## **BANNARI AMMAN INSTITUTE OF TECHNOLOGY**

An Autonomous Institution Affiliated to Anna University – Chennai • Approved by AICTE • Accredited by NAAC with “A+” Grade

**SATHYAMANGALAM - 638401 ERODE DISTRICT TAMILNADU INDIA**

Ph : 04295-226000/221289 Fax : 04295-226666 E-mail : stayahead@bitsathy.ac.in Web : www.bitsathy.ac.in

### **VISION OF THE SCHOOL OF MANAGEMENT STUDIES**

- To be a Centre of Excellence for developing corporate leaders who make a difference in the globally competitive market through their professional competence blended with due social concern and a high value system.

### **MISSION OF THE SCHOOL OF MANAGEMENT STUDIES**

- To offer quality management education through appropriate pedagogy.
- To equip students with strong analytical foundations for better decision making in a challenging environment.
- To expose the students to international business practices through collaborations.

### **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

- I** Graduates are bestowed with managerial, problem solving and decision-making skills applying appropriate management concepts, practices, and theories to handle business problems and challenges.
- II** Acquire competitive edge with strong analytical skills, research acumen and the ability to apply the right management research tools to arrive at objective solutions for functional managerial situations.
- III** Competence in contemporary business practices in the global scenarios enabling to take up managerial and entrepreneurial roles demanding the application of managerial skills in a global and cross- cultural scenario.
- IV** Exhibit an ideal situational leadership style entwined by values, ethics, societal concern and imbedding inquisitiveness for continuous learning.

### **GRADUATE ATTRIBUTES**

1. Profound Domain Knowledge
2. Research Competency
3. Critical, Creative and Innovative Thinking
4. Problem Solving
5. Effective Communication
6. Teamwork and Leadership
7. Cross Cultural and Global Adaptability
8. Societal Concern and Ethics
9. Entrepreneurship

### **PROGRAM OUTCOMES**

PO1: Apply knowledge of management theories and practices to solve business problems.

PO2: Foster Analytical and critical thinking abilities for data-based decision making.

PO3: Ability to develop Value based Leadership ability.

PO4: Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.

PO5: Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.

### **PROGRAM SPECIFIC OUTCOMES**

PSO1: Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.

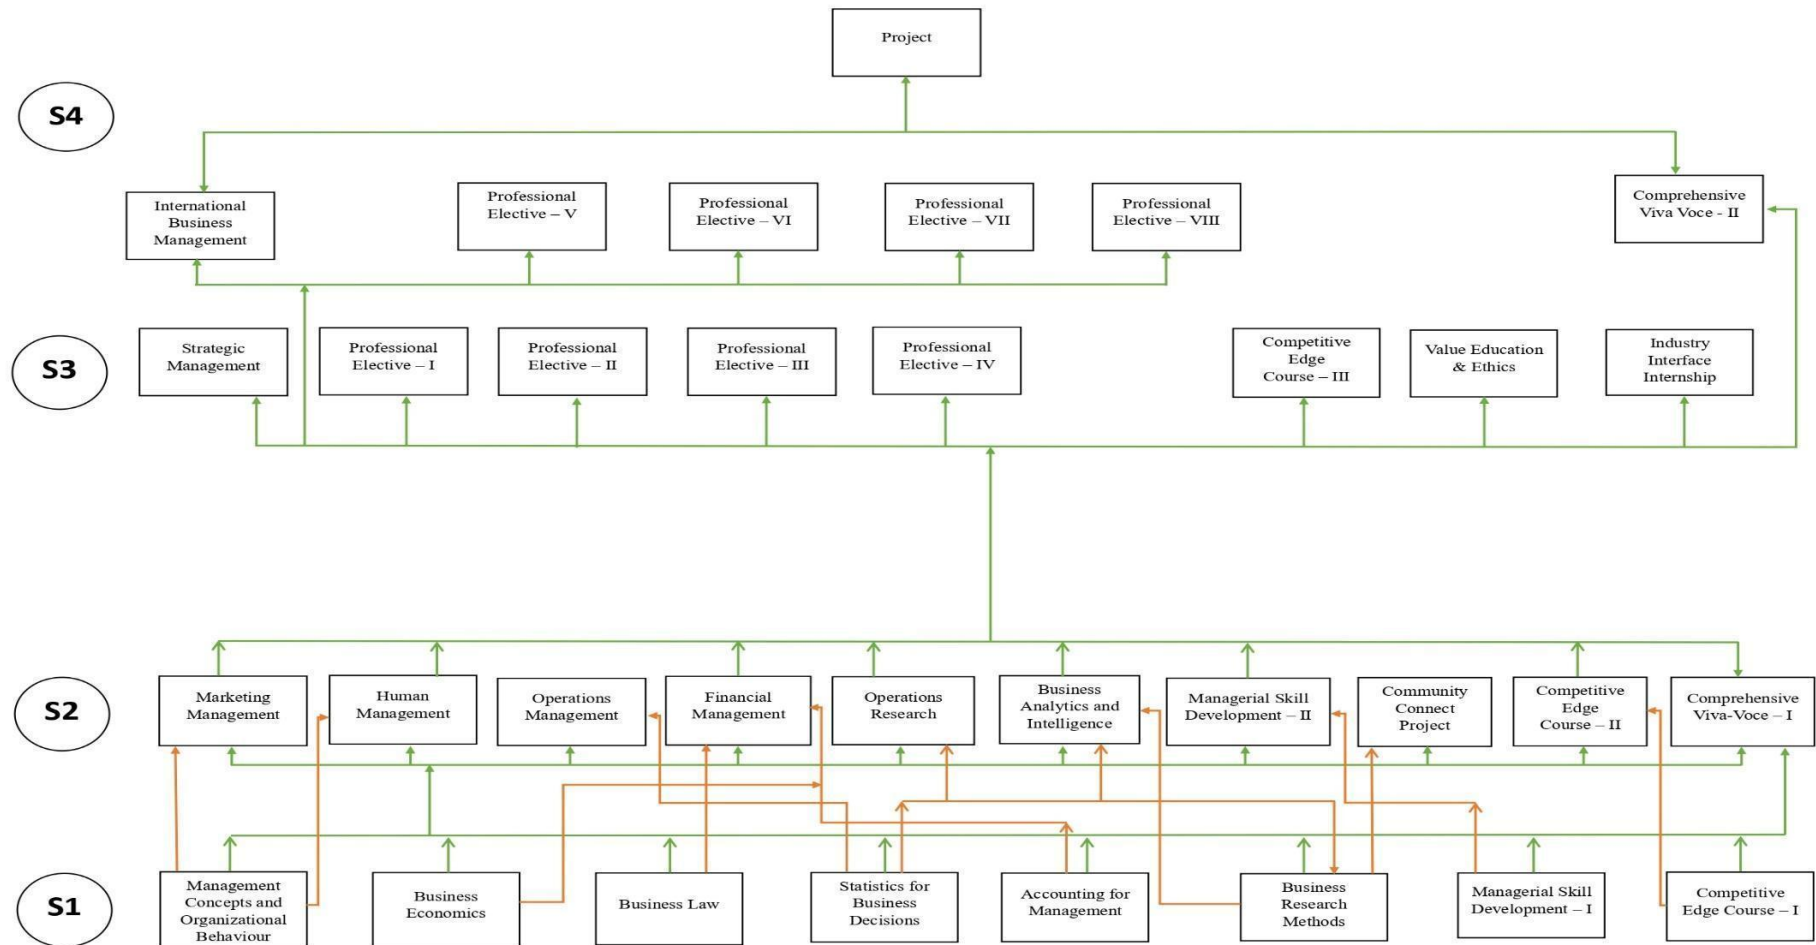

PSO2: Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment

### **RECOMMENDED LIST OF NPTEL COURSES**

1. AI in Marketing
2. Artificial Intelligence (AI) for Investments
3. Leadership for India Inc: Practical Concepts and Constructs
4. Talent Acquisition and Management
5. Multivariate Procedures with R
6. Marketing Research and Analysis-II
7. E-Business
8. Trainer of Trainers
9. Advanced Business Decision Support System
10. Business to Business Marketing (B2B)
11. Data Analysis & Decision Making – III
12. Designing Work Organization
13. Human Factors Engineering
14. Organizational Behaviour - II
15. Quantitative Investment Management
16. Management Information System
17. Operations and Supply Chain Management
18. Emotional Intelligence and Effective Change Management
19. Labour Economics - Theory and Practice
20. From Theory to Practice: Implementing ESG and Sustainability in Business

## FIRST SEMESTER

24MB101	Management Concepts and Organizational Behaviour		L	T	P	C		
			3	1	0	4		
Pre-requisite			Assessment Pattern					
<ul style="list-style-type: none"><li>Understanding the need for Management</li></ul>			Mode of Assessment		Weightage (%)			
			Continuous Assessment		40			
			Semester End Examinations		60			
Course Objectives								
<ul style="list-style-type: none"><li>To provide insights on the fundamental concepts and theories of management.</li><li>To acquaint with the concepts required to manage individual behaviour in work settings.</li><li>To give inputs on how an individual's behaviour is influenced by a group.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO3	Ability to develop Value based Leadership ability.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
Course Outcomes (COs)								
The students will be able to:								
CO1	Demonstrate an understanding of the planning and organizing functions of management, including their types, processes, and techniques; and analyze various decision-making models to apply appropriate strategies in managerial scenarios							
CO2	Differentiate the core concepts of planning and organizing in management, and analyze decision-making processes using techniques such as SWOT analysis, cost-benefit analysis, and decision trees to solve managerial problems.							
CO3	Outline the key concepts of organizational behaviour and analyze the influence of personality, values, beliefs, and attitudes on workplace behaviour.							
CO4	Apply motivation theories such as Maslow’s Hierarchy of Needs and the perception process to develop strategies that enhance employee job performance and improve workplace dynamics.							
CO5	Select and apply appropriate conflict resolution strategies includes collaboration, compromise, and negotiation to effectively manage interpersonal conflicts and enhance group performance							
Articulation Matrix								
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO 1		3					2	
CO 2			3				2	
CO 3				2		3		
CO 4		2		2		2		
CO 5			2			3	2	

<b>UNIT I</b>	<b>INTRODUCTION TO MANAGEMENT</b>	<b>8 Hours</b>
Management: Meaning, Levels, Evolution – Management Theories – Manager: Roles, Functions, Skills, Changing Role of a Manager. <b>Gamification for experiential learning:</b> <ul style="list-style-type: none"> <li>Functions of Management – A game “Play with Cards” to learn about the functions of management.</li> <li>Roles of a Manager – The “Fast and Furious” activity to explore the roles of a manager.</li> </ul>		

<b>UNIT II</b>	<b>FUNCTIONS OF MANAGEMENT</b>	<b>8 Hours</b>
Planning: Importance, Types, Steps, Management by Objectives (MBO) – Organizing: Organizational Structure, Types, Span of Control – Decision Making: Process, Types of Decisions, Techniques. <b>Gamification for experiential learning:</b> <ul style="list-style-type: none"> <li>Planning – The “Fish and Fisherman” activity to learn the planning process.</li> <li>Decision Making – The “Balance Yourself” activity to grasp the intricacies of decision making.</li> </ul>		
<b>UNIT III</b>	<b>MANAGING INDIVIDUAL BEHAVIOUR</b>	<b>8 Hours</b>
Organizational Behaviour: Meaning, Importance – Personality: Types, Traits, Determinants – Values – Beliefs – Attitude: Components, Functions, Types (Job Related Attitudes). <b>Gamification for Experiential Learning:</b> <ul style="list-style-type: none"> <li>Personality – “Burst Your Anger” activity for identifying the one’s personality</li> <li>Attitude – Activity for understanding about attitude and realizing the importance of positive attitude.</li> </ul>		
<b>UNIT IV</b>	<b>MOTIVATION, PERCEPTION &amp; LEADERSHIP</b>	<b>8 Hours</b>
Motivation: Meaning, Theories, Motivation and Job Performance – Perception: Meaning, Importance, Process, Managing Perceptions – Leadership: Meaning, Traits, Styles & Leadership Theories. <b>Gamification for Experiential Learning:</b> <ul style="list-style-type: none"> <li>Motivation – “Sacrifice Game” activity aimed to enhance motivation among team members.</li> <li>Leadership – “Blind Fall Activity” designed to bring out leadership qualities of the participants.</li> </ul>		
<b>UNIT V</b>	<b>MANAGING GROUP BEHAVIOUR</b>	<b>8 Hours</b>
Groups: Types, Stages in formation, Group Dynamics, Group Cohesiveness – Conflict: Meaning, Sources, Types, Resolution Techniques – Introduction to Organizational Culture – Change Management: Types, Process. <b>Gamification for Experiential Learning:</b> <ul style="list-style-type: none"> <li>Performing in Groups – An activity “Fill the Empty” to unveil the importance of group cohesiveness for enhanced performance.</li> <li>Change Management – “Board Game” to experience the nuances of change management in varied situations.</li> </ul>		
<b>Suggested Self-Study Topics:</b> Line vs. Staff authority, Centralization vs. Decentralization in organizational structure, Strong vs. Weak organizational culture, John Holland’s Theory of career choice, Emotions, Felt vs. Expressed emotions, Classical conditioning, Operant conditioning, Group Thinking		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

<b>UNIT I</b>	<b>INTRODUCTION TO BUSINESS ECONOMICS</b>	<b>4 Hours</b>
Nature and Scope of Business Economics, Macro and Microeconomics, Basic problems of an Economy, Organization and Economy – Objectives of business, Production Possibility Curve, Production and Cost analysis Opportunity Cost principle, Economics of Information.		
<b>UNIT II</b>	<b>CONCEPT OF DEMAND AND SUPPLY</b>	<b>6 Hours</b>
Different Concepts of Demand, Demand Curve, Determinants of Demand, Law of Demand, Demand Forecasting Methods, Market Equilibrium, and Concepts of Elasticity. Concept of Supply, Supply Curve, Conditions of Supply, Elasticity of Supply, Economies of Scale.		
<b>UNIT III</b>	<b>MARKET STRUCTURE</b>	<b>6 Hours</b>
Perfect Competition, Monopoly, Sources of Monopoly Power, Monopolistic Competition, Oligopoly, Oligopolistic Market, Price rigidity, Cartels and Price Leadership Models, Economic Inefficiency, Price Determination Under Perfect Competition, Monopolistic Competition and Monopoly.		
<b>UNIT IV</b>	<b>MACRO-ECONOMIC INDICATORS</b>	<b>6 Hours</b>
Price Indices, Inflation-Types of inflation, Deflation, Business Cycle and Stabilization Policies, Monetary and Fiscal Policy, National Income and its Components- GNP, NNP, GDP, NDP, Tax Regime.		
<b>UNIT V</b>	<b>INTRODUCTION TO BEHAVIOURAL ECONOMICS</b>	<b>8 Hours</b>
Origins of Behavioural Economics, Nature of Behavioural Economics, Principles of Behavioural Economics- Loss Aversion, Anchoring, Nudging, Discounting, Social Proof, Decision Fatigue.		
<b>Suggested Self-Study Topics:</b> Utility Analysis, Barometric Indicators, Price Discrimination, Economical aspects of taxation, Self-evaluation and projection bias.		
<b>Total</b>		<b>30 Hours</b>

24MB103	Business Law				L	T	P	C	
					3	0	0	3	
Pre-requisite					Assessment Pattern				
<ul style="list-style-type: none"><li>Basics in Business Administration and Economics.</li></ul>					Mode of Assessment		Weightage (%)		
					Continuous Assessment		40		
					Semester End Examinations		60		
Course Objectives									
<ul style="list-style-type: none"><li>To instil in students an awareness of the legal framework of a Contract.</li><li>To understand the basics of special contracts and Sale of Goods Act.</li><li>To gain an insight into Negotiable Instruments Act and Companies Act.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth								
Course Outcomes (COs)									
The students will be able to									
CO1	Apply fundamental legal principles to analyze the formation, execution, and enforcement of contracts in a business context.								
CO2	Analyze the legal framework governing special contracts, partnerships, and cyber law to evaluate their implications in business operations and decision-making.								
CO3	Understand and apply the legal provisions related to the sale of goods and consumer protection to analyze the rights, duties, and remedies of parties involved in commercial transactions.								
CO4	Identify and describe the features of negotiable instruments such as promissory notes, cheques, and bills of exchange, including their types and methods of negotiation.								
CO5	Identify and explain the nature, types, and formation of companies, along with key documents like Memorandum and Articles of Association, and the roles and powers of the Board of Directors.

24MB104	Statistics for Business Decisions				L	T	P	C	
					3	1	0	4	
Pre-requisite					Assessment Pattern				
<ul style="list-style-type: none"><li>Basics of Statistics or Business Mathematics</li><li>Analytical skills</li></ul>					Mode of Assessment		Weightage (%)		
					Continuous Assessment		40		
					Semester End Examinations		60		
Course Objectives									
<ul style="list-style-type: none"><li>To enable the students to have an insight into basic statistical techniques.</li><li>To gain an understanding about hypothesis testing, using tools such as Z test, F test, ANOVA, chi-square tests, regression &amp; correlation analysis, and non-parametric tests.</li><li>To enable the students to draw conclusions from the analysis for better decision making.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems.								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth								
Course Outcomes (COs)									
The students will be able to									
CO1	Compute and interpret measures of central tendency, position, and variability for statistical data analysis.								
CO2	Apply probability rules and concepts, including Bayes’ theorem and decision trees, to solve business-related problems								
CO3	Analyze relationships between variables using correlation, covariance, and simple linear regression techniques to make informed business decisions based on data insights								
CO4	Apply concepts of probability distributions, estimation, and hypothesis testing, including Z-test, t-test, and ANOVA, to analyze business data and support decision-making under uncertainty								
CO5	Apply non-parametric statistical tests such as Chi-Square, Mann-Whitney U, Wilcoxon Signed-Rank, Kruskal-Wallis, and Friedman tests to analyze categorical and ordinal data for informed business decisions								
Articulation Matrix

	CO 3		2		1		2		
	CO 4		3		2		1		
	CO 5		2		3		1		
UNIT I		DESCRIPTIVE STATISTICS						8 Hours	
Introduction to Statistics, Measures of Central Tendency - Mean, Median, Mode, Weighted Mean, Geometric Mean, Harmonic Mean, Measures of Position – Percentiles, Quartiles, Decile. Measures of Variability- Range, Inter-Quartile Range, Variance, Standard Deviation, Coefficient of Variation.									
UNIT II		EXPERIMENTS AND SAMPLE SPACE						7 Hours	
Basic Probability concepts –Events and Sample Spaces, Contingency Tables and Venn diagrams, Simple Probability, Joint Probability, Marginal Probability, General Additional Rule, Conditional Probability – Computing Conditional Probabilities, Independence, Multiplication rules, Bayes theorem.									

<b>UNIT III</b>	<b>COVARIANCE, CORRELATION AND REGRESSION</b>	<b>8 Hours</b>
Dependent vs. Independent Variables, Covariance, Correlation Coefficient (Pearson and Spearman's Rank Correlation), Simple Linear Regression.		
<b>UNIT IV</b>	<b>DISTRIBUTION, ESTIMATION &amp; PARAMETRIC TESTS</b>	<b>9 Hours</b>
Distribution – Probability Distribution, Normal Distribution. Point Estimates, Interval Estimates and Confidence Intervals. Hypothesis Testing, Level of Significance, Type I, Type II Error, Z- Test, t-test (One Sample and Two Sample) and ANOVA (One Way) – Basic computation.		
<b>UNIT V</b>	<b>NON-PARAMETRIC TESTS</b>	<b>8 Hours</b>
Chi-Square Test, Mann-Whitney U Test/Wilcoxon Rank Sum Test, Wilcoxon Rank Signed Test and Kruskal-Wallis Test, Friedman Test.		
<b>Suggested Self-Study Topics</b>		
Counting Rules, Binomial Distribution, Poisson distribution, Rectangular distribution, Triangular distribution		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

					Semester End Examinations	60		
Course Objectives								
<ul style="list-style-type: none"><li>To acquaint the students with the fundamental principles of accounting.</li><li>To enable the students to read and understand financial statements.</li><li>To enhance the knowledge of students in costing, budgeting and decision making.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Demonstrate understanding of fundamental processes such as journalizing, ledger posting, trial balance, depreciation to prepare financial statements.							
CO2	Analyze and interpret financial statements using tools like comparative statements, ratio analysis, and cash/fund flow statements to evaluate the financial health and performance of an organization.							
CO3	Apply cost accounting principles to prepare cost sheets, allocate costs, and analyze activity-based costing for effective cost management.							
CO4	Analyze and prepare various budgets including cash budgets, functional budgets, and flexible budgets for effective budgetary control.							
CO5	Apply cost-volume-profit relationships and break-even analysis to support managerial decision-making using marginal costing techniques.							
Articulation Matrix								
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	
CO 1	1	2				2		
CO 2		3		2			1	
CO 3		2				2		
CO 4		2			2	2		
CO 5		3			2			

<b>UNIT I</b>	<b>INTRODUCTION TO FINANCIAL ACCOUNTING</b>	<b>8 Hours</b>
Introduction, Meaning, Branches and Objectives of Accounting, Concepts and Conventions of Accounting, An Overview of Journal, Ledger and Trial Balance, Depreciation Accounting, Preparation of financial statements, Financial reporting (IGAAP and IFRS)		
<b>UNIT II</b>	<b>FINANCIAL STATEMENT ANALYSIS</b>	<b>8 Hours</b>
Financial Statements, Characteristics, Limitations, Methodical Classification, Analysis of financial statements with managerial perspective: Comparative Balance Sheet, Common Size Statement, Ratio Analysis, Trend Analysis, Fund Flow Statement and Cash Flow Statement (Basic problems)		
<b>UNIT III</b>	<b>COST ACCOUNTING</b>	<b>8 Hours</b>
Cost Accounting, Meaning & Objectives, Classification & Elements of Costs, Cost Concepts, Preparation of Cost Sheet, Apportionment of Cost, An Overview of Activity Based Costing.		
<b>UNIT IV</b>	<b>BUDGET AND BUDGETARY CONTROL</b>	<b>8 Hours</b>
Budget and Budgetary Control, Cash Budget, Functional Budgets and Flexible Budget.		
<b>UNIT V</b>	<b>CVP AND ALTERNATIVE BUSINESS DECISIONS</b>	<b>8 Hours</b>
Cost Volume Profit Analysis, Break Even Analysis, Application of Marginal Costing Techniques in Managerial Decision Making.		
<b>Suggested Self-Study Topics</b>		
Ind AS (Indian Accounting Standards), Recent Developments in Management Accounting, Inventory Valuation Methods - FIFO, LIFO, Average Cost Method, Zero based budgeting, Multi product firm and BEP.		
		<b>Theory</b>
		<b>30 Hours</b>
		<b>Tutorial</b>
		<b>10 Hours</b>
		<b>Total</b>
		<b>40 Hours</b>

					3	0	2	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Basic of Statistics</li></ul>					Mode of Assessment		Weightage (%)	
					Continuous Assessment		50	
					Semester End Examinations		50	
Course Objectives								
<ul style="list-style-type: none"><li>To develop the research orientation among the students and to acquaint them with fundamentals of research methods.</li><li>To introduce the students to the basic concepts used in research and to scientific social research methods and their approach.</li><li>To develop the skills for preparing research-based business reports.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to:								
CO1	Apply key concepts of business research and design exploratory, descriptive, and causal studies to address practical business problems.							
CO2	Design and evaluate measurement scales and questionnaires by applying principles of validity and reliability to collect accurate business data for decision-making							
CO3	Apply appropriate sampling techniques, determine sample size, and develop and test hypotheses using relevant data collection methods to support data-driven business decisions.							
CO4	Prepare and process data through editing, coding, and entry, and apply appropriate statistical tools within a theoretical framework to analyze and interpret business data.							
CO5	Create structured research reports using appropriate formats, summaries, and software tools to effectively communicate research findings for informed business decision-making.							
Articulation Matrix

UNIT I	INTRODUCTION							7 Hours
Business Research: Concepts, Process, Literature Review, Variable types, Hypothesis, Types of Research, Characteristics of Good research. Research Design- Exploratory, Descriptive and Causal Research Design.								
UNIT II	SCALING AND MEASUREMENT							6 Hours

Measurement and Scaling- Different Scales, Scaling Techniques. Data Collection Tools, Guidelines for Questionnaire Design, Construction of questionnaire. Pilot Testing. Validity and Reliability Testing.		
UNIT III	SAMPLING DESIGN AND DATA COLLECTION	6 Hours
Sampling Design – Population, Sample Unit, Sample Size, Sampling Frame, Sampling Techniques. Primary and Secondary Sources of Data. Formulation of Hypothesis, Interviews and Observation.		
UNIT IV	DATA PREPARATION AND ANALYSIS	6 Hours
Data Preparation- Editing, Coding, Data Entry. Tests of Significance. Parametric and Non-Parametric Tests, Univariate, Bivariate and Multivariate Statistical Techniques. Usage of statistical tool SPSS for Data analysis.		
UNIT V	REPORT PREPARATION	5 Hours
Techniques of Interpretation. Report writing – Steps, Layout, Types. Oral presentation. Executive Summary. Norms for using Tables, Charts, Diagrams, Index, Bibliography. Research Ethics. Plagiarism. Tools for Report writing.		
Suggested Self-Study Topics		
Cross-Sectional and Longitudinal Studies, Qualitative Research, Post Facto Research, Format for Journal publication.		
List of Laboratory Experiments		
Experiment 1		2 Hours
Transcribing data in SPSS		
Experiment 2		2 Hours
Exploring Data – Histogram, Box and Whisker Plot, Scatter Plot		
Experiment 3		2 Hours
Descriptive Statistics		
Experiment 4		2 Hours
Checking for Reliability, Normality and Homogeneity of Variance		
Experiment 5		2 Hours
Conducting Factor Analysis		
Experiment 6		2 Hours
Conducting Non-Parametric Tests		
Experiment 7		2 Hours
Conducting Parametric Tests		
Experiment 8		2 Hours
Conducting Discriminant Analysis		
Experiment 9		2 Hours
Correlation and Regression		
Experiment 10		2 Hours
Conducting Cluster Analysis		
Laboratory		20 Hours
Theory		30 Hours
Total		50 Hours

## SECOND SEMESTER

24MB201	Marketing Management		L	T	P	C		
			3	0	0	3		
Pre-requisites			Assessment Pattern					
<ul style="list-style-type: none"><li>Management Principles</li><li>Business Environment</li></ul>			Mode of Assessment		Weightage (%)			
			Continuous Assessment		40			
			Semester End Examinations		60			
Course Objectives								
<ul style="list-style-type: none"><li>To provide insights on the basic concepts of marketing and the various marketing environment factors that impact formulation of marketing strategies.</li><li>To disseminate clear understanding about STP in marketing and dynamics of consumer behaviour.</li><li>To facilitate understanding about the element of marketing mix and the adoption of contemporary marketing practices.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.							
Course Outcomes (COs)								
The students will be able to								
CO1	Analyze core marketing concepts and philosophies, evaluate the impact of the marketing environment, and design effective marketing mix strategies to achieve organizational goals.							
CO2	Analyze market segments, formulate targeting strategies, and design positioning approaches by evaluating buyer behavior to optimize marketing outcomes.							
CO3	Evaluate product strategies across the product life cycle, design pricing and channel approaches, and develop integrated promotional plans to maximize market impact.							
CO4	Analyze branding fundamentals, formulate strategic brand name and positioning decisions, and evaluate the concepts of brand love and love marks to build strong emotional connections with consumers.							
CO5	Analyze and apply digital marketing strategies—including social media marketing, neuromarketing, inbound and outbound techniques—and evaluate marketing analytics and information systems to enhance decision-making and campaign effectiveness.

CO 5	3			3		1														

<b>UNIT I</b>	<b>INTRODUCTION</b>	<b>6 Hours</b>
HRM-Nature, Scope, Definition, Objectives and Functions of HRM, Models of HRM, HR policies, HRM in the changing environment, Role of AI in HRM.		
<b>UNIT II</b>	<b>STAFFING</b>	<b>6 Hours</b>
Human Resource Planning, Job Analysis, Job Description, Job Specification, Job Design, Recruitment, Selection, Induction, Placement.		
<b>UNIT III</b>	<b>LEARNING AND DEVELOPMENT</b>	<b>6 Hours</b>
Training and Development, Principles of Learning, Objectives, Training need Analysis, Training calendar, Training Methods, Training evaluation, Management Development: Meaning, Scope, Objectives and Methods.		
<b>UNIT IV</b>	<b>PERFORMANCE MANAGEMENT</b>	<b>6 Hours</b>
Performance Appraisal: Introduction, Identification of issues in performance appraisal, Uses and limitations of Performance Appraisal, Methods of appraisal. Performance Management, Career Management, Grievances Redressal.		
<b>UNIT V</b>	<b>COMPENSATION MANAGEMENT</b>	<b>6 Hours</b>
Compensation – Concepts and Principles, Influencing Factors, Current Trends in Compensation – Methods of Payment – Incentives and Rewards. Job Evaluation-Concepts and Methods.		
<b>Suggested Self-Study Topics</b> IHRM, HRIS, e-Learning, Changing roles of HR during the transition from Local to Global, Competencies required for International Managers.		
<b>Total</b>		<b>30 Hours</b>

24MB203	Operations Management				L	T	P	C	
					3	1	0	4	
Pre-requisites					Assessment Pattern				
<ul style="list-style-type: none"><li>Management Principles</li><li>Basics of Statistics</li></ul>					Mode of Assessment		Weightage (%)		
					Continuous Assessment		40		
					Semester End Examinations		60		
Course Objectives									
<ul style="list-style-type: none"><li>To acquaint with production terminology and concepts.</li><li>To enable the students to comprehend the important aspects like production system, layout, production planning and inventory management.</li><li>To enable the students to evaluate the utility of work measurement techniques.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems.								
PO2	Foster Analytical and critical thinking abilities for data-based decision making								
PO3	Ability to develop Value based Leadership ability.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.								
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment.								
Course Outcomes (COs)									
The students will be able to									
CO1	Evaluate different production systems and apply line balancing techniques to optimize operational efficiency in varied business contexts.								
CO2	Design facility layouts and justify location decisions to enhance workflow and reduce operational costs in manufacturing and service sectors.								
CO3	Formulate aggregate and capacity planning strategies using MRP tools to align production schedules with fluctuating customer demands.								
CO4	Apply inventory control models and techniques like EOQ, ABC, and JIT to minimize stockouts and optimize inventory levels.								
CO5	Develop lean operations by implementing time study methods and waste-reduction tools such as 5S, KAIZEN, and KANBAN.								
Articulation Matrix									
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2

UNIT I	INTRODUCTION							8 Hours	
Production Management: Evolution and Functions of Production Management. Production Systems: Job, Batch, Mass, Continuous Flow, Group technology, Line Balancing (Problems).									
UNIT II	PRODUCTION LOCATION AND LAYOUT							9 Hours	
Location Decision: Factors Affecting Location Decision. Facility Layout: Product, Process Layout, Cellular Layout, Fixed Position Layout. Operation Layout for service industries.									

<b>UNIT III</b>	<b>PROCESS PLANNING IN PRODUCTION AND SERVICE</b>	<b>7 Hours</b>
Process Planning: Characteristics and Functions, Capacity Requirement Planning: Methodology Aggregate planning: Methodology. Master Production Schedule, Material Requirement Planning. Manufacturing Resource Planning (MRP) II. Managing capacity and demand in service, Service supply relationship, GANTT Chart.		
<b>UNIT IV</b>	<b>INVENTORY MANAGEMENT</b>	<b>8 Hours</b>
Independent Demand model: Economic Order Quantity (EOQ) Model (Problems). Types of Inventory control - P System, Q System, and Techniques of Inventory control: ABC Analysis (Problems), Just in Time (JIT), KANBAN.		
<b>UNIT V</b>	<b>WORK MEASUREMENT TECHNIQUES AND LEAN MANUFACTURING</b>	<b>8 Hours</b>
Work Measurement Techniques: Time Study, Method Study, Time Measurement (MTM), Work Sampling (Problems), Lean Manufacturing: 7 Wastes, KAIZEN, 5S.		
<b>Suggested Self-Study Topics</b> Cellular manufacturing, Centre of gravity model, Product tree, Andons and Motion study.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>

24MB204	Financial Management				L	T	P	C
					3	0	2	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Management Principles</li><li>Knowledge in Financial and Management Accounting</li></ul>					Mode of Assessment	Weightage (%)		
					Continuous Assessment	50		
					Semester End Examinations	50		
Course Objectives								
<ul style="list-style-type: none"><li>To understand the fundamentals of Financial Management.</li><li>To impart the skills on Investment, Financing and Dividend decisions.</li><li>To estimate the requirements of working capital of an organization.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.							
Course Outcomes (COs)								
The students will be able to:								
CO1	Analyze the fundamental functions and goals of financial management, evaluate the role of the finance manager, and apply key concepts such as Time Value of Money and financial planning processes to make informed financing decisions within dynamic business environments.							
CO2	Evaluate the principles and nature of capital budgeting and apply various investment appraisal techniques such as Payback Period, Discounted Payback, ARR, NPV, IRR, and Profitability Index to make sound capital investment decisions under constraints like capital rationing.							
CO3	Analyze the concept and measurement of cost of capital, evaluate specific and overall costs, and assess factors influencing capital structure including operating, financial, and combined leverage to optimize financial decision-making.							
CO4	Evaluate various dividend policies and theories, analyze the determinants influencing dividend decisions, and differentiate between different forms of dividends to formulate effective dividend strategies.							
CO5	Analyze the principles and determinants of working capital, evaluate the operating cycle, estimate working capital to maintain financial stability, ensure liquidity, and improve the efficiency of day-to-day operations in an organization.							
Articulation Matrix

UNIT I	FUNDAMENTALS OF FINANCIAL MANAGEMENT						6 Hours	
Introduction: Evolution of Financial Management, Goals / Objectives of Financial Management, Financial Management Decisions, Forms of Business Organizations. Time Value of Money: Present Value and Future Value Concepts for different cashflow streams.								

UNIT II	INVESTMENT DECISIONS	6 Hours
Capital Budgeting: Process, Project Classification – Discounted Cash flow Techniques: Net Present Value, Internal Rate of Return, Profitability Index, Discounted Payback Period – Non-Discounted Cash Flow Techniques: Payback Period, Accounting Rate of Return – Capital Rationing.		
UNIT III	FINANCING DECISIONS	7 Hours
Cost of Capital: Cost of Debt, Preference Shares, Equity and Retained earnings, Weighted Average Cost of Capital (WACC). Capital Structure: Definition, Factors determining Capital Structure, EBIT – EPS Analysis, In-difference point. Leverage Analysis: Financial Leverage, Operating Leverage and Combined Leverage.		
UNIT IV	DIVIDEND DECISIONS	5 Hours
Dividend Policy: Dividend, Forms of Dividend, Determinants of Dividend Policy – Theories: Relevance and Irrelevance.		
UNIT V	WORKING CAPITAL DECISIONS	6 Hours
Meaning of Working Capital, Determinants, and Estimation of working capital requirement, Current Assets Financing Policy, Operating Cycle and Cash Cycle. An overview of Cash, Receivables and Inventory Management.		
Suggested Self-Study Topics		
Real and Nominal Interest Rate, Modified Internal Rate of Return (MIRR), EBIT-EPS Analysis, Share Split and Bonus shares, Tax aspects of dividend, Working capital committees.		
List of Laboratory Experiments		
Experiment 1		2 Hours
Calculating Present Value (PV) of different cashflow streams		
Experiment 2		2 Hours
Calculating Future Value (FV) of different cashflow streams		
Experiment 3		2 Hours
Analyzing alternative investment decisions using DCF Techniques		
Experiment 4		2 Hours
Analyzing alternative investment decisions using Non-DCF Techniques		
Experiment 5		2 Hours
Calculating Cost of Capital for various sources of funds		
Experiment 6		2 Hours
EBIT – EPS Analysis using What-if Analysis		
Experiment 7		2 Hours
Calculating Financial, Operating and Combined Leverages		
Experiment 8		2 Hours
Analyze the impact of Dividend Decisions on Value of the Firm		
Experiment 9		2 Hours
Calculating Operating Cycle		
Experiment 10		2 Hours
Estimation of Working Capital Requirements		
Laboratory		20 Hours
Theory		30 Hours
Total		50 Hours

UNIT I		LINEAR PROGRAMMING					7 Hours																																																	
Linear Programming, Formulation, Solving LPP: Graphical method, Simplex method- Dual simplex method- Principles of Duality- Sensitivity Analysis.																																																								

UNIT II	TRANSPORTATION AND ASSIGNMENT	6 Hours
Transportation problems-North-West Corner Solution, least cost, Vogel’s Approximation Method (VAM) – Test of optimality - MODI method, Assignment Problem: Hungarian method. Travelling Salesmen Algorithm.		
UNIT III	NETWORK TECHNIQUES	6 Hours
Introduction- Phases of project management, Guidelines for network construction-Critical Path Method-CPM float calculations-PERT analysis.		
UNIT IV	GAME THEORY	6 Hours
Game Theory-Two-person Zero sum games-Saddle point, Dominance Rule, Convex Linear Combination 20 (Averages)-Decision making under risk, Expected Monetary Value approach, Decision Trees- Monte-carlo simulation, Nash Equilibrium.		
UNIT V	QUEUING THEORY	5 Hours
Queuing Theory – Structure and Characteristics of Queuing System, Solution to the practical problems on Poisson – exponential, single server model infinite population. Waiting line models: Features and Terminologies.		
<b>Suggested Self-Study Topics</b>		
Linear Programming Big M-Method and Two –Phase Method, Economic Interpretation of Dual, Unbalanced Transportation Problems, Prohibited Routes, Unique Vs. Multiple Optimal Solutions, Inventory Model with Planned Shortages, Solution of m x n Games –Formulation and Solution as an LPP, Multistage Decision-Making problems.		
<b>List of Laboratory Experiments</b>		
<b>Experiment 1</b>		<b>2 Hours</b>
Construct a Linear Programming model using solver.		
<b>Experiment 2</b>		<b>2 Hours</b>
Solving Linear Programming with sensitivity analysis.		
<b>Experiment 3</b>		<b>2 Hours</b>
Solving Transportation Problem		
<b>Experiment 4</b>		<b>2 Hours</b>
Construct the Optimized solution for the Assignment.		
<b>Experiment 5</b>		<b>2 Hours</b>
Solve the Travelling Salesman Problem		
<b>Experiment 6</b>		<b>2 Hours</b>
Calculate the expected time using PERT		
<b>Experiment 7</b>		<b>2 Hours</b>
Find out the Critical Path		
<b>Experiment 8</b>		<b>2 Hours</b>
Decision Tree Analysis		

<b>Experiment 9</b>	<b>2 Hours</b>
Determine the value of the game using Game Theory.	
<b>Experiment 10</b>	<b>2 Hours</b>
Applying Single Server Queuing Model.	
<b>Laboratory</b>	<b>20 Hours</b>
<b>Theory</b>	<b>30 Hours</b>
<b>Total</b>	<b>50 Hours</b>

UNIT I	INTRODUCTION	6 Hours
IT in Business - Characteristics of Internet-Ready IT Applications - Information Users and their requirements. Types of Digital Data and their difference; Structured Data, Unstructured Data and Semi-Structured Data. Application of Analytics in Different Industries.		
UNIT II	BASICS OF BUSINESS INTELLIGENCE	6 Hours
Introduction to On-Line Transaction Processing (OLTP), On-Line Analytical Processing (OLAP), Different OLAP Architectures, Data Models for OLTP and OLAP, Role of OLAP Tools in the BI Architecture. Evolution of Business Intelligence (BI) and Role of DSS, EIS, MIS and Digital Dashboard -Question About BI Where, When, and What? - Data from Many Perspective -BI Framework - BI Applications -BI Users.		
UNIT III	BASICS OF DATA INTEGRATION	6 Hours
Data Warehouse and its need, Data Mart, Constitution of Data Warehouse, Extract-Transform-Load (ETL), Data Integration and its Technologies, Data Quality and Data Profiling.		
UNIT IV	MULTIDIMENSIONAL DATA MODELLING	6 Hours
Basics of Data Modeling, Types of Data Model, Data Modeling Techniques, Fact Table, Dimension Table, Typical Dimensional Models, Dimensional Modeling Life Cycle.		
UNIT V	MEASURES, METRICS AND KPIS	6 Hours
Basics of Measures and Performance, Measurement System Terminology, Role of Metrics and Metrics Supply Chain, Fact-Based Decision Making and KPIS, KPI usage in companies, Sources of Business Metrics and KPIS. Reporting Perspectives Common to All Levels of Enterprise, Report Standardization and Presentation Practices, Enterprise Reporting Characteristics in OLAP World, Balanced Scorecard and Dashboards.		
Suggested Self-Study Topics		
Extracting Data, BI for Past, Present and Future, Common Approaches of Data Integration, Designing the Dimensional Model, Funnel and Distribution channel Analysis.		
List of Laboratory Experiments		
Experiment 1		2 Hours
Basic Report Preparation using Pivot Table		
Experiment 2		2 Hours
Percentage Calculations in Pivot Table		
Experiment 3		2 Hours
Calculations in Pivot Table		
Experiment 4		2 Hours
Pivot Chart and Dashboard Preparation		
Experiment 5		2 Hours
Extraction and Cleaning of Structured and Semi Structured Data from Spreadsheet		
Experiment 6		2 Hours
Transformation of Structured and Semi Structured Data from Spreadsheet		
Experiment 7		2 Hours
Data Modelling – Star Schema		

<b>Experiment 8</b>	<b>2 Hours</b>
Data Modelling – Snowflake Schema	
<b>Experiment 9</b>	<b>2 Hours</b>
Report Standardization and Presentation Practices	
<b>Experiment 10</b>	<b>2 Hours</b>
Presenting the data and KPIs graphically	
<b>Laboratory</b>	<b>20 Hours</b>
<b>Theory</b>	<b>30 Hours</b>
<b>Total</b>	<b>50 Hours</b>

24MB208	Community Connect Project				L	T	P	C
					0	0	2	1
Pre-requisites		Assessment Pattern						
<ul style="list-style-type: none"><li>Business and Social Environment</li><li>Basics of Research</li></ul>		Mode: Continuous Assessment 100%						
		Assessments					Weightage (%)	
		Appropriateness / Social Relevance of the Project					20	
		Report					20	
		Video Presentation					20	
		Impact on Society / Feasibility of Implementation					20	
Viva-Voce					20			
Course Objectives								
<ul style="list-style-type: none"><li>To bring about an attitudinal change in the students and help them to develop societal consciousness, sensibility, responsibility, and accountability.</li><li>To make students aware of their inner strength and help them to find new /out of box solutions to the social problems.</li><li>To help students to initiate developmental activities in the community in coordination with public and government authorities.</li></ul>								
Programme Outcomes (POs)								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO3	Ability to develop Value based Leadership ability.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.							
Course Outcomes (COs)								
The students will be able to:								
CO1	Analyze local community challenges through field engagement and stakeholder interaction to identify areas for impactful intervention.							
CO2	Evaluate existing public and government development initiatives to identify gaps and opportunities for community improvement.							
CO3	Apply innovative and practical solutions to social problems by leveraging creative thinking and collaborative approaches.							
CO4	Design awareness campaigns or educational interventions that address identified social issues by collaborating with community members and relevant authorities							
CO5	Demonstrate ethical responsibility and social sensitivity while engaging with diverse community stakeholders.							
Articulation Matrix

CO 4					2	3	1	
CO 5					3	1	1	

This course includes modules on community engagement, covering the concept of social responsibility, civic engagement, and the role of business in society. Students will assess community needs, identify social issues aligned with Sustainable Development Goals (SDGs), and plan suitable projects. Through field engagement, they will interact with NGOs and local bodies, execute mini-projects, and document their experiences through journals and reports. The course concludes with reflective discussions, presentations, and evaluations involving faculty, peers, and community stakeholders to assess learning, SDG impact, and community contribution.

The Comprehensive Viva Voce aims to assess students' understanding of key management theories, concepts, and frameworks covered in the first year courses. It evaluates their ability to synthesize information, analyze business problems, and apply appropriate tools and techniques. The viva also focuses on current trends, critical thinking, and effective oral communication, helping students integrate academic knowledge with practical insights suitable for professional decision-making and leadership roles.

### THIRD SEMESTER

24MB301	Strategic Management	L	T	P	C		
		3	1	0	4		
Pre-requisites		Assessment Pattern					
<ul style="list-style-type: none"><li>Basic Management Concepts</li></ul>		Mode of Assessment	Weightage (%)				
		Continuous Assessment	40				
		Semester End Examinations	60				
Course Objectives							
<ul style="list-style-type: none"><li>To acquaint with production terminology and concepts.</li><li>To enable the students to comprehend the important aspects like production system, layout, production planning and inventory management.</li><li>To enable the students to evaluate the utility of work measurement techniques.</li></ul>							
Programme Outcomes (POs)							
PO1	Apply knowledge of management theories and practices to solve business problems.						
PO2	Foster Analytical and critical thinking abilities for data-based decision making.						
PO4	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.						
PO5	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth						
PSO1	Apply knowledge of management theories and practices to solve business problems.						
Course Outcomes (COs)							
The students will be able to							
CO1	Apply the conceptual framework of strategic management by analyzing its components—vision, mission, goals, objectives, and strategic intent—to formulate a coherent understanding of strategic decision-making models and their relevance in dynamic business environments						
CO2	Analyze internal and external environments using SWOT, PESTEL, VRIO, and Porter’s Five Forces to formulate strategic insights, identify core competencies, and evaluate competitive positioning.						
CO3	Develop comprehensive business strategies by applying corporate portfolio analysis, evaluating global and international options, and selecting suitable corporate, business, and functional strategies to address diverse organizational scenarios and competitive environments.						
CO4	Construct effective implementation plans by aligning organizational structures, development stages, and job designs with strategic goals, and by applying reengineering principles to support long-term organizational growth and adaptability.						
CO5	Evaluate key performance measures at different organizational levels and apply strategic control systems to monitor progress and improve corporate outcomes.

**Module 1: Internship Orientation and Preparation (2–3 hours)**

- Understanding the purpose and expectations of internships
- Guidelines for internship conduct, reporting, and ethics
- Setting learning objectives and career alignment

**Module 2: Exposure to Functional Areas (During internship)**

- Working across departments like Marketing, Finance, HR, Operations, and Analytics
- Observing organizational workflows and managerial decision-making
- Understanding interdependencies between functional areas

**Module 3: Professional Skill Development (During internship)**

- Application of theoretical concepts in real-time work scenarios
- Development of communication, teamwork, problem-solving, and time management skills
- Use of digital tools, industry-specific software, and business techniques

**Module 4: Industry Interaction and Networking**

- Engaging with mentors, team leaders, and industry professionals
- Participating in meetings, reviews, or field visits
- Learning current trends, industry best practices, and business etiquette

**Module 5: Reporting, Reflection, and Presentation (Post-internship)**

- Internship diary and weekly progress updates
- Final internship report highlighting learning outcomes and industry insights
- Oral presentation and feedback session with faculty panel

### AUDIT COURSE

24MB303	Value Education and Ethics		L	T	P	C	
			0	1	0	-	
Pre-requisite		Assessment Pattern					
Nil		Mode: Continuous Assessment 100%					
		Assessments		Weightage (%)			
		Mid-Course Evaluation		50			
		End Course Evaluation		50			
		Total		100			
Course Objective							
<ul style="list-style-type: none"><li>To provide an understanding of ethics.</li><li>To gain insights about the role of value education in life.</li><li>To create awareness about personal and social well-being.</li></ul>							
Programme Outcomes (POs)							
PO2	Foster Analytical and critical thinking abilities for data-based decision making						
PO3	Ability to develop Value based Leadership ability.						
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.						
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.						
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.						
Course Outcomes (COs)							
The students will be able to:							
CO1	Define core ethical concepts and explain their relevance in personal and professional contexts.						
CO2	Assess and evaluate personal values and how they influence ethical decision-making.						
CO3	Apply ethical principles to analyze scenarios involving personal, social, and workplace ethics.						
CO4	Demonstrate awareness of the impact of ethical behaviour on individual well-being and societal harmony.						
CO5	Develop a personal code of ethics based on reflection, societal expectations, and professional standards.						
Articulation Matrix							
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO 1			1	2			
CO 2		2	2	3		1	
CO 3		1	2	3			
CO 4			1	2	2	2	
CO 5			2	3		2	

Meaning, Philosophy and Purpose of Life, Duty of protecting nature, environment and universe, Regulating desires, anger and anxiety, Love and Charity for humanity, Social Responsibilities, Physical, Mental and Spiritual well-being, Indian Ethos, Understanding, respecting culture and social norms, Professional Ethics, Managing ethical dilemmas and being a law-abiding citizen	
<b>Total</b>	<b>20 Hours</b>

			<b>0</b>	<b>0</b>	<b>12</b>	<b>6</b>	
<b>Pre-requisites</b>			<b>Assessment Pattern</b>				
<ul style="list-style-type: none"><li>Core Management Principles</li></ul>			<b>Mode of Assessment</b>		<b>Weightage (%)</b>		
			Continuous Assessment		60		
			Semester End Examinations		40		
<b>Course Objectives</b>							
<ul style="list-style-type: none"><li>To apply the business research process to identify the problems prevailing in the industry.</li><li>To design / choose the appropriate data collection tools for the problem defined in line with research methodology.</li><li>To analyze the data using appropriate research tools and present the findings and solutions in the research report.</li></ul>							
<b>Programme Outcomes (POs)</b>							
<b>PO1</b>	Apply knowledge of management theories and practices to solve business problems.						
<b>PO2</b>	Foster Analytical and critical thinking abilities for data-based decision making.						
<b>PO3</b>	Ability to develop Value based Leadership ability.						
<b>PO4</b>	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.						
<b>PO5</b>	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.						
<b>PSO1</b>	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.						
<b>PSO2</b>	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment						
<b>Course Outcomes (COs)</b>							
The students will be able to							
<b>CO1</b>	Assess the various business environments to identify the research gap / research problem						
<b>CO2</b>	Design an appropriate research plan to address a defined problem						
<b>CO3</b>	Design a questionnaire / identify the appropriate secondary data source for collecting the data						
<b>CO4</b>	Analyze the data using suitable research tools						
<b>CO5</b>	Compose a research report applying effective report writing principles to present findings and solutions clearly						
<b>Articulation Matrix</b>							
	<b>PO1</b>	<b>PO2</b>	<b>PO3</b>	<b>PO4</b>	<b>PO5</b>	<b>PSO1</b>	<b>PSO2</b>
<b>CO 1</b>	3	3		3		3	2
<b>CO 2</b>	3	2		2		3	
<b>CO 3</b>		2		2	2	2	
<b>CO 4</b>		3		3			3
<b>CO 5</b>	2	2	2	3	3	2	2

**Module 1: Introduction to Business Research Process (1-2 Weeks)**

- Definition, scope, and significance of business research
- Steps in the research process: problem identification to report writing
- Types of research: exploratory, descriptive, causal

**Module 2: Research Design and Problem Definition (3-4 Weeks)**

- Formulating research problems, objectives, and hypotheses
- Choosing appropriate research design: qualitative vs. quantitative
- Variables, constructs, and conceptual framework

**Module 3: Data Collection Methods (5-6 Weeks)**

- Designing questionnaires, scales, and surveys
- Sampling techniques and determining sample size
- Identifying and using secondary data sources

**Module 4: Data Analysis and Interpretation (6-7 Weeks)**

- Data preparation: coding, editing, cleaning
- Using statistical tools (SPSS/Excel/R) for analysis: descriptive and inferential
- Interpretation of results and drawing conclusions

**Module 5: Report Writing and Presentation (7-8 Weeks)**

- Structure of a research report: introduction, analysis, findings, conclusions, and recommendations
- Report formatting and referencing styles
- Presentation of research findings with visuals (charts, tables, etc.)
- Understanding plagiarism and using plagiarism detection tools
- Introduction to research publication and opportunities for publishing student research

<b>CO 5</b>		1			2	1	

The Comprehensive Viva Voce aims to assess students' understanding of advanced management theories, concepts, and frameworks covered in the second-year MBA courses. It evaluates their ability to synthesize information, critically analyze complex business problems, and apply appropriate strategic tools and techniques. The viva also emphasizes current trends, emerging industry issues, and the integration of digital transformation, ESG, and SDGs in decision-making. Additionally, it focuses on enhancing effective communication skills, both oral and written, preparing students for professional leadership roles and ensuring their readiness to tackle real-world business challenges.

24MBM07	Neuromarketing				L	T	P	C
					3	1	0	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Marketing management</li></ul>					Mode of Assessment		Weightage (%)	
					Continuous Assessment		40	
					Semester End Examinations		60	
Course Objectives								
<ul style="list-style-type: none"><li>To enable the students to understand the dynamic nature of Consumer Behaviour.</li><li>To give insight on the various external and internal influences on Consumer Behaviour.</li><li>To let them understand how individual consumers and organizational buyers differ in making purchase decisions.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO3	Ability to develop Value based Leadership ability.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Evaluate neuromarketing concepts to devise strategies addressing complex consumer behaviour challenges in dynamic business environments.							
CO2	Integrate neuroscience tools and scientific techniques (e.g., fMRI, QEEG) to optimize advertising effectiveness and ethical product development decisions.							
CO3	Synthesize insights on internal consumer influences to design marketing interventions that effectively shape attitudes and motivate purchasing behaviour.							
CO4	Assess the impact of social, cultural, and group dynamics to tailor communication and influence consumer choice within diverse market segments.							
CO5	Apply consumer decision-making models to predict adoption, enhance post-purchase satisfaction, and minimize cognitive dissonance for business growth.

24MBM08	Omni Channel Retail Management and Analytics		L	T	P	C		
			3	1	0	4		
Pre-requisite			Assessment Pattern					
<ul style="list-style-type: none"><li>Marketing management</li></ul>			Mode of Assessment		Weightage (%)			
			Continuous Assessment		40			
			Semester End Examinations		60			
Course Objectives								
<ul style="list-style-type: none"><li>To give an understanding to the students about the significant role of retailing in the marketing system.</li><li>To give inputs to gain insights on the issues involved in organizing and establishing a retail format.</li><li>To enable the students to understand the merchandise management, pricing and promotion strategies in retailing.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
Course Outcomes (COs)								
The students will be able to								
CO1	Design and implement omni-channel retail strategies to enhance customer experience and optimize store management in diverse retail formats.							
CO2	Analyze Indian shopper behaviour and market segments to develop targeted retail strategies for enhanced customer engagement and business growth.							
CO3	Evaluate location strategies, trade areas, site characteristics, and atmospherics to optimize retail space and enhance customer experience for increased profitability.							
CO4	Integrate key components of the retail marketing mix by evaluating product, brand, merchandise, and category management strategies; formulate effective pricing and promotional strategies aligned with retail objectives and consumer behaviour.							
CO5	Apply retail analytics techniques to evaluate the value chain and leverage big data for informed decisions across supply chain, pricing, inventory, and customer experience optimization.							
Articulation Matrix

<ul style="list-style-type: none"><li>To understand the basic principles of semiotics as well as semiotic thinking thereby examining the role of semiotics in communicating the brand</li><li>To provide an in-depth understanding the marketing communication concepts</li><li>To evaluate an organization’s marketing and promotional situation in order to develop effective communication strategies and programmes</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Analyze brand communication evolution to identify key brand values and heritage for strategic brand positioning.							
CO2	Interpret semiotic elements to decode signs and symbols influencing consumer perception in marketing communications.							
CO3	Apply semiotic principles to design impactful marketing messages using verbal, visual, and cultural touchpoints.							
CO4	Execute semiotic analysis using structured techniques to uncover hidden meanings and enhance marketing insights.							
CO5	Synthesize semiotic findings from case studies to develop actionable branding and communication strategies.							
Articulation Matrix								
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
	CO 1	2	2		2		2	
	CO 2	2	3				2	2
	CO 3	2	3		2		3	2
	CO 4	2	3					3
	CO 5	2	2		3		2	
Unit I	Introduction to Communications & Branding						6 Hours	
Evolution of Communications & Branding – past and present positioning, Brand Values – brand heritage, Brand Building								

<b>Unit II</b>	<b>Elements of Semiotics</b>	<b>9 Hours</b>
Signifier and Signified, Redundancy and Noise, Polysemy and Synonymy, Symbolic and Semi Symbolic, Arbitrary and Convention, Single/Repeated signs, Semiotic Silence, Successive Signs.		
<b>Unit III</b>	<b>Role of Semiotics in Marketing</b>	<b>9 Hours</b>
Reach to customers - Verbal, Visual and Performative actions, Touch Points – Logos, Rituals, Cultural symbols, Colors, Iconic individuals, text, advertisements, websites, Physical environments		
<b>Unit IV</b>	<b>Techniques to Run Semiotic Analysis</b>	<b>10 Hours</b>
Stages – Grouping, Independent Analysis of groups, Inclusive analysis of groups, Interdisciplinary Approaches, Comparison of independent and inclusive analysis of groups, Wrap-up of analysis; Techniques – Questions, probing, abstract questions, projective techniques, craft stationery.		
<b>UNIT V</b>	<b>Apply Findings from Analysis</b>	<b>6 Hours</b>
Semiotic-Based Marketing Strategies, Case Studies from Indian Companies and MNCs		
		<b>Theory</b>
		<b>30 Hours</b>
		<b>Tutorial</b>
		<b>10 Hours</b>
		<b>Total</b>
		<b>40 Hours</b>
<b>Suggested Self-Study Topics :</b> Evolution of Branding Strategies, Historical Perspectives on Marketing Communication, Advanced Semiotic Theories and Models, Impact of Semiotics on Consumer Perception, Innovative Applications of Semiotics in Branding, AI-Based Image Recognition for Brand Symbol Analysis, Natural Language Processing (NLP) in Understanding Cultural Symbolism.

UNIT I	INTRODUCTION TO MERGERS	8 Hours
Meaning, Need and Objectives of Mergers, Acquisitions, Basic Difference between Mergers and Acquisition, SEBI Guidelines, Legal framework		

<b>UNIT II</b>	<b>TYPES AND PROCESS</b>	<b>8 Hours</b>
Types of Mergers, Acquisitions and Takeovers, Process of Mergers and Acquisitions, Value Creation.		
<b>UNIT III</b>	<b>FUNDING</b>	<b>8 Hours</b>
Funding of Mergers and Acquisitions, Financing Techniques, Various sources of financing.		
<b>UNIT IV</b>	<b>PRE-MERGER AND POST-MERGER OF FIRMS</b>	<b>8 Hours</b>
Determining Pre-Merger and Post Merger Values of the firms- Valuation of shares, Ascertaining the benefits to the Stakeholders of both the Firms out of Mergers and Acquisition, Problems Faced during the Mergers, Acquisitions and Takeovers.		
<b>UNIT V</b>	<b>INTRODUCTION TO RESTRUCTURING</b>	<b>8 Hours</b>
Need and Objectives of restructuring, Process of restructuring, Impact of restructuring on the value of the firm.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>
<b>Suggested Self-Study Topics :</b> SEBI Guidelines, Value Creation, Acquisitions and Takeovers, Process of restructuring, M&A Automation, Restructuring Sentiment Analysis using AI.

24MBH04	Performance Management		L	T	P	C		
			3	1	0	4		
Pre-requisite		Assessment Pattern						
<ul style="list-style-type: none"><li>Basics of Management principles</li><li>Basics of Organisational Behaviour</li><li>Introduction to HRM</li></ul>		Mode of Assessment		Weightage (%)				
		Continuous Assessment		40				
		Semester End Examinations		60				
Course Objectives								
<ul style="list-style-type: none"><li>To understand the concept and importance of Performance Management.</li><li>To comprehend the process of Performance Management System and its evaluation.</li><li>To expose the various methods of measuring and monitoring performance.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO3	Ability to develop Value based Leadership ability							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
Course Outcomes (COs)								
The students will be able to								
CO1	Differentiate between performance appraisal and performance management to explain their purposes and organizational significance.							
CO2	Apply the performance management process, including planning, feedback, and counselling, to improve employee development.							
CO3	Evaluate approaches and methods for measuring employee performance and develop appropriate appraisal tools.							
CO4	Implement monitoring, feedback, and coaching strategies to support continuous performance improvement.							
CO5	Analyze reward systems and evaluation methods to align recognition with organizational and individual goals.

24MBH05	Behaviour Modification and Management	L	T	P	C
		3	1	0	4
Pre-requisite		Assessment Pattern			
<ul style="list-style-type: none"><li>Basics of Management principles</li><li>Basics of Organisational Behaviour</li><li>Introduction to HRM</li></ul>	Mode of Assessment	Weightage (%)			
	Continuous Assessment	40			
	Semester End Examinations	60			
Course Objectives					
<ul style="list-style-type: none"><li>To understand the basic concepts in Spiritual Intelligence, Emotional Intelligence and Transaction Analysis.</li><li>To know the types and benefits of yoga.</li><li>To comprehend the reasons for stress and the methods to relieve it.</li></ul>					
Programme Outcomes (POs)					
PO1	Deep understanding and knowledge in core and allied management areas that aid in vividness about business functioning, exploit business opportunities resulting in planning and decision-making capabilities in highly volatile business environment.				
PO2	Utilize research methods to investigate, solve business problems by planning, executing research solution seeking assignments in the various functional areas of management.				
PO3	Acquire critical thinking skills, able to think creatively by application of lateral thinking techniques and scale up to innovations.				
PO5	Detect the significant problems faced by business entities and fit in tools, concepts, and benchmark practices to continuously solve business problems.				
PSO1	Understand the inescapable role of right leadership for the success of any business entity, collaborate with teams by being a contributing member and lead teams.				
Course Outcomes (COs)					
The students will be able to					
CO1	Analyze the philosophical and practical foundations of yoga to enhance personal well-being and life quality.				
CO2	Evaluate spiritual intelligence concepts and implement strategies to foster spiritually inclined organizations.				
CO3	Apply emotional intelligence techniques for managing thoughts, emotions, and fostering positive workplace relationships.				
CO4	Assess sources and impacts of stress; design coping strategies to promote work-life balance and organizational health.				
CO5	Perform transaction analysis and develop goal-setting frameworks to support effective behavioral change in professional contexts.

Unit I	Introduction							8 Hours																																																
Social Psychology – Origin and development – Social behaviour and social thought -Applications in society and business.																																																								
Unit II	Perceiving and Understanding Others							8 Hours																																																
Social perception – Nonverbal communication – Attribution – Impression formation- Impression management.																																																								

<b>Unit III</b>	<b>Cognition in the Social World</b>	<b>8 Hours</b>
Social cognition – Schemas – Heuristics – Errors – Attitudes - Factors leading to success or failure of attitude change & Behaviour – Persuasion – Cognitive dissonance – Self, Self Esteem		
<b>Unit IV</b>	<b>Interpersonal Relations</b>	<b>8 Hours</b>

Self & Social identity – Prejudice – Discrimination – Aggression – Interpersonal attraction.		
<b>UNIT V</b>	<b>Applied Social Psychology</b>	<b>8 Hours</b>
Social Influence – Conformity – Compliance – Social Influence - Prosocial behaviour – Groups – Social issues.		

<b>Suggested Self-Study Topics:</b> Evaluating the Applications of Social Psychology, Prosocial Behavior, Micro Expressions, Social Comparison, Workplace Interplace Relationship, Social Tension, AI in Analyzing Group Behavior and Online Social Interactions, Facial Emotion Recognition Using AI in Social Experiments.		
	<b>Theory</b>	<b>30 Hours</b>
	<b>Tutorial</b>	<b>10 Hours</b>

Unit I	Strategic Role of HR Metrics							8 Hours																																																
Connecting measures and organizational effectiveness- HR measurement approaches - Traditional versus contemporary HR measures.																																																								

<b>Unit II</b>	<b>Absenteeism and Separation</b>	<b>8 Hours</b>
Employee Absenteeism- how absenteeism creates costs – analytics and measures for Employee Absenteeism- Employee separation: Turnover, separation and acquisition – computation of turnover rates– Analytics – handling turnover costs.		
<b>Unit III</b>	<b>Employee Assistance and Workplace Health</b>	<b>8 Hours</b>
Assessment of cost and benefit of health, wellness and promotions – Analytics for decision making.		
<b>Unit IV</b>	<b>The Employee Attitude and Engagement</b>	<b>8 Hours</b>
The logic connecting attitude, behavior and financial outcome- employee engagement and service climate – Estimating the financial impact of employee attitude.		
<b>UNIT V</b>	<b>Staffing Utility and Benefits of HR Utility Programs</b>	<b>8 Hours</b>
The concept and measurement: staffing measurement - staffing decisions through utility analysis- Cost and benefit of HR Development program: Estimating pay offs from learning and development.		
<b>Suggested Self-Study Topics:</b> HR Analytics Function, HR dashboard, Workplace counseling, Machine Impact in HR Analytics, Recruitment utility analysis, Statistical analysis for HR, AI role in Predictive HR Analytics Using Machine Learning Models, Natural Language Processing (NLP) in Employee Feedback and Sentiment Analysis using AI.

Unit I		Maintenance Concepts						8 Hours																																																
Objectives and Functions Of Maintenance, Types, Maintenance Strategies. Organization for Maintenance. Five Zero Concept.																																																								

<b>Unit II</b>	<b>Failure Data Analysis</b>	<b>8 Hours</b>
MTBF, MTTF, Useful Life, Survival Curves, Repair Time Distribution, Break Down Time Distributions, Poisson, Exponential and Normal Distribution. Availability Of Repairable Systems, Maintainability Prediction, Design for Maintainability.		
<b>Unit III</b>	<b>Maintenance Planning</b>	<b>8 Hours</b>
Overhaul And Repair: Meaning And Difference, Optimal Overhaul / Repair / Replace Maintenance Policy, Re Placement Decisions: Optimal Interval.		
<b>Unit IV</b>	<b>Maintenance Systems</b>	<b>8 Hours</b>
Fixed Time Maintenance, Condition Based Maintenance; Operate To Failure, Opportunity Maintenance, Design Out Maintenance, Total Productive Maintenance. Predictive Maintenance, Prescriptive Maintenance.		
<b>Unit V</b>	<b>Advanced Techniques</b>	<b>8 Hours</b>
Reliability Centered Maintenance (RCM) – Total Productive Maintenance (TPM)- Philosophy and Implementation, Signature Analysis - Expert Systems – Concept of Terro Technology, Reengineering Maintenance Process, Concept of Reliability, Reliability Improvement, Concept of Maintainability and Maintainability Improvement - Asset Management Techniques.		
<b>Suggested Self Study Topics</b> New Developments in Maintenance, Preventive Maintenance, Group Replacement, Reduction of Maintenance Cost, Maintenance Management Information System & Technical Audit.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

24MBP03	Lean Manufacturing	L	T	P	C		
		3	1	0	4		
Pre-requisite		Assessment Pattern					
<ul style="list-style-type: none"><li>Basics of Management concepts</li><li>Understanding of Production Management</li></ul>		Mode of Assessment	Weightage (%)				
		Continuous Assessment	40				
		Semester End Examinations	60				
Course Objectives							
<ul style="list-style-type: none"><li>To understand the principles behind lean manufacturing philosophy.</li><li>To enable the student to understand the concept of Value Steam Mapping (VSM)</li><li>To familiarize them with the implementation of various lean manufacturing techniques.</li></ul>							
Programme Outcomes (POs)							
PO1	Deep understanding and knowledge in core and allied management areas that aid in vividness about business functioning, exploit business opportunities resulting in planning and decision-making capabilities in highly volatile business environment.						
PO2	Utilize research methods to investigate, solve business problems by planning, executing research solution seeking assignments in the various functional areas of management.						
PO5	Acquire critical thinking skills, able to think creatively by application of lateral thinking techniques and scale up to innovations.						
PSO1	Detect the significant problems faced by business entities and fit in tools, concepts, and benchmark practices to continuously solve business problems						
PSO2	Adept in using various modes of communication coupled with listening skills, interpersonal skills and influential communicative skills to speak the mind.						
Course Outcomes (COs)							
The students will be able to							
CO1	Apply knowledge of management theories and practices to solve business problems.						
CO2	Foster Analytical and critical thinking abilities for data-based decision making.						
CO3	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.						
CO4	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth						
CO5	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment						
Articulation Matrix

CO 2	2	2				3	3
CO 3	2				2	3	
CO 4	2					3	3
CO 5	2				2	3	
Unit I	Benefits of Lean Manufacturing System					8 Hours	
History And Modern Applications, MRP And Their Impact, Lean Manufacturing Model, Kanban Methodology, Continuing Evaluation, Strategic Business Analysis.							

<b>Unit II</b>	<b>Understanding Product, Process and Demand</b>	<b>8 Hours</b>
Value Stream Mapping - Scope, Selecting Parent Parts, Lean Line, Demand, Documenting Process Flow, Takt Time, Process Linking And Balancing. Imbalance, Approach, Resource, Definition, Physical Layout, Designing 5S.		
<b>Unit III</b>	<b>Kanban Strategies</b>	<b>8 Hours</b>
Process, Single, Multi Card System, Inventory Management, Team Establishment: Commitment, Physical Facilitation, Management Structure, Application Of Kanban.		
<b>Unit IV</b>	<b>Lean Implementation And Milestones</b>	<b>8 Hours</b>
Software Requirement Milestones, Understanding Process, Product And Materials, Checking, Factory Design, Line Start-Up And Introduction To Lean Tools.		
<b>Unit V</b>	<b>Lean Line Management</b>	<b>8 Hours</b>
Matching Customer Demand, Customer Response Policy, Lean Line Optimization, Resistance To Change. Continuous Improvement Practices, Value Stream Mapping, Standardized Work Processes.		
<b>Suggested Self Study Topics</b>		
Concept of IoT to improve Lean Manufacturing, Kanban Signalling, Transformation process perpetual inventory, Lean implementation in services- Banks, Flexibility and rewards.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

24MBP04	Purchasing and Materials Management				L	T	P	C
					3	1	0	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Basics of Management concepts</li><li>Understanding of Production Management</li></ul>					Mode of Assessment		Weightage (%)	
					Continuous Assessment		40	
					Semester End Examinations		60	
Course Objectives								
<ul style="list-style-type: none"><li>To introduce purchase and materials management practices.</li><li>To enable the students to understand supply sources.</li><li>To familiarize warehouse management.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO3	Ability to develop Value based Leadership ability.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Analyze the purchasing function and its integration with organizational departments to develop effective procurement strategies.							
CO2	Evaluate supply sources using vendor development, rating, and negotiation techniques to select optimal suppliers.							
CO3	Apply materials planning tools such as codification, classification, and standardization to streamline inventory management.							
CO4	Assess legal and ethical aspects in materials management to strengthen buyer-seller relationships and compliance.							
CO5	Manage warehousing operations and implement Materials Management Information Systems for accurate control and documentation							
Articulation Matrix								
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
	CO 1	2				2	3	
	CO 2	2				2	3	
	CO 3	2	2				3	3
	CO 4			2	2		3	
	CO 5	2					3	3
Unit I	Purchasing Functions							8 Hours
Relationship Of Purchasing Department with Other Departments, Procurement, Supply Management Activities, Purchasing Objectives and Policies, Operating Procedures, Purchasing Cycles, Objectives Of Materials Management.								

<b>Unit II</b>	<b>Supply Sources</b>	<b>8 Hours</b>
Importance Of Source Selection, Vendor Development & Maintenance, Vendor Rating, Competitive Bidding, Selecting the Source, Negotiation: Objectives, Process, Techniques, Price Negotiation, Purchasing of Capital Goods, Seasonal Commodities, Insurance Spares.		
<b>Unit III</b>	<b>Materials Planning</b>	<b>8 Hours</b>
Materials Codification: Evolution Of Codes, Classification, Methodology, Advantages, Standardization: Definition, Specification, Advantages, Techniques, Pricing Principles: Price Analysis, Discounts.		
<b>Unit IV</b>	<b>Materials Management</b>	<b>8 Hours</b>
Materials Management, Legal Aspects of Buying, Buyer-Seller Relationship, Ethics in Material Management - Supplier Relationship Management, Sustainable Procurement Practices.		
<b>Unit V</b>	<b>Warehousing Management</b>	<b>8 Hours</b>
Stores Management, Incoming Material Control, Stores Documentation & Accounting, Materials Management Information System (MMIS).		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>
<b>Suggested Self Study Topics</b>		
Organization of material function, Contract management, Economic consideration in determining the right price, Industry ethical practices in Materials, New developments in MMIS.

CO 5				2		3	3																																																	
Unit I		Supply chain						8 Hours																																																
Fundamentals, Importance, Decision Phases, Process view, 'Supplier- Manufacturer-Customer chain', Supply chain performance: Drivers, Structuring supply chain, Sustainable supply chain practices.																																																								

<b>Unit II</b>	<b>Overview of demand forecasting in the supply chain</b>	<b>8 Hours</b>
Aggregate planning, Managing predictable variability. Managing supply chain cycle inventory, Uncertainty, safety inventory, Determination of optimal level of product availability, AI and machine learning in demand forecasting, Predictive analytics.		
<b>Unit III</b>	<b>Distribution network design</b>	<b>8 Hours</b>
Role, factors influencing network, options, Value Addition. Models for facility location and capacity planning. Network design: Impact of uncertainty, decisions using decision trees. Distribution centre location models. Supply chain network optimization models, Last-mile delivery optimization, Omni-channel distribution strategies, Blockchain in network design		
<b>Unit IV</b>	<b>Logistic system</b>	<b>8 Hours</b>
Evolution, Infrastructure and Networks. Freight Management, Route Planning, Containerization. Modal Characteristics, Inter-modal operators and transport economies. Ocean carrier management, import- export logistics management. Logistics outsourcing, 3PL / 4PL, Importance of Insurance, Autonomous vehicles and drones in logistics, Electric vehicles in freight management, Carbon footprint reduction in logistics		
<b>UNIT V</b>	<b>Transactional logistics</b>	<b>8 Hours</b>
Framework and role of supply chain in e- business and b2b practices. Supply Chain IT Framework. International supply chain, GPS, tracking system.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>
<b>Suggested Self Study Topics</b>		
Overview of supply chain models, Coordination in the Supply Chain, New developments in network designs, Reverse logistics, Software Packages in Supply Chain, AI based techniques in supply chain and logistics management, Role of Sustainability Certifications in Supply Chains

24MBP07	Total Quality Management			L	T	P	C		
				3	1	0	4		
Pre-requisite				Assessment Pattern					
<ul style="list-style-type: none"><li>Basic understanding of management concepts.</li><li>Knowledge of quality control and operations management.</li><li>Familiarity with process improvement techniques.</li></ul>				Mode of Assessment		Weightage (%)			
				Continuous Assessment		40			
				Semester End Examinations		60			
Course Objectives									
<ul style="list-style-type: none"><li>To make the students understand the basic concepts of TQM and appreciate its importance in today's business environment.</li><li>To enable them to acquire required diagnostic skills and use various quality tools.</li><li>To familiarize the students about the Quality Management System.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems.								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.								
PO3	Ability to develop Value based Leadership ability.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth								
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment								
Course Outcomes (COs)									
The students will be able to									
CO1	Explain core concepts and analyze the evolution and dimensions of quality within a Total Quality Management framework.								
CO2	Evaluate leadership roles and apply Deming's principles and quality tools like PDSA for effective TQM implementation.								
CO3	Apply process-based approaches and integrate continuous improvement techniques such as Kaizen, Juran's Trilogy, and 5S.								
CO4	Use quality tools like FMEA, Poka-Yoke, and TPM to enhance process reliability and reduce defects.								
CO5	Assess quality management systems such as ISO 9000/14000 and compare global certification practices and standards.								
Articulation Matrix									
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	
CO 1		2			2		3		
CO 2		2		2			3		
CO 3				1			3	3	
CO 4			2				3	3	
CO 5					2		3		
Unit I		Introduction						8 Hours	
Introduction and basic concepts, Definition of quality, Dimensions of quality, Evolution of TQM, TQM frame work, Adoption of AI in quality management, and Role of data analytics in measuring and enhancing quality.									

<b>Unit II</b>	<b>TQM implementation</b>	<b>8 Hours</b>
Leadership for TQM, Deming's quality principle, TQM implementation, PDCA cycle, Quality Circles, Quality Council.		
<b>Unit III</b>	<b>Process approach to TQM</b>	<b>8 Hours</b>
Process approach, Juran's Trilogy, Taguchi's loss function, Kaizen, Quality by design, 5S, ESI (Early Supplier Involvement), Automation of quality processes, AI integration in process optimization, and Predictive maintenance techniques.		
<b>Unit IV</b>	<b>Tools and techniques</b>	<b>8 Hours</b>
7 Old quality control tools, Total productive maintenance, Failure mode and effect Analysis, POKAYOKE, Six Sigma		
<b>UNIT V</b>	<b>Quality management systems</b>	<b>8 Hours</b>
Management systems for TQM, ISO 9000 & 14000 Quality management systems, Auditing and certification Process, Korean and American QMS		
<b>Tutorial</b>		<b>10 Hours</b>
<b>Theory</b>		<b>30 Hours</b>
<b>Total</b>		<b>40 Hours</b>
<b>Suggested Self Study Topics</b>		
Cost of Quality, Supplier Partnership, 5M, Toyota and Six Sigma, Quality Awards.

### PROFESSIONAL ELECTIVES – BUSINESS ANALYTICS

24MBA01	Big Data Analytics	L	T	P	C		
		3	1	0	4		
Pre-requisite		Assessment Pattern					
<ul style="list-style-type: none"><li>Basic Computing Knowledge</li><li>Basics of Database Management and Statistics</li></ul>		Mode of Assessment		Weightage (%)			
		Continuous Assessment		40			
		Semester End Examinations		60			
Course Objectives							
<ul style="list-style-type: none"><li>To understand the computational approaches to big data analytics.</li><li>To understand the various search methods and visualization techniques.</li><li>To learn how to use various techniques for mining data stream and understand the applications using Map Reduce Concepts.</li></ul>							
Programme Outcomes (POs)							
PO1	Apply knowledge of management theories and practices to solve business problems.						
PO2	Foster Analytical and critical thinking abilities for data-based decision making.						
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.						
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment						
Course Outcomes (COs)							
The students will be able to							
CO1	Analyze big data characteristics and tools to overcome limitations of conventional systems in complex decision-making.						
CO2	Design stream processing solutions to handle real-time data using estimation and filtering techniques for analytics.						
CO3	Develop scalable applications using Hadoop and MapReduce to manage and analyze large-scale distributed data sets.						
CO4	Construct big data queries and workflows using Pig, Hive, and HBase to extract insights from complex datasets.						
CO5	Apply regression models and interactive visualization techniques to interpret data and support business forecasting.						
Articulation Matrix							
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO 1	1	2					2
CO 2		3					3
CO 3		2				2	3
CO 4		2				3	3
CO 5		3					2
UNIT I	INTRODUCTION TO BIG DATA					8 Hours	
Introduction to Big Data Platform – Challenges of Conventional Systems – Intelligent data analysis – Nature of Data - Analytic Processes and Tools - Analysis vs Reporting							
UNIT II	MINING DATA STREAMS					8 Hours	
Introduction To Streams Concepts – Stream Data Model and Architecture – Stream Computing - Sampling Data in a Stream – Filtering Streams – Counting Distinct Elements in a Stream – Estimating Moments – Counting Oneness in a Window – Decaying Window - Real Time Analytics Platform (RTAP) Applications - Case Studies - Real Time Sentiment Analysis- Stock Market Predictions							

<b>UNIT III</b>	<b>HADOOP</b>	<b>8 Hours</b>
History of Hadoop- the Hadoop Distributed File System – Components of Hadoop Analyzing the Data with Hadoop- Scaling Out- Hadoop Streaming- Design of HDFS Java Interfaces to HDFS Basics- Developing a Map Reduce Application-How Map Reduce Works-Anatomy of a Map Reduce Job Run-Failures-Job Scheduling-Shuffle and Sort – Task Execution - Map Reduce Types and Formats- Map Reduce Features Hadoop Environment.		
<b>UNIT IV</b>	<b>FRAMEWORKS</b>	<b>8 Hours</b>
Applications on Big Data Using Pig and Hive – Data processing operators in Pig – Hive services – HiveQL – Querying Data in Hive - Fundamentals of HBase and Zoo Keeper - IBM Info Sphere Big Insights and Streams		
<b>UNIT V</b>	<b>VISUALIZATION TECHNIQUES</b>	<b>8 Hours</b>
Predictive Analytics- Simple Linear Regression- Multiple Linear Regression- Interpretation of Regression Coefficients. Visualizations - Visual data analysis techniques- interaction techniques - Systems and applications		
<b>Suggested Self-Study Topics</b> Hybrid Cloud, Application of Artificial Intelligence in Big Data Analytics, Generative AI, Quantum Computing		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

UNIT I		DEEP NETWORKS					8 Hours																																																	
Deep Networks: Modern Practices: Deep Forward Networks: Example: Learning XOR - Gradient-Based Learning - Hidden Units - Architecture Design - Regularization for Deep Learning.																																																								
UNIT II		MODELS					8 Hours																																																	
Optimization for Training Deep Models: How Learning Differs from Pure Optimization - Challenges in Neural Network Optimization - Basic Algorithms - Parameter Initialization Strategies - Algorithms with Adaptive Learning Rates - Approximate Second-Order Methods - Optimization Strategies and Meta-Algorithms.																																																								

<b>UNIT III</b>	<b>INTELLIGENT SYSTEMS</b>	<b>8 Hours</b>
Introduction to Artificial Intelligence: Intelligent Systems - Foundations of AI - Applications - Tic-Tac-Toe Game Playing - Problem Solving: State-Space Search and Control Strategies: Introduction – General Problem Solving - Exhaustive Searches - Heuristic Search Techniques.		
<b>UNIT IV</b>	<b>KNOWLEDGE REPRESENTATION</b>	<b>8 Hours</b>
Advanced Problem-Solving Paradigm: Planning: Introduction - Types of Planning Systems – Knowledge Representation: Introduction - Approaches to Knowledge Representation - Knowledge Representation using Semantic Network - Knowledge Representation using Frames.		
<b>UNIT V</b>	<b>APPLICATIONS</b>	<b>8 Hours</b>
Expert Systems and Applications: Blackboard Systems - Truth Maintenance Systems - Applications of Expert Systems - Machine-Learning Paradigms: Machine-Learning Systems - Supervised and Unsupervised Learnings.		
<b>Suggested Self-Study Topics</b> Auto Encoder, Self-Organizing Map, Boltzmann Machines, Convolutional neural networks (CNNs)		
<b>Theory</b>		<b>40 Hours</b>
<b>Total</b>		<b>40 Hours</b>

24MBA04	Python Programming			L	T	P	C
				3	1	0	4
Pre-requisite				Assessment Pattern			
<ul style="list-style-type: none"><li>Basic Computing Knowledge</li><li>Basics of Statistics and Database Management</li></ul>				Mode of Assessment		Weightage (%)	
				Continuous Assessment		40	
				Semester End Examinations		60	
Course Objectives							
<ul style="list-style-type: none"><li>Preparing the students to use Python Programming for decision making.</li><li>Groom the students to apply appropriate packages and generate solution.</li><li>To learn the Object and Classes.</li></ul>							
Programme Outcomes (POs)							
PO1	Apply knowledge of management theories and practices to solve business problems.						
PO2	Foster Analytical and critical thinking abilities for data-based decision making.						
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.						
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment						
Course Outcomes (COs)							
The students will be able to							
CO1	Develop algorithms and write Python programs using variables, expressions, and basic data types.						
CO2	Construct control structures and apply sequence data structures to implement logic in business applications.						
CO3	Apply modular programming using functions, dictionaries, sets, and recursion for structured problem-solving.						
CO4	Build object-oriented Python programs using classes, inheritance, and packages to model real-world scenarios.						
CO5	Implement file handling, exception handling, and multithreading to enhance system efficiency and reliability.						
Articulation Matrix

CO 1		2					2
CO 2		2					2
CO 3		3					3
CO 4	1	2				2	3
CO 5		3					3
UNIT I	INTRODUCTION						8 Hours
Introduction to Computer Systems – Computer Hardware – Computer Software – Programming Languages – Algorithmic Problem Solving – Building Blocks of a Program – Fundamentals of Python Programming – Syntax and Styles: Data types – Literals – Variable – Operators and Expressions							

<b>UNIT II</b>	<b>DATA COLLECTIONS AND LANGUAGE COMPONENT</b>	<b>8 Hours</b>
Control Flow: If, While, For, Break, Continue, Pass Statements – Entry Controlled Loop – Exit Controlled Loop – Counter Controlled Loop – Condition Controlled Loop – Nested Loops – Sample Programs – Sequences– Lists – Tuples: Need of Tuple – Sequence Unpacking - Methods		
<b>UNIT III</b>	<b>FUNCTIONS AND MODULES</b>	<b>8 Hours</b>
Dictionaries: Making a Dictionary – Basic Operations – Dictionary Operations – Sets – Iterators and Generators – Functions: Introduction – Defining Functions – Calling Functions – Passing Arguments – Keyword Arguments – Default Arguments – Required Arguments – Variable –length Arguments – Return Statement – Nesting of Passing Arguments – Anonymous Functions – Recursive Function – Scope of Local and Global Variable – Sample Programs – Modules		
<b>UNIT IV</b>	<b>OBJECT AND CLASSES</b>	<b>8 Hours</b>
Object Oriented Programming Principles: Class Statement – Class Body – Objects – Class Methods – Self Variable – Class Properties and Instance Properties – Static Method – Data Hiding – Deleting an Object – Constructor – Method Overriding – Inheritance – Packages – Strings and Regular Expressions		
<b>UNIT V</b>	<b>I/O, ERROR HANDLING AND THREADS</b>	<b>8 Hours</b>
Files and Directory Access: Files and Streams – Opening a File – Reading/Writing Operations on a File – Other File Operations – Iterating through Files – Splitting Words – Serialization and De-serialization – Hash files – Directory Access – Errors and Exceptions – Multithreading: Introduction to Thread – Differences between Process and Thread – Threading Module – Thread Synchronization		
<b>Suggested Self-Study Topics</b> NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, SQLAlchemy.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

24MBA05	R Programming				L	T	P	C
					3	1	0	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Basic Computing Knowledge</li><li>Basics of Statistics and Database Management</li></ul>					Mode of Assessment		Weightage (%)	
					Continuous Assessment		40	
					Semester End Examinations		60	
Course Objectives								
<ul style="list-style-type: none"><li>To study the fundamentals of R programming to apply in quantitative analysis.</li><li>To familiarise with R Packages and its applications.</li><li>To equip the students to do the Statistical Analysis and construct Graphs.</li></ul>								
Programme Outcomes (POs)								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Set up the R environment and use its basic structures to read, organize, and visualize business data.							
CO2	Write control statements and functions in R to automate business tasks and iterative processes.							
CO3	Apply data manipulation techniques and basic statistical methods to explore and summarize business data.							
CO4	Construct and evaluate linear models using regression and diagnostics to interpret business relationships.							
CO5	Implement advanced models including time series, clustering, and non-linear models for predictive analytics.							
Articulation Matrix								
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
CO 1			2					2
CO 2			2					2
CO 3			3					3
CO 4			3					3
CO 5			3					3
UNIT I	GETTING STARTED WITH R							8 Hours
Installing R - The R environment - R packages - Basics of R - Data Structures – Reading data into R - Graphics in R								
UNIT II	FUNCTIONS AND STATEMENTS							8 Hours
Writing R functions - Control Statements (if and else, switch, if else, compound tests) - Loops in R (for, while, controlling loops) - Applications using the functions and loops								
UNIT III	DATA MANIPULATION AND ANALYSIS							8 Hours
Group manipulation - Data Reshaping - Manipulating Strings - Basic Statistics using R (Summaries, Correlation, t-tests, ANOVA)								

<b>UNIT IV</b>	<b>LINEAR MODELS USING R</b>	<b>8 Hours</b>
Linear Models - Simple and Multiple regression, GLM - Logit Regression, Model diagnostics - Residuals, Cross validation, Boot strapping		
<b>UNIT V</b>	<b>NON-LINEAR MODELS, TIME SERIES AND CLUSTERING USING R</b>	<b>8 Hours</b>
Nonlinear Models - Non-Linear least square, Splines, Generalised Additive Models, Decision trees, Random forests. Time Series - Autoregressive moving average, VAR, GARCH. Clustering - K means, PAM and Hierarchical Clustering		
<b>Suggested Self-Study Topics</b> Meta R package for data analysis, Data wrangling and manipulation, Data visualization, Data wrangling and manipulation, Time series analysis, Data import, - Machine learning.		
		<b>Theory</b>
		<b>30 Hours</b>
		<b>Tutorial</b>

24MBA06	Social Media Web Analytics				L	T	P	C	
					3	1	0	4	
Pre-requisite					Assessment Pattern				
<ul style="list-style-type: none"><li>Basic Computing Knowledge</li><li>Basics Knowledge of Social Media Platforms and Statistics.</li></ul>					Mode of Assessment		Weightage (%)		
					Continuous Assessment		40		
					Semester End Examinations		60		
Course Objectives									
<ul style="list-style-type: none"><li>To showcase the opportunities that exist today to leverage the power of the web and social media.</li><li>Preparing the students to develop mass communication strategy and campaign.</li><li>Learn the social media polices and web analytics.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems.								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.								
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment								
Course Outcomes (COs)									
The students will be able to									
CO1	Analyze the evolution and influence of social media using social theory and communication models.								
CO2	Design social media strategies to build communities and drive brand engagement in digital platforms.								
CO3	Evaluate social media policies and apply analytics tools to measure campaign performance and audience sentiment.								
CO4	Apply web analytics strategies to track KPIs and derive business insights through data-driven reports.								
CO5	Assess SEO and search behaviours to improve user engagement, interface design, and content optimization.								
Articulation Matrix									
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	
	CO 1	1	2		2				
	CO 2		2			2	2		
	CO 3		3		2			3	
	CO 4		3					3	
	CO 5		3					3	
UNIT I		INTRODUCTION						8 Hours	
Evolution of online communities - History and evolution of social media- Social media vs. traditional media - Social media audience and goals for using social media - Understanding social media: Strong and weak ties – Influencers - How ideas travel – Viralness - Social theory and social media - technological determinism in popular discourse on social media technologies.									

<b>UNIT II</b>	<b>COMMUNITY BUILDING AND MANAGEMENT</b>	<b>8 Hours</b>
Science of social media - Keys to Community Building - Promoting Social Media Pages- Linking Social Media Accounts-The Viral Impact of Social Media-Digital PR-Encourage Positive Chatter in Social Media - Identity in social media: formation of identities, communities, activist movements, and consumer markets - Social Media as business.		
<b>UNIT III</b>	<b>SOCIAL MEDIA POLICIES AND MEASUREMENTS</b>	<b>8 Hours</b>
Social Media Policies-Etiquette, Privacy- ethical problems posed by emerging social media technologies - The road ahead in social media- The Basics of Tracking social media - social media analytics- Insights Gained From Social Media- Customized Campaign Performance Reports - Observations of social media use		
<b>UNIT IV</b>	<b>WEB ANALYTICS</b>	<b>8 Hours</b>
Web Analytics - Present and Future, Data Collection - Importance and Options, Overview of Qualitative Analysis, Business Analysis, KPI and Planning, Critical Components of a Successful Web Analytics Strategy, Web Analytics Fundamentals, Concepts, Proposals & Reports, Web Data Analysis		
<b>UNIT V</b>	<b>SEARCH ANALYTICS</b>	<b>8 Hours</b>
Search engine optimization (SEO), non-linear media consumption, user engagement, user generated content, web traffic analysis, navigation, usability, eye tracking, online security, online ethics, content management system, data visualization, RSS feeds, Mobile platforms, User centered design, Understanding search behaviours		
<b>Suggested Self-Study Topics</b> Sentiment Analysis, Rival IQ, Audience Analysis, Buffer.

24MBA07	Stochastic Modelling		L	T	P	C		
			3	1	0	4		
Pre-requisite			Assessment Pattern					
<ul style="list-style-type: none"><li>Basic Computing Knowledge</li><li>Basics of Mathematics and Statistics</li></ul>			Mode of Assessment		Weightage (%)			
			Continuous Assessment		40			
			Semester End Examinations		60			
Course Objectives								
<ul style="list-style-type: none"><li>To learn the applications of stochastic modelling</li><li>To understand the techniques of stochastic modelling</li><li>Make the students to choose the appropriate models for the business decision making process.</li></ul>								
Programme Outcomes (POs)								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to								
CO1	Analyze stochastic processes and probability distributions to model uncertainty in real-world business systems.							
CO2	Apply discrete-time Markov chains to evaluate state transitions and steady-state behavior in queuing systems.							
CO3	Use continuous-time Markov chains and birth-death processes to model dynamic systems like networks and service queues.							
CO4	Interpret Brownian motion and martingales to solve stochastic differential equations in financial and operational models.							
CO5	Evaluate renewal processes and regenerative processes to analyze long-run behavior in complex queueing and branching systems.							
Articulation Matrix								
		PO1	PO2	PO3	PO4	PO5	PSO1	PSO2
	CO 1		2					2
	CO 2		3					3
	CO 3		3					3
	CO 4		3					3
	CO 5		3					3
UNIT I		INTRODUCTION TO STOCHASTIC PROCESSES					8 Hours	
Basics of probability- random variables and distributions -sequence of random variables; Stochastic process- Definition, classification, Simple stochastic processes								
UNIT II		DISCRETE-TIME MARKOV CHAINS					8 Hours	
Introduction, Definition and Transition Probability Matrix, Chapman-Kolmogorov Equations, Classification of States and Limiting Distributions: Limiting and Stationary Distributions, Limiting Distributions, Ergodicity and stationary distributions-Time Reversible Markov Chain, Application of Irreducible Markov chains in Queueing Models- Reducible Markov Chains								
UNIT III		CONTINUOUS-TIME MARKOV CHAINS					8 Hours	

Definition, Kolmogorov Differential Equation and, Infinitesimal Generator Matrix, Limiting and Stationary Distributions, Birth Death Processes, Poisson processes: M/M/1 Queuing model, Simple Markovian Queueing Models: Applications of CTMC- Queuing networks, Communication systems, Stochastic Petri Nets.		
<b>UNIT IV</b>	<b>BROWNIAN MOTION</b>	<b>8 Hours</b>
Definition and Properties, Processes Derived from Brownian Motion, Stochastic Differential Equation: Martingales: Conditional Expectation and filtration, Definition and simple examples.		
<b>UNIT V</b>	<b>RENEWAL PROCESSES</b>	<b>8 Hours</b>
Renewal Function and Equation, Generalized Renewal Processes, and Renewal Limit Theorems, Markov Renewal and Markov Regenerative Processes, Non-Markovian Queues, Application of Markov Regenerative Processes: Branching Processes, Stationary and Autoregressive Processes		
<b>Suggested Self-Study Topics</b> Metric spaces and topology, large deviations theory Cramér's theorem, large deviations for i.i.d. random variables.		
<b>Theory</b>		<b>30 Hours</b>
<b>Total</b>		<b>40 Hours</b>

UNIT I		UNIVARIATE STATIONARY TIME-SERIES MODELS					8 Hours																																																	
Introduction to stochastic process, stationary processes, Wold’s representation theorem, autocovariance functions, autocorrelation and partial autocorrelation, auto regressive and moving average models, conditions for stationary and invertible process, Box- Jenkins approach, forecasting.																																																								
UNIT II		UNIVARIATE NONSTATIONARY PROCESSES					8 Hours																																																	
Nonstationary process, deterministic and stochastic trends, Integrated process and random walk, random walk with drift, Unit root process-, test for unit root- Dicky Fuller tests, ARIMA process. Fractional integrated process																																																								
UNIT III		MODELING VOLATILITY CLUSTERING					8 Hours																																																	

Volatility-Meaning and measurement, Volatility clustering, Econometric models of volatility, ARCH model, GARCH model and its various extensions, testing for ARCH/GARCH effects		
<b>UNIT IV</b>	<b>MULTIVARIATE STATIONARY AND NON-STATIONARY PROCESSES</b>	<b>8 Hours</b>
Vector autoregressive model, Granger causality, impulse response function, variance decomposition		
<b>UNIT V</b>	<b>MULTIVARIATE NON-STATIONARY PROCESSES</b>	<b>8 Hours</b>
Introduction to cointegration, testing for cointegration: Single-equation approaches: Engle Granger method, Johansen test for cointegration, Vector error correction model		
<b>Suggested Self-Study Topics</b> Time Series Clustering, Anomaly Detection, Traffic Prediction, Data Preprocessing.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

24MBB01	Indian Economy and Indian Financial System				L	T	P	C
					3	1	0	4
Pre-requisite					Assessment Pattern			
<ul style="list-style-type: none"><li>Basic concepts of Economics, Financial Systems</li></ul>					Mode of Assessment		Weightage (%)	
					Continuous Assessment		40	
					Semester End Examinations		60	
Course Objectives								
<ul style="list-style-type: none"><li>To understand the structure of the Indian economy and key economic concepts relevant to the banking and financial sector.</li><li>To analyze the architecture of the Indian financial system and evaluate various financial products and markets.</li><li>To apply knowledge of financial services and regulatory frameworks to assess market dynamics and banking operations.</li></ul>								
Programme Outcomes (POs)								
PO1	Apply knowledge of management theories and practices to solve business problems.							
PO2	Foster Analytical and critical thinking abilities for data-based decision making.							
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.							
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.							
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.							
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment							
Course Outcomes (COs)								
The students will be able to:								
CO1	Evaluate the impact of economic reforms, globalization, and SDGs on strategic business decisions in India’s economic environment.							
CO2	Critically analyze macroeconomic indicators like inflation, GDP, and interest rates to optimize business and policy-level decisions.							
CO3	Interpret the structure and regulations of Indian financial institutions to navigate compliance and funding decisions in business.							
CO4	Design investment strategies by comparing financial products such as bonds, derivatives, and mutual funds across various markets.							
CO5	Integrate market dynamics and financial services like credit rating and merchant banking into strategic financial planning.							
Articulation Matrix								
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	
CO 1	2			3		2		
CO 2		2		3			2	
CO 3	2				3	2		
CO 4		2					3	
CO 5	1	2			3	2		

<b>UNIT I</b>	<b>INDIAN ECONOMIC ARCHITECTURE</b>	<b>8 Hours</b>
An Overview of the Indian Economy, Economic Planning in India, Sectors of the Indian Economy, Role of Priority Sector and MSME in the Indian Economy, Infrastructure including Social Infrastructure, Globalization – Impact on India, Economic Reforms, Foreign Trade Policy, Foreign Investments, and Economic Development, International Economic Organizations (World Bank, IMF, etc.), Climate change, Sustainable Development Goals (SDGs), Issues facing Indian Economy.		
<b>UNIT II</b>	<b>ECONOMIC CONCEPTS RELATED TO BANKING</b>	<b>8 Hours</b>
Fundamentals of Economics, Microeconomics, Macroeconomics, and Types of Economies, Supply and Demand, Money Supply and Inflation, Theories of Interest, Business Cycles, Monetary Policy and Fiscal Policy, National Income and GDP Concepts, Union Budget.		
<b>UNIT III</b>	<b>INDIAN FINANCIAL ARCHITECTURE</b>	<b>8 Hours</b>
Indian Financial System – An Overview, Indian Banking Structure, Banking Regulation Act, 1949, and RBI Act, 1934, Development Financial Institutions, Micro Finance Institutions, Non-Banking Financial Companies, Insurance Companies, Indian Financial System – Regulators & their roles Reforms & Developments in the Banking Sector.		
<b>UNIT IV</b>	<b>FINANCIAL PRODUCTS</b>	<b>8 Hours</b>
Money Markets and Capital Markets, Fixed Income Markets – Debt / Bond Markets, Capital Markets and Stock Exchanges, Forex Markets, Derivatives Market including Credit Default Swaps, Mutual Funds, Insurance Products, Pension Funds (including APY, NPS), Venture Capital, Leasing and Hire Purchase, Real Estate Investment Funds / Infrastructure Investment Fund (REITs/InvITs), Factoring, Forfeiting & Trade Receivables Discounting System (TReDS).		
<b>UNIT V</b>	<b>FINANCIAL SERVICES</b>	<b>8 Hours</b>
Overview of Financial Markets, Interconnection of Various Markets / Market Dynamics, Merchant Banking Services, Credit Rating Agencies & their Functions, Guidelines on Para Banking & Financial Services Provided by Banks.		
<b>Suggested Self-Study Topics:</b> Digital Banking, FinTech Innovations in India, Green Finance, Central Bank Digital Currency, Anti-Money Laundering		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>
<b>Total</b>		<b>40 Hours</b>

UNIT I		ACCOUNTING PRINCIPLES AND PROCESSES					8 Hours	

Definition, Scope, and Accounting Standards including Ind AS, Basic Accountancy Procedures Maintenance of Cash/Subsidiary Books and Ledger, Bank Reconciliation Statement, Trial Balance, Rectification of Errors, and Adjusting & Closing Entries, Depreciation & its Accounting Capital and Revenue Expenditure, Bills of Exchange, Operational Aspects of Accounting Entries Back Office Functions/Handling Unreconciled Entries in Banks, Bank Audit & Inspection.		
<b>UNIT II</b>	<b>COMPANY ACCOUNTS – I</b>	<b>8 Hours</b>
Definition, Types of Companies, Distinction between Partnership and Limited Liability Company, Classes of Share Capital, Issue of Shares, Voting and Non-voting shares.		
<b>UNIT III</b>	<b>COMPANY ACCOUNTS – II</b>	<b>8 Hours</b>
Forms of Balance sheet, General instructions for preparation of balance sheet, General instructions for preparation of statement of Profit and Loss, General instructions for preparation of consolidated Financial Statements, Impact of IND AS on Financial Statements.		
<b>UNIT IV</b>	<b>FINANCIAL MANAGEMENT</b>	<b>8 Hours</b>
Ratio Analysis, Financial Mathematics – Calculation of Interest & Annuities, Financial Mathematics – Calculation of YTM, Financial Mathematics – Forex Arithmetic, Capital Structure and Cost of Capital, Capital Investment Decisions/Term Loans, Equipment Leasing/Lease Financing, Working Capital Management, Derivatives.		
<b>UNIT V</b>	<b>TAXATION AND FUNDAMENTALS OF COSTING</b>	<b>8 Hours</b>
Taxation: Income Tax/TDS/Deferred Tax, Goods & Services Tax, An Overview of Cost & Management Accounting, Costing Methods, Standard Costing, Marginal Costing, Budgets and Budgetary Control.		
<b>Suggested Self-Study Topics:</b> Comparison of Indian GAAP vs Ind AS vs IFRS, Recent Trends in Equity Financing in India, Analysis of a Published Annual Report of a Listed Company, Practical Applications of Ratio Analysis in Credit Rating, Recent Amendments in GST and Their Business Implications.		
<b>Theory</b>		<b>30 Hours</b>
<b>Tutorial</b>		<b>10 Hours</b>

24MBB04	Retail Banking and Wealth Management				L	T	P	C	
					3	1	0	4	
Pre-requisite					Assessment Pattern				
<ul style="list-style-type: none"><li>Basic concepts of Banking</li></ul>					Mode of Assessment		Weightage (%)		
					Continuous Assessment		40		
					Semester End Examinations		60		
Course Objectives									
<ul style="list-style-type: none"><li>To introduce the fundamentals and operational structure of retail banking, including key products, services, and customer engagement strategies.</li><li>To equip students with the knowledge of marketing techniques, technology integration, and CRM practices in retail financial services.</li><li>To develop an understanding of wealth management strategies including investment, risk, retirement, and tax planning tailored for various client profiles.</li></ul>									
Programme Outcomes (POs)									
PO1	Apply knowledge of management theories and practices to solve business problems.								
PO2	Foster Analytical and critical thinking abilities for data-based decision making.								
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.								
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.								
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment								
Course Outcomes (COs)									
The students will be able to:									
CO1	Distinguish between retail and corporate banking operations to evaluate profitability and strategic focus in retail banking.								
CO2	Design suitable retail banking products using customer profiling, credit scoring, and digital technologies for enhanced service delivery.								
CO3	Apply marketing and CRM strategies to optimize customer engagement and service standards in retail banking.								
CO4	Develop personalized wealth management plans integrating risk management, retirement, and estate planning tools.								
CO5	Evaluate advanced wealth management strategies and digital tools to serve high-net-worth individuals and ensure compliance.

### COMPETITIVE EDGE COURSES

24MBX01	Power BI – I	L	T	P	C
		0	0	2	1
Pre-requisite		Assessment Pattern			
<ul style="list-style-type: none"><li>Basic computer knowledge</li></ul>		Mode: Continuous Assessment 100%			
		Assessments		Weightage (%)	
		Mid-Course Evaluation		50	
		End Course Evaluation		50	
		Total		100	
Course Objective					
<ul style="list-style-type: none"><li>To identify the primary components of the Power BI interface, reports, data, and model views.</li><li>To learn how to Import Excel data and build basic visuals and publish a desktop report to the Power BI Service.</li><li>To enable them to understand common challenges in Power BI data models, implement smart solutions, and avoid common mistakes</li></ul>					
Programme Outcomes (POs)					
PO1	Apply knowledge of management theories and practices to solve business problems.				
PO2	Foster Analytical and critical thinking abilities for data-based decision making.				
PO4	Ability to understand, analyze and communicate global, economic, legal, and ethical aspects of business.				
PO5	Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.				
PSO1	Apply core principles of Marketing, Finance, Human Resources, and related disciplines in real-world business scenarios to achieve sustainable growth.				
PSO2	Ability to identify, adopt, and apply the latest analytical tools to thrive in a rapidly evolving data-driven business environment				
Course Outcomes (COs)					
The students will be able to:					
CO1	Distinguish between traditional BI and self-service BI models to evaluate their relevance in modern business environments.				
CO2	Analyze Power BI architecture and its components to optimize business intelligence workflows and reporting.				
CO3	Design interactive dashboards and reports using Power BI Desktop to support real-time data-driven decision-making.				
CO4	Implement cloud-based and on-premise BI solutions to manage organizational data securely and efficiently.				
CO5	Integrate mobile BI tools to enhance data accessibility and executive-level decision support on the go.
