# Centre for Research (CFR)

## Institute Vision

To be a centre of excellence, providing world-class education that transforms individuals into intellectual, empathetic and responsible citizens.

## CFR Mission

- To indulge in extensive core and multi-disciplinary research activities
- To integrate research and education
- To develop core group of faculty members with high research potential

## Specific Objectives

- Effective utilization of existing facilities and to establish new facilities
- Enable faculty members and students to translate the knowledge and research into new products to improve the lifestyle of the people
- Ensure timely disclosure of all potential Inventions / Innovations and results of research activities by faculty members/students through patents or proper mode of publications with relevant property rights

### Scientific and Technological Infrastructure (STUTI)

A seven-day residential hands-on training program entitled “Synergistic Training Program Utilizing the Scientific and Technological Infrastructure (STUTI)” funded by NITW-DST, Govt. of India was hosted by Department of Physics and Centre for Research, Bannari Amman Institute of technology, from 22.06.23023 to 28.06.2023.

The Inaugural function was held on 22.06.2023. 35 participants from five different states participated the training program. Dr. R.T. Rajendrakumar, Prof / Dept. of Nanoscience and Technology, Bharathiar University was the Guest of Honor for the Inaugural Function. Fourteen scientists and researchers from different academic and research institutes shared their expertise in their invited talk sessions. Also, a Hands on training was given to the participants for all the seven days in sophisticated research equipment's which enhances their scientific knowledge in the research career. Moreover, post graduate students, research scholars pursuing their doctoral program and the faculty members had been benefited in terms of the scientific knowledge of the characterization instruments from this seven days residential training program.

**Travel Grant received by SERB to attend  
the conference in USA.**

Dr V Sathish, Assistant Professor Level II, Department of Chemistry, received travel grant from SERB (Rs.1.71 lakhs) for presenting paper entitled “Photoswitchable compounds in micelles and confined spaces” in “Gordon Research Conference on Artificial Molecular Switches and Motors” held at Colby-Sawyer College, New Hampshire, USA during July 18-23, 2023.

## International Conference on Materials, Design and Manufacturing (ICMDM 2023)

Ms.Pavithra.K (201ME167) , Ms.Nandana R (201ME155) , Mr.Thirumugam J (201ME201 ) ,Mr.Prakash Raj M ( 201ME168) Received the Best paper award by presenting the paper entitled on " Experimental Investigation of Date seed and Neem powder reinforced natural fiber Composites " in the international Conference on Materials, Design and Manufacturing (ICMDM 2023) Conducted by department of mechanical engineering ,Anna University CEG Campus,Guindy under the guidance of Mr.D.Dinesh APIII/ Mech

### Development Building Blocks using Construction Demolition Waste

Grantee	: Dr.A.Jayaraman
Funding agency	: Startup Research Grant
Amount	: Rs. 2,50,000/-
Duration	: 1 Year

#### *Scope of Sanctioned Funding:*

To innovate the practical competency of native building materials such as red soil brick and construction waste brick for various applications using sustainable natural binders, their suitability and performance in various environmental conditions are to be studied. During the preliminary analysis in the laboratory, noteworthy improvement has been observed in the strength, durability, high impact strength and soundness of the red soil bricks and construction waste bricks. These are evaluated by testing the compressive strength, water absorption, impact test and soundness test of the sample specimens. Through the compression test, the increase in the compressive strength value determines in the red soil brick and construction waste brick has been identified. Through the water absorption test, the reduction in water absorption value determines the resistance to water penetration and lower permeability to the red soil brick and construction waste brick has been identified.

## Nanoparticles Dispersed Hydrogen Bond Ferroelectric Liquid Crystals for Efficient Optical Modulator

Grantee	: Dr.V.N.Vijayakumar
Funding agency	: DAE
Amount	: Rs. 7,61,000/-
Duration	: 3 Years

### *Scope of Sanctioned Funding:*

Dispersion of nanoparticles into HBFLC matrix could be used to design electro-optic devices such as, frequency modulators, optical filter and low driving voltage devices. Detailed investigation (theoretical and experimental) on nanoparticle dispersed hbfcls could be more useful to introduce an efficient and cost effective optical modulators.

# 3

## Design and Synthesis of Nanomaterial Dispersed with Hydrogen Bonded Binary and Ternary Liquid Crystal Complexes for Photonic Devices

Grantee	:	Dr.V.N.Vijayakumar
Funding agency	:	TNSCST- RFRS
Amount	:	Rs. 3,00,000/-
Duration	:	2 Years

### *Scope of Sanctioned Funding:*

Cuo nanomaterial is dispersed with HBLC mixture in different ratio. The change in ratio of cuo with HBLC clearly explored the enhancement of LC properties. This nano HBLC mixture shows different color changes while applying thermal and electric field. If the external energy is applied, molecular order is changed and the variation in helical pitch has been observed and to exhibit thermochromic changes which is exploited in optical device, chromic paint, and color display devices. The reorientation of molecules within the layers induces the change in refractive index. A light transmit towards an opaque medium which depends on the molecular orientation. In optical devices, electrical signal is transformed into optical representation which intern induces thermochromic change. It could be an effective usage in polarizing optical filters. Furthermore dielectric studies, molecular transition order, relaxation method and its activation energy for thermochromic mesophases is evaluated from cole-cole plots. Investigation on thermochromic changes in the present cuo dispersed anti-ferroelectric (HBLC) mixture provides a novel idea to develop the well-organized and considerably reduce the price effective optical devices.

## Funding Proposals - Ongoing

1

### Development of Self-driven Vehicle

Grantee	: Dr.L.Rajasekar
Funding agency	: Institution of Engineering and Technology (IET)
Amount	: Rs. 59,275/-
Period	: 1 year

#### *Scope of sanctioned funding:*

The primary focus of technology nowadays is to moderate the human intervention in day-to-day tasks. Machine learning, artificial intelligence, and computer vision being the big players in doing so. We have reached a time wherein we can automate our menial tasks like driving.

## 2 Profiling and Development of Exosome-based Novel Anti- Arthritic Flavonoid Formulation

Grantee	: Dr.L.Dinesh Kumar
Funding agency	: SERB
Amount	: Rs. 20,50,000/-
Period	: 3 year

### *Scope of sanctioned funding:*

Profiling and development of exosome-based novel anti-arthritic flavonoid formulation to mitigate the hif regulated angiogenic-pannus growth in rheumatoid arthritis. The bioactive flavonoids, which have been identified and scientifically confirmed for their disease suppressing effects in ra will be collected from standard research literature/ databases and pharmacokinetic properties will be analysed along with the exosomes retrieved from fibroblast-like synoviocytes.

Besides, the association of ra-angiogenesis (ra-ag) regulatory targets with other Pathway mediators and bioactive small molecules will be assessed using network Pharmacology (string/stitch). Possible mechanism of the flavonoids and their predicted ra-ag targets will further be assessed with interaction and stability analysis by molecular docking and dynamics studies. Finally, the modulatory efficiency of the compound in the ra-ag pathway will be studied by in vitro cell culture (mh7a-fls cell line). The effective flavonoid compounds will then be formulated as a drug/ supplement to withhold the progression and severity of ra.

## Human-Elephant-Conflict Mitigation Through Design and Installation of SMS Operated Electronic Elephant Signage

Grantee	: Dr.Sanjoy Deb
Funding agency	: Elephant mangers association
Amount	: Rs. 1,16,000/-
Period	: 2 years

### *Scope of sanctioned funding:*

This is an initiative for human-elephant-conflict mitigation through design and installation of SMS operated electronic elephant signage. Invasive species like prosopis and wattle needs to be removed rigorous monitoring and ecological restoration should be done to prevent reinvasion practiced in Tamilnadu and Karnataka among other states. Elephant proof trenches (epts useful around large forest blocks. Separated by walls(septa) to prevent water flow.

Solar electric fences require lower investment than Karnataka and Tamilnadu. Strong barriers are using steel channels, used rails distances. Involvement of the local community or the stakeholder is most important maintenance of barriers.

## 4 Development of Integrated 6- Phase Electric Drive System for Hybrid/electric Vehicles and to Promote Sustainable Agriculture in Rural Areas

Grantee	: Dr.P.Sivaraman
Funding agency	: AICTE - RPS
Amount	: Rs. 13,74,333/-
Period	: 3 years

### *Scope of Sanctioned Funding:*

The rural people are highly dependent on public transportation that is not available during the pandemic situation. In future, with the proposed system the reduced size and cost of the electric vehicle making it feasible for rural people to be connected with towns for emergency. Also, it reduces the impact of co2 emission caused by internal combustion engines resulting replacement of fossil fuel with battery-operated vehicles. The proposed system offers an integrated inverter along with the motor resulting in reduced which is very compatible with 2&3wheeler, small cars, public & last-mile transportation for rural people

## Prototype Development and Field Trial of Body Heat Operated Wearable Mini Torch Light for Rural Area

Grantee	: Dr.Sanjoy Deb
Funding agency	: TNSCST
Amount	: Rs.4,15,000
Period	: 3 years

### *Scope of Sanctioned Funding:*

The testing of wearable thermoelectric generator module designed under TNSCST project entitled “Prototype Development and Field Trial of body heat operated wearable mini torchlight for rural area” is mainly to glow mini torchlight by resourcing power from human body heat. Four mini TEG modules are embedded over an especially designed lather armband, in a series configuration and together they generate 0.1V from human body heat.

## Autonomous Robotic Manipulator for Order Picking Task Integrated with Visual Servoing, Impedance Control Schemes and ASRS

Investigator	: Dr.K.L.Senthil Kumar
Funding agency	: AICTE -MODROB
Amount	: Rs.8,51,769/-
Period	: 2 years

### *Scope of sanctioned funding:*

The Industrial and Mobile robotics laboratory of the mechatronics department, Bannari Amman Institute of Technology has been sponsored with an amount of Rs. 8,51,769/- under AICTE-MODROB-Rural Aid Scheme. The project is aimed at development of an Autonomous robotic manipulator for order picking task integrated with visual servoing, impedance control schemes and AS/RS. The project integrates different sensors like vision, force to automate the order picking or retrieving task appropriately based on the order, for packaging or dispatching in a warehouse. The experimental setup developed in this project, provides a chance to the staff-members and the post graduate students to carry out their research in the latest areas like ware-house automation, vision-based robot control, sensor integration of vision and force feedback, etc. The setup not only restricts its research to robotics, it also includes mechatronic systems like conveyor control, Automated Storage and Retrieval systems.

# 7

## Modernisation of Electrical Machines

Grantee	: Dr.P.Sivaraman
Funding agency	: AICTE - MODROB
Amount	: Rs.13,88,000/-
Period	: 2 years

### *Scope of sanctioned funding:*

This project aims to upgrade the existing facilities thereby establishing CDAQ based automation of motor testing bundle, automation of induction motor testing bundle, eddy current dynamometer motor testing unit, variable frequency drive system, switched reluctance motor drive with eddy current loading and permanent magnet synchronous motor drive.

cDAQ based Automation of the motor testing bundle used in High-channel-count distributed DAQ , Benchtop test and measurement , Mixed sensor measurements The most common uses of a VFD are for control of fans, pumps and compressors, and these applications account for 75% of all drives operating globally. Soft starters and across-the-line contactors are other, less sophisticated types of motor controllers. The permanent-magnet synchronous machine (PMSM) drive is one of best choices for a full range of motion control applications. For example, the PMSM is widely used in robotics, machine tools, actuators, and it is being considered in high-power applications such as industrial drives and vehicular propulsion.

## 8 Technological Interventions for Enhancing Productivity, Scalability and Value Addition to Obtain Fiber from a Local Plant (*Urtica dioica*) for Tribals in Nagaland

Grantee	: Dr.S.Arun Jayakar (Level III), Department of EIE
Funding agency	: DST - SEED
Amount	: Rs. 68,82,120/-
Period	: 2 years

### *Scope of Sanctioned Funding:*

Design and development of textile machine, value addition and training to Naga Tribals Notable Accomplishments. Portable size of nettle fibre equipments like crushing setup, carding unit and roving machine are developed. The treated nettle samples are tested on developed machines in order to produce the nettle yarn. To save the energy, solar panels are used to run the newly developed machines. The Hill Innovation Lead Organisation (HILO) is an NGO at Nagaland, provided training on value addition of the nettle fiber to the tribal peoples in Nagaland.

## Funding Proposals - Completed

### 1 IEEE Sponsored First International Conference on "Smart Technologies, Communication and Robotics" - (ST CR-2021)

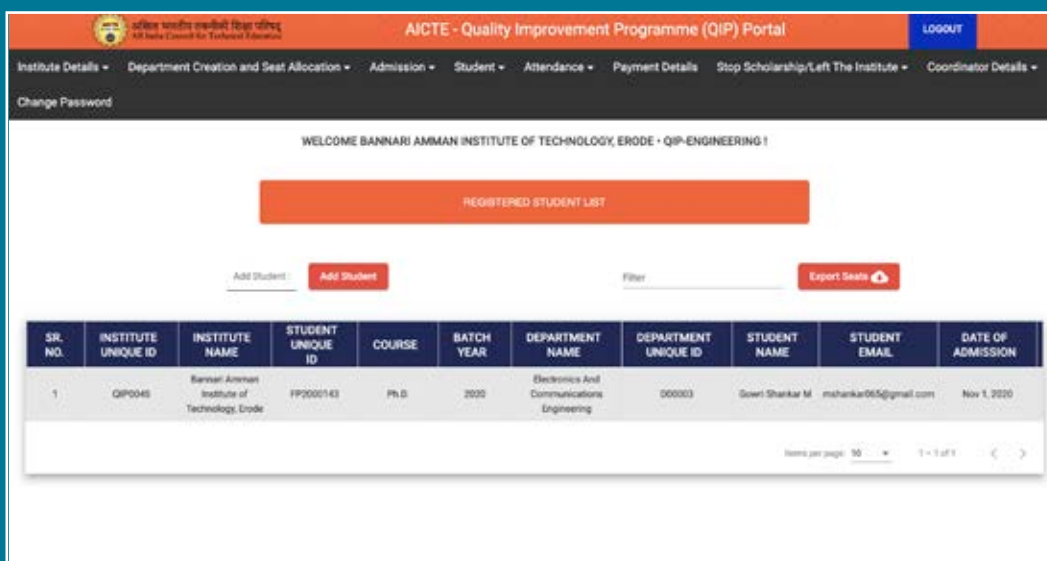

Grantee	: Dr.R.Harikumar
Funding agency	: AICTE
Amount	: Rs. 49,300/-
Duration	: 1 week

#### *Scope of Sanctioned Funding:*

STCR 2022 will provide a forum for researchers and engineers in both academia and industry to exchange the latest innovations and research advancements in smart technologies, communication and robotics. This virtual conference will provide a wonderful forum to refresh knowledge and explore the innovations in smart technologies, communication and robotics. This conference strives to offer plenty of networking opportunities and interact with leading scientists and researchers, friends and colleagues. The conference includes technical sessions, tutorials and technology and business panels. The primary goal of the conference is to promote research and developmental activities in smart technologies, communication and robotics. The main objective is to provide an opportunity to discuss about the technologies involved in the implementation of social relevant applications such as security aspects regarding the smartcity, IOT enabled wireless communication, autonomous vehicles and automations in trust areas"

## 2 Upgradation of the Expertise and Capabilities of the Faculty Members of the Degree Level Institutions in the Country

The screenshot displays the AICTE - Quality Improvement Programme (QIP) Portal. The header includes the AICTE logo and the text "All India Council for Technical Education". The main navigation bar contains links for Institute Details, Department Creation and Seat Allocation, Admission, Student, Attendance, Payment Details, Stop Scholarship/Left The Institute, and Coordinator Details. A "Logout" button is also present. Below the navigation bar, a welcome message reads "WELCOME BANNARI AMMAN INSTITUTE OF TECHNOLOGY, ERODE - QIP-ENGINEERING!". The main content area is titled "REGISTERED STUDENT LIST". It features a table with columns for SR. NO., INSTITUTE UNIQUE ID, INSTITUTE NAME, STUDENT UNIQUE ID, COURSE, BATCH YEAR, DEPARTMENT NAME, DEPARTMENT UNIQUE ID, STUDENT NAME, STUDENT EMAIL, and DATE OF ADMISSION. The table contains one row of data for a student named Gowri Shankar M. Below the table, there are buttons for "Add Student", "Filter", and "Export Seate".

Grantee : Dr.S.Jegadheeswaran  
Funding agency : AICTE - QIP  
Amount : Rs. 1,65,000/-  
Period : 1 year

### *Scope of Sanctioned Funding:*

The QIP funding allows an indian-listed company to raise capital from domestic markets without the need to submit any pre-issue filings to market regulators. This also supports upgradation of the expertise and capabilities of the faculty members of the degree level institutions in the country.

## Design and Development of Wireless Automatic Quality Domestic Water Distribution and Wastage Reduction Management System with PLC Controller and IOT Implementation, for Athiyappagoundan Pudur Village, Sathyamangalam, Erode District, Tamilnadu

Grantee	: Dr.C.Ganeshbabu
Funding agency	: AICTE - RPS
Amount	: Rs. 3,71,470/-
Period	: 3 Years

### *Scope of Sanctioned Funding:*

This project has 8 delivery points with different volume of pre-set delivery. The House 1 can be set to 500 lts per day and once the limit is delivered the solenoid is switched OFF automatically until for the next cycle of supply. Likewise, we can set various levels for the houses 1 to 8. Every house has a independent ON /OFF solenoid valve which is controlled by the PLC unit. Every independent node will have a LCD display interfaced with a Micro controller unit to show the user his Maximum Delivery limit per day ,Current Usage in Lts /day, Total quantity delivered. The entire data is transmitted to the IoT data concentrator through a RF link. The RF link enables as a data transmitter and as a wireless control switch to Switch ON /OFF the delivery line.

## 4 Application of Non-invasive Bio - Nano Electro Mechanical Systems (NEMS) Sensors in Healthcare: Innovative and Emerging Trends

Grantee	: Mrs.Andril Alagusabai
Funding agency	: DBT-CTEP
Amount	: Rs. 59,500\-
Period	: 1 year

### *Scope of sanctioned funding:*

The role of micro & nano system in biomedical engineering is ever increasing because human health is complex and deals with all aspects of human bodies, not just the physical aspects bio-engineers are concerned with all aspects and a wide range of problems that affect the body. Bio-engineering encompasses many areas, but the common thread that runs through the various field is the application of the sciences especially biology and mathematics. The mission of all disciplines of bio engineering is to: the prevention, diagnosis, and treatment of disease, patient rehabilitation, and the improvement of health.

## Climate Change Assessing and Developing Impacts, Adaptation and Mitigation Strategies in Tamil Nadu

Grantee	: Dr.N.Karthiga Shenbagam
Funding agency	: AICTE - ATAL
Amount	: Rs. 3,00,000
Period	: 1 year

### *Scope of sanctioned funding:*

This FDP on FUTURE TRENDS IN TRANSPORTATION AND LOGISTICS INDUSTRY aims to focus on the basic aspects of transportation and its advancements related to logistics industry , its need in the present day life with the help of programming . The latest developments in the field of civil and IT industry will be of great help to students, academicians and practicing Engineers in Civil Engineering to identify current technical gaps as well as immediate research needs.

The transport and the logistic sector are undergoing a major and important transformation today. The political, social, economic, environmental, technological and legal changes are amazingly influencing this sector every day. The transportation and logistics companies of today have to stay competitive and are made to add improved and advanced technologies in order to improve their warehouses, distribution centers, shipping and transport management. There is a new wave of startups in different segments of the logistics space that are helping to shape a modern supply chain marketplace that supports game changing technology.

## Nutraceutical Cake as a Protein Multivitamin-multimineral Supplement for Cancer Patients

Grantee	: Dr.I.Shanmuga Sundari
Funding agency	: TNSCST-SPS
Amount	: Rs.7,500/-
Period	: 6 months

### *Scope of Sanctioned Funding:*

Health Supplements for Cancer Patients. Access to a wealth of information on the internet has led many cancer patients to use complementary methods as an adjunct to traditional therapy for cancer, with, and more often, without informing their primary caregiver. Of the common complementary modalities, the use of dietary supplements appears to be highly prevalent in patients in active treatment for cancer, and later in cancer survivors. Some plant-based agents may, indeed, impact late-stage cancer, influencing molecular processes corrupted by tumor cells to evade detection, expand clonally, and invade surrounding tissues.

# 7

## Design and Development of Electronic Planter

Grantee	: Mr.K.Muthukumarvel
Funding agency	: TNSCST-SPS
Amount	: Rs.7,500/-
Period	: 6 months

### *Scope of Sanctioned Funding:*

Gardening is an activity that requires fully care and time which two main factors of nowadays people lack of due to fast moving daily lifestyle. Growing a plant requires a person to monitor several parameters such as water, oxygen, nutrient, light, temperature and support for the plant. In conjunction to overcome the lack of commitment for the people to enjoy their hobby in gardening, an automatic plant pot is introduced. This Project explores the plant growth which later will be used as the criteria to design and develop a prototype of automatic plant pot. Three outstanding elements were used as the main criteria to design a prototype of automatic plan pot which are water, nitrogen and temperature. These three elements need to be fully automated control to meet the objective that this prototype can help people to do gardening with less care and attention.

## Studies on Development of cost Effective moving Bed Biofilm Technology for Controlling and Treatment of Tannery Effluent odour

Grantee	: Dr.M.Kirupa Sankar
Funding agency	: TNSCST-SPS
Amount	: Rs.7,500/-
Period	: 6 months

### *Scope of sanctioned funding:*

Cost effective biofilm bed can be allotted in tannery industries at it's effluent tanks to control the odor. The increase in the generation of wastewater along with the presence of different recalcitrant pollutants has stressed the existing conventional biological treatment systems beyond capacity. Given the necessity of advanced biological treatment processes, moving bed biofilm reactor (MBBR) is preferred for treating high organic and nutrient load and recalcitrant contaminants with enhanced removal efficiency, less footprint, reduced operational difficulties, and increased technical feasibility for large-scale as well as package-based-unit implementation. The influencing design and operational parameters, such as hydraulic retention time, filling ratio of carriers and wastewater in the reactor, aeration, biofilm thickness, etc., have significant effects on the performance of MBBR.

## Sustainability of Natural Aggregates by utilizing CDW in Concrete

Grantee	: Mr.B.Jeyanth
Funding agency	: TNSCST-SPS
Amount	: Rs.7,500/-
Period	: 6 months

### *Scope of sanctioned funding:*

Waste materials can be reused in concrete which would reduce the issues of solid waste management and construction cost. A new innovative sustainable material will be developed. Concrete is a composite material with cement, fine and coarse aggregate which is well known for its strength and durability. The rapid growth in urbanisation and industrialisation increases its consumption to a huge quantity. Since natural aggregate occupies more than 70% of volume, any rise in use of concrete will intensify its quantity consumed. All over the world every year about 40 billion tons of aggregate is produced in which india contributes 13%. Further, the increase in concrete consumption makes the concrete into a most non-sustainable material due to maximum consumption of natural resources. The generation of source of natural aggregate requires thousands of years. The rate of generation of natural aggregate is very much smaller compared to its present rate consumption which leads to depletion of natural resource.

# 10

## Development of Emergency Braking Mechanism in Heavy Vehicles

Grantee	: Mr.S.Deepankumar
Funding agency	: TNSCST
Amount	: Rs.7,500/-
Period	: 6 months

### *Scope of sanctioned funding:*

Development of Emergency Braking Mechanism in Heavy Vehicles. Rear-end collisions in heavy traffic or at the tail ends of traffic jams are usually the consequence of inattentiveness or driver error. The advanced emergency braking (AEB) detects critical proximity to a vehicle in front, warns the driver of an impending collision, and provides assistance with braking. However, the driver must continue to drive attentively and considerately at all times. The front radar sensor from Bosch can not only enable this function, but can also more than satisfy the legal requirements. If the AEB system detects critical proximity to a stationary or moving vehicle ahead, it prepares the braking system for the possibility of an emergency stop.
