Salient Features of Autonomous System

The Bannari Amman Institute of Technology (BIT) has been conferred with the Autonomous Status by the University Grants Commission, New Delhi, with effect from the academic year 2007-2008 , subsequently extended up to 2019-2020. Under this system, the Institution has a great deal of freedom to design and deliver outcome-based curriculum to suit the needs of students as well as requirements of the other stakeholders.

Salient features of the Autonomous System of BIT are:

- BIT adopts Choice Based Credit System (CBCS) with Outcome Based Education (OBE) as per the guidelines of the UGC, NBA and Anna University.

- Choice Based Credit System enables the students to acquire Knowledge, Skills and Attitude (KSA) and learn the courses at one's own pace as prescribed in the regulations and curriculum.

- Fast Track System enables the students to undergo a semester- long Internship or Special Training.

- Board of Studies in each discipline of study has representation from members of facuty of Department, University, Industry, Students, Alumni and Research Organizations. Board facilitates the innovative curriculum, on par with other higher education institutions, with well-defined Programme Educational Objectives (PEOs), Programme Outcomes (POs) and Assessment Methods.

- Core electives, Open electives, One-credit courses, Online courses, Value-added courses/ Add-on courses, Self-study electives, Life skills, Mini-project,Personality Development Modules Layer-learning or learning-by-doing, Technical seminar and Summer / Winter Internships are some of the features of the Autonomous Curriculum.

- Science Electives, Language Electives, Mathematics Electives, Entrepreneurship Electives, SAP (Systems, Applications and Products in Data Processing) Electives and Electives on Management topics are some more unique features of the Autonomous System.

- Two dimensional approach (cognitive and knowledge domains) is followed in the classroom delivery and evaluation with learner-centric approach.

- Evaluation process, under the Autonomous System, includes continuous assessment in the form of quiz, online tests, surprise tests, library based assignments, open book tests, term papers, seminar presentations and field study.

- Announcement of results within a week after the last examination, supplementary examinations and special supplementary examinations are conducted before the commencement of succeeding Semester.

- Periodic feedback through structured rubrics is also obtained on all the taught courses for academic improvement.

- To train students in the area of enterprise application developments, mobile apps development and cloud technologies
- To conduct research on open source firewall technologies to provide security solutions
- To conduct research in open stack platform and establishing BIT private cloud

Transport Facility

The Institution has 26 buses for the benefit of the day scholars and the members of the faculty commuting from within a radical distance of 100 kms to the Institute on all working days. The bus facilities are utilised for local visits and educational trips. Besides, one 14-seater van (air-conditioned), 10 LCVs are also available to bring the experts for guest lectures.

Training and Placement

The college emphasizes on appropriate training throughout the academic career of the students and effective placement at the end of the programme. Life skill courses (Quantitative Aptitude, Verbal Aptitude and Technical) are offered as a part of curriculum to all the students. External vendors are also engaged for such purposes. The Training and Placement (T&P) Cell has a full-time Placement Officer, Industrial Relations Officer, Assistant Placement Officer, five Aptitude trainers, five Verbal trainers and two Technical trainers. The T&P Cell is equipped with seminar halls, rooms for conducting group discussion and interview process.The T&P Cell maintains a comprehensive database of the students ready for campus interview and organizes placements through on-campus as well as off-campus processes.

Yoga

BIT offers Diploma in Yoga to all first year B.E/B.Tech students from World Community Service Centre, Aliyar. It helps them physically be fit and more focused on studies. They are able to commune with people very easily understanding self and others. In today's scenario, social skill is one of the most important employability skills. Advanced yoga is offered as one credit course in the second year by which students acquire self-confidence to face critical challenges in life.

AWARDS

A number of awards have been instituted in order to promote and foster excellence in academic, Co-curricular and Extra Curricular activities among our students. The following awards are instituted by various patrons for the best academic performance.

Graduate Attributes

Graduates of higher education programs are expected to have certain identified technical/functional, generic and managerial competencies. The Graduate Attributes of Engineering Programs as identified by NBA (National Board of Accreditation) are

1. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. **Problem Analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. **Conduct Investigations of Complex Problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice

9. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in broadest context of technological change.
