(ii). Grievance Redressal mechanism for Faculty, Staff and Students:

The institute has set up a Grievance Redressal Cell to look into the grievances of the students, faculty and staff. The Cell consists of five senior members of faculty, which very closely interacts with all the students, faculty and staff, and thus facilitates effective redressal of grievances of any kind. As the administration is highly transparent and the communication flows freely at a faster pace, hardly any grievance is felt on the campus.

(xix). Games and Sports Facilities

The institution provides comprehensive sports and recreational facilities to promote the physical fitness and overall well-being of students. A total playing area of 764,074 sq. ft. has been developed with well-maintained infrastructure for both outdoor and indoor sports activities. The outdoor sports facilities include a standard 400 m athletic track with a football field, two Kho-Kho courts, one cricket field with cricket pitch, net practice facility, and portable net, one hockey field, two volleyball courts, two ball badminton courts, two Kabaddi courts, and one handball court. The sports complex also houses one basketball court, two synthetic tennis courts providing students with access to emerging sports. Indoor sports facilities include two table tennis tables, one snooker table, four carrom boards, and five chess boards. Separate gymnasiums for men and women are available with modern fitness equipment to encourage regular physical exercise.

The Boys' Hostel is equipped with ten semi-indoor badminton courts, an outdoor gym, and a dedicated yoga centre, providing ample opportunities for fitness and recreational activities within the hostel premises. The Girls' Hostel features four semi-indoor badminton courts, one basketball court, one hockey field, one throwball court, one volleyball court, and an outdoor gym, ensuring excellent sports infrastructure for women students.

One indoor wooden badminton complex with four courts is available to encourage regular practice. These facilities are extensively utilized by students for regular practice, intramural competitions, intercollegiate tournaments, and coaching programmes, fostering a healthy sporting culture and encouraging active participation in both recreational and competitive sports.

(xx). Teaching Learning Process

The focus of experiential learning at Bannari Amman Institute of Technology is on laboratory-based courses, which are supported by Layer-Learning, internships, skill development, and project work. Experiential learning approaches are used in between thirty and thirty-five percent of the courses on average. In contrast, Participative Learning encourages students to actively engage with the newest technology by emphasizing skill development through training, active engagement in labs, industry projects, internships, project contests, and project work. Participatory learning is incorporated into the design of about 25-30% of courses. Approximately 75% of courses focus on problem-solving techniques, which are included into tutorial sessions and assignments. These methods use layer learning, group learning, and self-learning to help students develop higher-order cognitive abilities.

Animated videos, simulations, real-time examples, presentations, and activity-based experiments are just a few of the elements used in BIT's teaching-learning process to improve comprehension. Additionally, students can easily access course materials and contents on the institute's PS Portal at <https://ps.bitsathy.ac.in>.
