under the categories I and II courses listed above.

#### **18. FIELD / INDUSTRIAL VISIT / INTERNSHIP**

In order to provide the experiential learning to the students, Head of the Department shall take efforts to arrange at least two industrial visits / field visits. The students may also undergo in-plant training / internship during summer / winter vacation between III and VII semesters.

#### **19. PERSONALITY AND CHARACTER DEVELOPMENT**

Every student shall be required to undergo a minimum of 40 hours of Personality Development Programmes viz, NSS / NCC / YRC / YOGA / Sports and Games / Technical and Non-technical Club activities. The attendance of the personality and character development courses / events shall be maintained on the regular basis by the club coordinator and made available in the Office of the Controller of Examinations before the commencement of Semester examinations of Semester I to Semester IV.

#### **20. DISCIPLINE**

A student is expected to follow the rules and regulations laid down by the Institute and the affiliating University, as published from time to time. Any violations, if any, shall be treated as per the procedures stated thereof.

If a student indulges in malpractice in any of the Semester End Examination / Continuous Assessments, he / she shall be liable for punitive action as prescribed by the Institution / University from time to time.

**21. REVISION OF REGULATIONS, CURRICULUM AND SYLLABI**

The Institution reserves the right to revise/amend/change the Regulations, Curriculum, Syllabi, Scheme of Examinations through the Academic Council.

## **BANNARI AMMAN INSTITUTE OF TECHNOLOGY**

An Autonomous Institution Affiliated to Anna University - Chennai • Approved by AICTE • Accredited by NAAC with 'A+' Grade

**SATHYAMANGALAM - 638401 ERODE DISTRICT TAMILNADU INDIA**

Ph: 04295-226000/221289 Fax: 04295-226666 Email: [stayahead@bitsathy.ac.in](mailto:stayahead@bitsathy.ac.in) Web: [www.bitsathy.ac.in](http://www.bitsathy.ac.in)

### **VISION OF THE DEPARTMENT**

- To build a conducive academic and research environment to produce competent Professionals to the dynamic needs of the emerging trends in the field of Artificial Intelligence and Data Science.

### **MISSION OF THE DEPARTMENT**

- To establish a unique learning environment and to enable the students to face the challenges in Artificial Intelligence and Data Science.
- To critique the role of information and analytics for a professional career, research activities and consultancy.
- To produce competent engineers with professional ethics and life skills.

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

**PEO1:** Competent engineering professionals to use Artificial Intelligence and Data Science to solve engineering problems.

**PEO2:** Capable of pursuing higher studies and research, with wider opportunities in teaching and innovation.

**PEO3:** Improve communication skills, follow professional ethics and involve in team work in their profession.

### **PROGRAMME OUTCOMES (POs)**

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### **PROGRAMME SPECIFIC OUTCOMES (PSOs)**

- PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.
- PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

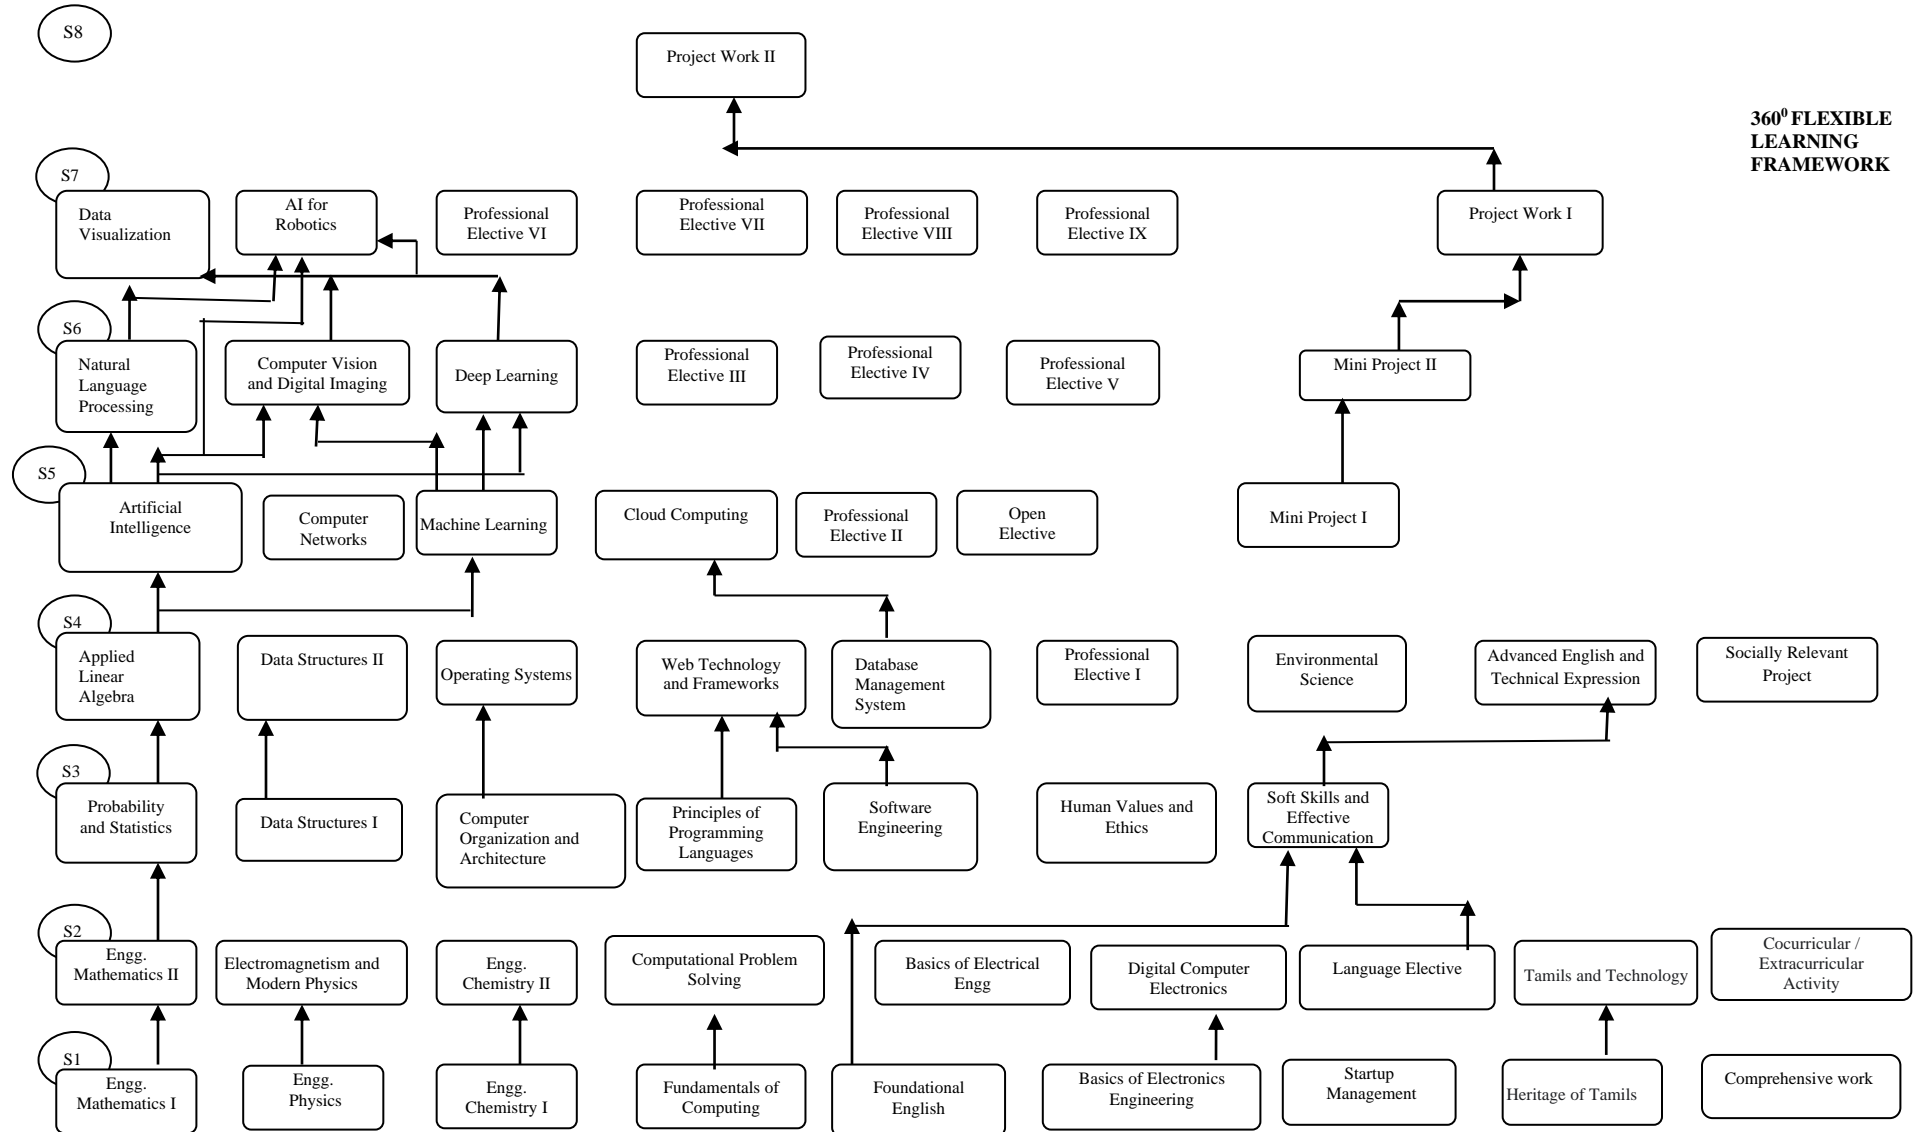

### MAPPING OF PEOs WITH POs AND PSOs

| POs   | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | PSO1 | PSO2 |
|-------|---|---|---|---|---|---|---|---|---|----|----|----|------|------|
| PEO 1 | X | X | X |   | X |   | X |   |   |    | X  |    | X    | X    |
| PEO 2 |   |   | X | X |   | X |   |   |   |    |    | X  | X    | X    |
| PEO 3 |   |   |   |   |   |   |   | X | X | X  |    |    | X    | X    |

**22MA101****ENGINEERING MATHEMATICS I****3 1 0 4****Course Objectives**

- To impart mathematical modeling to describe and explore real-world phenomena and data.
- To provide basic understanding on Linear, quadratic, power and polynomial, exponential, and multi variable models
- To summarize and apply the methodologies involved in framing the real-world problems related to fundamental principles of polynomial equations

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Implement the concepts of mathematical modeling based on linear functions in Engineering
2. Formulate the real-world problems as a quadratic function model
3. Demonstrate the real-world phenomena and data into Power and Polynomial functions
4. Apply the concept of mathematical modeling of exponential functions in Engineering
5. Develop the identification of multivariable functions in the physical dynamical problems

**Articulation Matrix**

**UNIT I****9 Hours****MATHEMATICS MODELING OF LINEAR FUNCTIONS**

The geometry of linear equations - Formation of linear equations: Method of least squares and method of regression - Vector spaces: Basic concepts with examples - Linear combination - Eigen values and vectors

**UNIT II****9 Hours****MATHEMATICAL MODELING OF QUADRATIC FUNCTIONS**

General form of a quadratic function - Basic relationships between the equation and graph of a quadratic function - Sum of squares error and the quadratic function of best fit - Quadratic forms: Matrix form - Orthogonality - Canonical form and its nature

**UNIT III**

**9 Hours**

**MATHEMATICAL MODELING OF POWER AND POLYNOMIAL FUNCTIONS**

Characteristics of the graphs of power and polynomial functions - Fitting of power and polynomial functions using the method of least squares - Local maxima and local minima of power and polynomial functions - Power series of functions with real variables, Taylors series, radius and interval of convergence - Tests of convergence for series of positive terms - comparison test, ratio test

**UNIT IV**

**9 Hours**

**MATHEMATICAL MODELING OF EXPONENTIAL FUNCTIONS**

Concept of exponential growth - Graphs of exponential functions - Relationship between the growth factor and exponential growth or decline - Exponential equations have a variable as an exponent and take the form  $y = ab^x$  through least square approximation - Calculus of exponential functions - Exponential series - Characteristics

**UNIT V**

**9 Hours**

**MATHEMATICAL MODELING OF MULTIVARIABLE FUNCTIONS**

Graphing of functions of two variables -Partial derivatives - Total derivatives - Jacobians - Optimization of multivariable functions with constraints - Optimization of multivariable functions without constraints

**Total: 45+15 = 60 Hours**

**22PH102****ENGINEERING PHYSICS****2023****Course Objectives**

- Understand the concept and principle of energy possessed by mechanical system
- Exemplify the propagation and exchange of energy
- Identify the properties of materials based on the energy possession

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Apply the work-energy theorem to analyze and optimize mechanical system performance.
2. Analyze free and forced mechanical oscillations in vibrational energy systems.
3. Analyze the propagation of energy in mechanical systems through transverse and longitudinal waves.
4. Analyze the exchange of energy and work between the systems using thermodynamic principles.
5. Apply the concept of energy and entropy to understand the mechanical properties of materials.

**Articulation Matrix**

**UNIT I****6 Hours****CONSERVATION OF ENERGY**

Concept of energy - types of energy-conservation of energy. Mechanical energy: - translation - rotation - vibration - Kinetic and potential energies - conservation - work and energy - laws of motion - minimization of potential energy - equilibrium - dissipative systems - friction

**UNIT II**

**5 Hours**

**VIBRATIONAL ENERGY**

Periodic Motion - Simple Harmonic Motion - Energy of the SHM - Pendulum types - Damped oscillations - forced oscillations - natural frequency – resonance

**UNIT III**

**6 Hours**

**PROPAGATION OF ENERGY**

Transfer of energy - material medium - Transverse wave - Longitudinal wave - standing wave - interference - Doppler effect. Sound waves and its types - characteristics - human voice - reflection - refraction-beats

**UNIT IV**

**7 Hours**

**EXCHANGE OF ENERGY**

Energy in transit - heat - Temperature - measurement - specific heat capacity and water - thermal expansion –Heat transfer processes-Thermodynamics: Thermodynamic systems and processes - Laws of thermodynamics - Entropy - entropy on a microscopic scale -maximization of entropy

**UNIT V**

**6 Hours**

**ENERGY IN MATERIALS**

Elastic energy - Structure and bonding - Stress - strain - Tension and compression - elastic limit - Elastic Modulus - Stress - strain diagram - ductility - brittleness - rubber elasticity and entropy

**EXPERIMENT 1**

**5 Hours**

Assess the physical parameters of different materials for engineering applications like radius, thickness and diameter to design the electrical wires, bridges and clothes.

**EXPERIMENT 2**

**5 Hours**

Evaluate the elastic nature of different solid materials for modern industrial applications like shock absorbers of vehicles.

**EXPERIMENT 3**

**5 Hours**

Analyze the photonic behavior of thin materials for advanced optoelectronic applications like adjusting a patient's head, chest and neck positions as a medical tool.

**EXPERIMENT 4**

**5 Hours**

Investigate the phonon behavior of poor conductors for thermionic applications like polymer materials and textile materials.

**EXPERIMENT 5**

**5 Hours**

Assess the elongation of different solid materials for industrial applications like buildings, bridges and vehicles

**EXPERIMENT 6**

**5 Hours**

Measure the compressibility of different liquids for modern industrial applications like navigation, medicine and imaging

**Total: 30+30 = 60 Hours**

**22CH103****ENGINEERING CHEMISTRY I****2023****Course Objectives**

- Understand the origin of elements from the universe.
- Outline the properties of elements in the periodic table.
- Analyze the different types of bond formed during chemical reactions and its reaction thermodynamics.
- Summarize different states of matter based on atomic arrangement.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Apply the mechanism of nuclear transmutation reactions, such as fusion and neutron capture, in the formation of elements in the universe
2. Apply the concept of atomic structure of elements in the periodic table to interpret the periodic trends in properties of elements with its anomaly
3. Apply the conditions for the formation of different types of chemical bonds and predict the minimum energy required for a reaction to occur
4. Analyze endothermic and exothermic processes and exchange of energy during chemical reactions
5. Analyze whether the given matter is a solid, liquid, gas, or plasma and interpret the arrangement of atoms

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 1     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 2     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 3     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 4     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****6 Hours****ORIGIN OF ELEMENTS**

Hydrogen - Elements and Sun - fusion - hypernova - supernova - dying stars - man-made elements.

**UNIT II****6 Hours****ATOMIC STRUCTURE AND PERIODICITY**

Atomic Structure - Electronic configuration - Periodic Table - Periodic trends in properties of elements - Anomalous behaviour in periodicity

**UNIT III** **6 Hours**

**CHEMICAL BONDING**

Octet rule & its limitations - types of chemical bonds - bond energy - bond cleavage - activation energy of reactions

**UNIT IV** **6 Hours**

**REACTION THERMODYNAMICS**

Conservation of energy - Endothermic reactions & exothermic reactions - Exchange of energy involved in chemical reactions

**UNIT V** **6 Hours**

**STATES OF MATTER**

Solid - liquid - gas - plasma – Quantum dots - arrangement of atoms/ions/molecules in different phases.

**EXPERIMENT 1** **5 Hours**

Evaluate the dissolved oxygen (DO) levels in effluent samples collected from sewage treatment plants in BIT. Ensure the suitability of outlet water for the growth of aquatic animals (fishes).

**EXPERIMENT 2** **5 Hours**

Investigate the amount of Iron (Fe<sup>2+</sup>) in a mild steel alloy sample using a spectrophotometer.

**EXPERIMENT 3** **4 Hours**

Estimate the amount of chromium present in industry effluent samples and bottled beverages.

**EXPERIMENT 4** **5 Hours**

Ensure the suitability of drinking water in the RO water supply in BIT based on the presence of chloride ions.

**EXPERIMENT 5** **3 Hours**

Assess the acidic nature of effluent water from industries using the conductometric titration method.

**EXPERIMENT 6** **4 Hours**

Measure the stain removal efficiency of the prepared soaps from stained clothes.

**EXPERIMENT 7** **4 Hours**

Assess the purity of commercially available active pharmaceutical ingredients (aspirin) as per the government-prescribed standards.

**Total: 30+30 = 60 Hours**

**22GE001****FUNDAMENTALS OF COMPUTING****3 0 0 3****Course Objectives**

- Understand the fundamental digital logics behind computations of computer systems.
- Develop simple assembly language programs with respect to arithmetic operations.
- Understand the program execution process and basics of software development methodologies.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Infer the hidden languages and inner structures of computer hardware and software through codes and combinations.
2. Interpret the organizational and architectural issues of a digital computer with concepts of various data transfer techniques in digital computers and the I/O interfaces.
3. Analyze programming problems and apply assembly instructions to solve simple problems.
4. Infer the fundamentals of operating system and System programs basics.
5. Apply the software development methodologies to various real-life scenarios.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****8 Hours****CODES AND COMBINATIONS**

Communication using Mores and Braille binary codes - Digitizing letters, numbers and objects using binary codes - Performing simple operations: addition through binary codes.

**UNIT II** **9 Hours**

**COMPUTATION USING COMPUTER**

Communication to computing devices through various input sources - Computational operation - its flow, functions and control - communication to output devices - Basic communication protocol.

**UNIT III** **11 Hours**

**ASSEMBLY LANGUAGE PROGRAMMING**

Little Man Computing (LMC) Model - Instruction Set - Labels - Calculation -Branching - Input- Output - Loops - Simple programs.

**UNIT IV** **9 Hours**

**OPERATING SYSTEM AND APPLICATION GENERATION**

BIOS - Device Drivers - Resources - Scheduler - Applications Generation and Creation - Stages of Compilation - Linkers, Loaders and Libraries.

**UNIT V** **8 Hours**

**SOFTWARE DEVELOPMENT**

Phases of application life cycle management - Software Development Methodologies - Web Page development.

**Total: 45 Hours**

**22HS001****FOUNDATIONAL ENGLISH****1 0 2 2****Course Objectives**

- Heighten awareness of grammar in oral and written expression
- Improve speaking potential in formal and informal contexts
- Improve reading fluency and increased vocabulary
- Prowess in interpreting complex texts
- Fluency and comprehensibility in self-expression
- Develop abilities as critical readers and writers
- Improve ability to summarize information from longer text, and distinguish between primary and supporting ideas

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Express themselves in a professional manner using error-free language
2. Express in both descriptive and narrative formats
3. Interpret and make effective use of the English Language in Business contexts
4. Actively read and comprehend authentic text
5. Express opinions and communicate experiences.

## UNIT I

15 Hours

### SELF-EXPRESSION

Self-Introduction-Recreating Interview Scenarios (with a focus on verbal communication)-Subject Verb Concord - Tenses - Common Errors in verbal communication Be-verbs Self-Introduction- Recreating interview scenarios-Haptics-Gestures-Proxemics-Facial expressions- Paralinguistic / Vocalic- Body Language- Appearance-Eye Contact-Artefacts Self-Introduction-Powerful openings and closings at the interview-Effective stock phrases - Modified for spontaneity and individuality-Question tags, framing questions including WH- questions- Prepositions-Listening to Ted talks-Listening for specific information

## UNIT II

15 Hours

### CREATIVE EXPRESSION

Descriptive Expression-Picture Description and Blog Writing -Vocabulary-One word substitution-Adjectives-Similes, Metaphors, Imagery & Idioms – Link words - Inclusive language Narrative Expression- Travelogue and Minutes of Meeting -Verbal analogy -Sequence & Time order words - Jumbled paragraph, sentences, Sequencing-Text & Paragraph completion -Past tense -Using quotation marks

## UNIT III

15 Hours

### FORMAL EXPRESSION

Formal Letters and Emails-Writing: E-mails and Letters of apology, Requisition and Explanation, and Letters to newspapers-Speaking: Tendering verbal apologies, and explanations, persuading a listener/ audience-Hierarchy in Business correspondence- Subject of a mail, Header, Body (Salutation) and Footer of a mail- Conjunctive clause Punctuation-Formal Idioms-Phrases-Articles - Definite & Indefinite-Types of sentences-Modal verbs Precision in comprehension, Summary writing, Selective summary-Reading: Active reading- short paragraphs, excerpts, articles and editorials-Skimming and Scanning Reading comprehension & analysis- Tenses, QP/ PQ approach. Identifying the central themes/ crux-Interpreting tone - formal/informal/semi-formal-Note-taking-Listening: Listening for data, for specific information, for opinion-Active and passive Listening-Transcription-Paraphrasing and summarizing information-Agreeing & disagreeing-Note-taking-Writing: Summary writing, selective summary, paraphrasing, note-making, opinion pieces-Finding synonyms in the context Paraphrasing- Sentence Transformation - simple, compound, complex. Sentence Substitution-Sentence completion- Interpreting paragraphs

**Total: 45 Hours**

**22GE004 BASICS OF ELECTRONICS ENGINEERING****2023****Course Objectives**

- To understand the concept of energy transmission through mechanical, electrical and electromagnetic form.
- To analyze the use of PN Junction Diode and BJT for signal conditioning.
- To apply the working principle of PN Junction Diode and BJT for the design of basic Digital Logic.
- To analyze the working and characteristics of Special Purpose Semiconductor Electronic Devices.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**Course Outcomes (COs)**

1. Understand the need for electrical and electromagnetic signal transmission.
2. Analyze the working principle and characteristics of PN junction diode.
3. Analyze the working principle and characteristics of Bipolar Junction Transistor.
4. Apply the working principle of PN Junction diode and BJT for designing basic Digital Logic functions.
5. Analyze the energy conversion needs and working principle of Special purpose electronic devices.

**UNIT I** **6 Hours**

**ENERGY TRANSFER AND SIGNALS**

Energy Transmission through Mechanical, Electrical and Electromagnetic means, Signal as Energy Transmission, Complexity in signal transmission (Volume of Information, Distance and Time taken), Limitations of Mechanical Energy Transmission, Electrical and Electromagnetic Signal Transmission, Need for Conversion between Electrical and Mechanical Signals.

**UNIT II** **8 Hours**

**SIGNAL CONDITIONING USING DIODE**

Need for Vacuum Tubes in the Evolution of Electronics, Overview of Vacuum Tubes, Diode and Triode, Limitations of Vacuum Tubes. Semiconductor Group in Periodic Table, Overview of Semiconductor Materials, Flow of electrical energy through PN Junction Diode, Signal Clipping, Signal Clamping and Signal Multiplication using PN Junction Diode, Limitations of PN Junction Diode.

**UNIT III** **6 Hours**

**SIGNAL CONDITIONING USING TRANSISTOR**

Need for controlling electrical signals, Principle of Bipolar Junction Transistor operation, Signal Switching and Amplification using BJT, Limitations of BJT, Principle of Field Effect Transistor operation.

**UNIT IV** **6 Hours**

**LOGIC SYNTHESIS USING DIODE AND TRANSISTORS**

Overview of Logic Gates, PN Junction and BJT as electronic switches, Digital Logic Synthesis using Diode and Transistor: Diode Logic, Resistor Transistor Logic, Diode Transistor Logic, Transistor Logic.

**UNIT V** **4 Hours**

**DEVICES FOR SPECIAL REQUIREMENTS**

Voltage Regulation using Zener Diode, Variable Capacitance using Varactor Diode, Electrical Energy to Light Energy conversion using Light Emitting Diode, Light to Energy to Electrical Energy conversion using Solar Cell.

**EXPERIMENT 1** **4 Hours**

Design and implement a simple device to communicate basic information between two different small distance points using wired and wireless methods.

**EXPERIMENT 2** **6 Hours**

Design and implement different wave shaping Circuits using PN Junction Diodes.

**EXPERIMENT 3** **4 Hours**

Design and Implement Voltage Multiplier Circuit using PN Junction Diodes and Capacitors.

**EXPERIMENT 4** **4 Hours**

Design and Implement a three Stage Circuit to convert 220V 50Hz AC mains supply to 12V DC supply.

**EXPERIMENT 5** **4 Hours**

Design and Implement a BJT Amplifier Circuit to amplify audio input signal.

## **EXPERIMENT 6**

**4 Hours**

Design and Implement Basic Logic Gates using PN Junction Diodes.

## **EXPERIMENT 7**

**4 Hours**

Design and Implement Basic Logic Gates using BJTs.

**Total: 30+30 = 60 Hours**

**22HS002      STARTUP MANAGEMENT****1 0 2 2****Course Objectives**

- Promote entrepreneurial spirit and motivate to build startups
- Provide insights on markets and the dynamics of buyer behaviour
- Train to develop prototypes and refine them to a viable market offering
- Support in developing marketing strategies and financial outlay
- Enable to scale up the prototypes to commercial market offering

**Programme Outcomes (POs)**

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Generate valid and feasible business ideas.
2. Create Business Model Canvas and formulate positioning statement.
3. Invent prototypes that fulfills an unmet market need.
4. Formulate business strategies and create pitch decks.
5. Choose appropriate strategies for commercialization.

**UNIT I** **3 Hours**

**BUSINESS MODELS AND IDEATION**

Startups: Introduction, Types of Business Modes for Startups. Ideation: Sources of Ideas, Assessing Ideas, Validating Ideas, Tools for validating ideas, Role of Innovation and Design Thinking

**UNIT II** **3 Hours**

**UNDERSTANDING CUSTOMERS**

Buyer Decision Process, Buyer Behaviour, Building Buyer Personas, Segmenting, Targeting and Positioning, Value Proposition (Business Model Canvas), Information Sourcing on Markets, Customer Validation

**UNIT III** **3 Hours**

**DEVELOPING PROTOTYPES**

Prototyping: Methods-Paper and Digital, Customer Involvement in Prototyping, Product Design Sprints, Refining Prototypes

**UNIT IV** **3 Hours**

**BUSINESS STRATEGIES AND PITCHING**

Design of Marketing Strategies and Campaigns, Go-To-Market Strategy, Financial KPIs Financial Planning and Budgeting, Assessing Funding Alternatives, Pitching, Preparing Pitch Decks

**UNIT V** **3 Hours**

**COMMERCIALIZATION**

Implementation: Prototype to Commercialization, Test Markets, Institutional Support, Registration Process, IP Laws and Protection, Legal Requirements, Type of Ownership, Building and Managing Teams, Defining role of investors

**EXPERIMENT 1** **1 Hour**

Analysis of various business sectors

**EXPERIMENT 2** **2 Hours**

Developing a Design Thinking Output Chart

**EXPERIMENT 3** **1 Hour**

Creating Buyer Personas

**EXPERIMENT 4** **3 Hours**

Undertake Market Study to understand market needs and assess market potential

**EXPERIMENT 5** **2 Hours**

Preparation of Business Model Canvas

**EXPERIMENT 6** **15 Hours**

Developing Prototypes

**EXPERIMENT 7**

**2 Hours**

Organizing Product Design Sprints

**EXPERIMENT 8**

**2 Hours**

Preparation of Business Plans

**EXPERIMENT 9**

**2 Hours**

Preparation of Pitch Decks

**Total: 15+30 = 45 Hours**

**22HS003****HERITAGE OF TAMILS****1 0 0 1****Course Objectives**

- Describe the linguistic diversity in India, highlighting Dravidian languages and their features.
- Summarize the evolution of art, highlighting key transitions from rock art to modern sculptures.
- Examine the role of sports and games in promoting cultural values and community bonding.
- Discuss the education and literacy systems during the Sangam Age and their impact.
- Outline the importance of inscriptions, manuscripts, and the print history of Tamil books in preserving knowledge and culture.

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions

**Course Outcomes (COs)**

1. Understand the concept of language families in India, with a focus on Dravidian languages.
2. Trace the evolution of art from ancient rock art to modern sculptures in Tamil heritage.
3. Identify and differentiate various forms of folk and martial arts in Tamil heritage.
4. Understand the concepts of Flora and Fauna in Tamil culture and literature.
5. Evaluate the contributions of Tamils to the Indian Freedom Struggle.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****3 Hours****LANGUAGE AND LITERATURE**

Language Families in India - Dravidian Languages - Tamil as a Classical Language- Classical Literature in Tamil- Secular Nature of Sangam Literature- Distributive Justice in Sangam Literature - Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

**UNIT II**

**3 Hours**

**HERITAGE - ROCK ART PAINTINGS TO MODERN ART- SCULPTURE**

Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils.

**UNIT III**

**3 Hours**

**FOLK AND MARTIAL ARTS**

Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

**UNIT IV**

**3 Hours**

**THINAI CONCEPT OF TAMILS**

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas.

**UNIT V**

**3 Hours**

**CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE**

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India - Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine - Inscriptions & Manuscripts - Print History of Tamil Books.

**Total: 15 Hours**

**22MA201****ENGINEERING MATHEMATICS II****3 1 0 4****Course Objectives**

- To impart and analyze the concepts of differential equations to describe in real-world phenomena
- To provide basic understanding on differential equation models and vector field models
- Summarize and apply the methodologies involved in framing the real-world problems related to fundamental principles of complex functions

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Interpret the concept of differential equations through mathematical modeling and analyze its applications in engineering
2. Formulate the real-world problems as second order linear differential equations and give solutions for the same
3. Demonstrate the real-world phenomena with magnitude and direction in the form of vector functions
4. Apply the concept of vector fields and line integrals through mathematical modeling in engineering
5. Determine complex functions and apply them to formulate problems arising in engineering

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****FIRST ORDER LINEAR DIFFERENTIAL EQUATIONS**

Formation of differential equations- Solutions of first order linear ODE: Leibnitzs and method of separation of variables- Cooling/Heating of an object - A falling object- Modeling of electric circuits: RL and RC circuits - Modeling of population dynamics: Exponential growth and decay - Logistic growth model

**UNIT II****9 Hours****SECOND ORDER LINEAR DIFFERENTIAL EQUATIONS**

Methods of solving second order linear ordinary differential equations -Models for linear oscillators: Simple harmonic motion - Mechanical vibrations with and without damping - Electric circuit system: RLC circuits

**UNIT III**

**9 Hours**

**VECTOR DIFFERENTIAL CALCULUS**

Vector and scalar functions - Fields - Derivative of vector function and geometrical interpretation- Velocity and acceleration - Gradient and its properties- Tangent and normal vectors - Directional derivative- Divergence of a vector field - Curl of a vector field - Projectile motion

**UNIT IV**

**9 Hours**

**VECTOR INTEGRAL CALCULUS**

Line integrals of vector point functions - Surface integral of vector point functions - Applications of line and surface integrals - Greens theorem in a plane - Stokes theorem - Gauss divergence theorem

**UNIT V**

**9 Hours**

**COMPLEX FUNCTIONS**

Basic concepts of Complex numbers Geometrical representation of complex number - Analytic functions and its properties - Construction of Analytic functions: Fluid flow Electric flow - Mapping of complex functions

**Total: 45+15 = 60 Hours**

**22PH202 ELECTROMAGNETISM AND MODERN  
PHYSICS**

**2023**

**Course Objectives**

- Understand the principles and mechanisms of electricity and magnetism
- Infer the classification of electromagnetic waves
- Analyze the theory of relativity and energy bands

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Analyze the mechanisms of Coulomb's law and electric potential in various charge system.
2. Analyze the magnetic properties of materials and their effects on external magnetic fields.
3. Analyze the classification of electromagnetic waves based on frequency and wavelength.
4. Outline the importance of theory of relativity and analyze the wave nature of particles.
5. Apply the principles of electron and hole transport to study p-type and n-type semiconductors.

**Articulation Matrix**

**UNIT I** **6 Hours**

**ELECTRICITY**

Electric monopoles - Electric field- Electric flux - Electric potential - electrical energy- capacitor- conductors and insulators-Electric dipole and polarization - electric current -voltage sources- resistance

**UNIT II** **6 Hours**

**MAGNETISM**

Sources of magnetism- monopoles-magnetic field and force-magnetic field and current distribution-magnetic dipole-magnetic potential energy-inductor- electric and magnetic field comparison

**UNIT III** **6 Hours**

**ELECTROMAGNETIC WAVES AND LIGHT**

Electromagnetism: basic laws-electromagnetic energy-radiation. Electromagnetic waves: origin, nature and spectrum-visible light - Principle of least time- geometrical optics-Human eye - Diffraction - Interference - polarization-LASER

**UNIT IV** **6 Hours**

**MODERN PHYSICS**

Special theory of relativity - simultaneity and time dilation - length contraction - relativistic mass variation. Matter waves - de-Broglie hypothesis - wave nature of particles

**UNIT V** **6 Hours**

**ENERGY BANDS IN SOLIDS**

Band theory of solids - classification of materials - semiconductors - direct and indirect semiconductor - fermi energy -Intrinsic and extrinsic semiconductor - carrier concentration - electrical conductivity

**EXPERIMENT 1** **5 Hours**

Analysis of I-V characteristics of a solar cell for domestic applications.

**EXPERIMENT 2** **5 Hours**

Determine the carrier concentration of charge carriers in semiconductors for automotive applications

**EXPERIMENT 3** **5 Hours**

Investigate the photonic behavior of laser source for photo copier device

**EXPERIMENT 4** **5 Hours**

Implement the principle of stimulated emission of laser for grain size distribution in sediment samples

**EXPERIMENT 5** **5 Hours**

Assess the variation of refractive index of glass and water for optical communication

**EXPERIMENT 6** **5 Hours**

Evaluate the band gap energy of semiconducting materials for display device applications

**Total: 30+30 = 60 Hours**

**22CH203 ENGINEERING CHEMISTRY II****2023****Course Objectives**

- Understand the concept of electrochemistry for determination of electrode potential, pH and applications as energy storage devices
- Outline the chemistry of metal corrosion and analyze the methods of corrosion control
- Understand how catalyst increases the reaction rate
- Summarize the variation in properties and reactivity of isotopes

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Apply the electrochemical concepts to determine the electrode potential of a metal.
2. Analyze the working of batteries for the energy storage devices.
3. Analyze the specific operating conditions under which corrosion occurs and suggest a method to control corrosion.
4. Analyze the reaction mechanisms and assess the role of catalyst in a chemical reaction.
5. Analyze various types of nuclear transmutation including decay reactions.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 4     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****6 Hours****ELECTROCHEMISTRY**

Origin of potential - electromotive force - electrical double layer - transport of charge within the cell - cell description - prediction of cell potentials

**UNIT II****6 Hours****ENERGY STORING DEVICES**

Relation between electrical energy and energy content of a cell - reversible and irreversible cell - charging and discharging reactions in a reversible cell - current challenges in energy storage technologies

**UNIT III** **6 Hours**

**METAL CORROSION AND ITS PREVENTION**

Oxidation of metals: Electrochemical origin of corrosion - electromigration - electron transfer in the presence and absence of moisture - galvanic series. Strategies for corrosion control: Galvanic anode and impressed current.

**UNIT IV** **6 Hours**

**CATALYSIS**

Energy profile diagram for a chemical reaction - activation energy - role of catalyst - homogeneous and heterogeneous catalysis - types

**UNIT V** **6 Hours**

**NUCLEAR REACTIONS**

Radioactive and stable isotopes - variation in properties between isotopes - radioactive decay (alpha, beta and gamma) - half-life period - nuclear reactions – recent applications of radioactive isotopes

**EXPERIMENT 1** **4 Hours**

Measure industrial effluent water pH and assess water quality against allowed standards.

**EXPERIMENT 2** **4 Hours**

Iron ( $\text{Fe}^{2+}$ ) in Bhavani River water: Potentiometric Analysis.

**EXPERIMENT 3** **4 Hours**

Construct a Zn-Cu electrochemical cell and validate the output by connecting the LED light.

**EXPERIMENT 4** **5 Hours**

Evaluate the corrosion percentage in concrete TMT bars.

**EXPERIMENT 5** **4 Hours**

Determination of the percentage of corrosion inhibition in plain-carbon steel using natural inhibitors.

**EXPERIMENT 6** **4 Hours**

Electroplating of copper metal on iron vessels for domestic application.

**EXPERIMENT 7** **5 Hours**

Determination of acid-catalyzed hydrolysis kinetics in locally sourced fruit extracts.

**Total: 30+30 = 60 Hours**

**22GE002 COMPUTATIONAL PROBLEM SOLVING****3 0 0 3****Course Objectives**

- Analyze the algorithm design techniques and development principles in solving the real-life problems.
- Illustrate the different ways of organizing and storing the data in computing systems.
- Understand the basic network configuration and setup connections among different device systems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Analyze a problem and formulate algorithms, pseudocodes and flowcharts.
2. Develop algorithmic solutions to simple computational problems and explore algorithmic approaches to problem solving.
3. Design and apply appropriate data structures for solving computing problems.
4. Compare the various storage devices used in a computer system.
5. Analyze the requirements for a given organizational structure and establish the connection between two or more computers to form a network.

**Articulation Matrix**

**UNIT I** **6 Hours**

**VISUAL PROCESS MODELING**

Scenario decomposition - logical sequencing - drawing flowchart - preparing visual process model.

**UNIT II** **12 Hours**

**ALGORITHMIC DESIGN THINKING**

Analysis - Verification - Brute force - Divide and conquer - Greedy - Backtracking.

**UNIT III** **12 Hours**

**DATA ORGANIZATION**

Elementary Data Organization - Abstract Data Types - Fundamentals of Linear and Non-Linear Data Structures.

**UNIT IV** **7 Hours**

**DATA STORAGE**

Flat File and Relational database- Data Read & Write in Local Storage, Server Storage and Cloud storage  
- Database Query Methods.

**UNIT V** **8 Hours**

**NETWORKING ESSENTIALS**

Networking Components and Services - IP Addressing - Configuring and Managing the Campus Network  
- Network Security - Firewalls.

**Total: 45 Hours**

**22GE003 BASICS OF ELECTRICAL ENGINEERING****2023****Course Objectives**

- To understand the basic concepts of electrical charge and its properties.
- To interpret the formation of electric field due to electric charges.
- To illustrate the concept of magnetic fields due to revolving electron.
- To illustrate the force on moving charges in electric and magnetic field.
- To understand the energy transfer in electro mechanical conversion.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Interpret the behavior of electric charges in different medium using coulombs law.
2. Analyze the electric field due to different charge distributions.
3. Analyze the magnetic field intensity due to long conductor, solenoid, toroid and magnetic dipoles.
4. Analyze the force on conductors due to the moving charges.
5. Interpret the energy conversion concepts in electromagnetic fields.

**UNIT I** **5 Hours**

**ELECTRIC CHARGE**

Properties of charge, additivity of charges, quantization of charge, conservation of charge, Forces between multiple charges, Electric charge in conductors, Drift of Electrons, Charges in Clouds.

**UNIT II** **7 Hours**

**ELECTRIC FIELD**

Electric field due to system of charges, Significance of Electric field line. Electric Dipole and its significance, Continuous charge distribution, Field in infinite long uniform straight conductors, field in uniform charged uniform infinite plane sheet, field due to uniform thin spherical sheet.

**UNIT III** **7 Hours**

**MAGNETIC FIELDS**

Concept of magnetic field, magnetic fields in infinitely long straight wire, straight and toroidal solenoids, Magnetic dipole moment of a revolving electron, Magnetic field intensity due to a magnetic dipole (bar magnet) along its axis and perpendicular to axis, Induced Electric field due to changing Magnetic Field.

**UNIT IV** **6 Hours**

**FORCE ON CHARGES**

Force on a moving charge in uniform magnetic and electric fields, Force on a current carrying conductor in a uniform magnetic field, Force between two parallel current carrying conductors.

**UNIT V** **5 Hours**

**ELECTRO MECHANICAL ENERGY CONVERSION**

Energy transfer in electromagnetic fields, Energy storage in magnetic field, Electromagnetic induction, induced emf, Eddy currents. Self and mutual inductance Linear Momentum and Angular Momentum carried by Electromagnetic Fields.

**EXPERIMENT 1** **7 Hours**

Analysis the behaviour of a fixed resistor in an electric heater.

**EXPERIMENT 2** **8 Hours**

Construct an electrical wiring layout for a basic household application.

**EXPERIMENT 3** **7 Hours**

Analysis the self and mutual induction in a domestic fan.

**EXPERIMENT 4** **8 Hours**

Design a transistor-based electronic switch.

**Total: 30+30 = 60 Hours**

**22AI206****DIGITAL COMPUTER ELECTRONICS****3 0 2 4****Course Objectives**

- Understand the operation of Arithmetic Logic unit in Microprocessors
- Interpret Data retrieval from Memory by Microprocessors
- Analyze the role of Control Unit in Microprocessors
- Analyze Instruction execution in Microprocessors

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**Course Outcomes (COs)**

1. Analyze the Design of Arithmetic and Logic Unit in Microprocessors.
2. Analyze the Data Storage and Retrieval from Random Access Memory.
3. Analyze the working mechanism of Control Unit in Microprocessors
4. Analyze the execution of Arithmetic and Logical Instructions
5. Analyze the execution of Jump and Memory related Instructions

**Articulation Matrix**

**UNIT I****9 Hours****BINARY SYSTEM AND DESIGN OF ALU**

Conversion of Decimal, Hexadecimal, Octal and Binary Numbers - Representation of Negative Numbers in Binary - Design of Binary Arithmetic Logic Modules - Magnitude Comparator - Encoder - Decoder - Multiplexer - Demultiplexer - Design of Arithmetic and Logic Unit (ALU)

**UNIT II****9 Hours****SYNCHRONOUS CIRCUIT AND DESIGN OF RAM**

Latches and Flip Flops - Clock - Registers - Counters - Shift Registers - Storage and Retrieval of Binary Numbers from Registers - Design of Random Access Memory (RAM) - Encoding and Decoding of Memory address locations

**UNIT III** **9 Hours**

**DESIGN OF CONTROL UNIT**

Design of Control Unit - Mechanism of Instruction Read, Data Read, Instruction Decode, Instruction Execute and Data Write.

**UNIT IV** **9 Hours**

**BASIC INSTRUCTION EXECUTION**

Arithmetic Instructions - Increments, Decrements and Rotate Instructions - Logic Instructions - Arithmetic and Logic instructions

**UNIT V** **9 Hours**

**ADVANCED INSTRUCTION EXECUTION**

Memory Reference Instructions - Register Instructions - Jump and Call Instructions - Concept of Flag - Extended Register Instructions - Indirect Instructions - Stack Instructions

**EXPERIMENT 1** **5 Hours**

Buzzer Alarm System: Logic Circuit for Intruder Detection.

**EXPERIMENT 2** **5 Hours**

Binary Calculator: Design and Simulation of a Basic Arithmetic Unit.

**EXPERIMENT 3** **5 Hours**

Binary Comparator: Designing a Circuit to Compare Binary Numbers.

**EXPERIMENT 4** **5 Hours**

Digital Lock System: With the combination of Flip-Flops and Logic Gates.

**EXPERIMENT 5** **5 Hours**

Digital Alarm Clock: Timekeeping with Counters and Decoders.

**EXPERIMENT 6** **5 Hours**

Elevator Control System: Implementing Logic for Floor Selection.

**Total: 45+30 = 75 Hours**

**22HS006****TAMILS AND TECHNOLOGY****1 0 0 1****Course Objectives**

- Analyse graffiti on potteries as a form of historical and cultural documentation during the Sangam Age.
- Investigate the building materials and the historical context of Hero stones during the Sangam Age by Analysing the details of stage constructions in Silappathikaram and their cultural significance.
- Examine ancient knowledge of oceans and its impact on Tamil society.

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions

**Course Outcomes (COs)**

1. Understand the significance of the weaving industry during the Sangam Age and its cultural importance.
2. Understand the significance of dams, tanks, ponds, and sluices in the agricultural and irrigation practices of the Chola Period.
3. Explore the architectural designs and structural construction methods used in household materials during the Sangam Age.
4. Explore the art of shipbuilding in ancient Tamil culture and its role in maritime trade and transportation.
5. Trace the development of scientific terminology and vocabulary in Tamil language.

**UNIT I****3 Hours****WEAVING AND CERAMIC TECHNOLOGY**

Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.

## UNIT II

3 Hours

### DESIGN AND CONSTRUCTION TECHNOLOGY

Designing and Structural construction House & Designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple)- Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.

## UNIT III

3 Hours

### MANUFACTURING TECHNOLOGY

Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel - Copper and gold - Coins as source of history - Minting of Coins – Beads making-industries Stone beads -Glass beads - Terracotta beads -Shell beads/ bone beads - Archeological evidences - Gem stone types described in Silappathikaram.

## UNIT IV

3 Hours

### AGRICULTURE AND IRRIGATION TECHNOLOGY

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoompu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries – Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.

## UNIT V

3 Hours

### SCIENTIFIC TAMIL & TAMIL COMPUTING

Development of Scientific Tamil - Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

**Total: 15 Hours**

## 22HS009      COCURRICULAR OR EXTRACURRICULAR ACTIVITY

### Course Objectives

- To develop Interpersonal and Leadership Skills.
- To Foster Personal Growth and Time Management.
- To enhance Community Engagement and Social Responsibility.

### Programme Outcomes (POs)

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

### Course Outcomes (COs)

1. Build leadership skills and teamwork capabilities by engaging in group activities through organization and participation of events
2. Demonstrate the technical, creative, and interpersonal skills through active participation in technical events.
3. Exhibit balanced academics with diverse cultural, sports, and literary activities, showcasing improved time management and organizational skills.
4. Enhance the social responsibility and community engagement by participating in outreach and extension activities.
5. Gain practical experience and industry insights through field visits, industrial training, and internships.

Every student shall be required to undergo a minimum of 40 hours of Co-curricular / Extracurricular activities organized through society chapters, technical and non-technical Club activities during the II semester, failing which he/she shall not be permitted to appear for the VIII Semester examination. Such students are permitted to appear for the Semester End examinations only after completing the requirements. The attendance of the courses/ events shall be maintained on the regular basis by the concerned Co-coordinators and made available in the Office of the Controller of Examinations before the commencement of Semester end examinations of Semester II.

The following co-curricular and extra-curricular activities are conducted on a regular basis and is compulsory for all students. The students' performances are assessed on the basis of their participation and organization of events in voluntary services, performance in technical and nontechnical events, games and sports, performance in literary activities, performance in cultural activities and their participation in District/Regional/State/National and International level events.

### **Co-Curricular activity**

Technical events organized through departments, Special labs, Clubs, Society and Chapters etc. includes but not limited to Workshop, Seminar, Conference, Symposium Technical Contest Competition, Field visit, Industrial Training, and Internships.

### **Extracurricular activity**

Non-Technical Events Organized through departments, Special labs, Clubs, Society and Chapters etc. includes but not limited to NSS Camp, NCC Camp, YRC activity, Yoga, Sports and games, Cultural events, Outreach activity and Extension activity.

**Total: 40 Hours**

**22AI301****PROBABILITY AND STATISTICS****3 1 0 4****Course Objectives**

- Understand the basic concepts of probability with characteristics and also two-dimensional random variables
- Learn how to formulate and test hypotheses about means, variances and proportions and to draw conclusions based on the results of statistical tests.
- Apply the concepts of probability and statistics in the field of Artificial Intelligence and Data Science.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Demonstrate and apply the basic probability axioms and concepts of random phenomena in the core areas
2. Execute the knowledge of solving two-dimensional random variables using correlation techniques.
3. Conclude on a particular scenario based on different types of hypothesis
4. Design an experimental analysis for one-way, two-way classifications and Latin square designs
5. Summarize the measurements and procedure for statistical quality control.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 3   | 3   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 2     | 2   | 3   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 3     | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 4     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 2   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****PROBABILITY AND RANDOM VARIABLES**

Introduction to probability concepts-Types of Events, axioms, theorems-Conditional probability-Multiplication theorem- Characteristics of random variables-Discrete case: Probability Mass function-Cumulative distribution function-Characteristics of random variables-Continuous case: Probability density function-Cumulative distribution function-Central and Raw Moments-Expectation-Variance-Moment generating function of discrete and continuous random variable.

**UNIT II**

**9 Hours**

**TWO - DIMENSIONAL RANDOM VARIABLES**

Joint Distributions-Marginal and Conditional Distributions- Covariance-Correlation and Linear Regression-Transformation of Random Variables-Central Limit Theorem (For Independent and Identically Distributed Random Variables).

**UNIT III**

**9 Hours**

**TESTING OF HYPOTHESIS**

Sampling Distributions-Estimation of Parameters-Statistical Hypothesis-Large sample test based on normal distribution for single mean and difference of means-Tests based on t - distribution- Chi-square and F distributions for mean, Variance and proportion-Contingency table (Test for independent)-goodness of fit.

**UNIT IV**

**9 Hours**

**DESIGN OF EXPERIMENTS**

One way and two way classifications-Completely randomized design-Randomized block design-Latin square design- 2 x 2 factorial design.

**UNIT V**

**9 Hours**

**STATISTICAL QUALITY CONTROL**

Control charts for measurements (X and R Charts)-Control charts for attributes (P, C and NP Charts)-Tolerance limits- Acceptance sampling

**Total: 45+15 = 60 Hours**

**22AI302 DATA STRUCTURES I**

**3 0 2 4**

**Course Objectives**

- Implement array and hash data structure for real world applications.
- Apply the different linear and non-linear data structures to problem solutions.
- Critically analyze the performance of various data structures using asymptotic notations.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement the array data structure and its types for searching and sorting operations.
2. Outline the algorithm efficiency with different asymptotic notations for optimizing the code.
3. Implement the linear node-based data structure for real world applications.
4. Evaluate the performance of Hash over arrays and list in memory access.
5. Analyze the tree traversal algorithms for various non-linear data structures.

**UNIT I****10 Hours****FOUNDATIONAL DATA STRUCTURES**

Algorithms and Data Structures - Data Structures hierarchy -Types of Data- Singular Data and Plural Data  
 - Position indexing: Array - Sets - Ordered Arrays - Searching over Arrays and Ordered Arrays.

**UNIT II****7 Hours****ALGORITHM EFFICIENCY**

Algorithm efficiency using Asymptotic Notations - Optimizing code with and without Big O Notation -  
 Optimizing for optimistic scenarios - Trade- offs between Time and Space.

**UNIT III****10 Hours****ADT AND NODE BASED DATA STRUCTURES**

ADT: Stacks - Queues - Recursion - Recursive Algorithms for Speed - Node Based Data Structures: Linked list - Need of Linked List - Arrays vs Linked List - Types of Linked List and its operations - Skip Lists.

**UNIT IV****8 Hours****FAST LOOKUP WITH HASH**

Hash Table - Hash functions - Internal implementation of Hash - Iteration over Hash - Hash operations -  
 Hash of Hash - Array of Hash - Hash of Array.

**UNIT V****10 Hours****TREES**

Tree - Binary Tree - Binary Search Tree - Tree traversal - AVL Tree - Red Black Tree - B Tree - B+ Tree  
 - Heap.

**EXPERIMENT 1****8 Hours**

Implement a python program for the supermarket application using Stack and Queue for basket storage and checkout respectively.

**EXPERIMENT 2****4 Hours**

Implement a python program for using a singly linked list. managing a train station and need to keep track of passengers on a particular train

**EXPERIMENT 3****4 Hours**

Create a python program that allows users to search for a person's phone number quickly in the phone directory.

#### **EXPERIMENT 4**

**2 Hours**

Implement a Python program to sort the student grades for the quiz competition.

#### **EXPERIMENT 5**

**2 Hours**

Implement a digital signature generator and verifier using hash functions and public-key cryptography. Users can sign documents and verify the authenticity of signed documents.

#### **EXPERIMENT 6**

**10 Hours**

Implement a python program to give a direction for a Stranger. Landmark will be considered as a node and the path between the two landmark is the link.

**Total:45+30 = 75 Hours**

22AI303

**COMPUTER ORGANIZATION AND  
ARCHITECTURE**

3 1 0 4

**Course Objectives**

- Understand the computer architecture concepts related to design of processors, memory management and I/O system.
- Explore the GPU computing architecture and develop an environment for creating high performance GPU-accelerated applications using CUDA programming.
- Gain knowledge on modern processor architecture to design the best processor/computing system.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Analyze the processor architecture and instruction sets of x86/x64 and ARM architecture.
2. Design a data path for a simple processor and compare the various techniques related to simultaneous execution of multiple instructions from a program.
3. Organize the computer memory to speed up the performance and facilitate the transfer of data between the computer's central processing unit and the external devices.
4. Analyze the GPU computing architecture and develop applications to run on NVIDIA GPUs using the CUDA programming environment.
5. Analyze the modern processor architectures and instruction sets and implement a RISC-V processor in a low-cost FPGA board.

**UNIT I****9 Hours****UNDERSTANDING PROCESSOR ARCHITECTURE AND INSTRUCTION SETS**

Basic Computer Organization and Design - Instruction Set principles - x86 and x64 architecture & instruction sets - 32 bit and 64 bit ARM architecture & instruction sets.

**UNIT II****9 Hours****PROCESSOR DESIGN**

Designing a Data path for a Simple Processor - DLX Pipeline - Super Pipelining - Super scalar processor - Instruction level parallelism (ILP) - Speculative Execution - Side channel attack (Spectre and Meltdown)

**UNIT III****9 Hours****MEMORY UNIT AND I/O ORGANIZATION**

Memory Hierarchy - Cache Architectures - Levels in Cache - Improving Cache Performance - Memory Prefetch - Tera MTA - Connecting I/O Devices to the Processor.

**UNIT IV****8 Hours****EXPLORING GPU ARCHITECTURE**

GPU Vs CPU architecture - GPU Architecture Basics - NVIDIA's CUDA Toolkit - CUDA Programming.

**UNIT V****10 Hours****MODERN COMPUTER ARCHITECTURE**

Domain-Specific Computer Architectures - Sony PlayStation design PS3/PS5, MAC M1 chip, Xbox, Cerebras - Wafer Scale Computing, Accelerators (FPGA, ASIC) - RISC-V Architecture and Instruction Set - Implementing RISC-V in a field-programmable gate array (FPGA).

**PRINCIPLES OF PROGRAMMING  
LANGUAGES**

3 0 2 4

**Course Objectives**

- Understand the history and evolution of programming language.
- Gain knowledge about the different data types and control flow statements.
- Impart knowledge about the subprograms, functions, debugging and error handling mechanisms.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Outline the programming paradigms and the basic structure of programming language.
2. Assess the implementation of different types of data, variable and types system.
3. Analyze suitable conditional statements and control structures for real world applications.
4. Develop programs using subprograms and explore their types for problem solving.
5. Determine the tools for error handling and event handling in Programming.

**Articulation Matrix**

**UNIT I****8 Hours****UNDERSTANDING PROGRAMMING PARADIGMS**

Natural Vs Artificial language - Common Programming Paradigms - Syntax and semantics - Language Evaluation Criteria - Programming Language Grammar.

**UNIT II****10 Hours****VARIABLES AND DATA TYPES**

Variable Declarations - Guidelines for Initializing Variables - Power of Variable names - Fundamental Data types - Type Systems - Type Inference and Polymorphism.

**UNIT III****10 Hours****STATEMENTS**

Expressions and Assignment statements - Organizing straight-line code - Using conditionals - Controlling loops - Unusual control structures - General control issues.

**UNIT IV****9 Hours****SUBPROGRAMS**

Fundamentals of Subprograms - Design issues - Parameter passing methods - Overloaded subprograms - Generic subprograms - Implementing subprograms.

**UNIT V****8 Hours****DEBUGGING AND ERROR HANDLING**

Debugging - Debugging Strategies - Debugging Tools - Error Messages - Documentation - Test cases - Debugging with print statements - Debugging with comments and questions - Exception handling and Event handling.

**EXPERIMENT 1****6 Hours**

Develop an application to implement online shopping cart and generate bill for the purchased products.

**EXPERIMENT 2****3 Hours**

Develop an application to manage an inventory of products for grocery stores.

**EXPERIMENT 3****3 Hours**

Create an application program that helps a user decide on their next vacation destination based on their preferences.

**EXPERIMENT 4**

**3 Hours**

Develop an application for temperature monitoring system and provide an alert message.

**EXPERIMENT 5**

**3 Hours**

Develop an access control system that simulates the granting access to authorized personnel based on their credentials, such as ID cards and PIN codes.

**EXPERIMENT 6**

**6 Hours**

Design a math quiz generator that generates questions of various difficulty levels and arithmetic operations.

**EXPERIMENT 7**

**6 Hours**

Build a maze solver application that finds a path from the entrance to the exit of a maze.

**Total: 45+30 = 75 Hours**

SOFTWARE ENGINEERING

3 0 0 3

### Course Objectives

- Understand the systematic approach related to the design, development and maintenance of a software system
- Analyze the limitations of manual testing process and provide a succinct summary of those limitations with the help of automated testing tools.
- Understand the Enterprise Architecture (EA) framework that provides the building blocks for successful digital business transformation.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the software development methodologies to various real-life scenarios.
2. Apply modern tools and techniques to develop scalable, maintainable, and reliable software systems.
3. Analyze the coding strategies and techniques to write well-structured, efficient, and error-free code.
4. Apply specific modern testing tools to ensure the quality and reliability of software products.
5. Analyze the elements, structure, and positioning of an Enterprise Architecture framework used for successful digital business transformation.

**UNIT I****9 Hours****SOFTWARE DEVELOPMENT PROCESS**

Phases in Software Development - Traditional Software Development Models - Agile Methodologies - Agile Scaling Frameworks - Lean Software Development - Software Requirements Specification (SRS) - Project Scheduling and Estimation.

**UNIT II****10 Hours****TOOLS AND TECHNIQUES FOR SOFTWARE DEVELOPMENT**

DevOps - Version control with Git - Containerization Using Docker and Kubernetes- Application Performance Monitoring (APM) - Continuous Integration Continuous deployment (CICD) - Clean Room build.

**UNIT III****9 Hours****CODE QUALITY**

Software Metaphors - Upstream Prerequisites - Key Construction Decisions - Defensive Programming - Code Tuning Strategies and Techniques.

**UNIT IV****9 Hours****TESTING**

Writing good test cases - Test driven development - Test Automation - Testing using Selenium tool - Continuous Testing - Exploratory Testing - Testing in Agile and DevOps Environments.

**UNIT V****8 Hours****ENTERPRISE ARCHITECTURE AND MODELING**

Enterprise Architecture (EA) in Digital Transformation - Agility in Digital Business - Measuring EA: Metrics, KPIs and Risks.

**Total: 45 Hours**

**22HS004****HUMAN VALUES AND ETHICS****2002****Course Objectives**

- Understand the concept of good values and comprehend the importance of value-based living.
- Recognize the culture of peace through education.
- Identify and apply the practices for value development and clarification.

**Programme Outcomes (POs)**

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Understand the importance of human values and ethics in life.
2. Execute the importance of harmonious living in a diverse society.
3. Analyze the sensitivity to the crying needs of society such as ungodliness, corruption, poverty, and suffering, and play a vital role in eradicating them.
4. Plan intellectually mature, morally upright, ethically correct, and spiritually inspired decisions.
5. Execute a correct balance between professional excellence and social commitment.

| 3     | -   | -   | -   | -   | -   | -   | -   | 3   | 2   | 1    | -    | -    | 1    | 1    |
| 4     | -   | -   | -   | -   | -   | -   | -   | 3   | 2   | 1    | -    | -    | 1    | 1    |
| 5     | -   | -   | -   | -   | -   | -   | -   | 3   | 2   | 1    | -    | -    | 1    | 1    |

**UNIT I****6 Hours****COURSE INTRODUCTION - NEED, BASIC GUIDELINES AND ANALYSIS**

Importance of Human Values & Ethics in 21st Century - Understanding the theory of basic human values and ethics Openness to change -Self enhancement -Conservation -Self transcendence - Schwartz Value Survey: Self-Assessment

**UNIT II** **6 Hours**

**EMBRACING THE COMMON ETIQUETTE**

Altruism- Integrity-Freedom-Justice-Honesty-Truthfulness-Responsibility-Compassion

**UNIT III** **6 Hours**

**CONTINUOUS HAPPINESS AND PROSPERITY**

An overview on basic Human Aspirations- Understanding and living in harmony at various levels of life- Embracing self-love and wellness-Understanding harmony in the family and society

**UNIT IV** **6 Hours**

**UNIVERSAL HUMAN VALUES AND PROFESSIONAL ETHICS**

Reflection on growing global multifold problems: poverty, pollution, hunger, disease, unemployment, caste system, child labour, gender equality, politics and violence. Understanding the challenges in cultural, personal, social, political, and economic environment

**UNIT V** **6 Hours**

**UNDERSTANDING HARMONY IN THE NATURE AND EXISTENCE - WHOLE EXISTENCE AS CO-EXISTENCE**

Understanding the harmony in the Nature- Holistic perception of harmony at all levels of existence- Practice Exercises and Case Studies will be taken up in Practice Sessions.

**Total: 30 Hours**

**22HS005****SOFT SKILLS AND EFFECTIVE  
COMMUNICATION****0 0 2 1****Course Objectives**

- Communicate proficiently in formal discussions at the workplace.
- Describe experiences and events, and briefly give reasons and explanations for opinions and plans.
- Interact with a degree of fluency and spontaneity that results in efficacious communication.
- Convey agreement and disagreement in a polite but firm manner.
- Communicate with coherence and imagination in both written and spoken formats.

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Enhance confidence in expressing thoughts in grammatically proper language and etiquette in waiting for the opportunity to provide input.
2. Effectively communicate in English on formal occasions and proficiency in the use of link words and other discourse markers.
3. Provide constructive feedback and file logical complaints.
4. Analyse the understanding of oral and written communication in real-world situations.
5. Apply the improved spelling and punctuation in writing and heightened understanding of tone, pitch and stress in oral formats.

| 4     | -   | -   | -   | -   | -   | -   | -   | -   | 2   | 3    | -    | -    | 1    | 1    |
| 5     | -   | -   | -   | -   | -   | -   | -   | -   | 2   | 3    | -    | -    | -    | -    |

**UNIT I**

**10 Hours**

**SELF-EXPRESSION**

Group discussion/ Peer discussion - Communicating decisions and opinions - Tone, Pitch, Stress - Agreeing, Disagreeing, Suggesting, Speculating - Comparing and Contrasting - Comparatives and Superlatives - Discourse markers – Interjections - Decision making - Synthesis - Higher order thinking  
Group discussion/Peer discussion - Effective Communication Types of communication - Written vs Spoken - Contractions Intonation Stress Active voice - Question tags - Confidence and body language  
Guided writing- Outlining Main Points - Group discussion/Peer discussion - Avoiding common errors  
Reduction of MTI - Common errors - Barriers to communication Accent

**UNIT II**

**10 Hours**

**CREATIVE EXPRESSION**

JAM, Debate, Review writing, Social media posts Synonyms - Antonyms Cloze test Phrasal verbs spotting errors Collocation - Commonly mispronounced

**UNIT III**

**10 Hours**

**FORMAL EXPRESSION**

Writing: Giving written feedback, Review writing, and Letter of complaint. Speaking: Giving constructive feedback and offering suggestions, asking for inputs, commenting politely on appropriate phrases - Giving written feedback, Review writing, and Letter of complaint. Critical reasoning - Modal verbs - Polite ways to express negatives

**22AI401****APPLIED LINEAR ALGEBRA****3 1 0 4****Course Objectives**

- Understand the basic concepts of Matrices, Eigen values, Eigenvectors and their Decomposition techniques to solve the given system.
- Analyze the system of vectors by different vector space and Inner product space techniques.
- Apply the concepts of linear algebra in the field of Artificial Intelligence and Data Science.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Demonstrate the characteristics of matrices and determinants and apply them in computer engineering.
2. Analyze the characteristics of a linear system with Eigenvalues and Eigenvectors.
3. Exemplify the various matrix decomposition techniques to solve the given system.
4. Analyze the linear dependence and compute the basis and dimension of vector spaces.
5. Analyze the systems through the techniques of inner product space.

**UNIT I****9 Hours****MATRICES**

Types of matrices- Matrix operations -Determinants-Orthogonal Matrices-Block Matrices-Rank of a matrix-Solution of Linear system: Matrix inversion method-Rank Method-Consistency of system.

**UNIT II****9 Hours****DIAGONALIZATION**

Characteristics equation (including Block matrices)-Cayley- Hamilton Theorem-Diagonalization-Algebraic and Geometric Multiplicity-Minimal polynomial (including Block matrices)-Characteristic and minimal polynomial of Block Matrices-Iterative method: Eigen values and Eigen vectors by power method.

**UNIT III**

**9 Hours**

**MATRIX DECOMPOSITIONS**

Nature of Matrices-Echelon Matrices-Row canonical form-Gauss elimination method-Gauss Jordan Method-Single value decomposition -LU decomposition.

**UNIT IV**

**9 Hours**

**VECTOR SPACES**

Vector spaces-subspaces-Linear Combinations-Spanning Sets-Linear dependence and independence -Basis and Dimensions -Rank and nullity.

**UNIT V**

**9 Hours**

**INNER PRODUCT SPACES**

Inner product spaces-Vector norms -Cauchy -Schwarz inequality -Orthogonality-Gram -Schmidt orthogonalization -QR decomposition.

**Total: 45+15 = 60 Hours**

22AI402

DATA STRUCTURES II

3 0 2 4

### Course Objectives

- Understand and use the various major modern data structures like Trie, Rope, Segment tree and Octree.
- Apply the graph data structure and tree traversal algorithms for solving real time problems.
- Analyze the performance of algorithm design techniques with different data structures.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Implement the Trie data structure and its basic search operations.
2. Outline the traversal algorithm and its types with graph data structure.
3. Implement Minimum Spanning tree algorithms and analyze their performance.
4. Design and implement different problems using the backtracking and branch and bound techniques and analyze the time complexities of them.
5. Implement modern data structures like Segment tree, Quadtree and Octree for real world applications.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****TRIE DATA STRUCTURES**

Trie Structure - Types - Prefix-Based Search - Space Efficiency - Time Complexity - Compact Tries - Applications - Suffix Array and Suffix Tree - Rope.

**UNIT II****9 Hours****GRAPH**

Graph representation - Breadth-first traversal - Depth-first traversal - Shortest Path Algorithms: Unweighted Shortest Paths - Dijkstra's Algorithm - Travelling Salesman Problem - Analysis of shortest path algorithms.

**UNIT III****9 Hours****GRAPH MST**

Minimum Spanning Tree: Prim's Algorithm - Kruskal's Algorithm- Disjoint-Set Union (Union-Find) - A\* algorithm - Flood filling algorithm - Analysis of MST algorithms.

**UNIT IV****9 Hours****ALGORITHM DESIGN TECHNIQUES**

NP Complete problems- Backtracking: N-Queens Problem and Subset-Sum problem - Branch and bound: Knapsack problem - Approximation algorithms for NP hard problems: Traveling salesman - P, NP, NP-Complete and NP-Hard Problems.

**UNIT V****9 Hours****MODERN DATA STRUCTURES**

Segment Tree - Interval Tree - Fenwick Tree - K-D Tree - Quadtree and Octree - Circular Buffer (Ring Buffer) - Marshalling / Unmarshalling - JSON - benefits - Schema - limitations - Protobuf.

**EXPERIMENT 1****4 Hours**

Implement a trie data structure to efficiently support autocomplete suggestions based on user input in google docs.

**EXPERIMENT 2****5 Hours**

Implement an algorithm to find the shortest route and travel time between two locations within a city's transportation network.

**EXPERIMENT 3****6 Hours**

Design a cost-efficient telecommunication network to connect multiple cities using Kruskal's algorithm

**EXPERIMENT 4****5 Hours**

Implement a chess game application using backtracking.

**EXPERIMENT 5**

**5 Hours**

Implement Segment Tree for Range Sum Query in a Real-time Data Analytics Platform for student management system.

**EXPERIMENT 6**

**5 Hours**

Implement a geographic information system (GIS) for locating a city as node using quadtree.

**Total: 45+30 = 75 Hours**

OPERATING SYSTEMS

3 1 0 4

### Course Objectives

- Establish a solid foundation in the introductory concepts of operating systems and gain insights into the structures, services, and roles of operating systems in computing environments.
- To apply process scheduling algorithms in a multi-programming environment and implement the various deadlock strategies effectively to prevent each other from accessing the computer resources
- To gain knowledge on the operations of memory management and File management.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze the basic structure and architectural components of the operating system and interpret how application programs interact with the operating system through APIs.
2. Apply the various scheduling algorithms and synchronization techniques to achieve better performance of a computer system.
3. Analyze memory allocation and deallocation mechanisms involved in memory management for a specific system.
4. Apply the various file handling strategies to manage files on a secondary storage structure and in a distributed environment.
5. Analyze the virtualization technologies and their types to simulate hardware functionality and create a virtual computer system.

**UNIT I****8 Hours****INTRODUCTION TO OPERATING SYSTEMS**

Basic Operating System Concepts - Operating System Structure and Components - Operating System Services and Interfaces - Role of the Kernel and User Space - System calls and System Programs - Open Source and Closed source operating systems.

**UNIT II****12 Hours****PROCESS MANAGEMENT**

Processes and Threads - Process Scheduling and CPU Scheduling Algorithms - Process Synchronization and Concurrency Control - Deadlocks and Handling Strategies - Inter-Process Communication (IPC) - Multi-Core and Multi-Processor Management

**UNIT III****9 Hours****MEMORY MANAGEMENT**

Memory Hierarchy - Address Spaces and Memory Allocation - Paging and Segmentation - Page Replacement Algorithms - NUMA (Non-Uniform Memory Access) - Memory Compression - Memory Tiering.

**UNIT IV****8 Hours****FILE SYSTEM DESIGN AND IMPROVEMENTS**

File System Structures - Storage Technologies - SSD and Flash Storage Optimization - Copy-on-Write (CoW) File Systems - File System Journaling - Distributed File Systems and Cloud Storage - File System Monitoring and Analytics.

**UNIT V**

**8 Hours**

**VIRTUALIZATION AND RECENT DEVELOPMENTS**

Virtualization Principles and Types (Hardware, Software, Network, Storage) - Hypervisors and Virtual Machine Monitors - Microkernels and Exokernels - Security and Integrity in Virtualized Environments - Security in Operating Systems - Operating Systems for Quantum Computers - Cross-Platform Compatibility.

**Total: 45+15 = 60 Hours**

**WEB TECHNOLOGY AND FRAMEWORKS**

**2023**

### **Course Objectives**

- Understand the Web Application Architectures and trace the evolution of the web and introduce concepts like Web 3.0 and Decentralized Web.
- Familiar with the different Web development Frameworks and Full stack development.
- Explore the emerging web technologies and implement best practices for making web applications accessible to all users

### **Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### **Course Outcomes (COs)**

1. Analyze the architecture of various web applications and develop simple use cases for the real time web applications
2. Implement web applications using client-side scripting language and server-side scripting languages.
3. Integrate the web applications with databases using Web frameworks.
4. Develop a complete, functional web application that incorporates both front-end and back-end components.
5. Implement the emerging web technologies in web application development projects.

**Articulation Matrix**

**UNIT I****5 Hours****INTRODUCTION TO WEB APPLICATIONS**

Evolution of the web - Understanding Web Application Architectures: Server Side Rendered Applications- Single Page Application (SPA) - Mobile Application Development – Comparison of Monolithic and Microservice architectures - Serverless computing - HTTP Protocol and Methods - Web Browsers and Rendering Engines - Use cases of various web applications, including Flipkart, BIT Discourse, BIP, Wiki and Moodle.

**UNIT II****7 Hours****SCRIPTING LANGUAGES**

Client-side Scripting vs Server-Side Scripting - Client-side Scripting: Execution Location - Languages: JavaScript Fundamentals - Document Object Model (DOM).

Server-Side Scripting: Execution Location - Language(s) - PHP Programming fundamentals.

**UNIT III****6 Hours****WEB DEVELOPMENT FRAMEWORKS**

Introduction to Web Development Frameworks - MVC Architecture - Building APIs with a Framework - RESTful APIs and API Design - Building a RESTful API - Database Integration with ORM/ODM - Building a Basic Front-End Application.

**UNIT IV****6 Hours****FULL STACK DEVELOPMENT**

Full-Stack Development - Combining Front-End and Back-End Technologies - Building a Full-Stack Web Application- 12 factor application model - Deployment and Hosting Options - Continuous Integration and Continuous Deployment (CI/CD) - Performance Optimization and Scalability.

**UNIT V****6 Hours****EMERGING WEB TECHNOLOGIES**

Emerging Web Technologies: Progressive Web Apps (PWAs) – Web Assembly and WebRTC - Web Security Best Practices – Open Web Application Security Project (OWASP) - Web Accessibility and Inclusive Design - Web Performance Optimization.

**EXPERIMENT 1****6 Hours**

Create a Multipage Website that serves as a personal portfolio using the browser's developer tools and CSS to enhance the web page.

**EXPERIMENT 2****3 Hours**

Implement an animated web application for Rock, Paper, Scissors game to handle input validation ensuring that the user's choice is one of Rock, Paper, or Scissors.

**EXPERIMENT 3**

**3 Hours**

Create a simple inventory management system to generate QR code for each product thereby allowing user validation using PHP.

**EXPERIMENT 4**

**3 Hours**

Develop a secure online banking system using a server-side framework like Flask, Django, or Ruby to avoid risk to financial systems.

**EXPERIMENT 5**

**6 Hours**

Develop a Full Stack Web Application for task management system in a Corporate Environment for tracking project progress and streamlining work assignments.

**EXPERIMENT 6**

**5 Hours**

Create a RESTful API for an online store used to manage different products using Node.js or Express.

**EXPERIMENT 7**

**4 Hours**

Develop a real-time chat application with a continuous integration and continuous deployment (CI/CD) pipeline and set up monitoring to ensure optimal performance.

**Total: 30+30 = 60 Hours**

DATABASE MANAGEMENT SYSTEM

3 0 2 4

### Course Objectives

- Analyze the data models, conceptualize and design a database system using E-R diagrams.
- Gain knowledge on the design principles of relational and modern database systems like SQL, NoSQL and NewSQL.
- Impart knowledge in transaction processing, concurrency control and recovery techniques.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Analyze the data models and the types of data used in databases.
2. Implement SQL queries for creating databases and performing the relational operations.
3. Apply the normalization theory in relational databases for removing anomalies.
4. Analyze the basic issues of transaction processing, concurrency control, deadlock and its recovery schemes.
5. Analyze the performance of NoSQL and NewSQL databases related to design.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 2   | 2   | 2   | 2   | 2   | -   | -   | -   | -   | -    | 2    | 2    | 2    | 2    |
| 2     | 2   | 2   | 2   | 2   | 2   | -   | -   | -   | -   | -    | 2    | 2    | 2    | 3    |

| 4     | 3   | 3   | 3   | 3   | 2   | -   | -   | -   | -   | -    | 3    | 3    | 2    | 3    |
| 5     | 3   | 2   | 3   | 3   | 3   | -   | -   | -   | -   | -    | 3    | 3    | 2    | 3    |

**UNIT I****8 Hours****INTRODUCTION TO DATABASES AND DBMS**

Understanding Data and Information - Database vs DBMS - Modern Databases - DBMS Architecture and Components - Data Models - Relational Model - Codd's 12 Rules - Object-Relational Mapping (ORM).

**UNIT II****10 Hours****STRUCTURED QUERY LANGUAGE (SQL)**

SQL Basic Commands - Constraints - Database Objects - SQL Functions - Subqueries- Correlated Subqueries- Nested subqueries - Recursive queries - Common Table Expressions (CTEs) - Triggers and Stored procedures.

**UNIT III****9 Hours****DATABASE DESIGN AND NORMALIZATION**

Database Design fundamentals - Entity-Relationship Diagrams (ERD) - ERD to tables - Functional Dependencies and Normal Forms: 1NF, 2 NF, 3 NF, BCNF, 4 NF, 5NF and 6 NF - Domain-Key Normal Form (DKNF) - Nested Normal Form (NNF) - Denormalization and Trade-offs - Emerging trends in Database Design - Dealing with real-world complexities in Database Design- CASE Tools for Database Design.

**UNIT IV****9 Hours****QUERY OPTIMIZATION AND TRANSACTION MANAGEMENT**

Query Optimization and Execution Plans -Optimization Visualization Tool - DB Sharding - Vitess – Vitess vs MySQL- Table partitioning - Transaction Management and ACID Properties - Concurrency Control: Lock based protocols -Deadlock handling – Multi version concurrency control (MVCC) - Transaction isolation.

**UNIT V****9 Hours****NOSQL AND NEWSQL DATABASES**

NoSQL Vs NewSQL- NoSQL Databases: MongoDB and Cassandra - NewSQL databases: Redis and NuoDB -Selection of NoSQL or NewSQL over RDBMS - CAP Theorem and BASE Properties - HeidiSQL - In-Memory Databases and Caching - Database Security and Encryption - Database Performance Tuning

**EXPERIMENT 1****4 Hours**

Create a relational database with tables for storing employee details and perform CRUD operations.

**EXPERIMENT 2****5 Hours**

Create a relational database for e-commerce applications and add primary key, foreign key, check constraints and triggers.

**EXPERIMENT 3****4 Hours**

Create an ER diagram for the library management system and implement the database schema in RDBMS.

**EXPERIMENT 4** **4 Hours**  
Create a MongoDB database for an event management system.

**EXPERIMENT 5** **4 Hours**  
Design a distributed database for an e-commerce platform to handle order processing.

**EXPERIMENT 6** **4 Hours**  
Develop an in-memory caching solution using Redis for a content publishing platform (Blog).

**EXPERIMENT 7** **5 Hours**  
Develop a secure RDBMS solution for a banking financial transactions system.

**Total: 45+30 = 75 Hours**

ENVIRONMENTAL SCIENCE

2 0 0 0

**Course Objectives**

- Understand the interdisciplinary and holistic nature of the environment
- Identify the significance of natural resources and environment on the quality of life and stimulate the quest for sustainable development
- Assess the socio-economic, political and ethical issues in environmental science

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Apply principles of natural resource management to analyze exploitation cases in forestry, water, minerals, and agricultural sectors, assessing their environmental impacts.
2. Analyze the different types of ecosystems and biodiversity, its values and also role of professionals in protecting the environment from degradation.
3. Analyze the existing environmental challenges related to pollution and its management.
4. Select suitable strategies for sustainable management of components of environmental science.
5. Analyze the impact of population and human activities on environment.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 1   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 2     | 1   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 3     | 2   | 2   | -   | -   | -   | -   | 1   | -   | -   | -    | -    | -    | -    | -    |
| 4     | 1   | -   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 2   | -   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****6 Hours****NATURAL RESOURCES**

Forest resources: Use - over exploitation - deforestation - case studies. Water resources: Use - over utilization of surface and ground water - conflicts over water. Mineral resources: Use - exploitation - environmental effects of extracting and using mineral resources - case studies. Food resources: Effects of modern agriculture - fertilizer-pesticide problems (eutrophication, blue baby syndrome, biomagnification). Energy resources: renewable (solar, wind, and hydro).

## UNIT II

6 Hours

### ECOSYSTEMS AND BIODIVERSITY

Concept of an ecosystem: Structure and function of an ecosystem - producers - consumers - decomposers - food chains - food webs and ecological pyramids - Types of ecosystem: Introduction - characteristic features: desert ecosystem. Biodiversity - value of biodiversity - threats to biodiversity - endangered and endemic species - Conservation of biodiversity: In-situ and ex-situ conservation of biodiversity.

## UNIT III

6 Hours

### ENVIRONMENTAL POLLUTION

Pollution: Definition - causes - effects - control measures of air pollution - water pollution: (Sewage water treatment by activated sludge and trickling filter process) - noise pollution- thermal pollution. Disaster management: causes - effects - control measures of floods - earthquake

## UNIT IV

7 Hours

### SOCIAL ISSUES AND ENVIRONMENT

Sustainable development : Definition - Unsustainable to sustainable development - solid waste management - causes - effects - 5R Principles (landfills, incineration, composting). Water conservation - rain water harvesting - watershed management. Climate change - global warming - acid rain - ozone layer depletion. E-waste

## UNIT V

5 Hours

### HUMAN POPULATION AND ENVIRONMENT

Human population: Population growth - characteristics - variation among nations - population explosion - value education - HIV / AIDS. Role of information technology in environment and human health - occupational safety and health administration (OSHA)

**Total: 30 Hours**

**22HS008    ADVANCED ENGLISH AND TECHNICAL  
EXPRESSION**

**0 0 2 1**

**Course Objectives**

- To enable students to achieve proficiency in academic writing
- Effectively use the language to persuade others
- Appreciate the nuances of the language and engage an audience
- Use advanced tools of language to improve communicative competence
- Prepare for professional demands at the workplace
- Give concrete expression to the plans and goals

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Infer the clarity in articulating the objectives and aims and improved proficiency in using the English language.
2. Communicate effectively and with good interpersonal skills; speak in public, engage the audience, and lead a group discussion.
3. Critically evaluate the ethics of persuasive appeals and confidence to influence opinion.
4. Analyse a specific piece of information; take in what is read, and use good writing techniques with proper grammar and syntax in all formal situations.
5. Create awareness and empathy to emotional signals in communication.

**Articulation Matrix**

## UNIT I

15 Hours

### CREATIVE EXPRESSION

Proposals & Grant applications, Argumentative essays & editorials, Sales Pitches, Campaigning, Commercials/advertisements, effectively answering the famous interview question: 'Why should we hire you?' Sentence and paragraph formation - Rhetorical questions - Emphasis & effective repetition - Empathetic expression, knowing the audience, capturing attention - Creating Memes, Comic Strips, Stand-up comedy, Caption writing, and Limericks, Vocabulary and slang words for comedy - Similes & Metaphors - Homophones, homonyms, alliteration, wordplay

## UNIT II

15 Hours

### FORMAL EXPRESSION

Writing: Action plans, Cover letters, Mind-Mapping, Paragraph writing Logical reasoning - SVA - Advanced level - Style: Clarity, Concision, Coherence, Evocativeness, Efficacious Vocabulary - Conditional Clause - Be verbs- Tenses- advanced - Opening and closing sentences - Action plans, Anecdotal references, order of communication/ narration, complete communication- Wh-questions - Effective beginning and closing - Rhetorical questions - Appraising target audience - Pronunciation, Enunciation, Tone, Pace and Volume. - Writing: SOPs, Research Objectives, Thesis Statement, Indexing, Scholarly Articles, Academic Writing, Executive Summary, Survey Questionnaires, Citations and Bibliography - Reading: Quantitative & qualitative analysis, Analysis and paraphrasing of reference materials Speaking: Commentate live events, give instructions to operate machines/ conduct experiments Listening: Informational listening, Reflective listening, - Discriminative listening - Connective words - Prefixes and Suffixes - Quoting and paraphrasing Proofreading - Directed writing and writing formats - Note taking - Active verbs

**Total: 30 Hours**

**22HS010**

**SOCIALLY RELEVANT PROJECT**

**Course Objectives**

- To develop Problem-Solving Skills.
- To enhance Research and Analytical Abilities.
- To promote Social Responsibility and Ethical Awareness.

**Programme Outcomes (POs)**

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Interact with society conduct a field surveys and identify societal issues.
2. Analyze societal problems using engineering principles.
3. Develop plan and provide optimal solutions for social issues using their engineering knowledge and skills.
4. Prepare comprehensive reports on their findings and proposed solutions.
5. Enhance the social responsibility and ethical considerations in engineering.
6. Develop community interaction and managerial skills.

Students have to interact with society, conduct a field survey and identify the issues / problems available in the society. Analyze the issues using engineering knowledge, skills and attitude and provide the optimal solutions to solve the social issues and submit the report.

**Total: 40 Hours**

22AI501

ARTIFICIAL INTELLIGENCE

3 0 2 4

**Course Objectives**

- To understand the fundamental concepts of artificial intelligence.
- To impart the different paradigms in knowledge representation and reasoning.
- To determine the problems to solve using artificial intelligence and machine learning.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply intelligent agent concepts and search strategies to solve problems efficiently.
2. Utilize informed search techniques and constraint satisfaction methods for optimization and decision-making.
3. Implement knowledge representation techniques using first-order logic and inference mechanisms.
4. Develop AI-based planning solutions using state-space search, planning graphs, and hierarchical task planning.
5. Analyze various machine learning techniques, including decision trees, ensemble learning, and AI governance principles.

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Intelligent Agents - Agents and environments - good behavior - The nature of environments - Structure of agents - Problem Solving - Problem solving agents- Uniformed search strategies - Avoiding repeated states-Searching with partial information.

## **UNIT II**

**9 Hours**

### **SEARCHING TECHNIQUES**

Informed search and exploration - Informed search strategies - heuristic function - Local search algorithms and optimization problems- Local search in continuous spaces - Online search agents and unknown environments -Constraint satisfaction problems (CSP)-Backtracking search and Local search for CSP

## **UNIT III**

**9 Hours**

### **KNOWLEDGE REPRESENTATION**

First order logic - Representation revisited - Syntax and semantics for first order logic - Using first order logic -Knowledge engineering in first order logic - Inference in First order logic - Propositional versus first order logic - Unification and lifting - Forward chaining - Backward Chaining-Ontological Engineering

## **UNIT IV**

**9 Hours**

### **PLANNING**

Planning problem- Planning with state space search - Partial order planning - Planning graphs - Planning with proportional logic - Time, Schedules, and Resources - Hierarchical task Planning - Conditional Planning - Execution monitoring and re planning-Continuous planning

## **UNIT V**

**9 Hours**

### **LEARNING**

Learning from observations - forms of learning - Inductive learning - Learning decision trees - Ensemble learning - Knowledge in learning - Logical formulation of learning - Explanation based learning - Learning using relevant information-Statistical Learning Methods-AI Governance

### **EXPERIMENT 1**

**4 Hours**

Using logic programming, develop a map coloring problem to highlight regions with promotional offers or discounts in a travel web page.

### **EXPERIMENT 2**

**4 Hours**

Develop a program for Solving the Farmer, the Wolf, the Goat, and the Cabbage Puzzle Using Logic Programming

### **EXPERIMENT 3**

**4 Hours**

Develop a program to generate a valid Sudoku puzzle using a metaheuristic search.

### **EXPERIMENT 4**

**6 Hours**

Develop a bot application to receive traffic assistance and route recommendations in mobile apps.

### **EXPERIMENT 5**

**6 Hours**

Implement a program for applying Bayes' Inference Rule to identify Disease Diagnosis Based on Test Results.

### **EXPERIMENT 6**

**6 Hours**

Develop a program for predicting Student Course Success Based on Attendance and Participation using Bayesian Belief Network.

**Total: 45+30 = 75 Hours**

COMPUTER NETWORKS

3 0 2 4

**Course Objectives**

- To understand the division of network functionality into layers and to familiarize the functions and protocols of each layer of TCP/IP protocol suite.
- To understand the components required to build different types of networks and to learn concepts related to network addressing.
- To understand the flow of information from one node to another node in the network and to learn the application layer utilities.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**Course Outcomes (COs)**

1. Apply OSI model with TCP/IP protocol suite and design a network based on four different topologies.
2. Apply and analyze error and flow control algorithms for communication between adjacent nodes in a network.
3. Evaluate and apply the suitable routing algorithms for the given network.
4. Evaluate a client/server application using TCP/UDP and design algorithms for end-end communication.
5. Create the capabilities of application layer utilities and replicate the same for new applications.

**Articulation matrix:**

**UNIT I** **9 Hours**

**DATA COMMUNICATIONS**

Introduction: Data Communications, Networks, Network Types, Protocol Layering, TCP/IP Protocol Suite, OSI Model - Physical Layer: Introduction to Physical Layer - Transmission Media: Guided Media, Unguided Media.

**UNIT II** **9 Hours**

**DATA LINK LAYER**

Introduction to Data Link Layer: Link Layer Addressing - Error Detection and Correction: Block Coding, Cyclic Codes, Checksum, Forward Error Correction - Data Link Control: DLC services, Data-Link Layer Protocols, HDLC, Point-to-Point Protocol - Media Access Control: Random Access and Controlled Access

**UNIT III** **9 Hours**

**NETWORK LAYER**

Network Layer Services - Packet Switching - IPV4 Addresses - Forwarding of IP Packets - Network Layer Protocols: IP, ICMPv4 - Routing Algorithms- Unicast Routing Protocols - Next Generation IP: IPv6 Addressing, IPv6 Protocol.

**UNIT IV** **9 Hours**

**TRANSPORT LAYER**

Introduction to Transport Layer: Simple Protocol, Stop-and-Wait Protocol, Go-Back-N Protocol, Selective Repeat Protocol, Bidirectional Protocols: Piggybacking - User Datagram Protocol - Transmission Control Protocol - Congestion Control.

**UNIT V** **9 Hours**

**APPLICATION LAYER**

Client Server Programming - WWW - HTTP - FTP - DNS – SNMP - DHCP.

**EXPERIMENT 1** **5 Hours**

Design a Local area network for organization of 5 laboratories with interdepartmental connectivity and show the simulated output.

**EXPERIMENT 2** **5 Hours**

Implement Cyclic Redundancy Check and Checksum algorithms to detect and correct errors while transferring files (.jpeg, .txt, .csv) over unreliable networks.

**EXPERIMENT 3** **5 Hours**

Configure routers and switches to manage and optimize network traffic, ensuring reliable internet connectivity and efficient data flow for home or office networks and show the simulated output.

**EXPERIMENT 4** **5 Hours**

Configure the network address using Address Resolution Protocol (ARP) to map IP addresses to MAC addresses in a college network, and Reverse ARP (RARP) to obtain their IP addresses from an available server and show the simulated output.

**EXPERIMENT 5** **5 Hours**

Implement Distance Vector and Link State Routing algorithms to determine the most efficient path for data transmission across large corporate networks.

**EXPERIMENT 6** **5 Hours**

Develop a real-time chat application that uses Transmission Control Protocol (TCP) for reliable, ordered communication and User Datagram Protocol (UDP) for faster, connectionless messaging.

**Total: 45+30 = 75 Hours**

MACHINE LEARNING

3 0 2 4

**Course Objectives:**

- To introduce students to the basic concepts and techniques of Machine Learning.
- To have a thorough understanding of the Supervised and Unsupervised learning techniques.
- To study the various probability-based learning techniques.
- To understand graphical models of machine learning algorithms.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply machine learning techniques and regression models for predictive analysis.
2. Optimize data preprocessing techniques to enhance data quality.
3. Compare classification algorithms for different applications.
4. Design clustering models for effective data grouping.
5. Develop graphical models for probabilistic inference and sequential analysis.

## **UNIT I**

**9 Hours**

### **INTRODUCTION**

Learning – Types of Machine Learning – Supervised -Unsupervised Learning - Relationship between attributes using Covariance and Correlation-Relationship between multiple variables- Regression - Linear-Multivariate in prediction.

## **UNIT II**

**9 Hours**

### **DATA PREPROCESSING**

Data Objects and attribute types - Basic statistical description of data - Data visualization - Measuring data similarity and dissimilarity - Data cleaning - Integration - Data reduction - Data transformation and data discretization

## **UNIT III**

**9 Hours**

### **CLASSIFICATION**

Naive Bayes Classifier -Model Assumptions, Probability Estimation-Required data processing- M-estimates, Feature selection- -K-Nearest Neighbor algorithm- Aspects to consider while designing K-Nearest Neighbor-Support Vector Machines-Linear learning machines and Kernel space, Making Kernels and working in feature space-Decision Trees- ID4, C4.5, CART

## **UNIT IV**

**9 Hours**

### **CLUSTERING**

Distance measures-Different clustering methods -Distance-Density-Hierarchical-Iterative distance-based clustering-Dealing with continuous, categorical values in K-Means-Constructing a hierarchical cluster-K-Medoids, k-Mode and density-based clustering-Measures of quality of clustering.

## **UNIT V**

**9 Hours**

### **GRAPHICAL MODELS**

Markov Chain Monte Carlo Methods – Sampling – Proposal Distribution – Bayesian Networks – Markov Random Fields – Hidden Markov Models – Tracking Methods.

## **EXPERIMENT 1**

**5 Hours**

Implement a Linear Regression model to forecast salary packages using student CGPA data, and evaluate the applied model's performance.

## **EXPERIMENT 2**

**5 Hours**

Implement Hypothesis Testing and Validation in Predicting Student Exam Scores using a Multivariate Regression model.

## **EXPERIMENT 3**

**5 Hours**

Develop a spam classifier using Naive Bayes model to classify emails as spam or not spam from the spam\_or\_not\_spam dataset and demonstrate the model's accuracy.

## **EXPERIMENT 4**

**5 Hours**

Implement the K-Nearest Neighbors (KNN) algorithm to classify handwritten digits in a MNIST dataset, and evaluate the model's performance in accuracy.

## **EXPERIMENT 5**

**5 Hours**

Implement and evaluate the performance of a Support Vector Machine (SVM) model to classify brain tumors from MRI images, and assess its accuracy.

## **EXPERIMENT 6**

**5 Hours**

Implement the K-Means clustering algorithm to identify the optimal number of clusters for segmenting social media users into similar communities, and evaluate its metrics.

**Total: 45+30 = 75 Hours**

CLOUD COMPUTING

3 0 2 4

**Course Objectives**

- To provide the ideal solution to manage enterprise resources effectively and efficiently by cloud computing.
- To identify the security and privacy issues in cloud computing.
- To develop the ability to understand and use the architecture of compute and storage cloud, service and delivery models.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze the need of virtualization in Cloud Computing.
2. Deploy applications over different Cloud computing infrastructures.
3. Implement Cloud Dockers to automate the deployment of applications.
4. Analyze the security and privacy issues in cloud computing.
5. Implement the cloud applications to solve real time problems.

**Articulation Matrix**

**UNIT 1****9 Hours****INTRODUCTION**

Introduction to Cloud Computing –Characteristics and Benefits of Cloud Computing- Hardware and software - Evolution of cloud computing - Server virtualization: parallel and vector processing.

**UNIT II** **9 Hours**

**CLOUD SERVICE MODELS**

Software as a Service (SaaS) - Infrastructure as a Service (IaaS)- Platform as a Service (PaaS) - Cloud Data Center - Service Oriented Architecture (SoA) – Basic approach to a Data center Based SoA.

**UNIT III** **9 Hours**

**CLOUD DOCKER**

Introduction – Docker Architecture – Docker Engine - Docker Containers - Docker Objects – Docker Run - Pipeline – Automation Scripts.

**UNIT IV** **9 Hours**

**CLOUD SECURITY**

Securing cloud boundary – Service boundary – Security mapping – Brokered cloud storage access - Storage location and tenancy – Encryption – Establishing the Identity and Presence.

**UNIT V** **9 Hours**

**CLOUD APPLICATIONS & STORAGE**

Applications in the cloud – Functionality mapping – Applications attributes – Cloud APIs-Cloud storage definition – Managed and Unmanaged cloud storage – Exploring cloud backup solutions – Cloud storage interoperability.

**EXPERIMENT 1** **4 Hours**

Develop the procedure to install Linux or Windows OS on Virtual Box / VMware.

**EXPERIMENT 2** **4 Hours**

Create a C program for Arithmetic Calculator using C compiler in Virtual Box.

**EXPERIMENT 3** **4 Hours**

Design the procedure to transfer Text File from one virtual machine to another using Open Stack.

**EXPERIMENT 4** **4 Hours**

Design the web application to display Personal Portfolio and host the application on Google APP Engine.

**EXPERIMENT 5** **4 Hours**

Develop the application for Data Center to allocate resources using First Come First Serve (FCFS) policy and simulate the scenario using CloudSim.

**EXPERIMENT 6** **5 Hours**

Develop and deploy a Chatbot application using Microsoft Windows Azure.

**EXPERIMENT 7** **5 Hours**

Develop the application to Count Number of Words in the given text file using Hadoop

**Total: 45+30 = 75 Hours**

MINI PROJECT I

0 0 2 1

### Course Objectives

- To identify the problem statement and apply the engineering concepts to find the solution.
- To improve the analyzing capability of the students.
- To increase the exuberance in finding the solution to various problems.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Formulate a real-world problem, identify the requirement and develop the design solutions.
2. Identify technical ideas, strategies and methodologies
3. Utilize the new tools, algorithms, and techniques that contribute to obtaining the solution of the project.
4. Test and validate through conformance of the developed prototype and analysis of the cost effectiveness.
5. Prepare the report and present oral demonstrations.

**22AI601****NATURAL LANGUAGE PROCESSING****3 0 2 4****Course Objectives**

- To apply basic mathematical models and methods in NLP applications to formulate computational solutions.
- To apply the logistic for classification and sentiment analysis.
- To analyze the syntax and semantics of natural languages.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes**

1. Apply mathematical models and algorithms to process and analyze natural language data.
2. Analyze logistic regression techniques for classification and sentiment analysis.
3. Implement semantic parsing methods to extract and evaluate word semantics.
4. Develop annotated language resources using appropriate annotation techniques.
5. Construct NLP-based solutions to address real-world challenges.

## **UNIT I**

**9 Hours**

### **INTRODUCTION**

Introduction -Regular Expressions- Words - Text Normalization, Minimum Edit Distance - N-gram Language Models - Evaluating Language Models - Sampling sentences from a language model – Smoothing.

## **UNIT II**

**9 Hours**

### **SENTIMENT CLASSIFICATION AND LOGISTIC REGRESSION**

Naive Bayes Classifiers - Optimizing for Sentiment Analysis - Evaluation: Precision, Recall, F-measure - Logistic Regression: Classification with Logistic Regression - Multinomial logistic regression - Learning in Logistic Regression - The cross-entropy loss: Gradient Descent - Regularization.

## **UNIT III**

**9 Hours**

### **SEMANTIC PARSING**

Lexical Semantics - Vector Semantics - Words and Vectors - Cosine for measuring similarity - TF-IDF: Weighing terms in the vector - Pointwise Mutual Information - Word2vec - Visualizing Embeddings - Bias and Embeddings - Evaluating Vector Models.

## **UNIT IV**

**9 Hours**

### **ANNOTATING LINGUISTIC STRUCTURE**

Context-Free Grammars and Constituency Parsing: Context-Free Grammars – Treebanks - Grammar Equivalence and Normal Form – Ambiguity - Span-Based Neural Constituency Parsing - Evaluating Parsers - Dependency Parsing: Dependency Relations - Transition-Based Dependency Parsing - Graph-Based Dependency Parsing – Evaluation.

## **UNIT V**

**9 Hours**

### **NLP APPLICATIONS**

Machine Translation: Language Divergences and Typology - Machine Translation using Encoder-Decoder - Translating in low-resource situations - MT Evaluation - Question Answering and Information Retrieval: Information Retrieval - IR-based Factoid Question Answering - Entity Linking - Knowledge-based Question Answering - Using Language Models to do QA.

## **EXPERIMENT 1**

**5 Hours**

Implement tokenization and stemming techniques in Web-Data Tokenizer application.

## **EXPERIMENT 2**

**5 Hours**

Perform a text classification on Quora question pairs to identify duplicate questions.

## **EXPERIMENT 3**

**5 Hours**

Implement a real-time word prediction system (Google g-board) that can be integrated into a text editor or writing assistant using n- gram language model.

## **EXPERIMENT 4**

**5 Hours**

Develop a Sentence Framing and Grammar Assistant Application (Grammarly) based on Chunk Parsing and PCF Parsing.

## **EXPERIMENT 5**

**5 Hours**

Develop a simple Language Translation Tool for students from other states of India (Google Translator).

## **EXPERIMENT 6**

**5 Hours**

Develop a Python program to perform Sentiment analysis for Facebook applications.

**Total: 45+30 = 75 Hours**

**22AI602 COMPUTER VISION AND DIGITAL IMAGING****3 0 2 4****Course Objectives**

- To understand the algorithms and techniques used in image formation.
- To analyze the Hough Transform for line, circle and ellipse detections.
- To implement the motion computation and 3D vision to generate 3-dimensional images of an object.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply foundational image processing techniques for computer vision.
2. Implement shape analysis and boundary tracking techniques to detect semantic boundaries in images.
3. Utilize Hough Transform for detecting lines, circles, and ellipses in images.
4. Analyze motion estimation and 3D reconstruction techniques for visual data interpretation.
5. Design computer vision methodologies to address real-world problems effectively

**UNIT I** **9 Hours**

**FOUNDATIONS OF IMAGE PROCESSING**

Images and Image Operations - Classical Filtering Operations – Thresholding Techniques – Edge Detection Techniques – Corner and Interest Point Detection – Mathematical morphology – Texture.

**UNIT II** **9 Hours**

**SHAPES AND REGIONS**

Binary Shape Analysis – Connectedness – Object Labeling and Counting – Size Filtering – Distance Functions – Skeletons and Thinning – Deformable Shape Analysis – Boundary Pattern Analysis - Boundary Tracking Procedures – Centroidal Profiles – Tackling the Problems of Occlusion –Boundary Length Measures.

**UNIT III** **9 Hours**

**HOUGH TRANSFORM**

Design Concepts - Modular design - Design heuristic - Design model and document - Architectural design - Software architecture - Data design - Transform and transaction mapping - User interface design - Component level Design: Designing Class based components, traditional Components- Introduction to Design Patterns

**UNIT IV** **9 Hours**

**MOTION ESTIMATION**

Methods for 3D vision – projection schemes for 3D vision – Three-Dimensional Object Recognition Schemes – Image Transformations and Camera Calibration - Image Rectification - Introduction to motion – triangulation – bundle adjustment – translational alignment – parametric motion – spline-based motion – optical flow – layered motion.

**UNIT V** **9 Hours**

**3D RECONSTRUCTION AND APPLICATIONS**

Shape from X – Active Range Finding – Surface Representations – Point-Based Representation – Model-Based Representation – Recovering Texture Maps and Albedos - Emotion Recognition– Gesture Recognition – Face Detection- Biometrics Augmented Reality- Stitching and document processing.

**EXPERIMENT 1** **5 Hours**

Design and implement a system to analyze images captured by surveillance cameras to detect and label objects with specific shapes for security purposes.

**EXPERIMENT 2** **5 Hours**

Design and implement Automated Image Noise Removal for Medical Imaging.

**EXPERIMENT 3** **5 Hours**

Design an app for Automated Shape Validation through Edge and Corner Detection.

**EXPERIMENT 4** **5 Hours**

Design a lane detection system using perspective projection to improve road navigation.

**EXPERIMENT 5** **5 Hours**

Design a home automation system where users can control smart home devices like lights, fans, or appliances using hand gestures.

## EXPERIMENT 6

**5 Hours**

Design the system that Classify the vehicles on the road and count the number of vehicles that travel through a road using the Faster R-CNN algorithm.

**Total: 45+30 = 75 Hours**

DEEP LEARNING

3 0 2 4

**Course Objectives**

- To understand the basic concepts and principles of neural networks.
- To analyze the Recurrent Neural Network (RNN) to model the sequence data.
- To apply deep generative models to solve problems with high dimensional data.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement the fundamental principles and architectures of Neural Networks and Deep Learning.
2. Develop Convolutional Neural Network (CNN) models to enhance performance in image classification tasks.
3. Apply advanced neural network architectures and training techniques to address complex sequential data challenges.
4. Implement Autoencoder algorithms for dimensionality reduction and deep learning applications.
5. Design and implement deep learning models to address real-world problems effectively.

**22AI701****DATA VISUALIZATION****3 0 2 4****Course Objectives**

- To understand the fundamental concepts and components used in the data visualization.
- To learn tools and techniques for creating interactive and effective visualizations.
- To apply visualization methods for solving real-world and security-related problems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply data visualization principles to design effective and meaningful visual representations.
2. Analyze various data visualization methods to select appropriate techniques for different data types.
3. Implement data acquisition and processing techniques for extracting and preparing data for visualization.
4. Implement interactive visualization tools and frameworks to develop dynamic and engaging visualizations.
5. Evaluate security data visualization techniques to assess and mitigate cybersecurity threats.

## **UNIT I**

**9 Hours**

### **INTRODUCTION TO DATA VISUALIZATION**

Context of data visualization – Definition, Methodology, Visualization design objectives. Key Factors – Purpose, visualization function and tone, visualization design options – Data representation, Data Presentation, Seven stages of data visualization, widgets, data visualization tools.

## **UNIT II**

**9 Hours**

### **DATA VISUALIZATION METHODS**

Mapping - Time series - Connections and correlations – Indicator-Area Chart-Pivot table- Scatter charts, Scatter maps - Tree maps, Space filling and non-space filling methods-Hierarchies and Recursion - Networks and Graphs -Matrix representation for graphs- Info graphics

## **UNIT III**

**9 Hours**

### **DATA VISUALIZATION PROCESS**

Acquiring data, - Tools for Acquiring Data from the Internet, Locating Files for Use with Processing, Loading Text Data, Parsing data - Levels of Effort, Tools for Gathering Clues, Text Markup Languages, Regular Expressions (regexps), Vectors and Geometry, Binary Data Formats.

## **UNIT IV**

**9 Hours**

### **INTERACTIVE DATA VISUALIZATION**

Technology Fundamentals- Setting up D3- Drawing with data – Scales – Axes – Updates, Transition and Motion – Interactivity - Layouts – Geomapping – Exporting, Framework – T3 JavaScript Framework- Tableau

## **UNIT V**

**9 Hours**

### **SECURITY DATA VISUALIZATION**

Port scan visualization - Vulnerability assessment and exploitation - Firewall log visualization - Intrusion detection log visualization -Attacking and defending visualization systems – Creating security visualization system.

## **EXPERIMENT 1**

**3 Hours**

Data preprocessing and cleaning methods on student datasets

Create an Employee Table with training data set which includes attributes like name, id, salary, experience, gender, phone number. Preprocess the given data by checking the constraints on each attribute

## **EXPERIMENT 2**

**3 Hours**

Import a dataset in any one of the data visualization tools and provide graphical representation in following formats: Bar Chart, Pie Chart, Area Chart, Scatter Chart and Scatter plot

**EXPERIMENT 3****3 Hours**

| Wise Owl Travel Agents |                     |            |               |        |            |
|------------------------|---------------------|------------|---------------|--------|------------|
| Country                | Resort Name         | No of Days | Travel Method | Price  | Holiday ID |
| Australia              | Great Barrier Reef  | 32         | Plane         | £750   | I990AUS    |
| Australia              | Perth               | 28         | Plane         | £985   | AUS112J    |
| Chile                  | Santiago            | 21         | Plane         | £1,259 | CH266H     |
| England                | London              | 3          | Train         | £69    | I456UK     |
| England                | Bognor              | 1          | Coach         | £12    | BG726H     |
| France                 | Lyon                | 14         | Plane         | £399   | A7995FR    |
| France                 | Paris - Euro Disney | 5          | Train         | £269   | TH789FR    |
| France                 | Paris - Euro Disney | 3          | Train         | £125   | TH788FR    |

Create a pivot table from this data, then use the filters within to view the average prices of holidays that have a Travel Method of Plane and a Resort Name that begins with the letter S. Confirm that there are 3 holidays in total, by using the drill-down feature.

**EXPERIMENT 4****3 Hours**

Pick a single data series and create an appropriate data visualization technique for it using Processing. A single series contains one set of values for a single variable. An example might be data representing your height for every year of your life, petrol cost over the last 10 years, or the relative popularity of the top 10 learning websites.

**EXPERIMENT 5****3 Hours**

Take multiple data series and make a visualization in Processing that allows someone to easily compare them visually.

**EXPERIMENT 6****3 Hours**

Use the batch yields dataset and construct a monitoring chart using the 300 yield values. Use a subgroup of size 5. Report the target value, lower control limit and upper control limit

**EXPERIMENT 7****3 Hours**

Using the Website traffic data set

1. Create a chart that shows the variability in website traffic for each day of the week.
2. Use the same data set to describe any time-based trends that are apparent.

**EXPERIMENT 8****3 Hours**

Load the room temperature dataset into any one of the tools like R, Python or MATLAB, or whichever software tool you prefer to plot with.

1. Plot the 4 trajectories, FrontLeft, FrontRight, BackLeft and BackRight on the same plot.
2. Comment on any features you observe in your plot.

**EXPERIMENT 9****3 Hours**

Load the six-point board thickness dataset, available from datasets website.

1. Plot a boxplot of the first 100 rows of data to match the figure in these notes
2. Explain why the thick center line in the box plot is not symmetrical with the outer edges of the box.

**EXPERIMENT 10****3 Hours**

Create an information dashboard on COVID cases in a particular location. Map the raw data into a meaningful information

**Total: 45+30 = 75 Hours**

AI FOR ROBOTICS

3 0 0 3

**Course Objectives**

- To understand the concepts of robot locomotion and kinematic models with its constraints.
- To analyze the methods for mobile robot Localization, Path planning and Navigation of Robots.
- To implement the localization algorithms to locate a robot with respect to its environment.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply principles of robot locomotion to evaluate different mobility mechanisms for autonomous robots.
2. Analyze kinematic models to enhance robot maneuverability and workspace efficiency.
3. Utilize sensor data and feature extraction techniques to improve robot perception and uncertainty handling.
4. Implement probabilistic localization methods for autonomous map building and navigation.
5. Develop robot planning and navigation strategies to optimize path planning and obstacle avoidance.

**Articulation Matrix**

**UNIT I****9 Hours****ROBOT LOCOMOTION**

Introduction to AI and Robotics – robot locomotion – legged mobile robots – wheeled mobile robots – aerial mobile robots.

**UNIT II** **9 Hours**  
**MOBILE ROBOT KINEMATICS**

Kinematic models and constraints – mobile robot maneuverability – mobile robot workspace – advanced kinematics – motion control.

**UNIT III** **9 Hours**  
**ROBOT PERCEPTION**

Sensors for mobile robots – representing uncertainty: statistical representation – error propagation – Feature extraction.

**UNIT IV** **9 Hours**  
**MOBILE ROBOT LOCALIZATION**

Introduction to localization – noise and aliasing – localization-based navigation – belief representation – map representation – probabilistic map-based localization – autonomous map building.

**UNIT V** **9 Hours**  
**ROBOT PLANNING AND NAVIGATION**

Planning and Navigation – planning and reacting – path planning – obstacle avoidance – navigation architectures.

**Total: 45 Hours**

PROJECT WORK I

0 0 4 2

### Course Objectives

- To work in teams to propose, formulate, and solve a challenging open-ended design problem of significant scope, depth, and breadth.
- To understand and incorporate engineering standards and multiple realistic constraints, within realistic design time, budget, and performance objectives.
- To develop a prototype of the proposed design and demonstrate the prototype in accordance with the specifications.
- To effectively communicate information relating to all aspects of the design process in written, oral, and graphical form.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Formulate a real-world problem, identify the requirement and develop the design solutions.
2. Identify technical ideas, strategies and methodologies.
3. Utilize the new tools, algorithms, techniques that contribute to obtain the solution of the project.
4. Test and validate through conformance of the developed prototype and analysis the cost effectiveness.
5. Prepare report and present the oral demonstrations.

## **LANGUAGE ELECTIVES**

22HS201

COMMUNICATIVE ENGLISH II

1 0 2 2

**Course Objectives**

- Command over the English language for day-to-day transactions.
- Improve listening and reading skills
- Increase ability to comprehend complex content
- Enhance confidence in expressing with clarity and elegance
- Enthusiastic and reflective use of the language through sufficient and focused practice
- Articulate fluently and confidently in challenging situations

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Engage with the English language in functional contexts
2. Express in both descriptive and narrative formats
3. Interpolate and make effective use of the English Language in Business contexts
4. Actively read and comprehend authentic text
5. Express opinions and communicate experiences.

## UNIT I

15 Hours

### SELF-EXPRESSION

Personal Goals and Values - Being a Team Player-Expressing strengths and weaknesses-Abstract nouns -Adjectives-Active Listening Skills-Note Making-Pronunciation and Accent Personal goals and values - Reading for Gist and Details-Professional ethics -Reported Speech-Conjunctions Reading skills - phonemics, word/phrase recognition, sight words Personal Goals and Values-Conditional clauses- Hypothetical questions and answers-Sentence Structure-Simple Present Tense-Perfect tense

## UNIT II

15 Hours

### CREATIVE EXPRESSION

Instructive and Expository Expression - Creating brochures, catalogues, and manuals for products/ services, Giving directions, Process writing, Sequencing experiments, Concept Explanation-Reported speech-Voice Sentence Equivalence-Proofreading

## UNIT III

15 Hours

### FORMAL EXPRESSION

Notices and Announcements-Writing: Creating notices and circulars for events, announcing college tours and lost and Found-Variety Vocabulary - Gender Sensitive Vocabulary, Non-discriminatory Vocabulary, Concise Vocabulary-Paragraph writing - Effective titles, topics and supporting sentences, calling in registrations and queries. Effective communication- Understanding purpose, reach and target audience, achieving complete communication Punctuation - Capitalization, Numeration, Use of proper nouns and Articles-Spelling-Reading: Analyzing and interpreting notices and Circulars-Understanding the gist of short real-world notices, and messages. Culling out keywords Information words vs Supporting words-Interpreting Abbreviations, Acronyms and Short-forms-Listening: Analyzing and interpreting announcements Decoding - Screening for salient points-Note making-Raising queries for clarification-Speaking: Announcements-Giving complete information-Pronunciation and Enunciation Pace, Intonation, and Pitch-Conducting Events-Speaking: Master of ceremonies, Short speeches - welcome speech, the vote of thanks/ valedictory speech, award-acceptance speech Writing: Invitations, Preparation of script/draft after interviewing someone. Adjectives-Pronunciation/ Punctuation Precision and Concision-Politeness markers

**Total: 45 Hours**

HINDI

1 0 2 2

**Course Objectives**

- To help students acquire the basics of Hindi
- To teach them how to converse in Hindi on simple day- to -day situations
- To help students understand a simple technical text in Hindi

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Course Outcomes (COs)**

1. Construct simple sentences and use vocabulary required for day- to -day conversation.
2. Distinguish and understand the basic sounds of Hindi language.
3. Apply appropriate grammar to write and speak in Hindi language
4. Comprehend the conversation and give correct meaning
5. Take up Hindi examinations conducted by Dakshin Bharat Hindi Prachar Sabha

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****VOWELS AND CONSONANTS**

Hindi Alphabet: Introduction (Self introduction) - Vowels - Consonants - Plosives - Fricatives - Nasal sounds - Vowel Signs - Chandra Bindu & Visarga -Table of Alphabet -Vocabulary.

**UNIT II****9 Hours****NOUNS**

Nouns: Genders -Masculine & Feminine -Reading Exercises

**UNIT III****9 Hours****PRONOUNS AND TENSES**

Pronouns and Tenses - Categories of Pronouns - Personal Pronouns - Second person (you & honorific) - Definite & Indefinite pronouns - Relative pronouns - Present tense - Past tense - Future tense - Assertive & Negative Sentences - Interrogative Sentences.

**UNIT IV**

**9 Hours**

**CLASSIFIED VOCABULARY**

Classified Vocabulary: Parts of body -Relatives Spices Eatables -Fruit & Vegetables - Clothes - Directions -Seasons Professions.

**UNIT V**

**9 Hours**

**CONVERSATIONS**

Speaking - Telling the times -Saying the Numbers from 1 to 50 speaking practice for various occasions.

**Total: 45 Hours**

**Reference(s)**

**22HSG01****GERMAN****1 0 2 2****Course Objectives**

- To help students appear for the A1 level Examination
- To teach them how to converse fluently in German in day-to-day scenarios

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Course Outcomes (COs)**

1. Listen and identify individual sounds of German
2. Use basic phonemes and words while speaking
3. Read and understand short passages on familiar topics
4. Use basic sentence structures while writing
5. Illustrate basic grammar and appropriate vocabulary in completing language tasks

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Introduction to the German Language-Alphabets-Numbers Greetings -Days and Seasons-Working with Dictionary.

**UNIT II****9 Hours****LANGUAGE AND ITS COMMON USE**

Nouns -articles-Speaking about oneself-Listening to CD supplied with books-paying special attention to pronunciation

**UNIT III****9 Hours****TECHNICAL DEUTSCHE**

Regular &Irregular verbs -Personal pronouns-family-Introduction to types of sentences

**UNIT IV****9 Hours****INTERROGATION**

Question words -Types of Questions -Nominative Case-Verb Conjugation -country -nationalities

**UNIT V**

**9 Hours**

**IMPLEMENTATION**

Verbs to be & to have -conjugation -Hobbies -Framing basic Questions and answers

**Total: 45 Hours**

22HSJ01

JAPANESE

1 0 2 2

**Course Objectives**

- To train students for N5 Level Examination
- To teach them use basic Japanese sentences in day-to-day conversation
- To make students familiar with the Japanese cultural facets and social etiquette

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Course Outcomes (COs)**

1. Recognize and write Japanese alphabet
2. Speak using basic sounds of the Japanese language
3. Apply appropriate vocabulary needed for simple conversation in Japanese language
4. Apply appropriate grammar to write and speak in Japanese language
5. Comprehend the conversation and give correct meaning

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 3     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 4     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 5     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |

**UNIT I****9 Hours****SELF INTRODUCTION / DEMONSTRATIVES / NOUN MODIFIERS**

Introduction to Japanese Japanese script - Pronunciation of Japanese (Hiragana (Katakana) Long vowels - Pronunciation of in,tsu,ga -Letters combined with ya,yu,yo - Daily Greetings and Expressions - Numerals. Speaking: Self Introduction- Listening: Listening to Greetings, Listening to specific information: Numbers, Time

**UNIT II****9 Hours****TIME EXPRESSION / VERBS - PAST**

Introduction to time -Introduction of verbs -Listening to specific information

**UNIT III****9 Hours****ADJECTIVES**

Word Sentence -Introduction to Adjectives -Technical Japanese Vocabulary -Pair Activity Day to day situational conversation - Listening to Japanese Alphabet Pronunciation -Simple Conversation

**UNIT IV**

**9 Hours**

**CONJUGATION OF II ADJECTIVE**

Past tense of Noun sentences and Na adjective sentences -Past tense of ii adjective sentences -houga adjective desu -Technical Japanese Vocabulary -Individual Activity - Listening to conversation with related particles

**UNIT V**

**9 Hours**

**CONJUGATION OF VERBS - TE FORM / TA FORM / NAI FORM / PLAIN FORM**

N gahoshidesu - V masu form tai desu - Verb te form - Technical Japanese Vocabulary -Listening to different Counters, simple conversations with verbs and adjectives

**Total: 45 Hours**

**Reference(s)**

22HSF01

FRENCH

1 0 2 2

**Course Objectives**

- To prepare the students for DELF A1 Examination
- To teach them to converse fluently in French in day-to-day scenarios

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**Course Outcomes (COs)**

1. Help students acquire familiarity in the French alphabet & basic vocabulary
2. Listen and identify individual sounds of French
3. Use basic sounds and words while speaking
4. Read and infer short passages on familiar topics
5. Interpret and use basic grammar and appropriate vocabulary in completing language tasks

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 2     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 3     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 4     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |
| 5     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | 3    | -    | -    | -    | -    |

**UNIT I****9 Hours****ENTRER EN CONTACT**

La langue française, alphabets, les numéros, les jours, les mois. Grammaire Les verbes s'appeler, être, avoir, les articles définis, indéfinis Communication Saluer, s'informer sur quelqu'un, demander de se présenter Lexique L'alphabet, les nationalités, l'âge, les pays, les couleurs, les jours de la semaine, les mois de l'année, les professions

**UNIT II****9 Hours****PARTAGER SON LIEU DE VIE**

Les français et leur habitat, des habitations insolites -Grammaire Verbes Conjugaison Présent (Avoir / Être / ER, IR, RE Régulier et Irrégulier) Adjectifs les propositions de lieu Communication Chercher un logement, décrire son voisin, s'informer sur un logement - Lexique L'habitat, les pièces, l'équipement, la description physique

**UNIT III**

**9 Hours**

**VIVRE AU QUOTIDIEN LES LOISIRS DES FRANCAIS, LES GOUTS DES AUTRES, LES ACTIVITES QUOTIDIENNES**

Grammaire Articles contractes, verbes vouloir, pouvoir, devoir, adjectifs interrogatifs, future proche  
Communication Exprimer ses goûts, parler de ses loisirs, justifier un choix, exprimer une envie -  
Lexique le temps libre et les loisirs, les saisons, les activités quotidiennes, le temps (le matin, le soir, la nuit)

**UNIT IV**

**9 Hours**

**COMPRENDRE SON ENVIRONNEMENT SOUVENIR A LA CULTURE**

Grammaire Verbes Finir, Sortir, les adjectifs démonstratifs, le passé composé, l'imparfait  
Communication Proposer à quelqu'un de faire quelque chose, raconter une sortie au passé, parler d'un film  
Lexique Les sorties, la famille, l'art, les vêtements et les accessoires

**UNIT V**

**9 Hours**

**GOUTER A LA CAMPAGNE**

Grammaire La forme négative, les verbes acheter, manger, payer, articles partitifs, le pronom en de quantité

Communication Accepter et refuser une invitation, donner des instructions, commander au restaurant  
Lexique Les services et les commerces, les aliments, les ustensiles, l'argent

22AI001

AGILE SOFTWARE DEVELOPMENT

3 0 0 3

**Course Objectives**

- To provide students with a theoretical as well as practical understanding of agile software development practices.
- To understand the Agile Scrum framework and development practices.
- To apply software design principles and refactoring techniques to achieve agility.
- To understand Agile requirements and perform testing activities within an agile project.
- To understand the benefits and pitfalls of working in an Agile team in terms of quality assurance.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply the Agile principles and manifesto in the software development.
2. Analyze the working methodology of types of Agile frameworks
3. Apply agility in software development processes.
4. Analyze the impact of agility in requirement engineering.
5. Analyze techniques used by Agile team for improving quality.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 1   | -   | 2   | -   | -   | -   | -   | -   | -   | -    | -    | 2    | 2    | -    |
| 2     | 1   | 2   | 2   | -   | -   | 2   | -   | -   | -   | -    | -    | -    | 2    | -    |
| 3     | 1   | 2   | 2   | -   | 2   | 2   | -   | -   | -   | -    | -    | 2    | 2    | -    |
| 4     | 1   | 2   | 2   | -   | 2   | 2   | -   | -   | -   | -    | -    | 2    | 2    | -    |
| 5     | 1   | 1   | 1   | -   | 2   | 2   | -   | -   | -   | -    | -    | 2    | 2    | -    |

**UNIT I**

**9 Hours**

**AGILE METHODOLOGY**

Theories for Agile management – agile software development – traditional model vs. agile model - classification of agile methods – agile manifesto and principles – agile project management – agile team interactions – ethics in agile teams - agility in design, testing – agile documentations – agile drivers, capabilities and values.

**UNIT II**

**9 Hours**

**AGILE PROCESSES**

Extreme Programming: Method overview – lifecycle – work products, roles and practices- Lean production - SCRUM, Crystal, Feature Driven Development, Adaptive Software Development, Kanban model.

**UNIT III**

**9 Hours**

**AGILITY AND KNOWLEDGE MANAGEMENT**

Agile information systems – agile decision making - Early schools of KM – institutional knowledge evolution cycle – development, acquisition, refinement, distribution, deployment, leveraging – KM in software engineering – managing software knowledge – challenges of migrating to agile methodologies – agile knowledge sharing – role of story-cards – Story-card Maturity Model (SMM).

**UNIT IV**

**9 Hours**

**AGILITY AND REQUIREMENTS ENGINEERING**

Impact of agile processes in RE – current agile practices – variance – overview of RE using agile– managing unstable requirements – requirements elicitation – agile requirements abstraction model – requirements management in agile environment, agile requirements prioritization – agile requirements modeling and generation – concurrency in agile requirements generation

**UNIT V**

**9 Hours**

**AGILITY AND QUALITY ASSURANCE**

Agile Interaction Design - Agile product development – Agile Metrics – Feature Driven Development (FDD) – Financial and Production Metrics in FDD – Agile approach to Quality Assurance - Test Driven Development – Pair programming: Issues and Challenges - Agile approach to Global Software Development.

**Total: 45 Hours**

UI AND UX DESIGN

3 0 0 3

**Course Objectives**

- Study about designing web pages and understand the difference between UI and UX Design.
- To understand the concept of UX design process and methodology.
- Learning the importance and scope of Interaction design, User centered design

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Understand to do user research, persona mapping, customer journey mapping
2. Design of interactive products Methods of interaction design Tools for interaction design
3. Design wireframes on paper and translate paper concepts into digital wireframes.
4. Apply and practice the techniques involved in designing digital wireframes using various UI elements.
5. Implement the process of conducting usability tests for digital products.

**Articulation Matrix**

**UNIT I****9 Hours****USER-CENTERED DESIGN PROCESS**

Scripting Languages – HTML, CSS - Fundamentals of graphics design, principles of visual design - Overview of UI & UX Design - Overview of the UX Design Process - Difference between User Interface (UI) vs User Experience (UX) - Defining problem and vision statement - Persona creation –Primary and Secondary persona - Requirement definition - Creative ideation – brainstorming and ideation techniques- Scenarios and functionality extraction - Information Architecture - Task flows - Wireframe design

## UNIT II

9 Hours

### FUNDAMENTALS OF UI HEURISTICS AND INTERACTION DESIGN

Design Principles for UX and UI Design - UI Elements-Patterns - Material Design (Google) and Human Interface Design (Apple) guidelines - Interaction Principles & Interaction Behaviour - Master the Brand Platforms & Style Guides - comments and current UI patterns - Understand problems and design solutions for e-commerce, social media, message, data, and dashboard design

## UNIT III

9 Hours

### ELEMENTARY SKETCHING

Principles of Sketching - Core Responsive Design - Wireframing vs Wireflows - Click through Wireframing Prototyping - Wireflow Creation - Work with different tools – Figma - Low-High Fidelity Design: Inclusive Design and Designing for Accessibility - Building High-Fidelity Mockups - Designing Efficiently with Tools - Interaction Patterns - Designing animations and interactions

## UNIT IV

9 Hours

### UNDERSTAND STYLE GUIDES, ELEMENTS AND PROTOTYPING

Building a Design System – Style guides, color palette, fonts, grid, iconography, UI elements, photography or imagery, and illustration - Use of grids in UI design - Design animations and interaction patterns for key UI elements

## UNIT V

9 Hours

### USABILITY EVALUATION AND PRODUCT DESIGN

Type of usability evaluation – Qualitative and Quantitative evaluation - Guerilla testing - A/B Testing - Unmoderated remote usability testing - Card sorting - Session recording - Think aloud : Introduction and advantages - Designing evaluation protocol - Conducting usability evaluation study - Conduct Usability Test explicit - Synthesize Test Findings - practices in corporate World - Product Design : Types of products & solutions - Design Psychology for e-commerce sites , CMS - Design Thinking Life Cycle

**Total: 45 Hours**

WEB FRAMEWORKS

3 0 0 3

**Course Objectives**

- Understand the architecture behind an Angular application and how to use it
- To understand the significance of using MongoDB as a database system
- To understand the role of React in designing front-end components
- Build a Web Server in Node and understand how it really works
- Develop a web application and API using web frameworks

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem analysis: Identify, formulate, review research literature, and analyze complex engineering

problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO9:** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering

community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply modules and components and Animations for creating Forms and developing web pages.
2. Create web applications by performing CRUD operations in database using web frameworks.
3. Design Progressive Web Application with dynamic HTML web pages using Angular.
4. Design single page applications with reusable UI components using React CSS and SaaS.
5. Apply Node Package Manager and Node packages for Server-Side programming.

## **UNIT I**

**9 Hours**

### **ANGULAR FRONTEND FRAMEWORK**

Introduction - Setup - Architecture: Modules, Components, Services and DI fundamentals - Components and Templates – Configuration- Forms - Observables and RxJS - Boot Strapping - Ng Modules - Dependency Injection - Http Client - Routing and Navigation – Animations.

## **UNIT II**

**9 Hours**

### **FRAMEWORKS WITH DATABASES**

MongoDB - MongoDB Basics - Documents - Collections - Query Language - Installation - The mongo Shell - Schema Initialization - MongoDB Node.js Driver - Reading from MongoDB - Writing to MongoDB - CRUD operations - projections - Indexing - Aggregation - Replication - Sharding - Creating backup – Deployment

## **UNIT III**

**9 Hours**

### **ANGULAR TECHNIQUES**

Service workers & PWA - Server-side rendering - Angular Libraries - Schematics - CLI Builders - Angular Ivy - Web Workers

## **UNIT IV**

**9 Hours**

### **REACT**

React Introduction - React ES6 - React Render HTML - React JSX - Components -React Classes - Composing Components - Passing Data - Dynamic Composition - React state - setting State - Async State Initialization - Event Handling Communicating from Child to Parent - Stateless Components - Designing components- React Forms - React CSS - React SaaS

## **UNIT V**

**9 Hours**

### **NODE JS BACKEND FRAMEWORK**

Node.js basics - Local and Export Modules - Node Package Manager - Node.js web server - Node.js File system - Node Inspector - Node.js Event Emitter - Frameworks for Node.js -Express.js Web App - Serving static Resource - Node.js Data Access

**Total: 45 Hours**

**22AI004****APP DEVELOPMENT****2023****Course Objectives**

- To facilitate students to understand android SDK.
- To help students to gain a basic understanding of Android application development.
- To inculcate working knowledge of Android Studio development tool.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice

**PO8:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Build a simple Android application with Android Manifest file.
2. Analyze the essential designs of Android Application with their anatomy and terminologies.
3. Apply rapid prototyping techniques to design, develop and deploy the Android Applications.
4. Analyze the essentials of User Interface Design in IOS with SQLite Database.
5. Design the flutter applications on the Android marketplace for distribution.

**Articulation Matrix**

**UNIT I****6 Hours****INTRODUCTION TO ANDROID**

The Android Platform, Android SDK, Eclipse Installation, Android Installation, building your First Android application, Understanding the Android Manifest file.

**UNIT II** **6 Hours**

**ANDROID APPLICATION DESIGN ESSENTIALS**

Anatomy of Android applications, Android terminologies, Application Context, Activities, Services, Intents, Receiving and Broadcasting Intents, Using Intent Filter, Permissions.

**UNIT III** **6 Hours**

**COMMON ANDROID APIs**

Testing Android applications, Publishing Android applications, Using Android Data and Storage APIs, managing data using Sqlite, Using Android Web APIs, Using Android Telephony APIs, Deploying Android Applications to the World.

**UNIT IV** **6 Hours**

**IOS USER INTERFACE DESIGN ESSENTIALS**

Ios features, UI implementation, Touch frameworks, Data persistence using Core Data and SQLite, Integrating calendar and address book with social media application, Using Wifi, iPhone marketplace.

**UNIT V** **6 Hours**

**APP DEVELOPMENT WITH FLUTTER**

Flutter Introduction, Create First Flutter Application, exploring commonly used flutter widgets: Container, Margin, Padding and Box Constraints, Custom Fonts, Column and Expanded Widgets, Image Asset, Raised Button, and Alert Dialog.

**EXPERIMENT 1** **4 Hours**

Develop a simple application with one EditText so that the user can write some text in it. Create a button called “Convert Text to Speech” that converts the user input text into voice.

**EXPERIMENT 2** **4 Hours**

Create an application to design a Visiting Card. The Visiting card should have a company logo at the top right corner. The company name should be displayed in Capital letters, aligned to the center. Information like the name of the employee, job title, phone number, address, email, fax and the website address is to be displayed. Insert a horizontal line between the job title and the phone number.

**EXPERIMENT 3** **4 Hours**

Create a SIGNUp activity with Username and Password. Validation of password should happen based on the following rules:

- Password should contain uppercase and lowercase letters.
- Password should contain letters and numbers.
- Password should contain special characters.
- Minimum length of the password (the default value is 8).
- On successful SIGN UP proceed to the next Login activity. Here the user should SIGNIN using the Username and Password created during signup activity. If the Username and Password are matched then navigate to the next activity which displays a message saying “Successful Login” or else display a toast message saying “Login Failed”. The user is given only two attempts and after that display a toast message saying “Failed Login Attempts” and disable the SIGN IN button. Use Bundle to transfer information from one activity to another.

**EXPERIMENT 4** **4 Hours**

Write a program to enter Medicine Name, Date and Time of the Day as input from the user and store it in the SQLite database. Input for Time of the Day should be either Morning or Afternoon or Evening or Night. Trigger an alarm based on the Date and Time of the Day and display the Medicine Name.

**EXPERIMENT 5** **4 Hours**

Develop an application to set an image as wallpaper. On click of a button, the wallpaper image should start to change randomly every 30 seconds.

### EXPERIMENT 6

5 Hours

Create an activity like a phone dialer with CALL and SAVE buttons. On pressing the CALL button, it must call the phone number and on pressing the SAVE button it must save the number to the phone contacts.

### EXPERIMENT 7

5 Hours

Implement UI elements like Text Fields, Label, Tool bar, Status bar, Tab bar.

**Total: 30+30 = 60 Hours**

**22AI005****SOFTWARE TESTING AND AUTOMATION****3 0 0 3****Course Objectives**

- Understand the importance of software testing in the software development process.
- Analyze different testing methodologies and techniques to create test plans, test cases, and test scripts.
- Apply automation testing tools and frameworks to design and implement automated test suites.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Understand the importance of testing in the software development process
2. Compare the different test case design strategies
3. Analyze the different levels of testing and their importance
4. Apply test management techniques and the role of a test specialist
5. Analyze the software test automation and its requirements

**UNIT I****9 Hours****INTRODUCTION**

Basic definitions – Software Testing Principles – The Tester's Role in a Software Development Organization – Origins of Defects – Cost of Defects – Defect Classes – The Defect Repository and Test Design – Defect Examples- Developer/Tester Support of Developing a Defect Repository.

## UNIT II

9 Hours

### TEST CASE DESIGN STRATEGIES

Test Scenarios - Test Cases - Test case Design Strategies - Black Box Approach to Test Case Design - Using White Box Approach to Test design – Test Adequacy Criteria – Static testing vs. Structural testing – Code functional testing – Coverage and Control Flow Graphs – Covering CodeLogic – Paths – Code complexity testing – Additional White box testing approaches - Test Coverage

## UNIT III

9 Hours

### LEVELS OF TESTING

Types of testing - manual and automation - Introduction to testing methods - White-box, Black- box and Grey-box - Functional testing - Non-functional testing - Introduction to levels of testing– Unit Testing, Integration Testing, System Testing, User Acceptance Testing - Introduction to types of testing – Regression Testing, Smoke Testing, Database Testing, Usability Testing, Load Testing, Stress Testing, Performance Testing, Compatibility Testing, Security Testing, Internationalization Testing, Localization Testing

## UNIT IV

9 Hours

### TEST MANAGEMENT

People and organizational issues in testing – Organization structures for testing teams – testing services – Test Planning – Test Plan Components – Test Plan Attachments – Locating Test Items – test management – test process – Reporting Test Results – Introducing the test specialist – Skills needed by a test specialist – Building a Testing Group- The Structure of Testing Group - The Technical Training Program.

## UNIT V

9 Hours

### TEST AUTOMATION

Software test automation – Design and Architecture for Automation - Automation testing - Automation Tools - Selenium Web Driver - Create Selenese Commands - TestNG - TestNG Annotations - Jmeter - Assertions in JMeter - Junit

**Total: 45 Hours**

22AI006

DevOps

3 0 0 3

**Course Objectives**

- To introduce DevOps terminology, definition & concepts.
- To understand the different Version control tools like Git, Mercurial.
- To understand the concepts of Continuous Integration/ Continuous Testing/ Continuous Deployment).
- To understand Configuration management using Ansible.
- Illustrate the benefits and drive the adoption of cloud-based DevOps tools to solve real-world problems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze the different actions performed through Version control tools like Git.
2. Perform Continuous Integration and Continuous Testing and Continuous Deployment using Jenkins by building and automating test cases using Maven & Gradle.
3. Build Jenkins workspace for Automated Continuous Deployment.
4. Perform configuration management using Ansible.
5. Apply Azure DevOps to leverage Cloud-based DevOps tools.

**Articulation Matrix**

## **UNIT I**

**7 Hours**

### **INTRODUCTION TO DEVOPS**

Devops Essentials - Introduction to AWS, GCP, Azure - Version control systems: Git and GitHub

## **UNIT II**

**10 Hours**

### **COMPILE AND BUILD USING MAVEN AND GRADLE**

Introduction, Installation of Maven, POM files, Maven Build lifecycle, build phases (compile build, test, package) Maven Profiles-Maven repositories (local, central, global) - Maven plugins- Maven create and build Artifacts- Dependency Management-Installation of Gradle- understanding build using Gradle.

## **UNIT III**

**12 Hours**

### **CONTINUOUS INTEGRATION USING JENKINS**

Install and Configure Jenkins- Jenkins Architecture Overview- creating a Jenkins Job- Configuring a Jenkins job- Introduction to Plugins- Adding Plugins to Jenkins-commonly used plugins (Git Plugin, Parameter Plugin- HTML Publisher- Copy Artifact, and Extended choice parameters). Configuring Jenkins to work with Java- Git- and Maven- Creating a Jenkins Build and Jenkins workspace

## **UNIT IV**

**9 Hours**

### **CONFIGURATION MANAGEMENT USING ANSIBLE**

Ansible Introduction- Installation-Ansible master/slave configuration- YAML basics-Ansible Modules- Ansible Inventory files- Ansible playbooks- Ansible Roles- and ad-hoc commands in Ansible

## **UNIT V**

**7 Hours**

### **BUILDING DevOps PIPELINES USING AZURE**

Create GitHub Account, Create Repository- Create Azure Organization- Create a new pipeline- Build a sample code- Modify azure-pipelines- yaml file

**Total: 45 Hours**

**22AI007 VIRTUALIZATION IN CLOUD COMPUTING****3 0 0 3****Course Objectives**

- Analyze the basic concepts of virtualization technology to derive the best practice model for deploying cloud-based applications.
- Create an application by utilizing cloud platforms such as Amazon Web Services and Windows Azure.
- Identify major security and privacy problems in cloud computing environment.
- Apply the ability to use the architecture of cloud, service and delivery models.
- Implement the key enabling technologies that help in the development of cloud.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply the concept of virtualization and its properties.
2. Apply the different forms of virtualization.
3. Analyze various architectures for implementing virtualization methods.
4. Evaluate virtual machines and installing various operating systems.
5. Evaluate the performance of the virtual machines and deployed applications.

**Articulation Matrix**

**UNIT I** **9 Hours**

**UNDERSTANDING VIRTUALIZATION**

Describing Virtualization-Microsoft Windows Drives Server Growth -Explaining Moore's Law- Understanding the Importance of Virtualization -Examining Today's Trends -Virtualization and Cloud Computing -Understanding Virtualization Software Operation -Virtualizing Servers -Virtualizing Desktops -Virtualizing Applications

**UNIT II** **9 Hours**

**HYPERVISORS**

Describing a Hypervisor -Exploring the History of Hypervisors -Understanding Type 1 Hypervisors - Type 2 Hypervisors - Role of a Hypervisor -Holodecks and Traffic Cops -Resource Allocation -Comparing Today's Hypervisors -VMware ESX -Citrix Xen -Microsoft Hyper-V -Other Solutions.

**UNIT III** **9 Hours**

**VIRTUAL MACHINES**

Introduction to Virtual Machine - CPUs in a Virtual Machine -Memory in a Virtual Machine -Network Resources in a Virtual Machine - Storage in a Virtual Machine -Understanding How a Virtual Machine Works -Working with Virtual Machines -Virtual Machine Clones -Templates -Snapshots -OVF -Containers

**UNIT IV** **9 Hours**

**CREATION OF VIRTUAL MACHINES AND CONFIGURATIONS**

Understanding Configuration Options-Installing Windows on a Virtual Machine- Installing Linux on a Virtual Machine-Installing VirtualBox Guest Additions- Managing CPUs for a Virtual Machine- Configuring VM CPU Options-Managing Storage for a Virtual Machine- Managing Networking for a Virtual Machine- Copying a Virtual Machine- Managing Additional Devices in Virtual Machines

**UNIT V** **9 Hours**

**AVAILABILITY AND APPLICATIONS IN A VIRTUAL MACHINE**

Increasing Availability-Protecting a Virtual Machine-Protecting Multiple Virtual Machines-Protecting Data Centers - Examining Virtual Infrastructure Performance Capabilities -Deploying Applications in a Virtual Environment-Understanding Virtual Appliances and vApps -Open Stack and Containers.

**Total: 45 Hours**

**22AI008 CLOUD SERVICES AND DATA MANAGEMENT****3 0 0 3****Course Objectives**

- Analyze the basic concepts of Cloud and capabilities across the various Cloud service models.
- Analyze virtualization technology to derive the best practice model for deploying cloud-based applications.
- Create an application by utilizing cloud platforms such as Google App Engine, Microsoft Azure and Open Stack.
- Identify strategies to reduce risk and eliminate issues associated with adoption of cloud services.
- Select appropriate structures for designing, deploying and running cloud-based services in a business environment.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply Cloud Computing reference architecture for developing clouds
2. Analyze the different forms of cloud service models
3. Analyze the characteristics and architecture of IaaS using various real-world applications.
4. Evaluate PaaS concepts and architectures with real-world examples.
5. Create and synthesize concepts related to the SaaS delivery model.

**UNIT I** **9 Hours**

**CLOUD COMPUTING REFERENCE ARCHITECTURE (CCRA)**

Introduction to Cloud Computing Reference Architecture (CCRA), Benefits of CCRA, Architecture Overview, Versions and Application of CCRA for Developing Clouds

**UNIT II** **9 Hours**

**INTRODUCTION OF DELIVERY MODELS IN CLOUD COMPUTING**

Introduction to Cloud Delivery Models, List Various Cloud Delivery Models, Advantages of Delivery Models in Cloud, Trade-off in Cost to Install Versus Flexibility, Cloud Service Model Architecture.

**UNIT III** **9 Hours**

**INFRASTRUCTURE AS A SERVICE (IaaS)**

Introduction to Infrastructure as a Service Delivery Model, Characteristics of IaaS, Architecture, Examples of IaaS, Applicability of IaaS in the Industry.

**UNIT IV** **9 Hours**

**PLATFORM AS A SERVICE (PaaS)**

Introduction to Platform as a Service Delivery Model, Characteristics of PaaS, Patterns, Architecture and Examples of PaaS, Applicability of PaaS in the Industry.

**UNIT V** **9 Hours**

**SOFTWARE AS A SERVICE (SaaS)**

Introduction to Software as a Service Delivery Model, Characteristics of SaaS, Architecture, Examples of SaaS, Applicability of SaaS in the Industry.

**Total: 45 Hours**

CLOUD STORAGE TECHNOLOGIES

3 0 0 3

### Course Objectives

- Characterize the functionalities of logical and physical components of storage
- Describe various storage networking technologies
- Identify different storage virtualization technologies
- Discuss the different backup and recovery strategies
- Understand common storage management activities and solutions

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Apply the fundamentals of information storage management and various models of Cloud infrastructure services and deployment.
2. Apply the usage of advanced intelligent storage systems and RAID.
3. Analyze various storage networking architectures - SAN, including storage subsystems and virtualization.
4. Evaluate the different roles in providing disaster recovery and remote replication technologies.
5. Create the security needs and security measures to be employed in information storage management.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****8 Hours****STORAGE SYSTEMS**

Cloud Storage Fundamentals and Architecture - Cloud Storage Providers and Services - Access methods (RESTful APIs, SDKs) for cloud object storage - Block storage technologies in cloud environments - File Storage in the Cloud: Network File System (NFS) and Server Message Block (SMB) protocols -Hybrid Cloud Storage - Data Migration - Data Lifecycle Management in the Cloud

**UNIT II****9 Hours****INTELLIGENT STORAGE SYSTEMS AND RAID**

Storage Tiering and Caching - Automated Data Placement and Load Balancing: Intelligent Algorithms for Data Placement, Load Balancing Strategies for Distributed Storage Systems, Dynamic Resource Allocation - RAID Technologies in Cloud Storage: RAID Levels - Data Striping, Mirroring, and Parity for Fault Tolerance - RAID Configuration and Performance Optimization

**UNIT III****10 Hours****STORAGE NETWORKING TECHNOLOGIES AND VIRTUALIZATION**

Storage Networking in Cloud Environments - Understanding storage protocols - Network-attached storage (NAS) vs. storage area network (SAN) - Storage virtualization techniques and technologies - Network-Attached Storage (NAS) - Storage Area Network (SAN) - iSCSI and Fiber Channel over IP (FCIP) in Cloud Storage - Network Virtualization and Overlay Networks - Storage Virtualization and Abstraction - Network Performance Optimization - Network Security in Cloud Storage

**UNIT IV****9 Hours****BACKUP, ARCHIVE AND REPLICATION**

Cloud Backup: Strategies and Architecture, Data duplication and Compression, Security - Cloud Archive: Strategies and Architecture, Replication for Data Redundancy: Synchronous and asynchronous replication methods - Disaster Recovery in the Cloud - Hybrid Backup and Archiving in Cloud Environments - Backup and Archive Management in Cloud Environments

**UNIT V****9 Hours****SECURING STORAGE INFRASTRUCTURE**

Storage Security Fundamentals: Key Security Principles, Threats and Vulnerabilities in Storage Infrastructure, Access Control and Authentication: Role-based Access Control (RBAC) and Permissions Management, Multi-factor authentication (MFA) for Storage Systems - Storage-level Encryption and Application-level Encryption - Storage infrastructure Management Functions and Processes.

**Total: 45 Hours**

**CLOUD AUTOMATION TOOLS AND APPLICATIONS**

3 0 0 3

**Course Objectives**

- To learn the options for running automation tools, and load balancers in the cloud-native applications.
- To learn the configuration management in the cloud.
- To know why cloud automation is important.
- To learn what types of cloud automation tools can be used.
- To learn load balancing and auto scaling in the cloud

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply cloud native applications on AWS, Terraform etc.
2. Apply VM provisioning and migration in the cloud.
3. Analyze cloud automation and configuration.
4. Evaluate balance load and auto scaling in the cloud.
5. Evaluate the AWS cloud formation use-case.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 1     | 2   | -   | 2   | 1   | 3   | -   | -   | -   | -   | -    | -    | -    | -    | 2    |
| 2     | -   | 2   | -   | -   | 3   | -   | -   | -   | -   | -    | -    | -    | -    | 1    |
| 3     | -   | -   | 3   | 2   | 3   | -   | -   | -   | -   | -    | -    | -    | -    | 2    |
| 4     | -   | -   | 2   | -   | 3   | -   | -   | -   | -   | -    | -    | -    | 2    | -    |
| 5     | -   | -   | 2   | -   | 3   | -   | -   | -   | -   | -    | -    | -    | -    | 2    |

**UNIT I** **7 Hours**

**UNDERSTANDING THE CLOUD AUTOMATION**

Introduction to Automation & Configuration Tools. Introduction to Terraform. Understanding Terraform Vs CloudFormation. Deploying & Destroying AWS environment with Terraform. Introduction to Packer.

**UNIT II** **9 Hours**

**ABSTRACTION AND VIRTUALIZATION**

Introduction to Virtualization Technologies, Load Balancing and Virtualization, Understanding hypervisors Porting Applications, Virtual Machines Provisioning and Manageability, Virtual Machine Migration Services, Virtual Machine Provisioning and Migration in Action, Provisioning in the Cloud Context, Virtualization of CPU, Memory, I/O Devices, Virtual Clusters and Resource management, Virtualization for Data Centre Automation.

**UNIT III** **9 Hours**

**AUTOMATION AND CONFIGURATION MANAGEMENT IN THE CLOUD**

Cloud automation at scale, Cloud Configuration Management –unmanaged and managed configuration management, Modification of the capacity of the service, horizontal and vertical scaling, and automatic versus manual scaling. Migrating the business to Cloud. Automating cloud deployments –Balancers.

**UNIT IV** **9 Hours**

**LOAD BALANCING AND AUTO SCALING IN CLOUD**

Managed instance groups, Auto scaling and health check, Overview of HTTP(S) load balancing. Example: HTTP load balancer, HTTP(S) load balancing, Configuring an HTTP Load Balancer with Auto scaling, SSL proxy load balancing, TCP proxy load balancing, Network load balancing, Internal load balancing, Configuring an Internal Load Balancer, Choosing a load balancer.

**UNIT V** **11 Hours**

**AWS CLOUDFORMATION USECASE**

Introduction to AWS CloudFormation, AWS CloudFormation Features and Components, Working of AWS CloudFormation, setting up AWS CloudFormation, building a Pipeline for Test and Production Stacks, AWS CloudFormation Artifacts, Parameter Override Functions with Code Pipeline, Using AWS CLI. AWS CloudFormation, Terraform, VMware vs Center Configuration Manager (VCM), and Puppet.

**Total: 45 Hours**

22AI011

SOFTWARE DEFINED NETWORKS

2023

**Course Objectives**

- To understand the need for SDN and its data plane operations.
- To understand the functions of control plane.
- To comprehend the migration of networking functions to SDN environment.
- To explore various techniques of network function virtualization.
- To comprehend the concepts behind network virtualization.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the motivation behind SDN
2. Apply the functions of the data plane and control plane
3. Analyze and develop network applications using SDN
4. Evaluate the network services using NFV
5. Create various use cases of SDN and NFV

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****6 Hours****INTRODUCTION TO SDN**

History of Software Defined Networking (SDN) – Modern Data Center – Traditional Switch Architecture – Why SDN – Evolution of SDN – How SDN Works – Centralized and Distributed Control and Data Planes.

**UNIT II** **6 Hours**

**SDN DATA PLANE AND CONTROL PLANE**

Data Plane functions and protocols - OpenFlow Protocol - Packet Processing and Performance Optimization – Flow Table - Control Plane Functions - Southbound Interface, Northbound Interface – SDN Controllers - Ryu, Open Daylight, ONOS - Distributed Controllers.

**UNIT III** **6 Hours**

**SDN APPLICATIONS**

SDN Application Plane Architecture – Network Services Abstraction Layer – Traffic Engineering – Measurement and Monitoring – Security – Data Center Networking – Wide Area Networks (WAN) – Service Provider Networks – Internet Service Providers (ISPs).

**UNIT IV** **6 Hours**

**NETWORK FUNCTION VIRTUALIZATION**

Network Virtualization - NFV Architecture – Virtual LANs – OpenFlow VLAN Support – NFV Standards and Frameworks – NFV Concepts – Benefits and Requirements – Reference Architecture.

**UNIT V** **6 Hours**

**NFV FUNCTIONALITY**

NFV Infrastructure – Virtualized Network Functions – NFV Management and Orchestration – NFV Use Cases: Virtual Customer Premises Equipment, Virtual Evolved Packet Core, Virtualized Network Monitoring and Traffic Analysis, Network Slicing, Edge Computing and NFV.

**EXPERIMENT 1** **6 Hours**

Setup your own virtual SDN lab

- i) Virtual box/Mininet Environment for SDN - <http://mininet.org>
- ii) <https://www.kathara.org>
- iii) GNS3

**EXPERIMENT 2** **6 Hours**

Create a simple mininet topology with SDN controller and use Wireshark to capture and visualize the OpenFlow messages such as OpenFlow FLOW MOD, PACKET IN, PACKET OUT etc.

**EXPERIMENT 3** **6 Hours**

Create a SDN application that uses the Northbound API to program flow table rules on the switch for various use cases like L2 learning switch, Traffic Engineering, Firewall etc.

**EXPERIMENT 4** **6 Hours**

Create a simple end-to-end network service with two VNFs using vim-emu  
<https://github.com/containernet/vim-emu>

**EXPERIMENT 5** **6 Hours**

Install OSM and onboard and orchestrate network service.

**Total: 30+30 = 60 Hours**

**22AI012 SECURITY AND PRIVACY IN CLOUD****3 0 0 3****Course Objectives**

- To Introduce Cloud Computing terminology, definition & concepts.
- To understand the security design and architectural considerations for Cloud.
- To understand the Identity, Access control in Cloud.
- To follow best practices for Cloud security using various design patterns
- To be able to monitor and audit cloud applications for security.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the cloud security concepts and fundamentals.
2. Apply the security challenges in the cloud.
3. Analyze the cloud policy, identity and Access Management.
4. Analyze various risks, audit and monitoring mechanisms in the cloud.
5. Create the various architectural and design considerations for security in the cloud.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 3   | 3   | 3   | 1   | 2   | -   | -   | -   | -   | -    | -    | -    | 2    | -    |
| 2     | 1   | 3   | 2   | 3   | 1   | -   | -   | -   | -   | -    | -    | -    | -    | 2    |
| 3     | 3   | 2   | 2   | 3   | 2   | -   | -   | -   | -   | -    | -    | -    | 2    | -    |
| 4     | 2   | 1   | 2   | 3   | 3   | -   | -   | -   | -   | -    | -    | -    | -    | 2    |
| 5     | 1   | 3   | 3   | 1   | 1   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I** **8 Hours**

**FUNDAMENTALS OF CLOUD SECURITY CONCEPTS**

Overview of Cloud Security- Security Services - Confidentiality, Integrity, Authentication, Non-repudiation, Access Control - Basic of Cryptography - Conventional and Public-key cryptography, Hash Functions, Authentication and Digital Signatures.

**UNIT II** **11 Hours**

**SECURITY DESIGN AND ARCHITECTURE FOR CLOUD**

Security Design Principles for Cloud Computing - Comprehensive Data Protection - End-to-end access control - Common Attack Vectors and threats - Network and Storage - Secure Isolation Strategies - Virtualization strategies - Inter-tenant network segmentation strategies - Data Protection strategies: Data Redaction, Tokenization, Obfuscation, PKI and Key

**UNIT III** **9 Hours**

**ACCESS CONTROL AND IDENTITY MANAGEMENT**

Access Control Requirements for Cloud infrastructure - User Identification - Authentication and Authorization - Roles-based Access Control - Multi-factor authentication - Single Sign-on, Identity Federation - Identity providers and service consumers - Storage and network access control options - OS Hardening and minimization – Verified and measured boot - Intruder Detection

**UNIT IV** **8 Hours**

**CLOUD SECURITY DESIGN PATTERNS**

Introduction to Design Patterns, Cloud Bursting, Geo-tagging, Secure Cloud Interfaces, Cloud Resource Access Control, Secure On-Premise Internet Access, Secure External Cloud

**UNIT V** **9 Hours**

**MONITORING, AUDITING AND MANAGEMENT**

Proactive Activity Monitoring – Incident Response, Monitoring for Unauthorized Access, Malicious Traffic, Abuse of System Privileges – Events and Alerts – Auditing – Record generation, Reporting and Management, Tamper-Proofing Audit logs, Quality of Services, Secure Management, User Management, Identity Management, Security Information and Event Management

**Total: 45 Hours**

### Course Objectives

- To learn cybercrime and cyber law.
- To understand the cyber-attacks and tools for mitigating them.
- To understand information gathering.
- To learn how to detect a cyber-attack.
- To learn how to prevent a cyber-attack.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Apply the principles of cybersecurity, cybercrime, and cyber law and their impact on digital systems.
2. Analyze various types of cyber-attacks and assess the effectiveness of tools used to launch them.
3. Apply advanced tools and techniques for secure information gathering to ensure data security and integrity.
4. Analyze intrusion techniques to detect unauthorized access and examine network traffic for malicious activities.
5. Apply and evaluate intrusion prevention mechanisms to mitigate cyber threats and enhance system security.

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Cyber Security – History of Internet – Impact of Internet – CIA Triad; Reason for Cyber Crime – Need for Cyber Security – History of Cyber Crime; Cybercriminals – A Global Perspective on Cyber Crimes - Classification of Cybercrimes

**UNIT II****9 Hours****ATTACKS AND COUNTER MEASURES**

OSWAP; Malicious Attack Threats and Vulnerabilities: Scope of Cyber-Attacks – Security Breach – Types of Malicious Attacks – Malicious Software – Common Attack Vectors – Social engineering Attack – Wireless Network Attack – Web Application Attack – Attack Tools – Countermeasures.

**UNIT III****9 Hours****RECONNAISSANCE**

Harvester – Who is – Netcraft – Host – Extracting Information from DNS – Extracting Information from E-mail Servers – Social Engineering Reconnaissance; Scanning – Port Scanning – Network Scanning and Vulnerability Scanning – Scanning Methodology – Ping Sweer Techniques – Nmap Command Switches – SYN – Stealth – XMAS – NULL – IDLE – FIN Scans – Banner Grabbing and OS Fingerprinting Techniques.

**UNIT IV****9 Hours****INTRUSION DETECTION**

Host -Based Intrusion Detection – Network -Based Intrusion Detection – Distributed or Hybrid Intrusion Detection – Intrusion Detection Exchange Format – Honeypots – Example System Snort -Cyber Laws – The Indian IT Act – Cyber Crime and Punishment.

**UNIT V****9 Hours****INTRUSION PREVENTION**

Firewalls and Intrusion Prevention Systems: Need for Firewalls – Firewall Characteristics and Access Policy – Types of Firewalls – Firewall Basing – Firewall Location and Configurations – Intrusion Prevention Systems – Example Unified Threat Management Products.

MODERN CRYPTOGRAPHY

3 0 0 3

### Course Objectives

- To learn about the basics of modern cryptography.
- To focus on how cryptographic algorithms and protocols work and how to use them.
- To build a Pseudo random permutation.
- To construct the basics of cryptanalytic techniques for ensuring data integrity.
- To provide instruction on how to use the concepts of block ciphers and message authentication codes.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Apply the fundamental principles of cryptography and cryptanalysis and their role in secure communication.
2. Analyze symmetric encryption techniques and authentication mechanisms for their effectiveness in securing data.
3. Analyze the applications of public key encryption, digital signatures, and key establishment in real-world scenarios.
4. Apply cryptographic algorithms to design, implement, and analyze secure cryptographic solutions.
5. Evaluate the effectiveness of Message Authentication Codes (MACs) in ensuring data integrity and authenticity.

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Basics of Symmetric Key Cryptography - Basics of Asymmetric Key Cryptography - Hardness of Functions - Notions of Semantic Security (SS) and Message Indistinguishability (MI): Proof of Equivalence of SS and MI – Hard Core Predicate - Trap-door permutation - Goldwasser-Micali Encryption - Goldreich-Levin Theorem: Relation between Hardcore Predicates and Trap-door permutations.

**UNIT II****9 Hours****FORMAL NOTIONS OF ATTACKS**

Attacks under Message Indistinguishability: Chosen Plaintext Attack (IND-CPA), Chosen Ciphertext Attacks (IND-CCA1 and IND-CCA2) - Attacks under Message Non-malleability: NM-CPA and NMCCA2 - Inter-relations among the attack model

**UNIT III****9 Hours****RANDOM ORACLES**

Provable Security and asymmetric cryptography - hash functions - One-way functions: Weak and Strong one-way functions - Pseudo-random Generators (PRG): Blum-Micali-Yao Construction - Construction of more powerful PRG - Relation between One-way functions and PRG - Pseudorandom Functions (PRF).

**UNIT IV****9 Hours****BUILDING A PSEUDORANDOM PERMUTATION**

The Luby Rackoff Construction: Formal Definition, Application of the Luby Rackoff Construction to the construction of Block Ciphers - The DES in the light of Luby Rackoff Construction.

**UNIT V****9 Hours****MESSAGE AUTHENTICATION CODES**

Introduction to Left or Right Security (LOR) - Formal Definition of Weak and Strong MACs - Using a PRF as a MAC - Variable length MAC - Public Key Signature Schemes: Formal Definitions, Signing and Verification - Formal Proofs of Security of Full Domain Hashing - Assumptions for Public Key Signature Schemes: One-way functions - Imply Secure One-time Signatures - Shamir's Secret Sharing Scheme - Analyzing Cryptographic Protocols - Zero Knowledge Proofs and Protocols.

CYBER FORENSICS

3 0 0 3

### Course Objectives

- To understand the principles and concepts of computer forensics.
- To learn to utilize forensic tools for network-based attacks.
- To identify and apply appropriate methodologies for forensics data.
- To identify and analyze the vulnerabilities in the network.
- To analyze the various hacking techniques and their impacts.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Analyze computer forensics principles, legal and ethical considerations, and the importance of preserving digital evidence integrity.
2. Apply forensic tools to ensure data integrity and security in network environments.
3. Analyze and validate forensic data from communication devices to detect and analyze intrusion attempts.
4. Analyze firewall techniques to identify and mitigate network vulnerabilities.
5. Apply and analyze real-world hacking techniques to test system security and enhance protection against cyber threats.

**UNIT I****9 Hours****INTRODUCTION TO COMPUTER FORENSICS**

Introduction to Traditional Computer Crime, Traditional problems associated with Computer Crime. Introduction to Identity Theft & Identity Fraud. Types of CF techniques - Incident and incident response methodology - Forensic duplication and investigation. Preparation for IR: Creating response tool kit and IR team. - Forensics Technology and Systems - Understanding Computer Investigation – Data Acquisition.

**UNIT II****9 Hours****EVIDENCE COLLECTION AND FORENSICS TOOLS**

Processing Crime and Incident Scenes – Working with Windows and DOS Systems. Current Computer Forensics Tools: Software/ Hardware Tools.

**UNIT III****9 Hours****ANALYSIS AND VALIDATION**

Validating Forensics Data – Data Hiding Techniques – Performing Remote Acquisition – Network Forensics – Email Investigations – Cell Phone and Mobile Devices Forensics.

**UNIT IV****9 Hours****E-MAIL SECURITY AND FIREWALLS**

PGP - S/MIME - Internet Firewalls for Trusted System: Roles of Firewalls – Firewall related terminology- Types of Firewalls - Firewall designs - SET for E-Commerce Transactions.

**UNIT V****9 Hours****ETHICAL HACKING IN WEB**

Social Engineering - Denial of Service - Session Hijacking - Hacking Web servers - Hacking Web Applications – SQL Injection - Hacking Wireless Networks - Hacking Mobile Platforms.

ETHICAL HACKING

3 0 0 3

**Course Objectives**

- To learn about the importance of information security.
- To explain different scanning and enumeration methodologies and tools.
- To understand various hacking techniques and attacks.
- To analyse the different phases in penetration testing

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the various attack methodologies used in ethical hacking and penetration testing in digital systems.
2. Apply hacking techniques and evaluate the effectiveness of tools used for ethical hacking.
3. Analyze the vulnerabilities in Windows and Linux operating systems to assess potential security risks.
4. Apply advanced hacking techniques to exploit web server vulnerabilities.
5. Evaluate firewall characteristics, intrusion detection mechanisms, and malicious software to enhance system security.

**Articulation Matrix**

**UNIT I** **9 Hours**

**INTRODUCTION**

Ethical Hacking Overview - Role of Security and Penetration Testers - Penetration-Testing Methodologies- Laws of the Land - Overview of TCP/IP- The Application Layer - The Transport Layer - The Internet Layer - IP Addressing - Network and Computer Attacks - Malware - Protecting Against Malware Attacks- Intruder Attacks - Addressing Physical Security

**UNIT II** **9 Hours**

**SCANNING AND ENUMERATION**

Introduction to Scanning – Objectives – Scanning Methodology – Tools – Introduction to Enumeration – Enumeration Techniques – Enumeration Procedure – Tools

**UNIT III** **9 Hours**

**SYSTEM HACKING**

Introduction – Cracking Passwords – Password Cracking Websites – Password Guessing –Password Cracking Tools – Password Cracking Countermeasures – Escalating Privileges –Executing Applications – Keyloggers and Spyware

**UNIT IV** **9 Hours**

**PROGRAMMING FOR SECURITY PROFESSIONALS**

Programming Fundamentals – C language – HTML – Perl – Windows OS Vulnerabilities –Tools for Identifying Vulnerabilities – Countermeasures – Linux OS Vulnerabilities – Tools for Identifying Vulnerabilities – Countermeasures

**UNIT V** **9 Hours**

**NETWORK PROTECTION SYSTEMS**

Access Control Lists. - Cisco Adaptive Security Appliance Firewall - Configuration and Risk Analysis Tools for Firewalls and Routers - Intrusion Detection and Prevention Systems - Network-Based and Host-Based IDSs and IPSs - Web Filtering - Security Incident Response Teams – Honeypots.

**CRYPTOCURRENCY AND BLOCKCHAIN  
TECHNOLOGIES**

2023

**Course Objectives**

- To understand the basics of Blockchain Technology.
- To learn Different protocols and consensus algorithms in Blockchain.
- To learn the Blockchain implementation frameworks.
- To experiment the Hyperledger Fabric, Ethereum networks.
- To understand the Blockchain Applications.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Analyze emerging abstract models of Blockchain Technology and their impact on decentralized systems.
2. Evaluate research challenges and technical gaps in cryptocurrency theory and practice.
3. Apply the Blockchain functions, security, consensus mechanisms in IT applications.
4. Apply Hyperledger Fabric and Ethereum to design and implement Blockchain applications.
5. Analyze real-world Blockchain applications across various industries.

## **UNIT I**

**7 Hours**

### **INTRODUCTION TO BLOCKCHAIN**

Blockchain- Public Ledgers, Blockchain as Public Ledgers - Block in a Blockchain, Transactions - The Chain and the Longest Chain - Permissioned Model of Blockchain, Cryptographic – Hash Function, Properties of a hash function-Hash pointer and Merkle tree.

## **UNIT II**

**6 Hours**

### **BITCOIN AND CRYPTOCURRENCY**

A basic crypto currency - Creation of coins - Payments and double spending - FORTH – precursor for Bitcoin scripting - Bitcoin Scripts - Bitcoin P2P Network - Transaction in Bitcoin Network - Block Mining - Block propagation and block relay.

## **UNIT III**

**6 Hours**

### **BITCOIN CONSENSUS**

Bitcoin Consensus - Proof of Work (PoW) - Hashcash PoW - Bitcoin PoW - Attacks on PoW - monopoly problem- Proof of Stake - Proof of Burn - Proof of Elapsed Time - Bitcoin Miner - Mining Difficulty - Mining Pool - Permissioned model and use cases.

## **UNIT IV**

**5 Hours**

### **HYPERLEDGER FABRIC AND ETHEREUM**

Architecture of Hyperledger fabric v1.1- chain code- Ethereum: Ethereum network, EVM, Transaction fee, Mist Browser, Ether, Gas, Solidity.

## **UNIT V**

**6 Hours**

### **BLOCKCHAIN APPLICATIONS**

Smart contracts - Truffle Design and issue - DApps – NFT - Blockchain Applications in Supply Chain Management, Logistics, Smart Cities, Finance and Banking, Insurance, etc - Case Study.

## **EXPERIMENT 1**

**5 Hours**

Install and understand Docker container, Node.js, Java and Hyperledger Fabric, Ethereum and perform necessary software installation on local machine/create instance on cloud to run.

## **EXPERIMENT 2**

**5 Hours**

Create and deploy a blockchain network using Hyperledger Fabric SDK for Java Set up and initialize the channel, install and instantiate chain code, and perform invoke and query on your blockchain network.

## **EXPERIMENT 3**

**5 Hours**

Interact with a blockchain network. Execute transactions and requests against a blockchain network by creating an app to test the network and its rules.

## **EXPERIMENT 4**

**5 Hours**

Deploy an asset-transfer app using blockchain. Learn app development within a Hyperledger Fabric network.

### EXPERIMENT 5

5 Hours

Use blockchain to track fitness club rewards. Build a web app that uses Hyperledger Fabric to track and trace member rewards

### EXPERIMENT 6

5 Hours

Car auction network: A Hello World example with Hyperledger Fabric Node SDK and IBM Blockchain Starter Plan. Use Hyperledger Fabric to invoke chain code while storing results and data in the starter plan.

**Total: 30+30 = 60 Hours**

MALWARE ANALYSIS

3 0 0 3

**Course Objectives**

- To understand the fundamentals of malware, types and its effects.
- To identify and analyze various malware types by static and dynamic analysis.
- To deal with detection, analysis, understanding, controlling, and eradication of malware.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze various malware analysis concepts and technologies used for threat detection.
2. Apply static and dynamic analysis techniques to independently examine modern malware samples.
3. Analyze professional malware analysis methods and techniques for identifying cyber threats.
4. Apply skills to safely analyze, debug, and disassemble malicious software using malware analysis tools.
5. Analyze Android malware architecture and assess its impact on app security and development.

**Articulation Matrix**

**UNIT I** **9 Hours**

**INTRODUCTION AND BASIC ANALYSIS**

Introduction to Malware - Malware threats - Malware types: Viruses, Worms, Rootkits, Trojans, Bots, Spyware, Adware, Logic Bombs - Goals of Malware Analysis - AV Scanning – Hashing - Finding Strings - Packing and Obfuscation - PE file format – Static - Linked Libraries and Functions - Static Analysis tools - Virtual Machines and their usage in Malware analysis – Sandboxing - Basic dynamic analysis - Malware execution - Process Monitoring -Viewing processes - Registry snapshots

**UNIT II** **10 Hours**

**ADVANCED STATIC ANALYSIS**

The Stack – Conditionals – Branching - Rep Instructions – Disassembly - Global and local variables - Arithmetic operations – Loops - Function Call Conventions - C Main Method and Offsets. Portable Executable File Format - The PE File Headers and Sections - IDA Pro - Function analysis – Graphing - The Structure of a Virtual Machine - Analyzing Windows programs - Anti-static analysis techniques – obfuscation – packing – metamorphism - polymorphism.

**UNIT III** **10 Hours**

**ADVANCED DYNAMIC ANALYSIS**

Live malware analysis - dead malware analysis - analyzing traces of malware - system calls - api calls – registries - network activities. Anti-dynamic analysis techniques - VM detection techniques- Evasion techniques - Malware Sandbox - Monitoring with Process Monitor - Packet Sniffing with Wireshark - Kernel vs. User-Mode Debugging – OllyDbg – Breakpoints – Tracing - Exception Handling – Patching

**UNIT IV** **8 Hours**

**MALWARE FUNCTIONALITY**

Downloaders and Launchers – Backdoors - Credential Stealers - Persistence Mechanisms- Handles – Mutexes - Privilege Escalation - Covert malware launching- Launchers - Process Injection- Process Replacement - Hook Injection – Detours - APC injection

**UNIT V** **8 Hours**

**ANDROID MALWARE ANALYSIS**

Android Malware Analysis: Android architecture - App development cycle – APKTool- APKInspector - Dex2Jar - JD-GUI - Static and Dynamic Analysis - Case Study: Smartphone (Apps) Security

**Total: 45 Hours**

ROBOTIC PROCESS AUTOMATION

3 0 0 3

**Course Objectives**

- To understand the basic concepts, methodologies and tools in RPA.
- To understand the UiPath building blocks in the RPA.
- To implement the exception handling and automation techniques using RPA.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze RPA methodologies and process improvement techniques to optimize automation workflows.
2. Implement UiPath tools and best practices for efficient automation development.
3. Develop advanced RPA solutions using data manipulation, web automation, and screen scraping.
4. Assess exception handling, debugging, and user event management to enhance bot reliability.
5. Optimize bot deployment, maintenance, and CI/CD strategies for scalable automation.

**Articulation Matrix**

**UNIT I****9 Hours****RPA AND PROCESS METHODOLOGIES**

Introduction to RPA: Definition, importance, and benefits of RPA – Comparison of RPA with BPO, BPM, and BPA-Understanding RPA Skills: On-Premise Vs. the Cloud - Lean and Six Sigma Methodologies for Process Improvement - Overview of Agile Methodologies and its importance in RPA.

**UNIT II****9 Hours****UiPath ESSENTIALS**

Introduction to UiPath: Installation and activation-UiPath Activities: Flowcharts, Sequences, and Data Manipulation-UiPath Variables and Data Types-Debugging techniques in UiPath-Overview of UiPath Orchestrator: BOT Development and Management-UiPath Automation Best Practices.

### UNIT III

9 Hours

#### ADVANCED RPA TECHNIQUES

Data Manipulation: Collections and Data Table Usage-File Operations: CSV/Excel to data table and vice versa-Working with UiExplorer and Desktop Automation-Web Automation: Basic and Desktop Recording-Advanced Screen Scraping Techniques-Data Scraping and Extraction from Websites.

### UNIT IV

9 Hours

#### HANDLING EXCEPTIONS AND USER EVENTS

Exception Handling Techniques: Try-Catch, Re-throwing Exceptions, and Custom Exception Handling- Logging, Debugging, and Error Reporting Techniques- Handling User Events: Assistant bots, System Event Triggers, and Image and Element Triggers- Monitoring Techniques in RPA- Launching an Assistant bot on a Keyboard Event.

### UNIT V

9 Hours

#### DEPLOYMENT AND MAINTENANCE OF BOT

Overview of Orchestration Server and its functionalities- Orchestrator to Control Bots and Deploy Bots- Uploading Packages, Managing Packages, and Deleting Packages- Publishing and Managing Updates- Continuous Integration and Continuous Deployment (CI/CD) in RPA.

**Total: 45 Hours**

REINFORCEMENT LEARNING

3 0 0 3

**Course Objectives**

- To understand the core principles behind the RL, including policies, value functions, deriving Bellman equations.
- To acquire the knowledge to define Markov Decision Processes with its properties.
- To explore the Monte Carlo Methods to solve real-world problems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply reinforcement learning principles to solve multi-armed bandit problems and optimize decision-making.
2. Analyze Markov Decision Processes to model agent-environment interactions and evaluate learning strategies.
3. Evaluate Bellman equations and value functions to derive optimal policies in reinforcement learning.
4. Implement dynamic programming techniques for policy evaluation, improvement, and iteration.
5. Assess Monte Carlo methods for reinforcement learning applications, including off-policy control and importance sampling.

**Articulation Matrix**

**UNIT I****10 Hours****REINFORCEMENT LEARNING PRIMITIVES**

The Reinforcement Learning Problem- Elements of Reinforcement Learning - Limitations and Scope - Multi-arm Bandits - An n-Armed Bandit Problem - Tracking a Non stationary Problem - Upper-Confidence-Bound Action Selection - Gradient Bandits.

**UNIT II**

**10 Hours**

**MARKOV DECISION PROCESS**

The Agent–Environment Interface - Goal and Rewards - Returns - Unified Notation for Episodic and Continuing Tasks - The Markov Property - Markov Decision Processes - Sequential Decision Making with Evaluative Feedback - Learning Action Values - Estimating Action Values Incrementally.

**UNIT III**

**9 Hours**

**VALUE FUNCTIONS AND BELLMAN EQUATIONS**

Specifying Policies-Value Functions - Bellman Equation Derivation -Why Bellman Equations - Optimal Policies - Optimal Value Functions - Using Optimal Value Functions to Get Optimal Policies.

**UNIT IV**

**9 Hours**

**DYNAMIC PROGRAMMING**

Policy Evaluation vs. Control - Iterative Policy Evaluation - Dynamic Programming: Policies -Evaluation - Improvement - Iteration - Value Iteration - Asynchronous Dynamic Programming - Generalized Policy Iteration - Efficiency of Dynamic Programming.

**UNIT V**

**7 Hours**

**MONTE CARLO METHODS**

Monte Carlo Prediction - Estimation of Action Values - Control and Control without Exploring Starts - Off-policy Prediction via Importance Sampling - Incremental Implementation - Off-Policy Monte Carlo Control - Importance Sampling on Truncated Returns – Applications of Reinforcement Learning.

**Total: 45 Hours**

EDGE COMPUTING

3 0 0 3

**Course Objectives**

- To outline an overview of Edge Computing.
- To implement data analytics techniques over edge.
- To apply various security schemes for manipulation and storage service.
- To perform optimization problem using modeling framework.
- To use RaspberryPi for implement edge computing for industry and commercial purpose.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.  
methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply edge computing principles to real-world scenarios and analyze its role in comparison to fog computing.
2. Analyze edge analytics techniques, including machine learning applications, to process real-time data efficiently.
3. Evaluate edge data security mechanisms, such as encryption and authentication, to ensure data privacy and confidentiality.
4. Optimize edge computing performance using formal modeling frameworks and performance metrics.
5. Implement edge computing solutions using Raspberry Pi and IoT for industrial and commercial applications.

**Articulation Matrix**

**UNIT I** **9 Hours**

**INTRODUCTION**

Introduction to Edge Computing Scenario's and Use cases - Edge computing purpose and definition, Edge computing use cases, Edge computing hardware architectures, Edge platforms, Edge vs Fog Computing, Communication Models - Edge, Fog and M2M.

**UNIT II** **9 Hours**

**EDGE ANALYTICS**

Data types - Data Analytics – Goals, Real-Time Applications - Phases of Data Analytics – Types of Data Analytics – Edge Data Analytics, Potential & Architecture of Edge Analytics, Case study, Machine learning for Edge Devices.

**UNIT III** **9 Hours**

**EDGE DATA SECURITY**

Security – Data Confidentiality – Identity & Attribute based encryption, Honey & search Encryption, Homomorphic Encryption– Authentication - Single, Cross & Handover – Privacy Preserving Schemes – Secure search and Storage service in Edge.

**UNIT IV** **9 Hours**

**OPTIMIZATION PROBLEMS**

Case for optimization, Formal modeling framework for Fog & Edge computing, Metrics & Performance measures for Edge optimization, Optimization opportunities for service life cycle.

**UNIT V** **9 Hours**

**APPLICATIONS**

Edge computing with RaspberryPi, Industrial and Commercial IoT and Edge, Edge computing and solutions.

**Total: 45 Hours**

22AI022

**INTELLIGENT ROBOTS AND DRONE  
TECHNOLOGY**

3 0 0 3

**Course Objectives**

- To understand the Robot types and its sensors, actuators and effectors.
- To understand the basics of Unmanned Aerial Vehicles (Drones) and its various applications.
- To impart the knowledge of how to fly a drone by considering the rules and regulations to the specific country.
- To understand the safety measures to be taken during flight.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Demonstrate the principles of robot design, classifications, and specifications to select and create intelligent robots for specific applications.
2. Examine the role of actuators and sensors in robots, assessing their characteristics and economic implications.
3. Assess the fundamentals of UAVs (drones), including design, motors, and aerodynamics, to understand their working principles.
4. Implement drone-building techniques using Arduino and GPS tracking, incorporating mission control functionalities for various applications.
5. Critique AI techniques used in drones for maintenance and troubleshooting, analyzing case studies such as INS Vikrant and related flying projects.

**Articulation Matrix**

**UNIT I** **9 Hours**

**ROBOTS INTRODUCTION**

Introduction – History and growth - Applications - Laws of Robotics – Classifications - Work envelope - Selection and Design Considerations - robot teaching - specification.

**UNIT II** **9 Hours**

**ACTUATORS AND SENSORS**

Actuators and types, DC motors, BLDC servo motors. Introduction to sensors, characteristics, sensor types-Touch, Potentiometer, Encoder, Force, Range and proximity. Economic Analysis of Robots.

**UNIT III** **9 Hours**

**DRONES FUNDAMENTALS**

Introduction to UAVs/Drones - Drones– Working Principle and Design- Types of Drones –Motors – Battery – connectors – Assembling the Drones – Frame – aerodynamics needed for flying Drone.

**UNIT IV** **9 Hours**

**DRONE AND CONTROLLERS**

How to Build a Drone – Preparing – APM planner – Building Follow me drone – Arduino based drones – GPS tracker using ESP8266.

**CONTROLLERS**

Building mission control drones – Using Drones and delivery man –Record Videos – Photography Drone – Controlling Camera.

**UNIT V** **9 Hours**

**MAINTENANCE AND APPLICATIONS**

Building Prototype Drones – Gilding Drones – Racing Drones – Maintaining and troubleshooting- Artificial Intelligence techniques in Drones – Case study: INS Vikrant, Flying Projects.

**Total: 45 Hours**

**INTELLIGENT TRANSPORTATION  
SYSTEMS**

3 0 0 3

**Course Objectives**

- To learn the fundamentals of ITS.
- To study the ITS functional areas.
- To have an overview of ITS implementation in developing countries.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcome (COs)**

1. Apply ITS principles to design and implement architectures, addressing challenges and opportunities.
2. Analyze technological building blocks like data acquisition and telecommunication for system integration.
3. Evaluate data collection methods and sensing technologies for effective ITS operations.
4. Assess transport management systems for optimizing traffic flow and mobility.
5. Analyze traveler information systems to evaluate their impact on route guidance and business opportunities.

**UNIT I****9 Hours****INTRODUCTION TO INTELLIGENT TRANSPORT SYSTEM**

Introduction to Intelligent Transportation Systems (ITS) - Functions of ITS Components - Challenges and Opportunities in ITS - Architecture – ITS Architecture Framework - Logical Architecture – Physical Architecture – Organizational Architecture

**UNIT II** **9 Hours**

**TECHNOLOGY BUILDING BLOCKS OF ITS**

Data Acquisition – Data Analysis – wireless adhoc networks – Tele communication technologies – Cellular wires – Wireless application protocols - Data and Information processing technologies – Data warehousing – Online Analytical Processing – Voice Processing and Internet.

**UNIT III** **9 Hours**

**DATA COLLECTION METHODS FOR ITS**

Detection and Sensing technologies – Road way sensors – Environmental Sensors – probe-based sensors – Blue tooth – RFID – Passive – Active and BAP RFID systems – Real time traffic monitoring using GPS probe – Emergency management – Incident management.

**UNIT IV** **9 Hours**

**TRANSPORT MANAGEMENT SYSTEM**

Vehicle to infrastructure communication – Mobility management - Integrated Traffic Management – Junction Management Strategies- ATMS - Route Guidance - Predictive Guidance – Dynamic Traffic Assignment (DTA).

**UNIT V** **9 Hours**

**TRAVELLER AND INFORMATION SYSTEM**

Basic TIS Concepts - Pre-Trip and Enroute Methods - Smart Route System – Dissemination to Travelers – Evaluation of Information – Value of Information – Business Opportunities. Case Study: Kavach system, Automatic train track switching system.

**Total: 45 Hours**

EXPERT SYSTEMS

3 0 0 3

**Course Objectives**

- To understand the concepts of intelligent agents, searching, knowledge and reasoning, planning and learning in expert systems.
- To illustrate the knowledge representation and acquisition in expert systems.
- To analyze the features, tools, limitations and applications of expert systems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Implement expert system architectures to solve domain-specific problems and assess their limitations.
2. Select appropriate expert system tools and techniques to optimize system development.
3. Construct knowledge acquisition models to enhance expert system performance.
4. Classify various knowledge representation schemes to improve reasoning efficiency.
5. Validate fuzzy expert systems by analyzing their inference mechanisms in decision-making.

**UNIT I****9 Hours****INTRODUCTION TO EXPERT SYSTEMS**

Definition – Features of an expert system – Architecture and Components of Expert System – Roles in Expert Systems – Stages in the Expert System development life cycle – Sources of Error in Expert System Development – Limitations and Applications of Expert Systems.

**UNIT II** **9 Hours**

**BUILDING AN EXPERT SYSTEMS**

Expert system tools - Selecting a tool - Evaluating the System Building tool – Knowledge acquisition process - Resources, Inherent Limitations - Common pitfalls in planning, development - Pitfalls in dealing with Domain Expert.

**UNIT III** **9 Hours**

**KNOWLEDGE ACQUISITION IN EXPERT SYSTEMS**

Knowledge Basics - Knowledge Engineering – Views of Knowledge Engineering – Knowledge Acquisition Techniques – Natural Techniques - Contrived Techniques - Modelling Techniques.

**UNIT IV** **9 Hours**

**KNOWLEDGE REPRESENTATION IN EXPERT SYSTEMS**

Definition- Characteristics - Properties of the symbolic representation of knowledge – Categories of Knowledge Representation Schemes –Types of Knowledge Representational Schemes – Formal Logic – Semantic Net – Frames – Scripts – Conceptual Dependency.

**UNIT V** **9 Hours**

**FUZZY EXPERT SYSTEMS**

Fuzzy Systems: Fuzzy Rule – Fuzzy Reasoning. Fuzzy Expert Systems: Need for Fuzzy Expert Systems – Operations - Fuzzy Inference Systems - The Fuzzy Inference Process in a Fuzzy Expert System - Types of Fuzzy Expert Systems - Fuzzy Controller.

**Total: 45 Hours**

KNOWLEDGE ENGINEERING

3 0 0 3

**Course Objectives**

- To understand the basics of Knowledge Engineering.
- To discuss the knowledge representation and reasoning methods.
- To apply reasoning and uncertainty for intelligent systems.
- To design and develop ontologies.
- To understand learning and rule learning.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Implement fundamental concepts of Knowledge Engineering.
2. Apply knowledge representation and reasoning methods effectively.
3. Analyze reasoning techniques and uncertainty management in intelligent systems.
4. Design and develop ontologies for structured knowledge representation.
5. Evaluate learning methodologies and rule-based learning approaches.

**Articulation Matrix**

**UNIT I** **9 Hours**

**INTRODUCTION TO KNOWLEDGE ENGINEERING**

Introduction – Data, Information and Knowledge – Skills of Knowledge Engineer – Knowledge based systems – Types of Knowledge based systems – Expert Systems – Neural Networks – Case Based Reasoning – Genetic Algorithms – Intelligent Systems – Data Mining

**UNIT II** **9 Hours**

**KNOWLEDGE REPRESENTATION AND REASONING**

Knowledge Acquisition – Knowledge Representation and Reasoning – Using Knowledge – Logic, Rules and Representation – Developing Rule based Systems – Semantic Networks – Frames

**UNIT III** **9 Hours**

**REASONING UNDER UNCERTAINTY**

Introduction – Abductive reasoning – Probabilistic reasoning: Enumerative Probabilities – Subjective Bayesian view – Belief Functions – Baconian Probability – Fuzzy Probability – Uncertainty methods - Evidence-based reasoning – Intelligent Agent – Mixed-Initiative Reasoning.

**UNIT IV** **9 Hours**

**ONTOLOGIES DESIGN AND DEVELOPMENT**

Concepts and Instances – Generalization Hierarchies – Object Features – Defining Features – Representation – Transitivity – Inheritance – Concepts as Feature Values – Ontology Matching. Design and Development Methodologies – Steps in Ontology Development

**UNIT V** **9 Hours**

**LEARNING AND RULE LEARNING**

Machine Learning – Concepts – Generalization and Specialization Rules – Types of Generalization and Specialization – Formal definition of Generalization. Modelling, Learning and Problem Solving.

**Total: 45 Hours**

HEALTH CARE ANALYTICS

3 0 0 3

**Course Objectives**

- To learn the significance and need of data analysis and data visualization.
- To learn the use of machine learning and deep learning algorithms in healthcare.
- To apply healthcare analytics for critical care applications.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply machine learning techniques to analyze healthcare data, policies, and standardized code sets.
2. Analyze machine learning pipelines, feature selection, and model evaluation metrics for healthcare analytics.
3. Implement IoT-based healthcare management solutions using cloud databases, encryption, and semantic frameworks.
4. Apply deep learning models for biomedical image analysis, clinical data mining, and decision support systems.
5. Analyze case studies to develop data-driven solutions for healthcare challenges like mortality prediction and ECG analysis.

**UNIT I** **9 Hours**

**INTRODUCTION TO HEALTHCARE ANALYSIS**

Overview - History of Healthcare Analysis Parameters on medical care systems- Health care policy- Standardized code sets – Data Formats – Machine Learning Foundations: Tree Like reasoning, Probabilistic reasoning, Weighted sum approach.

**UNIT II** **9 Hours**

**ANALYTICS ON MACHINE LEARNING**

Machine Learning Pipeline – Pre-processing –Visualization – Feature Selection – Training model parameter – Evaluation model : Sensitivity , Specificity , PPV ,NPV, FPR ,Accuracy , ROC , Precision Recall Curves , Valued target variables –Python: Variables and types, Data Structures and containers , Pandas Data Frame :Operations – Scikit –Learn : Pre-processing , Feature Selection.

**UNIT III** **9 Hours**

**HEALTH CARE MANAGEMENT**

IOT- Smart Sensors – Migration of Healthcare Relational database to NoSQL Cloud Database – Matrix block Cipher System – Semantic Framework Analysis – Histogram bin Shifting and Rc6 Encryption – Clinical Prediction Models – Visual Analytics for Healthcare.

**UNIT IV** **9 Hours**

**HEALTHCARE AND DEEP LEARNING**

Introduction on Deep Learning – DFF network CNN- RNN for Sequences – Biomedical Image and Signal Analysis – Natural Language Processing and Data Mining for Clinical Data – Mobile Imaging and Analytics – Clinical Decision Support System.

**UNIT V** **9 Hours**

**CASE STUDIES**

Predicting Mortality for cardiology Practice –Smart Ambulance System using IOT –Hospital Acquired Conditions (HAC) program- Healthcare and Emerging Technologies – ECG Data Analysis.

**Total: 45 Hours**

OPTIMIZATION TECHNIQUES

3 0 0 3

### Course Objectives

- To formulate and solve linear programming problems (LPP), Integer Programming Problems and Transportation Problems.
- To solve the dynamic programming and its simulation and obtain a solution to network problems using CPM and PERT techniques.
- To able to optimize the function subject to the constraints and solve problems under markovian queuing models.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

### Course Outcomes (COs)

1. Apply operations research techniques to solve linear programming problems.
2. Solve integer programming and transportation problems using transshipment models.
3. Apply dynamic programming and simulation techniques to real-world problems.
4. Develop project schedules using CPM, PERT, and Gantt charts.
5. Solve optimization problems using classical methods and Kuhn-Tucker conditions.

**Articulation Matrix**

**UNIT I****9 hours****LINEAR MODELS**

Introduction of Operations Research: Development, definition, characteristics and phases, types of operation research models, applications; Linear Programming: mathematical formulation of LPP- Graphical Methods to solve LPP- Simplex Method- Two-Phase method

**UNIT II****9 hours****INTEGER PROGRAMMING AND TRANSPORTATION PROBLEMS**

Integer programming: Integer Programming Formulations- the Cutting-plane Algorithm - Branch and bound method - Zero-One Implicit Enumeration Algorithm – Transportation problem - Types of Transportation Problem - Methods to Solve Transportation Problem - Transshipment Model - Modelling the Transportation Problem with Quantity Discounts.

**UNIT III****9 hours****DYNAMIC PROGRAMMING AND SIMULATION**

Dynamic Programming: Introduction, Terminology, Bellman's Principle of optimality, Applications of dynamic programming, shortest path problem, linear programming problem. Simulation: Introduction, Definition, types of simulation models, steps involved in the simulation process - Advantages and Disadvantages, Application of Simulation to queuing and inventory.

**UNIT IV****9 hours****PROJECT SCHEDULING**

Introduction – Phases of project management – Guidelines for network construction - Critical path method (CPM) – Gantt Chart - PERT- Crashing of project network - Project Scheduling with Constrained Resources - Cost considerations in PERT and CPM.

**UNIT V****9 hours****CLASSICAL OPTIMIZATION THEORY**

Unconstrained problems – necessary and sufficient conditions - Newton-Raphson method, Constrained problems – equality constraints – inequality constraints - Kuhn-Tucker conditions.

BIG DATA ANALYTICS

3 0 0 3

**Course Objectives**

- To acquire a deep understanding of big data and NoSQL.
- To develop expertise in map reduce analytics using Hadoop and related tools
- To explore the Hadoop related tools for Big Data Analytics.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Analyze the big data technologies and use cases for respective business domains.
2. Analyze the NoSQL databases and its related concepts.
3. Apply Map reduce workflows for web applications.
4. Analyze the basic concepts of Hadoop.
5. Apply Hadoop related tools for Big Data Analytics.

**Articulation Matrix**

**UNIT I****9 Hours****UNDERSTANDING BIG DATA**

Introduction to big data – Convergence of key trends – Unstructured data – Industry examples of big data – Web analytics – Big data applications– Big data technologies – Introduction to Hadoop – Open source technologies – Cloud and big data – Mobile business intelligence – Crowd sourcing analytics –Inter and trans firewall analytics.

## **UNIT II**

**9 Hours**

### **NOSQL DATA MANAGEMENT**

Introduction to NoSQL – Aggregate data models – Key-value and document data models – Relationships – Graph databases – Schema less databases – Materialized views – Distribution models – Master-slave replication – Consistency - Cassandra – Cassandra data model – Cassandra examples –Cassandra clients

## **UNIT III**

**9 Hours**

### **MAP REDUCE APPLICATIONS**

MapReduce workflows – Unit tests with MR Unit – Test data and local tests – Anatomy of MapReduce job run – Classic Map-reduce – YARN – Failures in classic Map-reduce and YARN – Job scheduling – Shuffle and sort – Task execution – MapReduce types – Input formats – Output formats.

## **UNIT IV**

**9 Hours**

### **BASICS OF HADOOP**

Data format – Analyzing data with Hadoop – Scaling out – Hadoop streaming – Hadoop pipes – Design of Hadoop distributed file system (HDFS) – HDFS concepts – Java interface – Data flow – Hadoop I/O– Data integrity – Compression – Serialization – Avro – File-based data structures - Cassandra – Hadoop integration.

## **UNIT V**

**9 Hours**

### **HADOOP RELATED TOOLS**

Hbase – Data model and implementations – Hbase clients – Hbase examples – Praxis. Pig – Grunt – Pig data model – Pig Latin – Developing and testing Pig Latin scripts. Hive – Data types and file formats – HiveQL data definition – HiveQL data manipulation – HiveQL queries.

**Total: 45 Hours**

QUANTUM COMPUTING

3 0 0 3

**Course Objectives**

- To understand the background of classical computing and quantum computing.
- To acquire the knowledge about the hardware and mathematical models of quantum computation.
- To interpret quantum security in order to ensure that any attempt to intercept.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Implement quantum mechanics and linear algebra principles to represent quantum systems and qubits.
2. Design quantum circuits and apply quantum error correction techniques to enhance computation reliability.
3. Evaluate quantum algorithms used in the circuit model
4. Analyze quantum information theory concepts over noisy quantum channels.
5. Implement cryptographic techniques and quantum key distribution protocols to ensure data security in quantum systems

**Articulation Matrix**

**UNIT I****9 Hours****QUANTUM COMPUTING BASIC CONCEPTS**

Complex Numbers - Matrices and Operators - Quantum Mechanics – Linear Algebra - The Postulates of Quantum Mechanics - Quantum Bits - Representations of Qubits – Superpositions

**UNIT II****9 Hours****QUANTUM GATES AND CIRCUITS**

Quantum Computation - Single qubit gates - Multiple qubit gates – Quantum Circuits – Qubit Copying Circuit - Circuit development - Quantum error correction.

**UNIT III**

**9 Hours**

**QUANTUM ALGORITHMS**

Quantum parallelism - Deutsch's algorithm - The Deutsch-Jozsa algorithm - Quantum Fourier transform and its applications - Quantum Search Algorithms: Grover's Algorithm: Grover's Algorithm - Quantum search as a quantum simulation - Quantum counting.

**UNIT IV**

**9 Hours**

**QUANTUM INFORMATION THEORY**

Data compression - Shannon's noiseless channel coding theorem - Schumacher's quantum noiseless channel coding theorem – Communication Over Noisy Quantum Channels – Quantum Information Over Noisy Quantum Channels.

**UNIT V**

**9 Hours**

**QUANTUM CRYPTOGRAPHY**

Principles of Information Security – One-Time Pad - Public key cryptography – RSA Coding Scheme - Quantum Cryptography – Quantum Key Distribution - BB84 - Ekert 91.

**Total: 45 Hours**

COGNITIVE SCIENCE

3 0 0 3

**Course Objectives**

- To understand the fundamentals of Cognitive Science
- To apply advanced analytics to cognitive science functions
- To explore how cognitive science used in healthcare system.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply cognitive science principles to analyze perception, decision-making, and language processing.
2. Implement cognitive intelligence techniques using AI architectures, knowledge-based systems, and robotics.
3. Utilize probabilistic programming languages to model uncertainty and inference in cognition.
4. Analyze inference models for cognitive reasoning using generative and statistical methods.
5. Develop learning models for cognition using hierarchical and deep learning approaches.

**UNIT I****9 Hours****INTRODUCTION TO COGNITIVE SCIENCE**

The mind in cognitive science- Logic and science of the mind – Place of psychology within cognitive science – Cognitive Neuroscience - Perception - Decision – Learning and memory –Language understanding and processing – Mental- Physical relation – From materialism to mental science.

**UNIT II****9 Hours****COGNITIVE INTELLIGENCE**

Machines and Cognition - Artificial intelligence – Architectures of Cognition – Knowledge based systems – Logical representation and Reasoning – Logical decision making – Decision making under uncertainty – Learning – Language – Vision – Robotics.

**UNIT III**

**9 Hours**

**PROBABILISTIC PROGRAMMING LANGUAGE**

WebPPL Language – Syntax – Using Java script libraries – Manipulating probability types and distributions – Finding inference - Exploring random computation - Coroutines: Functions that receive continuations – Enumeration - Other basic computation.

**UNIT IV**

**9 Hours**

**INFERENCE MODELS OF COGNITION**

Generative Models – Conditioning – Casual and statistical dependence – Conditional dependence – Data analysis - Algorithm for inference.

**UNIT V**

**9 Hours**

**LEARNING MODELS OF COGNITION**

Learning as Conditional Inference – Learning with a Language of Thought – Hierarchical Models – Occam's razor – Learning (Deep) Continuous function – Mixture Models.

**Total: 45 Hours**

BIOMEDICAL IMAGE ANALYSIS

2023

**Course Objectives**

- Understand Nature of Biomedical Images, Image Enhancement and Filtering for removal of artifacts
- Understand the image segmentation and analysis of Image shape and Texture
- Understand the pattern classification and diagnostic decision.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Develop biomedical image analysis techniques to enhance diagnostic accuracy.
2. Implement artifact removal methods to improve image quality and information retention.
3. Assess shape and texture features to analyze biomedical image characteristics.
4. Apply directional pattern analysis techniques for precise feature extraction.
5. Assess classification models to optimize diagnostic decision-making in biomedical imaging.

**Articulation Matrix**

**UNIT I****6 Hours****THE NATURE OF BIOMEDICAL IMAGES**

The Nature of Biomedical Images: Objectives of Biomedical Image Analysis - Computer aided Diagnosis-Image Quality and Information Content: Acquisition and Analysis -The Fourier Transform and Spectral Content.

## **UNIT II**

**6 Hours**

### **REMOVAL OF ARTIFACTS**

Removal of Artifacts: Random noise -Signal dependent noise - Space domain Local statistics-based Filters - Frequency domain Filters - Image Enhancement: Greyscale Transforms - Histogram Transformation - Convolution Mask Operators - Homomorphism Filtering for Enhancement - Detection of Regions of Interest

## **UNIT III**

**6 Hours**

### **ANALYSIS OF SHAPE**

Analysis of Shape: Representation of Shapes and Contours - Shape Factors - Fourier Descriptors - Analysis of Texture: Texture in Biomedical Images - Statistical Analysis of Texture - Fourier domain Analysis of Texture.

## **UNIT IV**

**6 Hours**

### **ANALYSIS OF ORIENTED PATTERNS**

Analysis of Oriented Patterns: Oriented Patterns in Images - Measures of Directional Distribution- Directional Filtering - Gabor Filters - Directional Analysis via Multiscale Edge Detection

## **UNIT V**

**6 Hours**

### **PATTERNS ANALYSIS DECISION**

Pattern Classification and Diagnostic Decision: Pattern Classification - Probabilistic Models and Statistical Decision - Logistic Regression - Neural Networks - Measures of Diagnostic Accuracy - Reliability of Features - Classifiers and Decisions.

## **EXPERIMENT 1**

**6 Hours**

### **Cell Counting and Nucleus Detection in Microscopy Images**

Develop and implement algorithms for automated cell counting and nucleus detection in microscopy images. Utilize Cell Profiler, a modular high-throughput image analysis software, to enhance the structure, function, and compatibility of the analysis.

## **EXPERIMENT 2**

**6 Hours**

### **Automated Detection of Diabetic Retinopathy in Fundus Images**

Create and validate a deep learning algorithm for automated detection of diabetic retinopathy in retinal fundus photographs. Employ advanced computational methods to aid in the early and accurate identification of diabetic retinopathy for effective medical intervention.

## **EXPERIMENT 3**

**6 Hours**

### **Segmentation and Characterization of Tumor Regions in Breast MRI**

Focus on developing robust segmentation techniques to identify and characterize tumor regions in breast MRI images. Implement quantitative imaging biomarkers, such as the Yen method, to improve the accuracy and efficiency of breast cancer diagnosis and assessment.

## **EXPERIMENT 4**

**6 Hours**

### **Analysis of White Matter Tracts in Diffusion Tensor Imaging (DTI)**

Utilize diffusion tensor imaging (DTI) to analyze white matter tracts in the brain. Implement three-dimensional tracking methods to visualize and track axonal projections, providing critical insights into brain connectivity and neurological conditions.

## EXPERIMENT 5

6 Hours

### Quantification of Cardiac Function using Echocardiography

Develop a system to quantitatively analyze cardiac function parameters, including ejection fraction and wall motion abnormalities, using echocardiography images. Adhere to the recommendations provided by the American Society of Echocardiography and the European Association of Cardiovascular Imaging for accurate cardiac disease assessment.

**Total: 30+30 = 60 Hours**

RECOMMENDER SYSTEMS

3 0 0 3

### Course Objectives

- To understand the foundations of the recommender system.
- To learn the significance of machine learning and data mining algorithms for Recommender systems.
- To learn about collaborative filtering.

### Programme Outcomes (POs)

**PO1: Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2: Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3: Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4: Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5: Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO7: Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Analyze different recommender system types, data mining methods, and dimensionality reduction techniques.
2. Apply content-based filtering by building item and user profiles using similarity and classification methods.
3. Analyze collaborative filtering techniques, including rating normalization, similarity computation, and neighborhood selection.
4. Apply attack detection and robust recommendation strategies to enhance system security.
5. Analyze evaluation metrics and paradigms to assess recommender system performance and limitations.

**UNIT I****9 Hours****INTRODUCTION**

Introduction and basic taxonomy of recommender systems - Traditional and non-personalized Recommender Systems - Overview of data mining methods for recommender systems- similarity measures- Dimensionality reduction – Singular Value Decomposition (SVD)

**UNIT II****9 Hours****CONTENT BASED RECOMMENDATION SYSTEMS**

High-level architecture of content-based systems - Item profiles, Representing item profiles, Methods for learning user profiles, Similarity-based retrieval, and Classification algorithms.

**UNIT III****9 Hours****COLLABORATIVE FILTERING**

A systematic approach, Nearest-neighbor collaborative filtering (CF), user-based and item-based CF, components of neighborhood methods (rating normalization, similarity weight computation, and neighborhood selection)

**UNIT IV****9 Hours****ATTACK RESISTANT RECOMMENDER SYSTEMS**

Introduction – Types of Attacks – Detecting attacks on recommender systems – Individual attack – Group attack – Strategies for robust recommender design - Robust recommendation algorithms.

**UNIT V****9 Hours****EVALUATING RECOMMENDER SYSTEMS**

Evaluating Paradigms – User Studies – Online and Offline evaluation – Goals of evaluation design – Design Issues – Accuracy metrics – Limitations of Evaluation measures.

IMAGE AND VIDEO ANALYTICS

3 0 0 3

**Course Objectives**

- To understand the basics of image processing techniques for computer vision.
- To learn the techniques used for image pre-processing.
- To discuss the various object detection techniques.
- To understand the various Object recognition mechanisms.
- To elaborate on the video analytics techniques

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement image analysis techniques to process and represent image data effectively.
2. Analyze image pre-processing methods to enhance image quality and feature extraction.
3. Develop object detection models using machine learning frameworks and deep learning architectures.
4. Evaluate face and gesture recognition techniques for real-world applications.
5. Apply advanced video analytics methodologies to extract insights from video data.

**Articulation Matrix**

**UNIT I** **9 Hours**

**INTRODUCTION**

Basic concepts - Image functions and types - Computer Vision – Image representation and image analysis tasks - Image representations – digitization – properties – color images – Data structures for Image Analysis - Levels of image data representation - Traditional and Hierarchical image data structures.

**UNIT II** **9 Hours**

**IMAGE PRE-PROCESSING**

Pixel brightness transformations - Geometric transformations - Local pre-processing - Image smoothing - Edge detectors - Zero-crossings of the second derivative - Scale in image processing - Canny edge detection - Parametric edge models - Edges in multi-select images - Local pre- processing in the frequency domain - Line detection by local pre-processing operators - Image restoration.

**UNIT III** **9 Hours**

**OBJECT DETECTION USING MACHINE LEARNING**

Object localization - Object detection – Object detection methods – Deep Learning framework for Object detection – bounding box approach - Intersection over Union (IoU) – Deep Learning Architectures - R-CNN - Faster R-CNN -You Only Look Once (YOLO) - Salient features-Loss Functions -YOLO architectures.

**UNIT IV** **9 Hours**

**FACE RECOGNITION AND GESTURE RECOGNITION**

Face Recognition – Introduction - Applications of Face Recognition -Process of Face Recognition - DeepFace solution by Facebook - FaceNet for Face Recognition - Implementation using FaceNet- Gesture Recognition.

**UNIT V** **9 Hours**

**VIDEO ANALYTICS**

Video Processing – use cases of video analytics -Vanishing Gradient and exploding gradient problem - ResNet architecture - ResNet and skip connections-Inception Network - GoogleNet architecture - Improvement in Inception v2 -Video analytics - Implementation using RestNet and Inception v3.

CYBER THREAT ANALYTICS

3 0 0 3

**Course Objectives**

- To understand the security problems and defend the cyberspace.
- To understand and protect against attacks, threats and intrusion
- To understand how to leverage intelligence to understand adversary behavior and make use of indicators of compromise to detect and stop malware.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement cybersecurity measures by understanding attack models, adversary types, and intrusion techniques.
2. Develop strategies to counter advanced persistent threats using intrusion kill chain analysis and evasion techniques.
3. Assess cyber threat intelligence frameworks by analyzing indicators of compromise and threat actor behaviors.
4. Construct effective threat intelligence models through campaign analysis, intrusion reconstruction, and OSINT techniques.
5. Optimize Security Operations Center (SOC) functions by managing threat intelligence data and generating actionable reports.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I**

**9 Hours**

**CYBER ATTACKS, INTRUSIONS, THREATS**

Introduction to cyber-attacks, attack model, Adversary Types, Vulnerability Types, Threat Types, Attacks vs. Intrusion, DDoS, Types, Malware, malware Types, Introduction to Dark net, Cybercrimes.

**UNIT II**

**9 Hours**

**CYBER THREATS AND INTRUSION KILL CHAIN**

Introduction to Advanced Persistent Threats, Intrusion Kill Chain, Zero days, Attack surface, Attack vectors, Evasion techniques – Host and Network level evasions, Covert Communication: Infiltration and Exfiltration, Advanced Evasion techniques

**UNIT III**

**9 Hours**

**THREAT INTELLIGENCE**

Cyber Threat Intelligence (CTI), Overview of Threat Intelligence Lifecycle and Frameworks, CTI types, generic threat actor, Indicators of Compromise (IoCs).

**UNIT IV**

**9 Hours**

**THREAT INTELLIGENCE MODEL**

Campaign analysis, Diamond model, Threat intel methodologies, Intrusion reconstruction, OSINT, Challenges with detection intrusions.

**UNIT V**

**9 Hours**

**SECURITY OPERATION CENTRE (SOC)**

Introduction to SIEM, Threat Intelligence Data Collection, Threat Intelligence Collection Management, Threat Intelligence Data Feeds and Sources, Data Processing and analysis, building your own SOC, Visualizing the threat intelligence data. Threat Intelligence Reports: Baseline and Diff, Blacklists and Whitelists, Tracking, Integration.

BUSINESS ANALYTICS

3 0 0 3

**Course Objectives**

- To comprehend the process of acquiring Business Intelligence.
- To understand various types of analytics for Business Forecasting.
- To apply analytics for different functions of a business.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply business analytics techniques to extract insights from data and drive decision-making.
2. Evaluate business intelligence tools and decision support systems for strategic problem-solving.
3. Implement predictive analytics and machine learning models to enhance business forecasting.
4. Analyze HR and supply chain analytics to optimize workforce planning and logistics.
5. Assess marketing and sales analytics to predict customer behavior and improve sales strategies.

**UNIT I****9 Hours****INTRODUCTION TO BUSINESS ANALYTICS**

Analytics and Data Science – Analytics Life Cycle – Types of Analytics – Business Problem Definition-Data Collection – Data Preparation – Hypothesis Generation – Modeling – Validation and Evaluation-Interpretation – Deployment and Iteration

**UNIT II** **9 Hours**

**BUSINESS INTELLIGENCE**

Data Warehouses and Data Mart - Knowledge Management –Types of Decisions - Decision Making Process - Decision Support Systems – Business Intelligence –OLAP – Analytic functions.

**UNIT III** **9 Hours**

**BUSINESS FORECASTING**

Introduction to Business Forecasting and Predictive analytics - Logic and Data Driven Models – Data Mining and Predictive Analysis Modeling –Machine Learning for Predictive analytics.

**UNIT IV** **9 Hours**

**HR AND SUPPLY CHAIN ANALYTICS**

Human Resources – Planning and Recruitment – Training and Development - Supply chain network - Planning Demand, Inventory and Supply – Logistics – Analytics applications in HR & Supply Chain. Apply HR Analytics to make a prediction of the demand for hourly employees for a year.

**UNIT V** **9 Hours**

**MARKETING AND SALES ANALYTICS**

Smart Marketing Strategy, Marketing Mix, Customer Behaviour –selling Process – Sales Planning – Analytics applications in Marketing and Sales. Do predictive analytics for customers' behaviour in marketing and sales.

**Total: 45 Hours**

DIGITAL MARKETING AND MANAGEMENT

3 0 0 3

**Course Objectives**

- To introduce the fundamentals of digital marketing, including platforms, strategies, and the role of a digital marketing manager.
- To analyze customer behavior, social media strategies, and search engine marketing techniques.
- To develop and manage digital marketing plans, leveraging customer relationship management (CRM) tools, analytics, and automation.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the fundamentals of digital marketing and the role of a digital marketing manager, to real-world scenarios.
2. Apply various digital models and analyze the behavior and profiles of digital customers.
3. Develop strategies for social media marketing, search engine marketing, and online advertising.
4. Implement CRM tools and techniques for customer profiling, personalization, and lifecycle marketing.
5. Design a comprehensive digital marketing plan, incorporating budgeting, analytics, and security measures.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

## **UNIT I**

**9 Hours**

### **INTRODUCTION TO DIGITAL MARKETING**

Basics of Marketing – Types of Marketing - Digital Marketing Platforms- Types of Organic and Paid Digital Marketing- Difference between Traditional Marketing and digital Marketing- Advantage of Digital Marketing - Role of a Digital Marketing Manager–Remix.

## **UNIT II**

**9 Hours**

### **DIGITAL MODEL AND DIGITAL CUSTOMER**

Digital Model – Revenue Model – Intermediary Model – Attribution Model – Communication Model – Processing Model – Loyalty Model – Social Media Model – Digital Customers: Introduction to Digital Customer – Online information process – Online buying process – Customer Profiles & Customer types.

## **UNIT III**

**9 Hours**

### **SOCIAL MEDIA MARKETING AND SEARCH ENGINE**

Social Media Marketing - Benchmarking and Setting - Strategy and plan to manage social media – Social listening - online reputation management - content marketing - social media communications strategy - Social Media optimization - Search Engine Marketing - Paid or Pay Per Click search marketing - Banner VS Native advertising - Online partnerships - Viral marketing - Offline traffic building.

## **UNIT IV**

**9 Hours**

### **CUSTOMER LIFECYCLE MANAGEMENT**

e-CRM - customer lifecycle marketing - Database marketing and marketing automation – marketing technology to support CRM - Profiling - Personalization - Email marketing - Control issues - Cleaning the database - social business through implementing social CRM - reviewing digital marketing capabilities.

## **UNIT V**

**9 Hours**

### **DIGITAL MARKETING PLAN AND MANAGEMENT**

Managing digital marketing - Budgeting for digital marketing - digital marketing investment- suppliers for digital marketing - Change management - digital analytics & Automation - Digital business security – digital marketing planning - Situational analysis – Tactics, Action, and Control - The 3Ms resources – case study.

**Total: 45 Hours**

**TIME SERIES ANALYSIS AND  
FORECASTING****3 0 0 3****Course Objectives**

- Understand the basic concepts of Time Series data and its analysis.
- Acquire the knowledge of Statistical and State Space models in Time series.
- Illustrate how to process time series data using Machine and Learning and Deep Learning Techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Analyze time series components and assess stationarity using visualization techniques and analytical methods.
2. Interpret stochastic processes by analyzing auto-covariance, auto-correlation, and white noise behavior.
3. Construct and apply AR, MA, ARMA, and ARIMA models for effective time series forecasting.
4. Validate regression models using adequacy checks and variable selection for accurate predictions.
5. Optimize forecasting accuracy with Kalman Filters, Neural Networks, and Bayesian techniques.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****INTRODUCTION**

Introduction to time series analysis – Components: Trend, seasonality, cycles and residuals- Stationarity in time series data - Familiar methods - Visualization and Applications- Popular time series databases and file solutions

**UNIT II** **9 Hours**  
**STOCHASTIC PROCESS IN TIME SERIES**

Auto covariance – Auto correlation functions - Partial autocorrelation function - White noise process - Estimation of mean auto co variances and autocorrelations

**UNIT III** **9 Hours**  
**TIME SERIES MODELS**

Stationary Model - Auto Regressive Process - Moving Average Process - Difference between Auto Regression Vs Moving Average process - Auto Regressive moving average process – Non-Stationary Model - ARIMA – SARIMA model

**UNIT IV** **9 Hours**  
**REGRESSION ANALYSIS AND FORECASTING**

Linear regression analysis – predictions of new observation - Model adequacy checking – Variable selection methods in regression - Generalized least squares – Regression Models for General Time Series Data - Econometric models

**UNIT V** **9 Hours**  
**FORECASTING METHODS**

Multivariate / Univariate time series - State Space Models –The Kalman Filter – Neural Networks and forecasting – Bayesian Methods in forecasting - The holt winter algorithm

HUMAN COMPUTER INTERACTION

3 0 0 3

**Course Objectives**

- Learn the foundations of Human Computer Interaction.
- Be familiar with the design technologies for individuals and persons with disabilities.
- Be aware of applications of mobile HCI.
- Learn the guidelines for creating user interface.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Apply HCI principles to enhance user interaction in a digital system.
2. Design effective HCI for individuals and groups using the design rules.
3. Apply models and theories of HCI to design an intuitive user interface.
4. Design an optimized multimedia, e-commerce, or e-learning website by applying HCI principles and evaluating their impact.
5. Develop and design meaningful user interfaces.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 1   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | 2    | -    |

| 4     | 2   | -   | 3   | -   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | -    |
| 5     | 2   | -   | 3   | -   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | -    |

**UNIT I**

**9 Hours**

**FOUNDATIONS OF HCI**

The Human: I/O channels – Memory – Reasoning and problem solving; The Computer: Devices-Memory – processing and networks; Interaction: Models – frameworks – Ergonomics – styles- elements – interactivity- Paradigms. - Case Studies

**UNIT II**

**9 Hours**

**DESIGN AND SOFTWARE PROCESS**

Interactive Design: Basics – process – scenarios – navigation – screen design – Iteration and prototyping. HCI in software process: Software life cycle – usability engineering – Prototyping in practice – design rationale. Design rules: principles, standards, guidelines, rules. Evaluation Techniques – Universal Design

**UNIT III**

**9 Hours**

**MODELS AND THEORIES**

HCI Models: Cognitive models: Socio-Organizational issues and stakeholder requirements – Communication and collaboration models-Hypertext, Multimedia and WWW.

**UNIT IV**

**9 Hours**

**MOBILE HCI**

Mobile Ecosystem: Platforms, Application frameworks- Types of Mobile Applications: Widgets, Applications, Games- Mobile Information Architecture, Mobile 2.0, Mobile Design: Elements of Mobile Design, Tools. - Case Studies

**UNIT V**

**9 Hours**

**WEB INTERFACE DESIGN**

Designing Web Interfaces – Drag & Drop, Direct Selection, Contextual Tools, Overlays, Inlays and Virtual Pages, Process Flow - Case Studies

**Total: 45 Hours**

PATTERN RECOGNITION

3 0 0 3

**Course Objectives**

- To understand the fundamental concepts of pattern recognition.
- To describe different techniques involved in pattern recognition.
- To familiarize various classification and clustering techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply Bayes Decision Theory to design optimal classifiers for pattern recognition tasks.
2. Explore various classifier models and ensemble techniques to enhance classification accuracy.
3. Assess clustering methods and validity measures to improve unsupervised learning outcomes.
4. Implement feature extraction and selection techniques to optimize pattern recognition performance.
5. Analyze template matching approaches to enhance pattern detection and recognition accuracy.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 3   | 2   | 2   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | 3    |
| 2     | 3   | 3   | 3   | 3   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | 3    |
| 3     | 3   | 3   | 3   | 3   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | 3    |
| 4     | 3   | 3   | 2   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | 3    |
| 5     | 3   | 3   | 2   | 2   | -   | -   | -   | -   | -   | -    | -    | -    | 3    | 3    |

**UNIT I****9 Hours****INTRODUCTION TO PATTERN RECOGNITION**

Introduction to Pattern Recognition: Learning paradigms, supervised and unsupervised learning– Features - Feature Vectors and Classifiers - Bayes Decision Theory: Minimum-error-rate classification - Discriminant Functions and Decision Surfaces.

**UNIT II**

**9 Hours**

**CLASSIFIERS**

Introduction – Decision-Making Hyperplanes – Least Square Methods – Mean Square Estimation Revisited - Parametric Techniques: Maximum Likelihood Estimation - Non-parametric techniques for density estimation: Parzen Window method - Classifier Ensembles: Bagging, Boosting.

**UNIT III**

**9 Hours**

**CLUSTERING**

Introduction – Unsupervised Bayesian Learning - Mixture Densities and Identifiability - Criterion functions for clustering: Sum-of-Squared Error – Related minimum variance – Cluster Validity Measures – Low-dimensional Representations and Multidimensional scaling (MDS).

**UNIT IV**

**9 Hours**

**FEATURE EXTRACTION AND SELECTION**

Feature Selection Based on Statistical Hypothesis Testing – Feature subset Selection - Basis Vectors and Images - Entropy Minimization – Karhunen-Loeve Transformation (KLT) – Feature Selection through Functions Approximation – Binary Feature Selection.

**UNIT V**

**9 Hours**

**TEMPLATE MATCHING**

Introduction – Template Matching Process – Correlation Measures: Sum of Squared Differences (SSD), Normalized Cross Correlation (NCC), Zero-mean Normalized Cross Correlation (ZNCC) – Template Matching Algorithms: Exhaustive Search, Efficient Search Techniques.

**Total: 45 Hours**

ETHICS AND AI

3 0 0 3

**Course Objectives**

- Understand the fundamental concepts of morality and ethics in AI.
- Explore the AI standards and Regulations in the field of AI.
- Determine the problems to solve societal issues using ethics and artificial intelligence.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Evaluate the ethical and moral implications of AI and its impact on society, psychology, law, and the environment.
2. Analyze ethical concerns in AI applications, including healthcare, autonomous systems and warfare using real-world case studies.
3. Apply AI standards and regulations to ensure transparency, fairness, and data privacy in autonomous systems.
4. Examine the principles of Roboethics and professional responsibilities in AI-driven technologies.
5. Design and implement AI-based solutions addressing societal issues while considering ethical challenges and global strategies.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 5     | 2   | 2   | 1   | -   | 3   | -   | -   | 3   | -   | -    | -    | 2    | 1    | -    |

**UNIT I**

**9 Hours**

**INTRODUCTION**

Definition of morality and ethics in AI-Impact on Society-Impact on human Psychology-Impact on the legal System-Impact on the environment and the Planet-Impact on trust.

**UNIT II**

**9 Hours**

**ETHICAL INITIATIVES IN AI**

International ethical Initiatives-Ethical harms and Concerns-Case study: healthcare robots, Autonomous Vehicles, Warfare and weaponization

**UNIT III**

**9 Hours**

**AI STANDARDS AND REGULATION**

Model Process for Addressing Ethical Concerns During System Design - Transparency of Autonomous Systems-Data Privacy Process- Algorithmic Bias Considerations - Ontological Standard for Ethically Driven Robotics and Automation Systems.

**UNIT IV**

**9 Hours**

**SOCIAL AND ETHICAL IMPLICATION OF ROBOTICS**

Robot-Roboethics- Ethics and Morality- Moral Theories-Ethics in Science and Technology – Ethical Issues in an ICT Society- Harmonization of Principles- Ethics and Professional Responsibility Roboethics Taxonomy

**UNIT V**

**9 Hours**

**CHALLENGES AND OPPORTUNITIES**

Challenges - Opportunities- ethical issues in artificial intelligence- Societal Issues Concerning the Application of Artificial Intelligence in Medicine- decision-making role in Industries-National and International Strategies on AI.

**Total: 45 Hours**

22AI041

MULTIMEDIA AND ANIMATION

2023

**Course Objectives**

- Understand the basic knowledge of multimedia Systems and related technologies.
- To learn about multimedia elements in a comprehensive way.
- Understand the basics of digital 2D animation to create story and multimedia production
- Design the technical and artistic skills to produce 3D animations.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information

**Course Outcomes (COs)**

1. Apply multimedia elements, image processing, and animation techniques to design and produce interactive digital content for diverse applications.
2. Analyze and evaluate encoding and decoding processes for multimedia elements to optimize their quality and efficiency.
3. Design and author 2D and 3D creative presentations by integrating interactive elements tailored to specific target audiences and applications.
4. Create and animate 3D models using advanced software tools, demonstrating proficiency in modeling, shading, and rigging techniques.
5. Evaluate and compare different multimedia authoring tools and techniques to select the most appropriate solutions for specific projects.

SOFTWARE PROJECT MANAGEMENT

3 0 0 3

### Course Objectives

- To understand the Software Project Planning and Evaluation techniques.
- To plan and manage projects at each stage of the software development life cycle.
- To learn about the activity planning and risk management principles.
- To manage software projects and control software deliverables.
- To develop skills to manage the various phases involved in project management and people management.
- To deliver successful software projects that support organization's strategic goals.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Analyze project evaluation techniques and planning strategies for optimized objectives and risk management.
2. Apply process models and estimation techniques to enhance project efficiency and cost-effectiveness.
3. Develop planning and risk management strategies using scheduling models and assessment frameworks.
4. Assess tracking and control methodologies for effective project monitoring and change management.
5. Design staffing and management strategies to improve team productivity and project success.

**UNIT I****9 Hours****PROJECT EVALUATION AND PROJECT PLANNING**

Importance of Software Project Management – Activities - Methodologies – Categorization of Software Projects – Setting objectives – Management Principles – Management Control – Project portfolio Management – Cost-benefit evaluation technology – Risk evaluation – Strategic program Management – Stepwise Project Planning.

**UNIT II****9 Hours****PROJECT LIFE CYCLE AND EFFORT ESTIMATION**

Software process and Process Models – Choice of Process models - Rapid Application development – Agile methods – Dynamic System Development Method – Extreme Programming– Managing interactive processes – Basics of Software estimation – Effort and Cost estimation techniques – COSMIC Full function points - COCOMO II - a Parametric Productivity Model.

**UNIT III****9 Hours****ACTIVITY PLANNING AND RISK MANAGEMENT**

Objectives of Activity planning – Project schedules – Activities – Sequencing and scheduling – Network Planning models – Formulating Network Model – Forward Pass & Backward Pass techniques – Critical path (CRM) method – Risk identification – Assessment – Risk Planning – Risk Management – PERT technique – Monte Carlo simulation – Resource Allocation – Creation of critical paths – Cost schedules.

**UNIT IV****9 Hours****PROJECT MANAGEMENT AND CONTROL**

Framework for Management and control – Collection of data – Visualizing progress – Cost monitoring – Earned Value Analysis – Prioritizing Monitoring – Project tracking – Change control – Software Configuration Management – Managing contracts – Contract Management.

**UNIT V****9 Hours****STAFFING IN SOFTWARE PROJECTS**

Importance of Software Project Management – Activities - Methodologies – Categorization of Software Projects – Setting objectives – Management Principles – Management Control – Project portfolio Management – Cost-benefit evaluation technology – Risk evaluation – Strategic program Management – Stepwise Project Planning.

PYTHON FOR DATA SCIENCE

3 0 0 3

**Course Objectives**

- To develop a basic understanding of Python programming language
- To use Python data structures - lists, tuples, dictionaries to represent complex data.
- To develop Python programs for solving real world problems

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Explore Python data types, expressions, and statements to develop structured programs.
2. Implement control flow, functions, and string operations for efficient problem-solving.
3. Manipulate lists, tuples, sets, and dictionaries to handle structured data effectively.
4. Utilize NumPy and Pandas for data processing, indexing, and analysis.
5. Demonstrate data visualization techniques using Matplotlib and Tableau for insightful analytics.

**Articulation Matrix**

## **UNIT I**

**7 Hours**

### **DATA TYPES, EXPRESSIONS, STATEMENTS**

Python interpreter and interactive mode – Debugging -Keyword and Identifiers – Variables- Data types – Numbers – Strings - Python Statements – Comments - Basic Syntax - Printing on Screen - Getting user input - tuple assignment – Operators - precedence of operators.

## **UNIT II**

**10 Hours**

### **CONTROL FLOW, FUNCTIONS, STRINGS**

Conditionals: conditional (if) - alternative (if-else) - chained conditional (if-elif-else); Iteration: for-while - break – continue -pass; Functions: inbuilt functions- user defined functions- passing parameters -return values - recursion; Strings: string slices -immutability- string functions and methods -string module.

## **UNIT III**

**10 Hours**

### **LISTS, TUPLES, SET, DICTIONARIES**

Lists: list operations- list slices -list methods - list loop - mutability, aliasing; Tuples: Tuple assignment - Operations on Tuples - tuple as return value; Sets: creating sets -set operations; Dictionaries: operations and methods -Nested Dictionaries.

## **UNIT IV**

**10 Hours**

### **NUMPY AND PANDAS**

NumPy: NumPy Data Types - Creating Single and Multi-Dimensional Arrays - Operations Using NumPy- NumPy – Indexing & Slicing; Pandas: Pandas Series- Pandas Data Frames- Pandas Object creation- Viewing Pandas data- Selection on Pandas Data- Operations on Pandas Data.

## **UNIT V**

**8 Hours**

### **DATA VISUALIZATION USING MATPLOTLIB**

Introduction to Data Visualization- Factors of Data Visualization-Line plots- Multiple Plots and Subplots- Plot with Annotation-Scatter plots -Pie Chart-Bar Chart-Contour plots- Histograms-Legends-Colors-Three-dimensional plotting- Visualizing Errors – Data Visualization Tools: Tableau.

**Total: 45 Hours**

## EXPLORATORY DATA ANALYSIS

2 0 2 3

### Course Objectives

- To implement data cleaning and preparation techniques.  
To perform descriptive statistics and data visualization techniques to present insights from the data.
- To analyze the relationships between variables using EDA analysis techniques.
- To apply dimensionality reduction techniques for simplifying complex datasets and visualize high-dimensional data.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

### Course Outcomes (COs)

1. Analyze the fundamentals of exploratory data analysis
2. Apply the data cleaning and preparation techniques on the provided dataset.
3. Apply advanced data visualization techniques to explore complex relationships and patterns in the data.
4. Analyze the relationships between variables using EDA analysis techniques to gain insights into complex data patterns.
5. Apply dimensionality reduction techniques, such as Principal Component Analysis (PCA), to simplify complex datasets and extract essential features.

**UNIT I****6 Hours****EXPLORATORY DATA ANALYSIS**

Overview of Exploratory Data Analysis- Importance of EDA - data analysis process: data collection, data cleaning, and data exploration- Introduction to common data types and formats - Introduction to Python - data analysis libraries.

**UNIT II****6 Hours****DATA CLEANING AND PREPARATION**

Introduction to data quality issues and common data cleaning techniques - Handling missing data and outliers - Data transformation techniques - Feature engineering and variable creation.

**UNIT III****6 Hours****DESCRIPTIVE STATISTICS AND DATA VISUALIZATION**

Descriptive statistics: measures of central tendency, dispersion, and shape - Data visualization principles and best practices - Exploratory data visualization using Matplotlib and Seaborn

**UNIT IV****6 Hours****EXPLORATORY DATA ANALYSIS TECHNIQUES**

Univariate analysis: exploring single variables - Bivariate analysis: exploring relationships between variables - Multivariate analysis: analyzing relationships among multiple variables - Exploring time series data.

**UNIT V****6 Hours****DIMENSIONALITY REDUCTION TECHNIQUES**

Introduction to dimensionality reduction - Principal Component Analysis (PCA) and its applications - Distributed Stochastic Neighbor Embedding (t-SNE) for visualization

**EXPERIMENT 1****5 Hours**

Explore the Titanic dataset using descriptive statistics and data visualization.

1. Load the Titanic dataset.
2. Calculate the descriptive statistics for each variable.
3. Create a variety of data visualizations to explore the relationships between variables.
4. Interpret the results of the descriptive statistics and data visualizations.

**EXPERIMENT 2****5 Hours**

Clean and prepare the California housing dataset for analysis.

1. Identify and handle missing data.
2. Identify and remove outliers.
3. Convert categorical variables to numerical variables.
4. Explore the distribution of the data after cleaning and preparing it.

### EXPERIMENT 3

5 Hours

Perform univariate analysis on the Iris dataset.

1. Calculate the descriptive statistics for each variable.
2. Create a variety of data visualizations to explore the distribution of each variable.
3. Interpret the results of the descriptive statistics and data visualizations.

### EXPERIMENT 4

5 Hours

Perform bivariate analysis on the Boston housing dataset.

1. Explore the relationship between housing prices and different features of the houses, such as the number of rooms, the lot size, and the crime rate.
2. Use data visualization to explore the relationships between variables.
3. Interpret the results of the bivariate analysis.

### EXPERIMENT 5

5 Hours

Perform multivariate analysis on the Wine dataset.

1. Explore the relationships between different features of the wine, such as the color, the acidity, and the alcohol content.
2. Use data visualization to explore the relationships between variables.
3. Interpret the results of the multivariate analysis.

### EXPERIMENT 6

5 Hours

Apply dimensionality reduction techniques to the MNIST dataset.

1. Use PCA to reduce the dimensionality of the dataset from 784 dimensions to 2 dimensions.
2. Visualize the reduced data using a scatter plot.
3. Interpret the results of the dimensionality reduction.

**Total: 30+30 = 60 Hours**

**22AI045 / 22AIM45****FUNDAMENTALS OF MACHINE LEARNING****3 0 0 3****Course Objectives**

- To understand the basic concepts of machine learning.
- To understand and build supervised learning and unsupervised models
- To apply neural networks to solve complex problems
- To perform statistical analysis of machine learning techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply machine learning concepts and algorithms to real-world problem-solving.
2. Implement supervised learning techniques for classification and regression tasks.
3. Analyze unsupervised and reinforcement learning methods for pattern discovery and decision-making.
4. Utilize neural networks for deep learning applications, including image and sequence processing.
5. Evaluate advanced machine learning models for generative tasks and recommendation systems.

**UNIT I** **9 Hours**

**INTRODUCTION**

Need for Machine Learning- Examples of machine learning applications- Machine Learning Process – Types of Machine Learning - Concept Learning: VC Dimension- Find-S algorithm, Version space, Candidate Elimination algorithm, Inductive Bias.

**UNIT II** **9 Hours**

**SUPERVISED LEARNING**

Classification Algorithms: Support Vector Machines - Logistic Regression - K-Nearest Neighbors - Naive Bayes Classifier - Decision Trees - Random Forests - Regression Algorithms: Simple Linear Regression - Multiple Linear Regression.

**UNIT III** **9 Hours**

**UNSUPERVISED LEARNING AND REINFORCEMENT LEARNING**

Clustering algorithm: k-means clustering - Fuzzy c-means clustering - Hierarchical clustering– Gaussian (EM) clustering - Density-based clustering - Reinforcement Learning: Examples – Challenges - Q - Learning Algorithm.

**UNIT IV** **9 Hours**

**NEURAL NETWORKS**

Neural Network Basics: Multilayer Perceptron – Feed Forward Neural Networks – Back Propagation - Hyperparameter Tuning. Convolutional Neural Networks: Image Classification. Recurrent Neural Networks: Long Short-Term Memory.

**UNIT V** **9 Hours**

**ADVANCED MODELS**

Generative Models – Generative Adversarial Networks - Autoencoders – Recommendation System: Collaborative Filtering Recommendation System - Content Based Recommendation System - Hybrid Recommendation System.

**Total: 45 Hours**

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply deep learning architectural principles to design and train neural networks effectively.
2. Analyze CNN architectures and optimization techniques to enhance image recognition tasks.
3. Analyze RNN and LSTM models to improve sequential data processing and language modelling.
4. Evaluate different autoencoder architectures to enhance feature extraction and data compression.
5. Assess deep generative models to generate realistic data and improve AI-driven applications.

**UNIT I** **9 Hours**

**FOUNDATIONS OF NEURAL NETWORKS AND DEEP LEARNING**

Neural Networks: Perceptron - Multilayer Feed Forward Networks -Training in Neural Networks: Back Propagation Learning-Common Architectural Principles of Deep Networks: Layers-Activation Functions- Batch Normalization and Dropout-Loss Functions

**UNIT II** **9 Hours**

**CONVOLUTIONAL NEURAL NETWORKS**

Introduction to CNN – Layers – Filters - Weight and Bias - Epoch and Batch Size - Data Augmentation - Parameter sharing – Regularization - Popular CNN Architectures: ResNet, AlexNet.

**UNIT III** **9 Hours**

**RECURRENT NEURAL NETWORKS**

Recurrent Neural Networks - Bidirectional RNNs -Encoder-decoder sequence to sequence architectures – Backpropagation through time (BPTT) for training RNN - Long Short-Term Memory (LSTM).

**UNIT IV** **9 Hours**

**AUTOENCODERS**

Introduction to Autoencoders - Architecture of Autoencoders – Undercomplete Autoencoders - Regularized Autoencoders – Denoising – Contractive- Predictive Sparse Decomposition - Drawing Samples from Autoencoders -Applications of Autoencoders.

**UNIT V** **9 Hours**

**DEEP GENERATIVE MODELS**

Deep Belief networks - Boltzmann Machines - Deep Boltzmann Machine - Generative Adversarial Networks – Case Study: Object Detection using CNN – Automatic Image Captioning.

**Total: 45 Hours**

TEXT AND SPEECH ANALYSIS

3 0 0 3

### Course Objectives

- Acquire a deep understanding of natural language processing (NLP) techniques.
- Develop expertise in text analysis through practical implementation of advanced techniques.
- Explore the fundamentals of speech processing.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Apply suitable algorithmic thinking and data management practices to design, develop, and evaluate effective solutions for real-life and research problems.

### Course Outcomes (COs)

1. Analyze the foundations of natural language processing and speech analysis to understand language structures and preprocessing techniques.
2. Implement classification algorithms for text documents using machine learning and deep learning techniques.
3. Design and develop question-answering and dialogue systems by applying information retrieval and language modeling techniques.
4. Construct speech recognition and synthesis systems using acoustic modeling and deep learning approaches.
5. Develop a robust text classification model by exploring advanced techniques in text and speech analysis.

**Articulation Matrix**

**UNIT I****6 Hours****NATURAL LANGUAGE PROCESSING BASICS**

Introduction to natural language processing – Language Syntax and Structure- Text Pre-processing and Wrangling – Text Tokenization – Stemming – Lemmatization – Stop word Removal – Feature Engineering for text representation – Bag of Words model- Bag of N-Grams model – TF-IDF model

**UNIT II****9 Hours****TEXT CLASSIFICATION AND SENTIMENT ANALYSIS**

Vector Semantics and Word Embeddings - Word2Vec model – Glove model – FastText model – Deep Learning models for text classification– Recurrent Neural Networks (RNN) – Transformers –Text summarization techniques - Topic Modelling

**UNIT III****9 Hours****QUESTION ANSWERING AND DIALOGUE SYSTEMS**

Information retrieval techniques – IR-based question answering – Knowledge-based question answering – Language models for question answering – Classic question answering models – Introduction to Chatbots and dialogue systems – Designing dialogue systems – Evaluating dialogue systems

**UNIT IV****9 Hours****SPEECH RECOGNITION AND SYNTHESIS**

Introduction to speech Processing - Speech signal analysis and Pre-Processing - Acoustic modelling for speech Recognition - Hidden Markov Models (HMM) - Deep learning-based speech Recognition - Automatic Speech Recognition (ASR) Systems -Text normalization and letter-to-sound Conversion - Speech Synthesis Techniques - Concatenative and parametric Approaches - Wave Net and other neural TTS systems

**UNIT V****12 Hours****TEXT AND SPEECH ANALYSIS MODELLING**

Named Entity Recognition (NER) - Coreference resolution-Text coherence and cohesion - Advanced sentiment analysis - Advanced language modelling - Machine translation - Multi-modal analysis (text and speech) - Ethical considerations in text and speech analysis.

**Total: 45 Hours**

COMPUTER VISION AND IMAGE PROCESSING

3 0 0 3

**Course Objectives**

- To understand the fundamental concepts related to Image formation and processing.
- To understand feature detection and matching, feature based alignment and motion estimation.
- To develop innovative image processing and computer vision applications.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement image formation and processing techniques to manipulate and enhance digital images.
2. Apply image enhancement and filtering methods to improve image clarity and noise reduction.
3. Compare different segmentation and object detection algorithms for accurate image interpretation.
4. Develop feature extraction and matching techniques to enhance object recognition and tracking.
5. Evaluate deep learning models for computer vision applications using CNNs and transfer learning.

**UNIT I** **9 Hours**

**IMAGE FORMATION AND PROCESSING**

Overview of Computer Vision – Applications – Image Formation: Geometric primitives and transformations - Photometric image formation - The digital camera – Image Processing: Point operators - Linear Filtering – More neighborhood operators - Pyramids and wavelets - Geometric transformations.

**UNIT II** **9 Hours**

**IMAGE ENHANCEMENT AND FILTERING**

Introduction to Image Enhancement Techniques-Histogram Equalization, Contrast Stretching-Spatial Domain Filtering – Mean Filter, Median Filter-Frequency Domain Filtering –Fourier Transform, High Pass Filter, Low Pass Filter – Image Denoising techniques – Gaussian Filtering, Bilateral Filtering.

**UNIT III** **9 Hours**

**IMAGE SEGMENTATION AND OBJECT DETECTION**

Introduction to Image Segmentation algorithms – Thresholding, Region based Segmentation-Edge Detection Techniques-Sobel, Canny-Contour Detection and Object Representation –Introduction to object detection algorithms-Haar cascades, SSD, YOLO.

**UNIT IV** **9 Hours**

**FEATURE EXTRACTION**

Introduction to Feature Extraction-Feature Extraction Techniques-SIFT, SURF, ORB-Local feature descriptors-HOG, LBP-Feature Matching Algorithms-Brute Force matching, FLANN-Feature tracking and optical flow.

**UNIT V** **9 Hours**

**DEEP LEARNING FOR COMPUTER VISION**

Introduction to Deep Learning and Neural Networks – Convolutional Neural Networks (CNNs) for Image Classification-Transfer Learning and Pre-trained models - Object Detection using CNNs - U-Net - Familiarity with popular libraries such as OpenCV and PyTorch.

FUNDAMENTALS OF DATA SCIENCE

3 0 0 3

**Course Objectives**

- To learn the basics of data science and statistical inference.
- To understand the concept of data pre-processing.
- To visualize the processed data using visualization techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Implement the data science process to collect, clean, and analyze data for decision-making.
2. Interpret descriptive statistical measures to summarize and understand data distributions.
3. Analyze correlations, regression models, and normal distributions for predictive insights.
4. Execute Python-based data handling techniques using NumPy and Pandas for efficient data processing.
5. Evaluate various data visualization techniques to effectively communicate insights using Matplotlib, Seaborn, and Tableau.

**Articulation Matrix**

## **UNIT I**

**9 Hours**

### **INTRODUCTION**

Need for data science – benefits and uses – facets of data – data science process – setting the research goal – retrieving data – cleaning, integrating, and transforming data – exploratory data analysis – build the models – presenting and building applications.

## **UNIT II**

**9 Hours**

### **DESCRIPTIVE STATISTICS I**

Frequency distributions – Outliers – relative frequency distributions – cumulative frequency distributions – frequency distributions for nominal data – interpreting distributions – graphs – averages – mode – median – mean – averages for qualitative and ranked data – describing variability– range – variance – standard deviation – degrees of freedom – interquartile range.

## **UNIT III**

**9 Hours**

### **DESCRIPTIVE STATISTICS II**

Normal distributions – z scores – normal curve problems – finding proportions – finding scores – more about z scores – correlation – correlation coefficient for quantitative data – computational formula for correlation coefficient – regression – regression line – least squares regression line – standard error of estimate – interpretation of  $r^2$ .

## **UNIT IV**

**9 Hours**

### **PYTHON FOR DATA HANDLING**

Basics of Numpy arrays – aggregations – computations on arrays – comparisons, masks, boolean logic – fancy indexing – structured arrays – Data manipulation with Pandas – data indexing and selection – operating on data – missing data – hierarchical indexing – combining datasets – aggregation and grouping.

## **UNIT V**

**9 Hours**

### **DATA VISUALIZATION**

Types of data visualization: Exploratory, Explanatory, visualization with matplotlib – line plots – scatter plots – visualizing errors – density and contour plots – histograms, binnings, and density – three-dimensional plotting– geographic data – data analysis using statmodels and seaborn – graph plotting using Plotly - Visualization Tools: Tableau

**22OCE01****ENERGY CONSERVATION AND  
MANAGEMENT****3 0 0 3****Course Objectives**

- To develop an understanding and analyze the energy data of industries
- To carryout energy accounting and balancing
- To conduct energy audit and suggest methodologies for energy savings and
- To utilize the available resources in optimal ways

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Classify and characterize the various energy utilization techniques.
2. Identify suitable technique to provide an energy efficient system.
3. Identify the need for thermal systems with latest technologies.
4. Choose suitable techniques for conserving energy with respect to emerging trends.
5. Assess the impact economics on the conservation of energy.

**UNIT I****9 Hours****INTRODUCTION**

Energy - Power – Past & Present scenario of World; National Energy consumption Data – Environmental aspects associated with energy utilization – Energy Auditing: Need, Types, Methodology and Barriers. Role of Energy Managers. Instruments for energy auditing.

## **UNIT II**

**9 Hours**

### **ELECTRICAL SYSTEMS**

Components of EB billing – HT and LT supply, Transformers, Cable Sizing, Concept of Capacitors, Power Factor Improvement, Harmonics, Electric Motors - Motor Efficiency Computation, Energy Efficient Motors, Illumination – Lux, Lumens, Types of lighting, Efficacy, LED Lighting and scope of Encon in Illumination.

## **UNIT III**

**9 Hours**

### **THERMAL SYSTEMS**

Stoichiometry, Boilers, Furnaces and Thermic Fluid Heaters – Efficiency computation and Encon measures. Steam: Distribution & U sage: Steam Traps, Condensate Recovery, Flash Steam Utilization, Insulators & Refractories

## **UNIT IV**

**9 Hours**

### **ENERGY CONSERVATION IN MAJOR UTILITIES**

Pumps, Fans, Blowers, Compressed Air Systems, Refrigeration and Air Conditioning Systems – Cooling Towers – D.G. sets

## **UNIT V**

**9 Hours**

### **ECONIMICS**

Energy Economics – Discount Rate, Payback Period, Internal Rate of Return, Net Present Value, Life Cycle Costing –ESCO concept.

**Total: 45 Hours**

22OCE02

**COST MANAGEMENT OF ENGINEERING  
PROJECTS**

**3 0 0 3**

**Course Objectives**

- To introduce fundamental quantitative techniques, including linear programming, PERT/CPM, and optimization models, for effective cost management.
- To develop analytical skills for solving transportation and assignment problems to enhance resource allocation and cost efficiency.
- To apply learning curve theory in project planning and cost estimation to improve productivity and financial forecasting.
- To enable the use of quantitative decision-making tools for optimizing project scheduling, budgeting, and overall cost control

**Programme Outcomes (Pos)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Analyze the cost concepts to support decision-making and operational control through a structured cost database.
2. Analyze stakeholder roles to optimize project performance and mitigate cost overruns.
3. Analyze project execution and cost control techniques to support strategic decision-making and optimize project financial performance.
4. Evaluate costing strategies and budgetary control techniques in the service sector.
5. Apply quantitative techniques to optimize cost management and decision-making in projects.

**UNIT I****9 Hours****INTRODUCTION TO COSTING CONCEPTS**

Objectives of a Costing System; Cost concepts in decision-making; Relevant cost, Differential cost, Incremental cost and Opportunity cost; Creation of a Database for operational control.

**UNIT 2****9 Hours****INTRODUCTION TO PROJECT MANAGEMENT**

Project: meaning, Different types, why to manage, cost overruns centres, various stages of project execution: conception to commissioning. Project execution as conglomeration of technical and nontechnical activities, Detailed Engineering activities, Pre project execution main clearances and documents, Project team: Role of each member, Importance Project site: Data required with significance, Project contracts

**UNIT 3****9 Hours****PROJECT EXECUTION AND COSTING CONCEPTS**

Project execution Project cost control, Bar charts and Network diagram, Project commissioning: mechanical and process, Cost Behavior and Profit Planning Marginal Costing; Distinction between Marginal Costing and Absorption Costing; Break-even Analysis, Cost-Volume-Profit Analysis, Various decision-making problems, Pricing strategies: Pareto Analysis, Target costing, Life Cycle costing.

**UNIT 4****9 Hours****COSTING OF SERVICE SECTOR AND BUDGETARY CONTROL**

Just-in-time approach, Material Requirement Planning, Enterprise Resource Planning, Activity Based Cost Management, Bench Marking; Balanced Score Card and Value-Chain Analysis, Budgetary Control: Flexible Budgets; Performance budgets; Zero-based budgets.

**UNIT 5****9 Hours****QUANTITATIVE TECHNIQUES FOR COST MANAGEMENT**

Just-in-time approach, Material Requirement Planning, Enterprise Resource Planning, Activity Based Cost.

**Total: 45 Hours****References:**

MICROCONTROLLER PROGRAMMING

3 0 0 3

**Course Objectives**

- Understand Series of Microcontrollers in terms of architecture, Programming and Interfacing.
- Learn Programming of PIC series of microcontrollers and learn building of hardware circuits using PIC 16F series of Microcontrollers
- Learn the emerging trends in the design of advanced Microcontrollers.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**Course Outcomes (COs)**

1. Interpret the components and functionalities of 8051 Microcontrollers.
2. Develop microprocessor applications using the Assembly Language Program
3. Illustrate the working nature of PIC microcontroller on various versions
4. Illustrate the interfacing of different peripherals using PIC Microcontroller
5. Analyze the architecture and instruction set of ARM Microcontroller

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****8-BIT MICROCONTROLLER**

Introduction-Intel 8051 architecture-Counters and Timers-Serial Interface- Interrupts- Interfacing to external memory and 8255- Instruction set- Address modes.

**UNIT II****9 Hours****8051 ALP AND APPLICATIONS**

Assembly language program- Timers and Counters programming- DAC- ADC- Sensor- Keyboard and LCD.

**UNIT III**

**9 Hours**

**PIC MICROCONTROLLER**

PIC Microcontroller features- PIC Architecture, Program Memory, Addressing Modes, Instruction Set, Instruction Format- Byte-oriented Instructions- Bit-oriented Instructions- Literal Instructions- Control Instructions (CALL & GOTO)- Destination Designator. MPLAB overview: Using MPLAB, Toolbars, Select Development Mode and Device type, Project, Text Editor, Assembler, MPLAB operations.

**UNIT IV**

**9 Hours**

**PIC HARDWARE**

Reset, Clock, Control registers, Register banks, Program Memory Paging, Ports, Interrupts, Timer and Counter, Watchdog Timer, Power up timer, Sleep mode, I2C bus- A/D converter.

**UNIT V**

**9 Hours**

**HIGH PERFORMANCE RISC ARCHITECTURE**

ARM: The ARM architecture- ARM organization and implementation- The ARM instruction set- The THUMB instruction set- Basic ARM Assembly Language Program- ARM CPU Cores.

**Total: 45 Hours**

22OEC03

**PRINCIPLES OF COMMUNICATION  
SYSTEMS**

3 0 0 3

**Course Objectives**

- To study the various analog and digital modulation techniques
- To study the various digital communication techniques
- To enumerate the idea of spread spectrum modulation
- To study the design concepts of satellite and optical communication

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**Course Outcomes (COs)**

1. Illustrate the process involved in Amplitude, Frequency and phase modulation systems.
2. Analyze the performance of different digital modulation /demodulation techniques.
3. Analyze Pulse Code Modulation scheme for the transmission of analog data in digital format.
4. Apply the concepts of spread spectrum modulation techniques to eradicate interference in wireless communication.
5. Analyze the system design of satellite and optical communication.

**Articulation Matrix**

| 5     | 3   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****FUNDAMENTALS OF ANALOG COMMUNICATION**

Principles of amplitude modulation, AM envelope, frequency spectrum and bandwidth, modulation index and percent modulation, AM Voltage distribution, AM power distribution, Angle modulation. FM and PM waveforms, phase deviation and modulation index, frequency deviation and percent modulation, Frequency analysis of angle modulated waves. Bandwidth requirements for Angle modulated waves

## UNIT II

9 Hours

### DIGITAL COMMUNICATION

Introduction, Shannon limit for information capacity, Amplitude Shift Keying (ASK), Frequency Shift Keying (FSK) Minimum Shift Keying (MSK), Phase Shift Keying (PSK), BPSK, QPSK, 8 PSK Quadrature Amplitude Modulation (QAM), Bandwidth Efficiency, Comparison of various Digital Communication System (ASK - FSK - PSK - QAM).

## UNIT III

9 Hours

### DIGITAL TRANSMISSION

Introduction, Pulse modulation, PCM, PCM sampling, sampling rate, signal to quantization noise rate, companding, delta modulation, adaptive delta modulation, differential pulse code modulation, pulse transmission, Intersymbol interference, eye patterns.

## UNIT IV

9 Hours

### SPREAD SPECTRUM AND MULTIPLE ACCESS TECHNIQUES

Introduction, Pseudo-noise sequence, DS spread spectrum with coherent binary PSK, processing gain, FH spread spectrum, multiple access techniques, wireless communication, TDMA and CDMA in wireless communication systems, source coding of speech for wireless communications.

## UNIT V

9 Hours

### SATELLITE AND OPTICAL COMMUNICATION

Satellite Communication Systems-Keplers Law, LEO and GEO Orbits, footprint, Link Model-Optical Communication Systems-Elements of Optical Fiber Transmission link, Types, Losses, Sources and Detectors.

**Total: 45 Hours**

**22OEI01****PROGRAMMABLE LOGIC CONTROLLER****3 0 0 3****Course Objectives**

- To impart knowledge about automation and architecture of PLC
- To understand the PLC programming using timers, counters and advanced PLC functions
- To familiarize the student with PLC based applications

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Outline the fundamental Concepts of Automation
2. Conclude the architecture, interfacing and communication techniques of PLC
3. Execute the suitable PLC Programming languages
4. Attribute the various functions and instruction sets of PLC
5. Generate a suitable logical programming for given applications

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 2   | 1   | -   | 2   | 2   | -   | 3   | -   | -   | -    | -    | -    | -    | -    |

| 3     | 2   | 1   | -   | 2   | 2   | -   | 3   | -   | -   | -    | -    | -    | -    | -    |
| 4     | 2   | 1   | -   | 2   | 2   | -   | 3   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 2   | 1   | -   | 2   | 2   | -   | 3   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****10 Hours****INTRODUCTION TO AUTOMATION**

Evolution of automation - Types of automation - Fixed, flexible and programmable automation - Batch process and continuous process - open loop system and closed loop system - Function of sensors - Proximity sensors: Capacitive and Inductive - Infrared and Laser Push-buttons and toggle switches - Actuators: Solenoid valve - servo motor - electromagnetic relays.

## **UNIT II**

**9 Hours**

### **ARCHITECTURE OF PLC**

Components of PLC - sink and source I/O cards - Processor - Memory: Types of memory, Input and Output modules: Discrete, Analog -Scan time of PLC -Interfacing computer and PLC: RS232, RS485, Ethernet - Selection criteria for PLC.

## **UNIT III**

**8 Hours**

### **PLC PROGRAMMING**

Programming languages - Ladder logic components: User and bit Instructions, branch instructions, internal relay instruction Boolean logic using ladder logic programming, Latching -Timers: On Delay timer, OFF Delay timer and Retentive timer - Counters: Up Counter and Down Counter.

## **UNIT IV**

**10 Hours**

### **ADVANCED PLC FUNCTIONS**

Instructions in PLC: Program Control Instructions, Math Instructions, Data Manipulation Instructions: Data compare operations, Data transfer operations - Sequencer and Shift register instructions- Analog Instructions: PID Controller - Scaling Instructions.

## **UNIT V**

**8 Hours**

### **APPLICATIONS OF PLC**

Case Studies: Bottle filling system - Pick and place robot - Car Parking - Traffic light control (4 ways with pedestrian signal) -Elevators - Pneumatic stamping system - alarm annunciator system.

**Total: 45 Hours**

SENSOR TECHNOLOGY

3 0 0 3

**Course Objectives**

- To impart knowledge about various sensors in multidisciplinary engineering domain
- To familiarize students with different applications and its material handling technology
- To understand the concept of sensing circuits and its static and dynamic characteristics

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Conclude the static and dynamic characteristics of measuring instruments
2. Compare the characteristics and working principles of Resistance, Inductance and Capacitance type sensors
3. Construct the interfacing and signal conditioning circuit for measurement system using different types of sensors
4. Analyze and select the suitable sensor for different industrial applications
5. Combine the modern technologies and smart materials to design various sensors

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I**

**8 Hours**

**SENSORS FUNDAMENTALS AND CHARACTERISTICS**

Sensors: Principles of Sensing - Sensor Classification and terminology- Units of Measurements - Measurands- Sensor Characteristics: Static and Dynamic.

**UNIT II**

**8 Hours**

**PHYSICAL PRINCIPLES OF SENSING**

Electric Charges, Fields, and Potentials; Capacitance; Magnetism; Induction; Resistance; Piezoelectric Effect; Hall Effect; Temperature and Thermal Properties of Material; Heat Transfer; Light; Dynamic Models of Sensor Elements.

**UNIT III**

**9 Hours**

**INTERFACE ELECTRONIC CIRCUITS**

Input Characteristics of Interface Circuits, Amplifiers, Excitation Circuits, Analog to Digital Converters, Direct Digitization and Processing, Bridge Circuits, Data Transmission, Batteries for Low Power Sensors.

**UNIT IV**

**10 Hours**

**SENSORS IN DIFFERENT APPLICATION AREA**

Occupancy and Motion Detectors; Position, Displacement, and Level; Velocity and Acceleration; Force, Strain, and Tactile Sensors; Pressure Sensors, Temperature Sensors.

**UNIT V**

**10 Hours**

**SENSOR MATERIALS AND TECHNOLOGIES**

Materials, Surface Processing- MEMS microsystem components- Microfluidics microsystem components - Nano Technology- Smart Materials.

**Total: 45 Hours**

**Reference(s)**

22OEI03

FUNDAMENTALS OF VIRTUAL INSTRUMENTATION

3 0 0 3

### Course Objectives

- Understand the basic components of Virtual Instrumentation system.
- Learn the developing VIs based on Lab VIEW software.
- To learn to develop applications based on Virtual Instrumentation system.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Course Outcomes (COs)

1. Outline the concepts of traditional instruments and virtual instruments.
2. Conclude the overview of modular programming and the structuring concepts in VI programming.
3. Attribute the procedure to install DAQ in various OS and its interfacing methods.
4. Implement the VI toolsets for specific applications.
5. Generate the applications using Virtual Instrumentation software.

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Virtual Instrumentation: Historical perspective - advantages - block diagram and architecture of a virtual instrument - Conventional Instruments versus Traditional Instruments - data-flow techniques, graphical programming in data flow, comparison with conventional programming.

**UNIT II****9 Hours****VI PROGRAMMING TECHNIQUES**

VIs and sub-VIs, loops and charts, arrays, clusters and graphs, case and sequence structures, formula nodes, local and global variables, State machine, string and file I/O, Instrument Drivers, Publishing measurement data in the web.

**UNIT III****9 Hours****DATA ACQUISITION**

Introduction to data acquisition on PC, Sampling fundamentals, Input/output techniques and buses. Latest ADCs, DACs, Digital I/O, counters and timers, DMA, Software and hardware installation, Calibration, Resolution, Data acquisition interface requirements - Issues involved in selection of Data acquisition cards - Data acquisition cards with serial communication - VI Chassis requirements. SCSI, PCI, PXI system controllers, Ethernet control of PXI. Networking basics for office & Industrial applications, VISA and IVI.

**UNIT IV****9 Hours****VI TOOLSETS**

Use of Analysis tools, Fourier transforms, power spectrum, correlation methods, windowing and filtering. Application of VI in process control designing of equipments like oscilloscope, Digital multimeter, Design of digital Voltmeters with transducer input Virtual Laboratory, Web based Laboratory.

**UNIT V****9 Hours****APPLICATIONS**

Distributed I/O modules- Application of Virtual Instrumentation: Instrument Control, Development of process database management system, Simulation of systems using VI, Development of Control system, Industrial Communication, Image acquisition and processing, Motion control. Development of Virtual Instrument using GUI, Real-time systems, Embedded Controller, OPC, HMI / SCADA software, Active X programming.

**22OEI04****OPTOELECTRONICS AND LASER INSTRUMENTATION****3 0 0 3****Course Objectives**

- To enhance the student knowledge in fiber optics fundamentals and fabrication
- To be recognized with industrial applications of fibers
- To understand the fundamental concepts about lasers
- To identify and describe various fiber optic imaging and optoelectronic sensor applications

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**Course Outcomes (COs)**

1. Attribute the properties of optical fibers, their light sources and detectors.
2. Implement the fiber-optic sensor for the measurement of various physical quantities.
3. Conclude the fundamentals of laser, type of laser and its working.
4. Outline the applications of laser for industrial applications.
5. Differentiate the use of laser instruments for various medical applications.

**UNIT I****9 Hours****OPTICAL FIBERS AND THEIR PROPERTIES**

Introduction to optical fibers - Light guidance - Numerical aperture - Dispersion - Different types of fibers and their properties - Light Sources for fiber optics, Photo detectors, source coupling, splicing and connectors.

**UNIT II****9 Hours****INDUSTRIAL APPLICATION OF OPTICAL FIBERS**

Fiber optics instrumentation system - optical fiber sensors, Measurement of pressure, temperature, current, voltage and liquid level - fiber optic communication set up - different types of modulators - detectors.

### UNIT III

9 Hours

#### LASER FUNDAMENTALS

Fundamental characteristics of lasers: laser rate equation - three level system - four level system - properties of laser beams - laser modes - resonator configuration - Q-switching and mode locking - cavity dumping - types of lasers: gas lasers, solid state lasers, liquid lasers and semiconductor lasers.

### UNIT IV

9 Hours

#### INDUSTRIAL APPLICATION OF LASERS

Lasers for measurement of distance and length, velocity, acceleration, atmospheric effects, sonic boom, pollutants - material processing: laser heating, melting, welding and trimming of materials - removal and vaporization - calculation of power requirements of laser for material processing.

### UNIT V

9 Hours

#### HOLOGRAM AND MEDICAL APPLICATIONS

Holography: basic principle, methods - holographic interferometry and application, holography for non-destructive - medical applications of lasers, laser and tissue interactive - laser instruments for surgery, removal of tumors of vocal cords, brain surgery, plastic surgery, gynaecology and oncology.

**Total: 45 Hours**

**22OME01****DIGITAL MANUFACTURING****3 0 0 3****Course Objectives**

- To understand the process of generating 3D Computer Aided Design (CAD) model by different method.
- To explain the constructional features and develop simple program for CNC lathe and Milling machines.
- To provide an exhaustive knowledge on various generic process and benefits of Additive Manufacturing.
- To familiarize about materials and process parameters of liquid and solid based AM techniques.
- To educate powder-based methodology and emerging trends with case studies, applications of AM techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**Course Outcomes (COs)**

1. Design a 3D model from the 2D data.
2. Develop a CNC program for simple components.
3. Generate stl file and manipulate parameters of AM machine
4. Select appropriate liquid or solid materials-based AM process to the respective application
5. Select appropriate process to fabricate a functional/prototype for aerospace, automotive, electronics, manufacturing and medical applications.

## **UNIT I**

**9 Hours**

### **CAD MODELING**

Introduction - Design process - Stages. CAD - Input and Output devices, Modelling methods - Wire frame modelling, Surface modelling, solid modelling - Constructive Solid Geometry and Boundary Representation Techniques. CAD/CAM data exchange - IGES, STEP. Product Life cycle management (PLM).

## **UNIT II**

**10 Hours**

### **AUTOMATION AND CNC MACHINES**

Introduction to Automation - Definition, types, reasons for automating. CNC Machines - Principles, types, features, advantages, applications. CNC Machine structure - Linear motion bearings, Recirculating ball bearings, drive system, and control system. CNC Lathe and Milling programming - Linear and circular interpolation, threading and drilling programs.

## **UNIT III**

**7 Hours**

### **ADDITIVE MANUFACTURING**

Introduction - Impact of Additive Manufacturing (AM) and Tooling on Product Development - Distinction between AM and CNC Machining - The Generalized AM Process chain - CAD Model - Input file formats - Generation and Conversion of STL file - File Verification and Repair - Build File Creation - Part Construction - Part Cleaning and finishing - AM Benefits - Classification of AM process

## **UNIT IV**

**8 Hours**

### **LIQUID AND SOLID MATERIAL BASED SYSTEMS**

Stereo lithography Apparatus (SLA), Digital Light Processing (DLP), Fused Deposition Modelling (FDM) and Laminated Object Manufacturing (LOM) - Working Principle, Construction, Process, Materials and Applications

## **UNIT V**

**11 Hours**

### **POWDER BASED PROCESSES AND APPLICATIONS OF ADDITIVE MANUFACTURING**

Selective Laser Sintering (SLS), Color Jet Printing (CJP), Electron Beam Melting (EBM) and Laser Engineered Net Shaping (LENS) - Working Principle, Construction, Process Variables, Materials and Applications. Reverse Engineering using 3D scanner. Application of Additive Manufacturing in Medical field, Manufacturing, Automotive industries, Aerospace and Electronics and Retail industries.

**Total: 45 Hours**

**22OME02****INDUSTRIAL PROCESS ENGINEERING****3 0 0 3****Course Objectives**

- To impart the knowledge on production planning methodologies and layout design.
- To learn about production planning and its control methods.
- To provide the knowledge of work study, process charts and ergonomic condition.
- To impart the knowledge on inventory control and material handling.
- To learn about system analysis and different types of maintenance processes.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**Course Outcomes (COs)**

1. Select proper plant layout for the required production system
2. Plan the resources required for the production and to perform the control methods
3. Apply work study method, prepare charts to outline the process and develop ergonomic condition suitable for the processes.
4. Analyze the inventory required based on production needs and material handling
5. Perform system analysis and use different types of maintenance process for smooth operations.

## **UNIT I**

**9 Hours**

### **INDUSTRIAL ENGINEERING AND PRODUCTION SYSTEM**

Industrial engineering - Concept, History and development, Applications, Roles of Industrial engineer- Production management, Industrial engineering versus production management, operations management. Plant layout, Criteria for good layout, Types of layout - Process layout, Product layout, Combination layout and fixed position layout, Flow (material movement) pattern, Workstation Selection and design.

## **UNIT II**

**10 Hours**

### **PROCESS PLANNING AND PRODUCTION CONTROL**

Introduction to Process planning-Definition, Procedure, Process selection, Machine capacity, Process sheet. Process analysis - Group technology, classification and coding system, formation of component family - Production planning, loading, scheduling. Production control -dispatching, routing - Progress control bar, curve, Gantt chart, route and schedule chart.

## **UNIT III**

**8 Hours**

### **WORK STUDY AND ERGONOMICS**

Work study - Definition, Need, Advantages, objectives of method study and work measurement, method study procedure, Process chart - symbols, outline process chart, flow process chart, principles of motion economy, ergonomics- applications of ergonomic principles in the shop floor- work benches-seating arrangement, Industrial physiology.

## **UNIT IV**

**10 Hours**

### **INVENTORY MANAGEMENT**

Inventory control, classification, management, objectives, functions. Economic order quantity, Economic batch quantity, inventory models, ABC analysis, Material Requirement Planning(MRPI), Manufacturing Resource Planning (MRPII), Operating cycle, lean manufacturing, Supply chain management - Material handling.

## **UNIT V**

**8 Hours**

### **SYSTEM ANALYSIS AND MAINTENANCE**

System concept - system analysis, systems engineering, value engineering, value control, types of values. Plant maintenance - objectives, importance. Maintenance engineer - duties, functions and responsibilities. Types - breakdown, scheduled, preventive and predictive - Plant maintenance schedule, Condition monitoring.

**Total: 45 Hours**

**22OME03****MAINTENANCE ENGINEERING****3 0 0 3****Course Objectives**

- To understand the principles, objectives and importance of maintenance adopted in industry for successful progress.
- To introduce different maintenance categories, its merits and types of lubrication.
- To expose the idea of condition monitoring, methods and instruments used for allied measurements.
- To learn about failure analysis and repair methods for few mechanical elements.
- To promote computerization in maintenance and inventory management.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Explain the principles, objectives and importance of maintenance adopted in industry.
2. Select the suitable maintenance category and lubrication type.
3. Apply the appropriate methods and instruments for condition monitoring.
4. Analyze the failures of mechanical systems and select suitable repair methods.
5. Utilize computers in maintenance and inventory management.

**Articulation Matrix**

**UNIT I**

**9 Hours**

**PRINCIPLES OF MAINTENANCE PLANNING**

Basic principles of maintenance planning - Objectives and principles of planned maintenance activity - Importance and benefits of sound maintenance systems - Maintenance organization - Maintenance economics.

**UNIT II**

**9 Hours**

**MAINTENANCE CATEGORIES AND LUBRICATION**

Maintenance categories - Comparative merits of each category - Preventive maintenance, Maintenance schedules, Repair cycle - Total Productive Maintenance - Principles and methods of lubrication.

**UNIT III**

**9 Hours**

**CONDITION MONITORING**

Condition based maintenance - Cost comparison with and without Condition Monitoring - Methods and instruments for condition monitoring - Noise, vibration, wear and temperature measurement.

**UNIT IV**

**9 Hours**

**FAILURE ANALYSIS AND REPAIR METHODS**

Failure analysis - Failures and their development - Role of Non-Destructive Testing in failure analysis - Repair methods for bearings, cylinder block, fuel pump, shaft.

**UNIT V**

**9 Hours**

**COMPUTER AIDED MAINTENANCE MANAGEMENT**

Approach towards Computerization in maintenance - computer-aided maintenance management system (CAMMS) - Advantages of CAMMS - spare parts and inventory center performance reporting.

**Total: 45 Hours**

22OME04

SAFETY ENGINEERING

3 0 0 3

### Course Objectives

- To study the principles of safety management system.
- To introduce the provisions contained in the industrial laws.
- To provide knowledge on safety requirements for engineering industry.
- To learn safety requirement for chemical industry.
- To study the various safety measures adopted in construction industries.

### Programme Outcomes (POs)

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

### Course Outcomes (COs)

1. Explain safety management system of an industry.
2. Implement the provisions of acts and rules in industries.
3. Implement and review the safety performance followed in various industries
4. Evaluate safety appraisal in chemical industries.
5. Generate safety reports on construction industries.

**Articulation Matrix**

| 4     | 2   | 3   | -   | -   | -   | -   | -   | -   | 2   | -    | -    | -    | -    | -    |
| 5     | -   | -   | -   | -   | 2   | -   | -   | -   | -   | 3    | -    | -    | -    | -    |

**UNIT I****8 Hours****SAFETY MANAGEMENT**

Concepts - Evolution, International Labour Organization (ILO), National Safety Council, Techniques - Job Safety Analysis (JSA), Safety survey, Safety inspection, Safety Sampling, Accident Reporting and Investigation - Concept of an accident, Accident causation models, cost of accident, investigation, Safety Performance Monitoring - Safety indices.

**UNIT II****10 Hours****SAFETY AND LAW**

Factory Act 1948-Safety and Health chapters, Tamil Nadu Factories Rules- Safety and Health chapters, Environment and Pollution Laws, Building and other construction works act 1996, Electricity Rules.

**UNIT III****10 Hours****SAFETY IN ENGINEERING INDUSTRIES**

Safety in machine shop- Principles of machine guarding - Personal protective equipment- Safety in handling industrial gases - Safety in cold forming and hot working of metals- Safety in finishing, inspection and testing, heat treatment, electro plating, leak test, radiography.

**UNIT IV****9 Hours****SAFETY IN CHEMICAL INDUSTRIES**

Safety in process design, unit operations, pressure vessel, heat exchanger, safety valves -Plant commissioning and inspection, pressure vessel, Plant maintenance and emergency planning, management of maintenance HAZOP study.

**UNIT V****8 Hours****SAFETY IN CONSTRUCTION INDUSTRY**

Construction regulations, contractual clauses, permit to work, - Education and training-Hazards of construction and prevention- excavation, scaffolding, dismantling, road works, construction of high-rise buildings - Working at heights-Working on fragile roofs, work permit systems-Construction machinery, cranes, chain pulley blocks, earth moving equipment, conveyors- Manual handling, Safety in demolition work, - Safety in confined spaces

**22OBT01****BIOFUELS****3 0 0 3****Course Objectives**

- To understand and explore the scope of biofuels the most efficient renewable source of energy.
- To develop the expertise in the technology pertaining to their generation and employment in order to surrogate the existing conventional fuels and hence strives towards sustainable development.
- To give way to the bolster green technology and incline towards more ecofriendly options.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Apply the bio resources that can be used for the production of biofuels.
2. Analyze the physical and chemical properties of the biodiesel.
3. Analyze the mechanisms of improvising the quality and performance of engines using biofuels
4. Analyze the bio-fuel conversion technologies and their environmental attributes
5. Evaluate the designing aspects of major unit processes/operations of an integrated bio- refinery

**UNIT I****9 Hours****CLASSIFICATION AND RESOURCES**

Introduction, biofuel as a renewable energy, classification of biofuels - First, second, third and fourth generation biofuels, different plant sources as biofuel feed stocks, Biogases, physical and chemical characteristics of vegetable oils - iodine number, hydroxyl, acid values, rancidity, hydrogenolysis and hydrolysis, Food vs energy.

## **UNIT II**

**9 Hours**

### **BIODIESEL**

Definition, basics and chemistry of biodiesel, vegetable oils in biodiesel production, Trans esterification: Chemical methods, enzymatic methods and types of catalysts, separation and purification, physical properties and characterization of biodiesel - Cloud point, pour point, cold filter plugging point, flash point, viscosity and cetane number.

## **UNIT III**

**9 Hours**

### **QUALITY BIODIESEL AND ENVIRONMENT**

Producing Quality Biodiesel, quality control, test methods, ASTM specifications. Oxidative and thermal stability, estimation of mono, di, triglycerides and free glycerol, engine performance test, blending of ethanol with biodiesel, blending of biodiesel with high-speed diesel (HSD) and their combustion properties.

## **UNIT IV**

**9 Hours**

### **BIOETHANOL AND BIOGASES**

Ethanol as a fuel, microbial and enzymatic production of ethanol from biomass - lignocellulose, sugarcane, sugar beet, corn, wheat starch, purification - wet and dry milling processes, saccharification-chemical and enzymatic. Production of bio methane and bio hydrogen.

## **UNIT V**

**9 Hours**

### **BIOREFINERIES**

Definition and types of biorefineries, co-products of biorefineries-oil cake and glycerol, purification of glycerol obtained in biodiesel plant; anaerobic and thermal gasification of biomass, economics of biorefineries.

**Total: 45 Hours**

### **Reference(s)**

**22OFD01****TRADITIONAL FOODS****3 0 0 3****Course Objectives**

- Understand the importance of traditional foods and food habits
- Know the traditional processing of snack, sweet and dairy food products
- Infer the wide diversity and common features of traditional Indian foods and meal patterns.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**Course Outcomes (COs)**

1. Justify the processing methods of traditional foods in terms of its health benefits
2. Assess the production methods of traditional sweets, snacks and dairy products
3. Differentiate Traditional fermented foods products based on its raw material
4. Implement a large-scale production of tradition foods for its increased consumption
5. Compare the health aspects of traditional foods with modern foods

**Articulation Matrix**

**UNIT I****9 Hours****TRADITIONAL METHODS OF FOOD PROCESSING**

Introduction - food culture -geographical features and food. Traditional methods of milling grains - rice, wheat and corn - equipment and processes as compared to modern methods. Equipment and processes for edible oil extraction- comparison of traditional and modern methods. Energy costs, efficiency, yield, shelf life and nutrient content comparisons. Traditional methods of food preservation - sun-drying, osmotic drying, brining, pickling and smoking.

## UNIT II

9 Hours

### TRADITIONAL SWEETS, SNACKS AND DAIRY PRODUCTS

Production, formulation, preparation and processing of Indian traditional sweet and snack food products- Rasgolla, Gulab jamun; formulation and preparation of namkeen, potato chips, banana chips. Acid coagulated and fermented dairy products- paneer, dahi, shrikhand, lassi - processing conditions, defects etc. Fat rich products- Butter, ghee and its processing.

## UNIT III

9 Hours

### TRADITIONAL FERMENTED FOOD PRODUCTS

Idli, Soya sauce, fish pickle, dry fish, meat and vegetable fermented products. Various alcohol-based products. Ways to increase nutritional quality of food such as enrichment, fortification, fermentation and mutual supplementation. Best cooking and processing methods to retain nutrients

## UNIT IV

10 Hours

### COMMERCIAL PRODUCTION OF TRADITIONAL FOODS

Commercial production of traditional breads, snacks, ready-to-eat foods and instant mixes, frozen foods -types marketed, turnover; role of SHGs, SMES industries, national and multinational companies; commercial production and packaging of traditional beverages such as tender coconut water, neera, lassi, buttermilk, dahi. Commercial production of intermediate foods - ginger and garlic pastes, tamarind pastes, masalas (spice mixes), idli and dosa batters

## UNIT V

8 Hours

### HEALTH ASPECTS OF TRADITIONAL FOODS

Comparison of traditional foods with typical fast foods / junk foods - cost, food safety, nutrient composition, bioactive components; energy and environmental costs of traditional foods; traditional foods used for specific ailments /illnesses.

**Total: 45 Hours**

22OFD02

FOOD LAWS AND REGULATIONS

3 0 0 3

**Course Objectives**

- Introduce the concept of food hygiene, importance of safe food and laws governing it
- Learn common causes of food borne illness - viz. physical, chemical and biological and identification through food analysis
- Understand food inspection procedures employed in maintaining food quality

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**Course Outcomes (COs)**

1. Analyse the food safety strategies and nutritional quality of the food
2. Check the food regulatory mechanism and mandatory laws for food products
3. Determine the national and international regulatory agencies
4. Understand and apply the voluntary regulatory standards
5. Assess the implementation of food safety for a food processing industry

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

## **UNIT I**

**10 Hours**

### **INTRODUCTION**

Introduction, concept of food safety and standards, food safety strategies. Food hazards and contaminations - biological (bacteria, viruses and parasites), chemical (toxic constituents / hazardous materials) pesticides residues / environmental pollution / chemicals) and physical hazards. Preventive food safety systems - monitoring of safety, wholesomeness and nutritional quality of food. Prevention and control of physical, chemical and microbiological hazards. Principles of food safety - Establishment: design and facilities - emergency preparedness - Maintenance cleaning and sanitation - personal hygiene - packaging and labelling - transportation - traceability - recall procedure - visitor policy. Adulteration: Intentional and unintentional - Preservatives - antioxidants, sweeteners, flavours, colours, vitamins, stabilizers - indirect additives - organic residues - inorganic residues and contaminants.

## **UNIT II**

**10 Hours**

### **FOOD LAWS**

Indian and Food Regulatory Regime (Existing and new), PFA Act and Rules, Food Safety and Quality Requirements, Additives, Contaminants and Pesticide Residue. Food Safety and Standards Act, 2006, FSSAI roles and responsibilities, Essential Commodities Act, 1955, Global Scenario, Codex Alimentarius, WHO/FAO Expert Bodies (JECFA/ JEMRA/JMPR) WHO/FAO Expert Bodies (JECFA/ JEMRA/JMPR). Food safety inspection services (FSIS) and their utilization.

## **UNIT III**

**10 Hours**

### **REGULATIONS**

Introduction to OIE & IPPC, Other International Food Standards (e.g. European Commission, USFDA etc). WTO: Introduction to WTO Agreements: SPS and TBT Agreement, Export & Import Laws and Regulations, Export (Quality Control and Inspection) Act, 1963. Role of Agricultural and Processed Food Products Export Development Authority (APEDA), Customs Act and Import Control Regulations, Other Voluntary and mandatory product specific regulations, Other Voluntary National Food Standards: BIS Other product specific standards; AGMARK. Nutritional Labelling, Health claims.

## **UNIT IV**

**10 Hours**

### **STANDARDS**

Voluntary Quality Standards and Certification GMP, GHP, HACCP, GAP, Good Animal Husbandry Practices, Good Aquaculture Practices ISO 9000, ISO 21000, ISO 14000, ISO 17025, PAS 21000, FSSC 21000, BRC, BRCIOP, IFS, SQF 1000, SQF 2000. Role of NABL, CFLS.

## **UNIT V**

**5 Hours**

### **IMPLEMENTATION AND RISK ASSESSMENT**

Implementation of food safety for a desired food processing industry. Risk assessment studies: Risk management, risk characterization and communication.

**Total: 45 Hours**

### **Reference(s)**

22OFD03

**POST HARVEST TECHNOLOGY OF  
FRUITS AND VEGETABLES**

3 0 0 3

**Course Objectives**

- To understand the importance and different methods of post-harvest handling and storage of fruits and vegetables.
- To gain knowledge on different preservation methods of fruits and vegetables
- To familiarize with the value-added products from fruits and vegetables

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Implement the different post-harvest handling practices for the storage of fruits and vegetables.
2. Analyze the suitable preservation method (sugar, salt or dehydration) to produce value added products from fruits and vegetables.
3. Evaluate the requirement of low temperature and irradiation methods to preserve specific fruits and vegetables.
4. Apply the concentration and fermentation methods to preserve fruits and vegetables.
5. Implement the canning method to preserve fruits and vegetables.

**Articulation Matrix**

## UNIT I

9 Hours

### POST-HARVEST PRACTICES AND PROCESSING

Maturity indices for harvesting; pathological spoilage's during storage, ripening and control measures, post-harvest handling, sorting & grading, packaging, storage, transportation, Methods of pre-cooling, post-harvest treatments to hasten and delay ripening; Methods of storage at farm level - cold storage, controlled/modified atmosphere storage, Quality management, export requirements, Nutritive value, nutraceutical properties.

## UNIT II

9 Hours

### PRESERVATION AND VALUE ADDITION

General principles and methods of fruit and vegetable preservation. Preservation using sugar: Principle and Preparation of jam, jelly, marmalade, squash, RTS, carbonated beverages, crush, nectar, cordial, fruit bar, preserves, candies and carbonated fruit beverages. Processing using salt: Principle - Brining - Preparation of pickles, chutney and sauces, ketchup.

## UNIT III

9 Hours

### PRESERVATION BY LOW TEMPERATURE AND IRRADIATION

Preservation by low temperature: definition, principle, methods - Refrigeration, freezing. Methods of freezing-changes during freezing. Preparation of frozen foods. Minimal Processing of Fruits and Vegetables - techniques involved - Preservation by irradiation: definition- principle, application, irradiation unit.

## UNIT IV

9 Hours

### PRESERVATION BY DRYING

Machineries involved in processing of fruits and vegetables products. Drying and dehydration: definition, principle, Types of driers: Solar, cabinet, spray drier, drum drier, fluidized bed drier. Preparation of product for dehydration. Dehydration principles and equipment. Preparation of fruits - powder production. Problems related to storage of dehydrated products.

## UNIT V

9 Hours

### PRESERVATION BY CANNING

Canning: principles, Types of cans, packing of canned products-preparation of canned products - general considerations in establishing a commercial fruit and vegetable cannery, machineries involved in canning and bottling unit- spoilage of canned foods. Bottling of fruit and vegetable. Precautions in canning operations.

**Total: 45 Hours**

**22OFD04****CEREAL, PULSES AND OILSEED  
TECHNOLOGY****3 0 0 3****Course Objectives**

- Understand the application of scientific principles in the processing technologies specific to the materials
- Understand the storage methods and handling techniques followed for cereals, pulses and oil seeds
- Develop the knowledge in the area of Cereals, pulses and oil seed processing and technology

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**Course Outcomes (COs)**

1. Identify the specific processing technologies employed for cereals.
2. Analyse the composition of millets and their nutritional importance.
3. Relate the compositional changes and processing methods of pulses and legumes.
4. Create the competence in processing of oilseeds technology.
5. Relate the storage processing of food grains with quality aspects.

**Articulation Matrix**

## **UNIT I**

**9 Hours**

### **CEREALS**

Cereal Grains- Basic agricultural aspects, structure and composition; Storage, Insect control; Processing: Wheat- milling, (Atta and maida), quality aspects of flour, wheat proteins and their function, rheology of flour; wheat based baked products - Bread, Biscuit, Cakes, Extruded products, Pizza, Chapatis, malting and malt products; Rice-Milling, Parboiling, Quick cooking rice, Traditional Indian Products- Puffed Rice, flaked rice, Idli/Dosa/vada mixes and other savouries; Corn- Wet and dry milling, Corn Products - Corn flakes, Corn starch, canned corn products, puffed product; Oats-Milling, Oat Products - Steel cut, rolled oats, quick cooking; Traditional and Fermented cereal products.

## **UNIT II**

**9 Hours**

### **OTHER CEREALS AND MILLETS**

Sorghum, Pearl Millet, Finger millet, Foxtail Kodo Millet - Basic agricultural millet, aspects, structure and composition; storage, insect control; processing - pearling, Milling, Malting, Malt based foods, flaked and fermented products; Traditional and Nutritional products based on finger millet.

## **UNIT III**

**9 Hours**

### **PULSES AND LEGUMES**

Basic agricultural aspects, structure, composition, storage, insect control, processing Milling/splitting, dhal milling, products - puffed, flakes, flour, legume-based traditional products, flour based Indian sweets and savouries, soya milk, soy protein Isolate, soya paneer

## **UNIT IV**

**9 Hours**

### **OILSEEDS AND NUTS**

Basic agricultural aspect's structure, composition, Storage, Insect control; processing: traditional and modern methods of oil extraction, refining, bleaching, deodorizing, hydrogenation; oil blends; applications of different oils and fats in food processing & products.

## **UNIT V**

**9 Hours**

### **STORAGE AND HANDLING**

Bag Storage - Advantages and Disadvantages, Cover Plinth Storage Structures, CAP storage (Cover and Plinth Storage). Protection against Rodents, Fungi, Pests and Mites. Fumigation Processes for bag storage piles. Bulk Storage in silos and large Bins. Conveyors and Elevators for feeding and discharging.

**Total: 45 Hours**

**22OFT01****FASHION CRAFTSMANSHIP****3 0 0 3****Course Objectives**

- To impart theoretical and practical knowledge about various handi-craft techniques
- To enhance innovative skills on hand crafts.
- To build confidence on doing handicrafts.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Outline the classification, techniques and criteria for selecting raw materials for making various handicraft materials and produce textile-based handicrafts. Produce various decorative and appealing products
2. Design and construct various wall hangings and fashion accessories.
3. Design and construct toys and accessories
4. Design and construct head accessories, home furnishings and paintings
5. Design and construct various decorative and appealing products for interiors

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | 3   | 1   | 3   | -   | -   | -   | 2   | -   | 2   | 2    | -    | 2    | -    | -    |

**UNIT I**

**9 Hours**

**TECHNIQUES OF HANDICRAFT MATERIALS**

Definition of Handicraft, Classification: Reusable, Non reusable, Raw materials used in various craft materials: printed, embroidered, stitched and handmade, Criteria for selection of raw materials: material types and end uses.

**UNIT II**

**9 Hours**

**DECORATIVE AND APPEALING PRODUCTS - INTERIORS**

Designing and Construction procedures for following various decorative and appealing products: Wall hangings - String Art on plywood, Pressed Flower Art frames.

**UNIT III**

**9 Hours**

**DECORATIVE AND APPEALING PRODUCTS - ACCESSORIES**

Designing and Construction procedures for following various decorative and appealing products: Handbags, Hats, footwear.

**UNIT IV**

**9 Hours**

**DECORATIVE AND APPEALING PRODUCTS - ORNAMENTS**

Designing and Construction procedures for following various decorative and appealing products: Stone necklace using Macrame Technique, Tribal Jewellery using woollen threads, Floral Jewellery using Resin Technique, Fabric Jewellery using Tie and Dye Technique.

**UNIT V**

**9 Hours**

**DECORATIVE AND APPEALING PRODUCTS - FANCY ITEMS**

Designing and Construction procedures for following various decorative and appealing products: Jewellery Box, Utility Holder, Gift items. Lampshade decors from cardboard, Driftwood Frames for pictures and Mirrors.

**Total: 45 Hours**

22OFT02

INTERIOR DESIGN IN FASHION

3 0 0 3

**Course Objectives**

- To impart knowledge on interior design.
- To improve the design skills, sustainable with socially-conscious designs
- To impart knowledge on applying principles and elements of interior design to different situations.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Interpret the elements of interior design concepts and resolve the personality requirements.
2. Develop graphical representations of interior design concepts.
3. Resolve the space planning requirements of residential home as per CPWD guidelines.
4. Determine the aesthetic requirements of interior design components.
5. Appraise the roles and responsibilities of interior designer.

**Articulation Matrix**

## **UNIT I**

**9 Hours**

### **INTRODUCTION**

Interior designing - definition, importance, requirements and types - Structural design, Decorative Design - Designing interiors, good taste; Design themes, types and application. Personality of the Home - Art elements - Line: types, characteristics and importance; form: size and shape, characteristics; Colour - sources, qualities, emotional effects, colour wheel and schemes.

## **UNIT II**

**9 Hours**

### **GRAPHICAL PRESENTATIONS**

3D composition; Isometric and Axonometric- Still life- Furniture Sketching- Object Drawing with color rendering - Interior elements, Lighting, plants. Perspective, Axonometric Isometric drawing. Orthographic Projection - Lifts and escalators.

## **UNIT III**

**9 Hours**

### **SPACE PLANNING**

Space planning concepts- interiors, circulation. Definition, application of ergonomic principals in interiors. Residential house space planning case study- CPWD guidelines. Lighting for different locations and activities, measurement, ventilation and indoor air quality, noise control methods.

## **UNIT IV**

**9 Hours**

### **INTERIOR COMPONENTS**

Application of colour in interiors; Texture - types and significance; Pattern: types and effects; Light - importance. Importance of Furniture Design for Interiors- Ancient Age / Middle Age / Contemporary. Doors, Windows, Staircase designs, False Ceiling, Partitions, Wall Panelling, Comics, Mosaic, Cladding- Flooring and Wall Cladding

## **UNIT V**

**9 Hours**

### **ROLES AND RESPONSIBILITIES OF INTERIOR DESIGNER**

Role of an Interior Designer- Responsibility towards society and need of an Interior Designer to better the environment- Ethics and Code of Conduct- Responsibility towards client, contractor and supplier, Estimation. Professional Fees- Work of an Interior Designer- Making of portfolio, JD Annual Design Awards.

**Total: 45 Hours**

SURFACE ORNAMENTATION

3 0 0 3

**Course Objectives**

- To familiarize the students about the various techniques of surface embellishment with relevance to garment embellishments.
- To aware of various types of embroidery and methods of producing it.
- To make the students confident about doing surface embellishment work

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Course Outcomes (COs)**

1. Analyze the raw material requirements for surface ornamentation and its application
2. Implement hand embroidery stitches on fabric and show the stitch development procedure in diagrammatic representations
3. Apply the machine and computerized embroidery stitches
4. Analyze the surface embellishment techniques and its application
5. Assess the quality maintenance parameters of all embroidered products and analyze the 6 traditional embroidery techniques

**Articulation Matrix**

## **UNIT I**

**9 Hours**

### **INTRODUCTION TO SURFACE ORNAMENTATION**

Introduction, Definition, Need, Types, Raw materials, Importance of surface ornamentation, Selection of needle, thread and fabric for hand embroidery and machine embroidery - various methods of surface embellishment- embroidery and surface ornamentation.

## **UNIT II**

**9 Hours**

### **HAND EMBROIDERY**

General rules for hand embroidery. Types of hand embroidery stitches-Running, Couching, Button hole, Satin, Long & Short, Wheat, Chain, Stem, Herringbone, Cross stitch, Knotted stitches, Fish bone, Fly stitch, Braids, Back, Hem, Seed, Needle weaving, Whip stitches.

## **UNIT III**

**9 Hours**

### **MACHINE EMBROIDERY**

General rules for machine embroidery. Types of frames and methods of transferring the designs. Attachments to sewing machines for embroidery, Types of machine embroidery stitches- Eyelet work, Cut work, patch work, Mirror work, Applique, Shaded embroidery, Shadow work, Bead and Sequins work, Vermicelli, Zigzag, Granite stitch. Computerized embroidery machine- Concept of design and development, software used in embroidery machines, process of designing, method and types of stitch application, punching and digitizing.

## **UNIT IV**

**9 Hours**

### **EMBELLISHMENT TECHNIQUES**

Materials used and Applications. Types of embellishment techniques- fabric painting-hand, Stencil-dabbing and Spraying. Dyeing and printing-advanced tie and dye techniques, batik and block printing. Trimmings and decorations-Laces, Pompons, Fringes, Tassels, Tucks, Show buttons, Crocheting.

## **UNIT V**

**9 Hours**

### **TRADITIONAL EMBROIDERIES OF INDIA AND CARE**

Care and maintenance of embroidered articles-care and maintenance methods for embroidered apparel, pressing. Traditional Embroideries of India-Phulkari, Kasuti, Kashmiri embroidery, Kutch work, Chikkankari, Kantha.

**Total: 45 Hours**

**22OPH02****SEMICONDUCTOR PHYSICS AND DEVICES****3 0 0 3****Course Objectives**

- Impart knowledge in physical properties of semiconducting materials
- Analyze the factors affecting the operation of semiconductor devices
- Apply the physics of semiconductors to develop semiconductor devices

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Analyze the formation of drift current due to the movement of charge carriers under an electric field.
2. Analyze the energy band diagram in thermal equilibrium and space charge width of PN junction.
3. Analyze the operation of a Bipolar Junction Transistor (BJT) in active, cutoff, and saturation modes.
4. Apply the principles of charge storage in floating-gate transistors for non-volatile memory applications.
5. Outline the efficiency factors affecting the performance of opto-electronic devices.

**Articulation Matrix**

## **UNIT I**

**9 Hours**

### **ENERGY BANDS AND CARRIER TRANSPORT PROPERTIES**

Energy Bands: Formation of energy bands - doping effects - energy levels - electron and hole concept in semiconductor. Carrier transport: Carrier drift-drift current density - conductivity- diffusion current density - total current density

## **UNIT II**

**9 Hours**

### **P-N JUNCTION**

Basic structure and fabrication process of p-n junction - current - voltage characteristics - energy band diagram - equilibrium Fermi levels - depletion region - junction breakdown phenomena - zener - avalanche breakdown.

## **UNIT III**

**9 Hours**

### **BIPOLAR JUNCTION TRANSISTOR**

The basic transistor action - operation in the active mode - current gain - static characteristics - carrier distribution in emitter, base and collector region - modes of operation - current - voltage characteristics of common base and emitter configuration - frequency response and switching of bipolar transistor

## **UNIT IV**

**9 Hours**

### **MOSFET**

The ideal MOS diode - basic fundamentals and characteristics - types - CMOS and BiCMOS - CMOS inverter - MOSFET on insulator - thin film transistor (TFT) - silicon on insulators (SOI) devices - MOS Memory structures - DRAM and SRAM

## **UNIT V**

**9 Hours**

### **PHOTONIC DEVICES**

Radiative transitions and optical absorption-light emitting diodes-organic LED - infrared LED - semiconductor laser - temperature effect - photo detector - photo diode - silicon and compound semiconductor solar cells - efficiency

**Total: 45 Hours**

APPLIED LASER SCIENCE

3 0 0 3

**Course Objectives**

- Impart knowledge on laser science
- Explore different strategies for producing lasers
- Create expertise on the applications of lasers in various fields

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Analyze the role of energy levels and excitation processes in laser action
2. Compare the different types of lasers based on pumping method, active medium and energy levels
3. Compute the rotation of earth, velocity and distance using lasers and apply the same for day today applications
4. Analyze the role of lasers in surgical and endoscopy applications
5. Apply the laser techniques in industrial applications

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 3     | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | -    | 1    | -    | -    |
| 4     | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | -    | 1    | -    | -    |
| 5     | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -   | -    | -    | 1    | -    | -    |

## **UNIT I**

**9 Hours**

### **LASER FUNDAMENTALS**

Introduction - principle - absorption and emission of light - thermal equilibrium - Einstein's prediction - Einstein's relations - A and B coefficients - condition for large stimulated emission - spontaneous and stimulated emission in optical region - light amplification - condition for light amplification - population inversion- Components of lasers - pumping methods - pumping mechanisms - optical resonator

## **UNIT II**

**9 Hours**

### **LASER BEAM CHARACTERISTICS AND TYPES**

Characteristics of laser - Classification of lasers - principle, construction, working, energy level diagram and applications of molecular gas laser (CO<sub>2</sub> laser) - liquid laser (dye laser) - excimer laser - Solid state laser (Nd:YAG laser) - semiconductor laser (homojunction laser).

## **UNIT III**

**9 Hours**

### **LASERS IN SCIENCE**

Introduction - Harmonic generation (SHG) - Stimulated Raman emission - lasers in chemistry - laser in nuclear energy - lasers and gravitational waves - rotation of the earth - measurement of distance - Light detection And Ranging (LIDAR) - velocity measurement - holography

## **UNIT IV**

**9 Hours**

### **LASERS IN MEDICINE AND SURGERY**

Light induced biological hazards: Eye and skin - Eye laser surgery - photocoagulations - homeostasis - dentistry - laser angioplasty - different laser therapies - advantages & disadvantages - laser endoscopy.

## **UNIT V**

**9 Hours**

### **LASERS IN INDUSTRY**

Applications in material processing: laser welding - hole drilling - laser cutting - Lasers in electronics industry: information storage - bar code scanner- Lasers in defence: laser based military weapons - laser walls.

**Total: 45 Hours**

22OPH04

BIOPHOTONICS

3 0 0 3

**Course Objective:**

- To understand the light-matter interaction in biological cells or tissues by using the principles of optics and lasers.
- To apply the properties of biological cells or tissues in biomedical applications by various optical imaging, sensing and activation techniques.
- To analyze the concepts of Modern optical measurement techniques and devices in early detection of disease and cure them.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**Course Outcomes (COs)**

1. Analyze the fundamental laws of optics and their role in light interaction with biological cells and tissues.
2. Apply the principles of light interaction with biological tissues to enhance imaging resolution and contrast.
3. Use laser tweezers techniques to infer the activities of cells (tissues) and explain the single molecule detection processes in medical diagnosis.
4. Outline the properties of ultra short laser pulses and tissue engineering to rectify the affecting factors in biological cells.
5. Compare the various types of bio-imaging methods to detect the infected cells and molecules in biological science.

**Articulation Matrix**

| 5     | 3   | 3   | 2   | 2   | 1   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****INTRODUCTION TO BIOPHOTONICS**

Light as Photon Particles – Coherence of light - lasers – classification of lasers – Mechanisms of Non-linear Optics (NLO) processes associated with Biophotonics - Light scattering mechanisms: Rayleigh scattering, Miescattering, Brillouin Scattering, Raman Scattering -Different light sources – Quantitative description of light: Radiometry

**UNIT II****9 Hours****PHOTOBIOLOGY**

Interaction of light with cells and tissues – Light – Tissue Interaction Variables – Light –Tissue Interaction Theory: Radiative Transport Theory – Photo process in biopolymers – In Vivo Photoexcitation – photo-induced physical, chemical, thermal and mechanical effects in biological systems – Optical biopsy – Single molecule detection

**UNIT III****9 Hours****BIO-NANO-PHOTONICS**

Laser Microtools, Semiconductor quantum dots for bioimaging, Metallic nanoparticles and nanorods for biosensing – Optical biosensors: Fibre-Optic, evanescent wave, surface Plasmon resonance (SPR) based biosensors – biomaterials for photonics – Principle and design of laser tweezers – laser trapping and dissection for biological manipulation.

**UNIT IV****9 Hours****TISSUE ENGINEERING WITH LIGHT**

Basics of tissue optics: Light absorption and scattering in tissues, Wavelength effects and spectra– the therapeutic window, Light penetration in tissues – Absorbing agents in tissues and blood –Skinoptics, response to the UV radiation, Optical parameters of tissues – tissue welding – tissue contouring – tissue regeneration – Femto laser surgery – low level light therapy and photo dynamic therapy

**UNIT V****9 Hours****BIO-IMAGING TECHNIQUES AND ITS APPLICATIONS**

An overview of optical imaging – Fluorescence Microscopy – Scanning Microscopy – In vivo Confocal Microscopy – Multi photon Microscopy – Optical Coherence Tomography (OCT) – Fluorescence Resonance Energy Transfer (FRET) imaging – fluorescence lifetime imaging Microscopy (FLIM) – Nonlinear optical imaging – Coherent Anti-stokes Raman Scattering –Bioimaging Applications.

**22OPH05****PHYSICS OF SOFT MATTER****3 0 0 3****Course Objectives**

- To recognize the properties of soft matter and hard matter.
- To understand the fundamental interactions of colloids and gels.
- To explain the structure and phase behavior of liquid crystals and supramolecules.
- To summarize the soft matter properties of structures and components of life.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Analyze the structural and mechanical differences between soft matter and hard matter.
2. Exemplify the fundamental interactions and stability of colloids and gels.
3. Analyze the optical and electro-optical properties of liquid crystals used in display technologies.
4. Outline the aggregation and phase behavior of surfactants, polymers, copolymers and block copolymers.
5. Analyze the soft matter behavior of nucleic acids, proteins, polysaccharides and membranes.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**UNIT I****9 Hours****CONDENSED MATTER**

Intermolecular forces-Condensation and freezing-mechanical response: Hookean solid-Newtonian liquid-viscoelasticity. Glasses: relaxation time-viscosity- glass forming liquids. Soft matter: length scales-fluctuations and Brownian motion.

**UNIT II****9 Hours****COLLOIDAL DISPERSIONS & GELS**

Forces between colloidal particles: vander Waals forces-electrostatic double layer forces-steric hindrance-depletion interactions. Stability and phase behaviour: Crystallisation - strong colloids-weak colloids. Physical and chemical gels-classical theory of gelation-elasticity of gels.

**UNIT III**

**9 Hours**

**LIQUID CRYSTALS**

Liquid crystal phases-distortions and topological defects-electrical and magnetic properties-polymer liquid crystals-Fredricks transition and liquid crystal displays.

**UNIT IV**

**9 Hours**

**SUPRAMOLECULAR SELF ASSEMBLY**

Aggregation and phase separation-types of micelles- bilayers and vesicles. Phase behaviour of concentrated surfactant solutions-phase separation in polymers, copolymers and block copolymers.

**UNIT V**

**9 Hours**

**SOFT MATTER IN NATURE**

Components and structures of life-Nucleic acids-proteins-interaction between proteins-polysaccharides-membranes.

**Total: 45 Hours**

**22OCH01 CORROSION SCIENCE AND ENGINEERING****3 0 0 3****Course Objectives**

- Analyse the loss incurred due to corrosion in different sectors and terminologies related to corrosion.
- Identify forms and types of corrosion with suitable mechanism.
- Apply various methods of corrosion control, corrosion testing and monitoring.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Apply fundamental principles of corrosion science to calculate corrosion rates, analyze metal degradation and interpret Pourbaix diagrams to predict corrosion behavior in various industrial environments.
2. Compare different corrosion types on metals when exposed to air, water and at high temperatures (> 100 C).
3. Analyze the corrosion mechanism on steel, iron, zinc and copper metal surfaces.
4. Analyze the rate of corrosion on metals using electrochemical methods of testing.
5. Analyze the correct materials, design and operation conditions to reduce the likelihood of corrosion in new equipment and constructions.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 1     | 2   | 1   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 2     | 2   | -   | -   | -   | -   | -   | 1   | -   | -   | -    | -    | -    | -    | -    |
| 3     | 1   | 3   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 4     | 2   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 3   | 3   | -   | -   | -   | -   | 1   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****CORROSION**

Importance of corrosion - spontaneity of corrosion - units of corrosion rate (mdd and mpy) - direct and indirect damage by corrosion - importance of corrosion prevention in industries - Pilling Bedworth ratio and its significance - passivation - area relationship in both active and passive states of metals - Pourbaix diagrams of Mg, Al and Fe and their advantages and disadvantages

## **UNIT II**

**7 Hours**

### **TYPES OF CORROSION**

Eight forms of corrosion: uniform, galvanic, crevice corrosion, pitting, intergranular corrosion, selective leaching, erosion corrosion and stress corrosion-Catastrophic oxidation corrosion

## **UNIT III**

**9 Hours**

### **MECHANISM OF CORROSION**

Hydrogen embrittlement - corrosion fatigue - filiform corrosion - fretting damage and microbes induced corrosion. Corrosion mechanism on steel, iron, zinc and copper metal surfaces

## **UNIT IV**

**10 Hours**

### **CORROSION RATE AND ITS ESTIMATION**

Rate of corrosion: Factors affecting corrosion. Electrochemical methods of polarization: Tafel extrapolation polarization and linear polarization. Weight loss method - testing for intergranular susceptibility and stress corrosion. Non-Destructive testing methods: Visual testing - liquid penetrant testing - magnetic particle testing - Ultrasonic monitoring, and eddy current testing

## **UNIT V**

**10 Hours**

### **CORROSION CONTROL METHODS**

Fundamentals of cathodic protection - types of cathodic protection (sacrificial anodic and impressed current cathodic protection). Stray current corrosion, problems and its prevention. Protective coatings: Metal coatings: Hot dipping (galvanizing, tinning and metal cladding) - natural inhibitors. Selection of suitable design for corrosion control

**Total: 45 Hours**

**22OCH02****POLYMER SCIENCE****3 0 0 3****Course Objectives**

- Explain the properties of different polymers with its mechanism
- Select the appropriate polymerization techniques to synthesize the polymers
- Identify suitable polymers for various industrial applications

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**Course Outcomes (COs)**

1. Apply knowledge of polymerization mechanisms to predict the formation of different polymer products under various reaction conditions and catalysts.
2. Apply suitable polymerization techniques to synthesize the high-quality polymers.
3. Identify the structural, thermal, and mechanical properties of polymers for different applications.
4. Apply the polymer processing methods to design polymer products.
5. Analyze the polymers used in electronic and biomedical applications.

**Articulation Matrix**

| 5     | 1   | 3   | 2   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****10 Hours****POLYMERS AND ELASTOMERS**

Classification of polymers - Mechanism: Addition polymerization - free radical, cationic, anionic and co-ordination (Ziegler-Natta) polymerization - copolymerization - condensation polymerization (nylon-6,6) -ring opening polymerization (nylon-6). Elastomers: Natural rubber and synthetic rubber: styrene -butadiene rubber (SBR), butyl, neoprene, thiocol rubbers. High performance polymers: polyethers, polyether ether ketone (PEEK), polysulphones and polyimides

## UNIT II

8 Hours

### POLYMERIZATION TECHNIQUES

Homogeneous and heterogeneous polymerization - bulk polymerization (PMMA, PVC) - solution polymerization - polyacrylic acid, suspension polymerization (ion-exchange resins) - emulsion polymerization (SBR) - advantages and disadvantages of bulk and emulsion polymerization. Melt solution and interfacial poly-condensation

## UNIT III

8 Hours

### CHARACTERIZATION AND TESTING

Characterization of polymers by Infrared Spectroscopy (IR) and Nuclear Magnetic Spectroscopy (NMR) - Thermal properties: TGA and DSC - Testing tensile strength - Izod impact - Compressive strength - Rockwell hardness - Vicot softening point - water absorption

## UNIT IV

9 Hours

### POLYMER PROCESSING

Moulding: Compression - injection - extrusion and blow mouldings. Film casting - calendering. Thermoforming and vacuum formed polystyrene - foamed polyurethanes. Fibre spinning: melt, dry and wet spinning. Fibre reinforced plastics fabrication: hand-layup - filament winding and pultrusion

## UNIT V

10 Hours

### SPECIALITY POLYMERS

Preparation and properties of heat resistant and flame-retardant polymers. Polymers for electronic applications: liquid crystalline, conducting and photosensitive polymers – E waste management. Polymer for biomedical applications: artificial organs, controlled drug delivery, Scaffolds in tissue Engineering –waste management.

**Total: 45 Hours**

**22OCH03****ENERGY STORING DEVICES****3 0 0 3****Course Objectives**

- Compare the energy density of commercialized primary and secondary batteries.
- Classify the fuel cells and compare their efficiency in different environmental conditions.
- Demonstrate the various energy storage devices and fuel cells.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Find the parameters required for operation of a cell to evaluate the capacity of energy storage devices.
2. Identify the electrodes, electrolyte and cell reactions of different types of primary, secondary batteries and infer the selection criteria for commercial battery systems with respect to commercial applications.
3. Differentiate fuel cells based on its construction, production of current and applications.
4. Compare different methods of storing hydrogen fuel and its environmental applications.
5. Classify the solar cell based on the materials used in it.

**Articulation Matrix**

**UNIT I****6 Hours****BASICS OF CELLS AND BATTERIES**

Components - classification - operation of a cell - theoretical cell voltage - capacity - specific energy - energy density of lithium and lead acid battery - charge efficiency- charge rate - charge retention - closed circuit voltage - open circuit voltage current density - cycle life - discharge rate-over charge-over discharge

## UNIT II

10 Hours

### BATTERIES FOR PORTABLE DEVICES AND ELECTRIC VEHICLES

Primary batteries: zinc-carbon - magnesium, and mercuric oxide - recycling/safe disposal of used cells. Secondary batteries: lead acid - nickel-cadmium - lithium-ion batteries - rechargeable zinc alkaline battery. Reserve batteries: Zinc-silver oxide - lithium anode cell - photo galvanic cells. Battery specifications for cars and automobiles. Extraction of metals from battery materials.

## UNIT III

10 Hours

### TYPES OF FUEL CELLS

Importance and classification of fuel cells: Description, working principle, components, applications and environmental aspects of the following types of fuel cells: alkaline fuel cells - phosphoric acid - solid oxide - molten carbonate and direct methanol fuel cells

## UNIT IV

10 Hours

### HYDROGEN AS A FUEL

Sources and production of hydrogen: Electrolysis and photocatalytic water splitting. Methods of hydrogen storage: High pressurized gas - liquid hydrogen type - metal hydride. Hydrogen as engine fuel - features, application of hydrogen technologies in the future – limitations.

## UNIT V

9 Hours

### ENERGY AND ENVIRONMENT

Future prospects of renewable energy and efficiency of renewable fuels - economy of hydrogen energy. Solar Cells: First, second, third and fourth generation solar cell - photo biochemical conversion cell.

**Total: 45 Hours**

**22OGE01****PRINCIPLES OF MANAGEMENT****3 0 0 3****Course Objectives**

- To develop cognizance about importance of management principles.
- Extract the functions and responsibilities of managers.
- To Study and understand the various HR related activities.
- Learn the application of the theories in an organization.
- Analyze the position of self and company goals towards business.

**Programme Outcomes (POs)**

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Students will be able to understand the basic concepts of Management.
2. Have some basic knowledge on planning process and its Tools & Techniques.
3. Ability to understand management concept of organizing and staffing.
4. Ability to understand management concept of directing.
5. Ability to understand management concept of controlling.

**Articulation Matrix**

| 4     | -   | -   | -   | -   | -   | -   | -   | -   | 3   | -    | 2    | -    | 1    | 1    |
| 5     | -   | -   | -   | -   | -   | -   | -   | -   | 2   | -    | 2    | -    | 1    | 1    |

**UNIT I****9 Hours****BASICS OF ENTREPRENEURSHIP**

Nature, scope and types of Entrepreneurships, Entrepreneur Personality Characteristics, Entrepreneurship process. Role of entrepreneurship in economic development

**UNIT II****9 Hours****GENERATION OF IDEAS**

Creativity and Innovation, Lateral Thinking, Generation of Alternatives, Fractional, Reversal Method, Brain Storming, Analogies

**UNIT III**

**9 Hours**

**LEGAL ASPECTS OF BUSINESS**

Contract act-Indian contract act, Essential elements of valid contract, classification of contracts, sale of goods act- Formation of contract of sale, negotiable instruments- promissory note, bills and cheques, partnership, limited liability partnership (LLP), companies act-kinds, formation, memorandum of association, articles of association.

**UNIT IV**

**9 Hours**

**BUSINESS FINANCE**

Project evaluation and investment criteria (cases), sources of finance, financial statements, break even analysis, cash flow analysis.

**UNIT V**

**9 Hours**

**OPERATIONS MANAGEMENT**

Importance- functions-deciding on the production system- facility decisions: plant location, plant layout (cases), capacity requirement planning- inventory management (cases)-lean manufacturing, Six sigma.

**Total: 45 Hours**

**22OGE02****ENTREPRENEURSHIP DEVELOPMENT I****3 0 0 3****Course Objectives**

- Learn the basics and scope of the Entrepreneurship
- Understand the generation of ideas of the Entrepreneurship
- Evolve the legal aspects of the business
- Learn to analyze the various business finance
- Learn the basics of the Operations Management

**Programme Outcomes (POs)**

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Analyze the role of entrepreneurship in economic development.
2. Explain the types of ideas that to be used for entrepreneurship development.
3. Examine the legal aspects of business and its association.
4. Examine the sources of business and its analysis.
5. Analyze the different modes of operation management.

**UNIT I****9 Hours****MARKETING MANAGEMENT**

Marketing Environment, Segmentation, Targeting and positioning, Formulating marketing strategies, Marketing research, marketing plan, marketing mix (cases)

**UNIT II** **9 Hours**

**HUMAN RESOURCE MANAGEMENT**

Human Resource Planning (Cases), Recruitment, Selection, Training and Development, HRIS, Factories Act 1948 (an over view)

**UNIT III** **9 Hours**

**BUSINESS TAXATION**

Direct taxation, Income tax, corporate tax, MAT, Tax holidays, Wealth tax, Professional tax Cases). Indirect taxation, Excise duty, Customs, Sales and Service tax, VAT, Octroi, GST (Cases)

**UNIT IV** **9 Hours**

**GOVERNMENT SUPPORT**

Industrial policy of Central and State Government, National Institute-NIESBUD, IIE, EDI. State Level Institutions-TIIC, CED, MSME, Financial Institutions

**UNIT V** **9 Hours**

**BUSINESS PLAN PREPARATION**

Purpose of writing a business plan, Capital outlay, technical feasibility, Production plan, HR plan, Market survey and Marketing plan, financial plan and Viability, Government approvals, SWOT analysis.

**Total: 45 Hours**

22OGE04

**NATION BUILDING, LEADERSHIP AND  
SOCIAL RESPONSIBILITY**

3 0 0 3

**Course Objectives**

- To understand the importance of National Integration, Patriotism and Communal Harmony
- To outline the basic awareness about the significance of soft skills in professional and inter-personal communications and facilitate an all-round development of personality
- To analyze the different types of responsibility role of play for the improvement of society

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the understanding of religion-cultural diversity of the country and its impact on the lives of the people and their beliefs.
2. Build a sense of responsibility, smartness in appearance and improve self-confidence.
3. Develop the sense of self-less social service for better social & community life.
4. Apply the importance of Physical and Mental health and structure of communication organization and various mode of communication.
5. Analyze the organizational structure, entry modes, and operational roles of Indian armed forces, CAPF, and NCC while developing leadership capabilities.

## UNIT I

9 Hours

### NATIONAL INTEGRATION

Importance & Necessity, Factors Affecting National Integration, Unity in Diversity. Threats to National Security. Water Conservation and Rain Harvesting, Waste Management and Energy Conservation. Leadership Capsule-Traits-Indicators-Motivation-Moral Values-Honor Code-Case Studies: Shivaji, Jhansiki Rani, Case Studies-APJ Abdul kalam, Deepa Malik, Maharana Pratap, N Narayan Murthy Ratan Tata Rabindra Nath Tagore, role of NCC cadets in 1965 war.

## UNIT II

9 Hours

### PERSONALITY DEVELOPMENT AND LEADERSHIP

Intra & Interpersonal skills - Self-Awareness- & Analysis, Empathy, Critical & creative thinking, Decision making and problem solving, Communication skills, Group Discussion – coping with stress and emotions, changing mindset, Public Speaking, Time Management, Social skills, Career counseling, SSB procedure and Interview skills.

## UNIT III

9 Hours

### SOCIAL SERVICE, COMMUNITY DEVELOPMENT AND ENVIRONMENTAL AWARENESS

Basics of social service and its need, Types of social service activities, Objectives of rural development programs and its importance, NGO's and their contribution in social welfare, contribution of youth and NCC in Social welfare. Protection of children & women safety, Road/ Rail Travel Safety, New initiatives, Cyber and mobile security awareness. Disaster management Capsule-Organization-Types of Disasters-Essential Services-Assistance-Civil Defence Organization

## UNIT IV

9 Hours

### HEALTH, HYGIENE AND COMMUNICATION

Sanitation, First Aid in Common Medical Emergencies. Health, Treatment and Care of Wounds. Yoga-Introduction, Definition, Purpose, Benefits. Asanas-Padmasana, Siddhasana, Gyan Mudra, Surya Namaskar, Shavasana, Vajrasana, Dhanurasana, Chakrasana, Sarvangasana, Halasana etc. Obstacle Training Contact: Obstacle training - Intro, Safety measures, Benefits, Straight balance, Clear Jump, Gate Vault, ZigZagBalance, High Wall etc. COMMUNICATION: Basic Radio Telephony (RT) Procedure-Introduction, Advantages, Disadvantages, Need for standard- Procedures-Types of Radio Telephony Communication-Radio telephony procedure, Documentation.

## UNIT V

9 Hours

### ARMED FORCES AND NCC GENERAL

Army, navy, Air force and Central armed policed forces- Modes of entry into army, police and CAPF- Naval expeditions & campaigns. History, Geography of Border / Coastal areas. EEZ maritime security & ICG. Modes of Entries in armed forces. Security challenges & role of cadets in Border management. Aims, Objectives and org of NCC- Incentives- Duties of NCC cadets- NCC Camps: types and conduct.

**Total: 45 Hours**

**22OBM01****OCCUPATIONAL SAFETY AND HEALTH IN  
PUBLIC HEALTH EMERGENCIES****3003****Course Objectives**

- Students will be able to know about Occupational safety and health (OSH)
- Students will be able to discuss about risks faced by emergency responders during disease outbreaks and other emergencies
- Students will be able to create awareness on necessary strategies for managing OSH in emergency situations

**Programme Outcomes (POs)**

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4:** Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**Course Outcomes (COs)**

1. Practice the occupational safety measures by the scientific knowledge to overcome the risks faced by emergency responders
2. Apply appropriate strategies and tools in Occupational safety and healthcare
3. Analyze common risks for safety and health in emergencies
4. Adapt appropriate occupational safety practices in chemical accidents
5. Guide Occupational safety measures in radiation incidents

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|-------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| 1     | -   | 3   | 2   | 1   | -   | -   | -   | 1   | -   | -    | -    | 2    | -    | -    |

**UNIT I** **9 Hours**

**MANAGEMENT ASPECTS**

Management system approach to occupational safety and health hazards and risks – rights, duties and responsibilities of employers and workers during outbreaks and emergencies – Emergency responders health monitoring and surveillance

**UNIT II** **9 Hours**

**STRATEGIES AND TOOLS**

International Health Regulations, 2005 – Incident command system for managing outbreaks and emergencies – Occupational safety and health controls – Strategies for infection prevention and control

**UNIT III** **9 Hours**

**COMMON RISKS FOR SAFETY AND HEALTH IN EMERGENCIES**

Vector-borne diseases, water and food-borne diseases, Vaccine-preventable diseases – Heat stress - Slips, trips and falls - Road traffic injuries – Ergonomic hazards - Violence – Psychological stress during outbreaks and injuries

**UNIT IV** **9 Hours**

**OCCUPATIONAL SAFETY AND HEALTH IN CHEMICAL INCIDENTS**

Emergencies caused by chemical incidents – occupational safety and health hazards and risks of chemicals – Personal Protective Equipment – Decontamination of emergency response personnel – medical surveillance of emergency responders

**UNIT V** **9 Hours**

**OCCUPATIONAL SAFETY AND HEALTH IN RADIATION INCIDENTS**

Sources and scenarios of radiation incidents – guidance for protection of emergency responders - Occupational health surveillance of persons occupationally exposed to radiation in emergencies

**Total: 45 Hours**

**22OBM02****AMBULANCE AND EMERGENCY MEDICAL  
SERVICE MANAGEMENT****3 0 0 3****Course Objectives**

- Understand the ambulance & transport management and allied services.
- Compare the ambulance design and equipment, transportation and corporate Profit.
- Carry-out various acts governing transport management.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Identify ambulance services, types and allied services
2. Formulate minimum ambulance rescue equipment and developing a transportation Strategy.
3. Understand the Emergency response team, Transportation interfaces, Transportation Service Characteristics & regulatory reforms involved.
4. Identify ambulance services, types and allied services
5. Formulate minimum ambulance rescue equipment and developing a transportation Strategy.

| 5     | 2   | -   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****INTRODUCTION**

Introduction-transportation ambulance types-Advanced Life Support Ambulance-Basic Life Support Ambulance - Patient Transport Ambulance-Emergency services – Ambulances - Allied services-telephone management

**UNIT II****9 Hours****AMBULANCE DESIGN AND EQUIPMENT**

Design and Equipment of Ambulances -Minimum Ambulance Rescue Equipment-Emergency drugs medicines Recruitment validation Training to handle in house Ambulance emergency procedures Checklist measures Roles of paramedics, midwives, community nurses, hospice workers in emergency handling via ambulance

### UNIT III

9 Hours

#### TRANSPORTATION REGULATION FOR EMERGENCY MEDICAL SERVICE

Crisis Management-Anxiety & Stress Management-the Emergency response team-police assistance- Information handling & processing-Establishing customer service levels - Developing and Reporting customer service standards - Impediments to an Effective customer Service strategy - Improving customer Service Performance Transportation

### UNIT IV

9 Hours

#### AMBULANCE PREVENTIVE MAINTENANCE

Legal obligations Switch Console Front, Main Electrical, Patient Compartment Climate Oxygen system On board Suction system 110/12 VOLT system, Modular Body, Medical Equipment - Cot & Stretcher, safety belts-driver(s), passenger, Patients-child restraint device- incubator

### UNIT V

9 Hours

#### THE MOTOR VEHICLE ACT

The Motor Vehicle Act, 1988- Rules of the road Regulations 1989- Overall Dimensions of Motor Vehicles (Prescription of conditions for exemption) Rules 1991-Use of Red light on the top front of the vehicle

**Total: 45 Hours**

**22OBM03****HOSPITAL AUTOMATION****3 0 0 3****Course Objectives**

- Introduce the concepts of hospital systems and need for central monitoring
- Exemplify the power generation, utility and protection systems.
- Apply the distributed and central monitoring functions in hospital environment

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**Course Outcomes (COs)**

1. Identify the factors in central power generating and monitoring systems
2. Analyze the sensors and actuators for the automation systems
3. Classify the equipment types and its applications.
4. Apply software tools and digital computer for monitoring of parameters and medical data handling
5. Design central monitoring station for hospitals for control and surveillance applications

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

| 3     | -   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 4     | -   | 2   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |
| 5     | 3   | -   | -   | -   | -   | -   | -   | -   | -   | -    | -    | -    | -    | -    |

**UNIT I****9 Hours****AUTOMATION IN HEALTHCARE**

Introduction to automation Role of automation in healthcare Remote Patient Monitoring Maximizing resources on patient care Reducing variability, Automating clinician and patient interactions through products.

**UNIT II****9 Hours****POWER GENERATION AND MEDICAL GAS PRODUCTION**

Power generator, Battery: Maintenance and troubleshooting, energy conservation and monitoring system - Automation in dryer, compressor, air conditioning, lighting, heating systems.

**UNIT III****9 Hours****AUTOMATION IN PIPING**

Monitoring of flow and pressure of medical gas System components Vacuum control units Automatic changeover system - Types of Outlets - Leakage test- Prevention and safety automation.

**UNIT IV**  
**INSTRUMENTATION SYSTEMS**

**9 Hours**

Optical sensors , Pressure Sensors - Ultrasonic Sensors - Tactile Sensors - Thermal sensors -Biosensor - Linear Actuators, Central monitoring station - Alarm system - Regulation and standards.

**UNIT V**  
**APPLICATIONS**

**9 Hours**

Business intelligence & executive dashboards - Radio-Frequency Identification (RFID)- based patient and asset tracking solutions - Tablet-based applications for bed side access to doctors/nurses - Healthcare CRM for patient relationship management - Patient kiosk, tele-health – HIS integration.

**Total: 45 Hours**

**22OAG01****RAINWATER HARVESTING TECHNIQUES****3 0 0 3****Course Objectives**

- To enhance the awareness about water resources management and conservation.
- To acquire knowledge about water harvesting techniques and their implementation.
- To practice the design aspects of sustainable rainwater harvesting solutions for communities.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**Course Outcomes (COs)**

1. Assess the sources, availability and challenges in water resources management
2. Assess various water harvesting systems in practice
3. Execute design considerations for comparing surface runoff harvesting methods
4. Compare the characteristics and impacts of flood water harvesting techniques
5. Evaluate various rainwater harvesting methods for groundwater recharging

**Articulation Matrix**

**UNIT I****8 Hours****WATER RESOURCES**

Global water distribution – primary and secondary sources of water – technical, social and cultural aspects; Global challenges in water and climate – water scarcity – water pollution – Indian scenario; Water resources management – public participation – integrated approach; Water governance – water sharing plans – policy, schemes and concerns.

## UNIT II

10 Hours

### WATER CONSERVATION CHALLENGES

Principles of water harvesting for rural and urban – collection at micro and macro levels, flow control, storage and uses; Rainwater harvesting systems – traditional and contemporary – groundwater recharge; Water resources inventory – site analysis – database collection – water allocation principles based on demand and supply; Traditional water harvesting systems – practices in India – references in old texts – reasons for their deterioration – way forward; Watershed-based approach – project planning at micro and macro levels – community participation – rain centres.

## UNIT III

9 Hours

### SURFACE RUNOFF HARVESTING

Short-term and micro-level harvesting techniques for runoff – terracing and bunding – rock and ground catchments; Long-term and macro-level harvesting techniques for runoff – farm ponds – percolation ponds and nala bunds; Design considerations – site selection – selection of runoff coefficients – computation of rainwater runoff volume – hydrograph analysis – cost estimation; Design of storage structures – storage capacity – selection of component – methods of construction

## UNIT IV

9 Hours

### FLOOD WATER HARVESTING

Floods – causes of urban floods and droughts – characteristics of water spread – impacts; Flood water harvesting – permeable rock dams – water spreading bunds – flood control reservoir; Design considerations – computation of flood water quantity; Trenching and Diversion Structures – types – site selection – design criteria – most economic section – design consideration of ditch system

## UNIT V

9 Hours

### GROUNDWATER HARVESTING

Rooftop rainwater harvesting – recharge pit – recharge trench – tube well – recharge well; artificial recharge – gully plug – dug well – percolation tank – nala bunds – recharge shaft; Groundwater harvesting – aquifer characteristics – subsurface techniques – infiltration wells – recharge wells – groundwater dams; Design of drainage system – types – design criteria – filter design – causes of failures

**Total: 45 Hours**

22OEE01

VALUE ENGINEERING

3 0 0 3

**Course Objectives**

- To understand the concept of value engineering in order to reduce cost of product or process or service.
- To implement creative and innovative techniques using FAST diagram.
- To study benefits of Value Engineering for various industries.

**Programme Outcomes (POs)**

**PO10:** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11:** Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12:** Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Apply the concepts of value and value engineering to prepare a job plan.
2. Analyze the cost and worth of a product/service using the principles of economics.
3. Evaluate the value of a product/service to take managerial decisions.
4. Apply the soft skills in understanding team building, team work and report writing.
5. Asses the functions and values of product/services in industries using case studies.

**Articulation Matrix**

**UNIT I****8 Hours****INTRODUCTION TO VALUE ENGINEERING**

Historical perspective of Value Engineering, Aims and objectives of Value Engineering, Concept of Value, Value Engineering concerned with Economic Value, Value Engineering Job plan.

**UNIT II** **9 Hours**

**FUNCTIONAL ANALYSIS**

Function-Cost-Worth analysis: Function Analysis System Technique (FAST); Review of principles of engineering economics

**UNIT III** **10 Hours**

**EVALUATION OF VALUE ENGINEERING**

Evaluation of function, Problem setting system, problem solving system, setting and solving management - decision - type and services problem, evaluation of value

**UNIT IV** **9 Hours**

**HUMAN ASPECTS IN VALUE ENGINEERING**

Team building; Life cycle costing; Managing Value Engineering Study; Value Engineering Report writing; Presentation Skill - Individual and Team Presentations; Implementation and follow-up.

**UNIT V** **9 Hours**

**BENEFITS OF VALUE ENGINEERING**

Classification of hazardous zones-intrinsically safe and explosion proof electrical apparatus-increase safe Value Engineering Case studies in the Industries like Manufacturing; Construction; Health Care; Process.

**Total: 45 Hours**

22OEE02

ELECTRICAL SAFETY

3 0 0 3

**Course Objectives**

- To provide knowledge on basics of electrical fire and statutory requirements for electrical safety
- To understand the causes of accidents due to electrical hazards
- To know the various protection systems in Industries from electrical hazards
- To know the importance of earthing
- To distinguish the various hazardous zones and applicable fire proof electrical devices

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO6:** The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8:** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**Course Outcomes (COs)**

1. Analyze the basic concepts in electrical circuit and hazards involved in it.
2. Analyze the electrical hazards in the workplace and its impacts.
3. Examine the operation of various protection systems from electrical hazards.
4. Analyze the various safety procedures involved in the industries.
5. Explore the different hazardous zones in Industries and their safety measures.

**Articulation Matrix**

**UNIT I** **9 Hours**  
**INTRODUCTION**

Objectives of safety and security measures - Hazards associated with electric current and voltage - principles of electrical safety - working principles of major electrical equipment - Typical supply situation - Indian electricity act and rules - statutory requirements from electrical inspectorate-International standards on electrical safety.

**UNIT II** **9 Hours**  
**ELECTRICAL HAZARDS**

Primary and secondary hazards-shocks, burns, scalds, falls-human safety in the use of electricity- Energy leakage-clearances and insulation-classes of insulation-voltage classifications-excess energy- current surges- over current and short circuit current-heating effects of current- Lightning, hazards, lightning arrestor, - national electrical safety code ANSI.

**UNIT III** **9 Hours**  
**ELECTRICAL SAFETY EQUIPMENT**

Fuse, circuit breakers and overload relays - safe distance from lines - capacity and protection of conductor joints and connections, overload and short circuit protection - earth fault protection. FRLS insulation - insulation and continuity test - system grounding - equipment grounding - earth leakage circuit breaker (ELCB) - ground fault circuit interrupter - electrical guards - Personal protective equipment.

**UNIT IV** **9 Hours**  
**ELECTRICAL SAFETY OPERATION AND MAINTENANCE**

Role of environment in selection - protection and interlock - discharge rod and earthing devices - safety in the use of portable tools - preventive maintenance - installation – earthing, specifications, earth resistance, earth pit maintenance - Fire Extinguishers - CO2 and Dry Powder schemes.

**UNIT V** **9 Hours**  
**HAZARDOUS AREAS**

Classification of hazardous zones-intrinsically safe and explosion proof electrical apparatus-increase safe equipment-their selection for different zones-temperature classification-grouping of gases-use of barriers and isolators-equipment certifying agencies – electrical safety standards. (IS, API and OSHA standards)

**Total: 45 Hours**

**22OCB01****INTERNATIONAL BUSINESS MANAGEMENT****3 0 0 3****Course Objectives**

- To enable the students to understand the fundamentals of international business
- To provide competence to the students on making international business decisions
- To enable the students to understand the financial and promotional assistance available for exporters

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO7:** Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO9:** Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Demonstrate the role and importance of digital marketing in today's rapidly changing business environment
2. Discover the techniques to help organizations to utilize social media for digital marketing
3. Analyze the key elements and campaign effectiveness of E-Mail marketing and mobile marketing
4. Evaluate the effectiveness of a digital marketing campaign using Google Analytics
5. Apply advanced practical skills to plan, predict and manage digital marketing campaign

**Articulation Matrix**

**UNIT I****9 Hours****INTRODUCTION**

Definition, Drivers of International Business, Domestic Vs. International Business, Trade and Investment Theories: Interventionist Theories, Free Trade Theories, Theories Explaining Trade Patterns: PLC Theory, The Porter Diamond, Factor Mobility Theory.

**UNIT II** **9 Hours**  
**GLOBALIZATION**

Globalization: Implications, Challenges - Protectionism: Tariff Barriers, Non-Tariff Barriers- Forms of Integration, Role of WTO and IMF in International Business, Economic, Political, Cultural and Technological Environments

**UNIT III** **9 Hours**  
**INTERNATIONAL BUSINESS STRATEGIES**

Market Entry Strategies, Multinational Strategy, Production Strategy, Marketing Strategy, Human Resource Strategy.

**UNIT IV** **9 Hours**  
**FOREIGN EXCHANGE**

Foreign Exchange Market – Functions, Theories of Exchange Rate Determination, Exchange Rate Forecasting, Convertibility of Currency, Risks associated with Foreign Exchange.

**UNIT V** **9 Hours**  
**EXPORTS AND ETHICS IN INTERNATIONAL BUSINESS**

Exports – Risks, Management of Exports, Regulatory frameworks, Export financing, Countertrade, Ethics – Issues, Dilemma and Theory.

## **ONE CREDIT COURSES**

**22AI0XA****MACHINE LEARNING IN IoT****1 0 0 1****Course Objectives**

- To enhance the capabilities of robotic systems within the context of the Internet of Things
- To understand various applications in robotic systems within the IOT framework and techniques.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Identify components of IoT and Machine Learning.
2. Implement the techniques for robotic localization and mapping.

**Articulation Matrix**

**22AI0XB****AUGMENTED REALITY****1001****Course Objectives**

- Apply advanced AR techniques to create interactive and immersive experiences.
- Design and develop multi-faceted AR projects using cutting edge technologies.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Differentiate between Augmented Reality and other immersive technologies
2. Develop a functional AR application using common development platforms, incorporating virtual elements into a real-world environment.
3. Develop advanced multi-user interactions for shared AR environments.

**Articulation Matrix**

**22AI0XC STATISTICAL MODELLING IN R PROGRAMMING****1 0 0 1****Course Objectives**

- Understand the mathematical fundamentals of linear models
- Explore the role of regression models, which are used to model a variable of interest as a function of explanatory variables.
- Work with the R programming language to perform analyses and generate reproducible reports.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Identify and diagnose violations of the assumptions of linear models and add complexity to regression models using transformations and interactions.
2. Use variable selection techniques to select a model. Perform regression analyses for a binary response.

**Articulation Matrix**

**22AI0XD****NODE.JS****1001****Course Objectives**

- To understand how to set up a node js environment.
- To incorporate various libraries and modules, and to create and execute scripts in node js.
- To build modern, fast and scalable server-side web applications with node js.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**Course Outcomes (COs)**

1. Experiment with Node JS Modules and Node Package Manager.
2. Develop applications to handle events in Node JS and make use of Web Server to manage database

**Articulation Matrix**

MLOps ESSENTIALS

1001

**Course Objectives**

- To understand the technologies essential for MLOps, including version control systems, containerization tools and orchestration platforms.
- To implement Continuous Integration and Continuous Delivery (CI/CD) pipelines for automating the testing, deployment, and monitoring of machine learning models.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Design, build, and deploy ML models and systems to solve real-world problems.
2. Utilize Git for version control in machine learning projects.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**22AI0XF****APACHE KAFKA****1001****Course Objectives**

- To learn the basic concepts and architecture of Apache Kafka.
- To understand the role of Kafka in modern data processing systems.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Develop Kafka producer applications to publish messages and Kafka consumer applications to consume messages.
2. Implement strategies for data retention, partitioning, and replication to optimize Kafka's performance and reliability.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**22AI0XG****FULL STACK DEVELOPMENT  
USING ADAPTIVE AI****1 0 0 1****Course Objectives**

- To understand how to integrate frontend with backend.
- To understand the Setting up data drift monitoring in a Flask application.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Develop a Backend Application with Python and Flask.
2. Deploy AutoML-generated models with Flask and implement model retraining automatically when data drift is detected.

**Articulation Matrix**

| CO No | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |

**22AI0XH****DEMYSTIFYING DIALOGUECRAFT AI AND APPLICATIONS****1 0 0 1****Course Objectives**

- To gain a comprehensive understanding of DialogueCraft AI technology and its core principles.
- To explore diverse applications of DialogueCraft AI across various industries and domains.
- To develop critical thinking skills to evaluate the benefits and limitations of DialogueCraft AI.
- To engage in hands-on activities to experience and experiment with DialogueCraft AI platforms.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Interpret the benefits and limitations of DialogueCraft AI compared to traditional chatbots.
2. Implement the key components of dialogue systems and their roles in interaction flow.
3. Apply critical thinking skills to identify and address potential biases in DialogueCraft AI systems.
4. Analyze the quality and quantity of training data required for effective dialogue system performance.

**22AI0XI****AI BASED DEEPFAKE IMAGE CREATION****1 0 0 1****Course Objectives**

- Understand the core concepts and techniques behind deepfake image generation using AI.
- Gain hands-on experience with popular deepfake image creation tools and frameworks.
- Explore the ethical considerations and potential societal impacts of deepfakes.
- Develop critical thinking skills to analyze and evaluate deepfake content.

**Programme Outcomes (POs)**

**PO1:** Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2:** Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3:** Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO5:** Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PSO1:** Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

**PSO2:** Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

**Course Outcomes (COs)**

1. Understand the core concepts and principles of Deepfake AI technology and its application in image creation.
2. Implement the popular Deepfake image creation tools and platforms for basic manipulation and experimentation.
3. Apply different types of Deepfake techniques and their underlying algorithms.
4. Analyze the potential benefits and limitations of Deepfakes in various domains.
