VISION OF THE DEPARTMENT

To be a leading technology and managerial resource for the global growth of the Indian textile industry.

MISSION OF THE DEPARTMENT

- To build and nurture a new generation of textile technologists with the potential to be the future leaders of the textile industry.
- To provide quality education and empower the students and staff with the technical, managerial, entrepreneurial and life-long learning competencies required to attain the vision.
- To impart ethical and value-based education by promoting activities addressing the social needs.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

- I. Analyse the properties of textile materials to enable the selection of materials for different kinds of textile and apparel manufacturing systems.
- II. Compare various technological systems of manufacturing the quality textile materials and apply them for the development of new processes and products.
- III. Demonstrate the management responsibilities related to issues namely social, ethical and environmental and personal aspects of textile industry.

PROGRAMME OUTCOMES (POs)

1. Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
6. Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

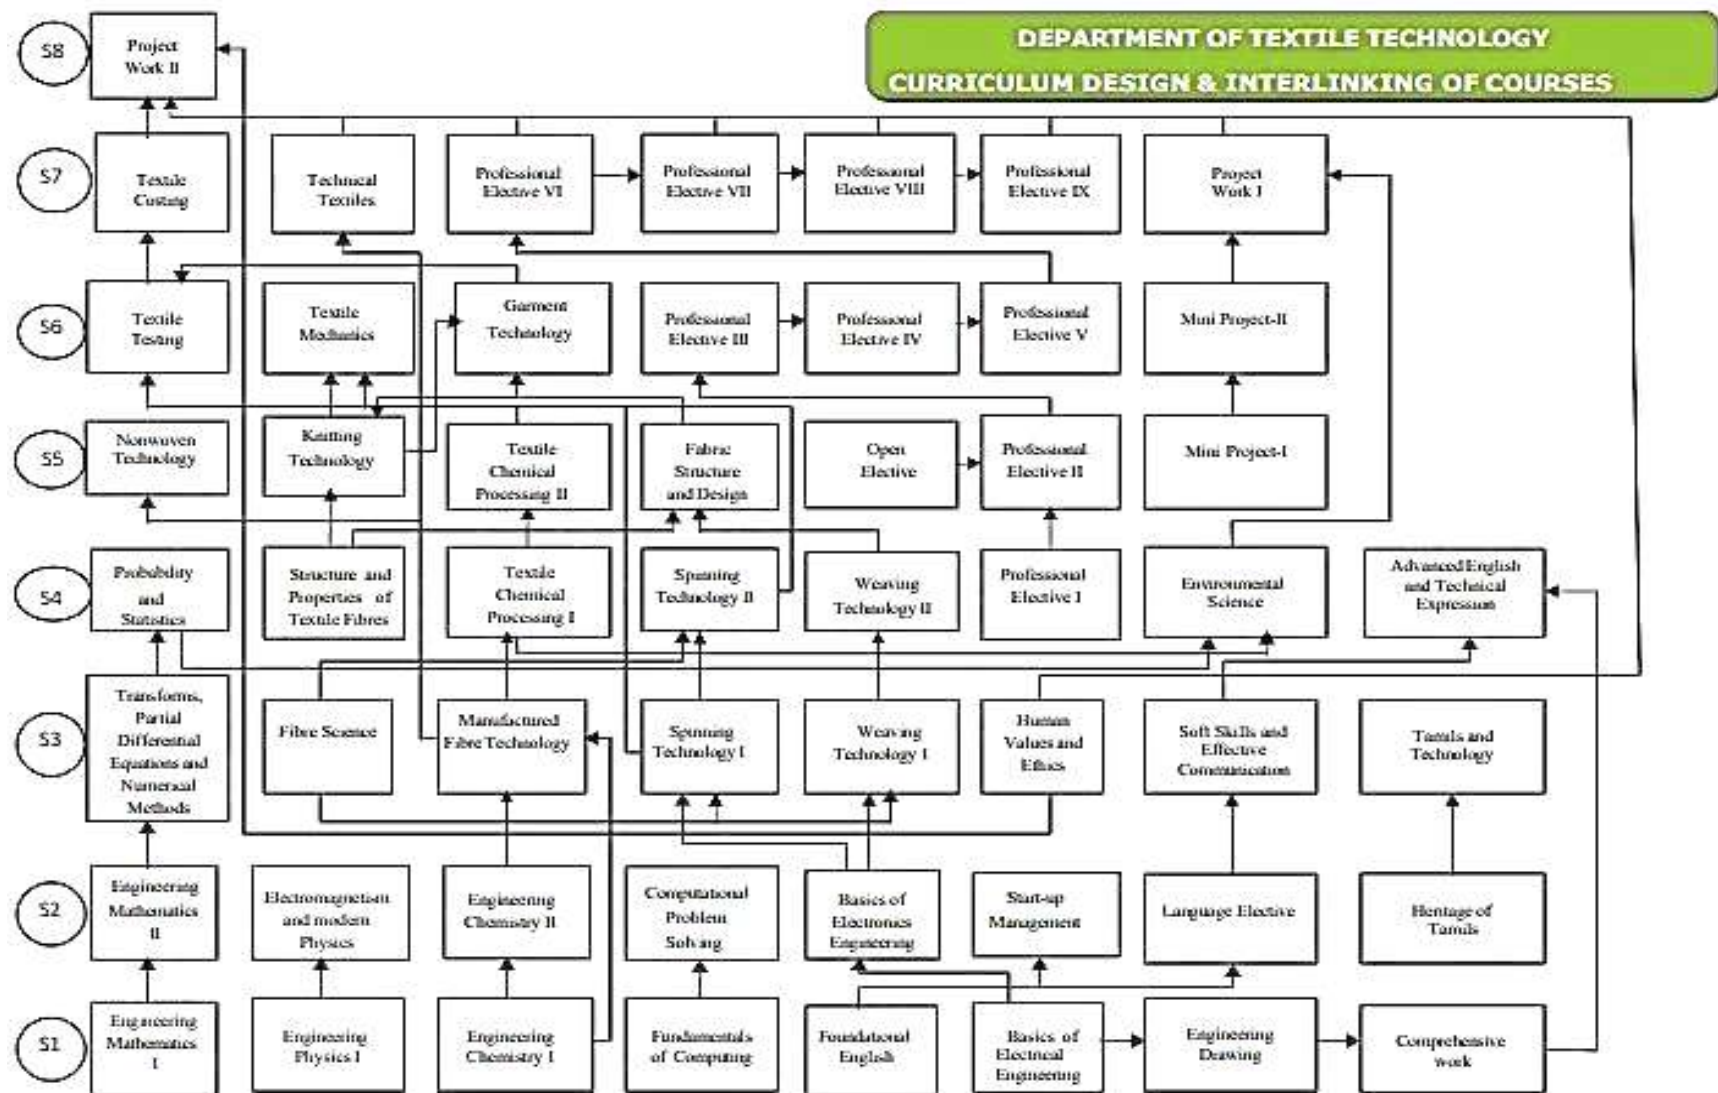

10. Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

1. Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.
2. Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Objectives

- To impart mathematical modelling to describe and explore real-world phenomena and data.
- To provide basic understanding on Linear, quadratic, power and polynomial, exponential, and multivariable models.
- Summarize and apply the methodologies involved in framing the real-world problems related to fundamental principles of polynomial equations.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Implement the concepts of mathematical modelling based on linear functions in Engineering.
2. Assess the real-world problems as a quadratic function model.
3. Execute the real-world phenomena and data into Power and Polynomial functions.
4. Apply the concept of mathematical modelling of exponential functions in Engineering.
5. Create the identification of multivariable functions in the physical dynamical problems.

Articulation Matrix

5	1	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****MATHEMATICS MODELING OF LINEAR FUNCTIONS**

The geometry of linear equations - Formation of linear equations: Method of least squares and method of regression - Vector spaces: Basic concepts with examples - Linear combination - Eigen values and vectors

UNIT II**9 Hours****MATHEMATICAL MODELING OF QUADRATIC FUNCTIONS**

General form of a quadratic function - Basic relationships between the equation and graph of a quadratic function - Sum of squares error and the quadratic function of best fit - Quadratic forms: Matrix form - Orthogonality - Canonical form and its nature

UNIT III**9 Hours****MATHEMATICAL MODELING OF POWER AND POLYNOMIAL FUNCTIONS**

Characteristics of the graphs of power and polynomial functions - Fitting of power and polynomial functions using the method of least squares - Local maxima and local minima of power and polynomial functions - Power series of functions with real variables, Taylors series, radius and interval of convergence - Tests of convergence for series of positive terms - comparison test, ratio test

UNIT IV**9 Hours****MATHEMATICAL MODELING OF EXPONENTIAL FUNCTIONS**

Concept of exponential growth - Graphs of exponential functions - Relationship between the growth factor and exponential growth or decline - Exponential equations have a variable as an exponent and take the form $y = ab^x$ through least square approximation - Calculus of exponential functions - Exponential series - Characteristics

UNIT V**9 Hours****MATHEMATICAL MODELING OF MULTIVARIABLE FUNCTIONS**

Graphing of functions of two variables - Partial derivatives - Total derivatives - Jacobians - Optimization of multivariable functions with constraints - Optimization of multivariable functions without constraints

Tutorial: 15 Hours**Total: 60 Hours****Reference(s)**

1. Erwin Kreyszig, Advanced Engineering Mathematics, Tenth Edition, Wiley India Private Limited, New Delhi, 2016.
2. B. S. Grewal, Numerical Methods in Engineering & Science: With Programs in C, C++ & MATLAB, Khanna Publishers, 2014.

4. Thomas and Finney, Calculus and Analytic Geometry, Fourteenth Edition, By Pearson Paperback, 2018.

Course Objectives

- Understand the concept and principle of energy possessed by mechanical system
- Exemplify the propagation and exchange of energy
- Identify the properties of materials based on the energy possession

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Course Outcomes (COs)

1. Implement the concept and principles of energy to understand mechanical systems
2. Execute the types of mechanical oscillations based on vibrational energy
3. Analyse the concept of propagation of energy as transverse and longitudinal waves
4. Analyze the exchange of energy and work between the systems using thermodynamic principles
5. Apply the concept of energy and entropy to understand the mechanical properties of materials

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	2	1	-	-	-	-	-	2	-	-	-	-	-	-
2	2	1	-	-	-	-	-	2	-	-	-	-	-	-
3	2	1	-	-	-	-	-	2	2	-	-	-	-	-
4	2	1	-	-	-	-	-	2	-	-	-	-	-	-
5	2	1	-	-	-	-	-	2	-	-	-	-	-	-

UNIT I**6 Hours****CONSERVATION OF ENERGY**

Concept of energy - types of energy - conservation of energy Mechanical energy: - translation - rotation - vibration - Kinetic and potential energies - conservation - work and energy - laws of motion - minimization of potential energy - equilibrium - dissipative systems - friction

UNIT II**5 Hours****VIBRATIONAL ENERGY**

Periodic Motion - Simple Harmonic Motion - Energy of the SHM - Pendulum types - Damped oscillations - forced oscillations - natural frequency - resonance

UNIT III **6 Hours**

PROPAGATION OF ENERGY

Transfer of energy - material medium - Transverse wave - Longitudinal wave - standing wave - interference - Doppler effect. Sound waves and its types - characteristics - human voice - reflection - refraction - beats

UNIT IV **7 Hours**

EXCHANGE OF ENERGY

Energy in transit - heat - Temperature - measurement - specific heat capacity and water - thermal expansion - Heat transfer processes. Thermodynamics: Thermodynamic systems and processes - Laws of thermodynamics - Entropy - entropy on a microscopic scale - maximization of entropy

UNIT V **6 Hours**

ENERGY IN MATERIALS

Elastic energy - Structure and bonding - Stress-strain - Tension and compression - elastic limit - Elastic Modulus - Stress - strain diagram - ductility - brittleness - rubber elasticity and entropy

EXPERIMENT 1 **5 Hours**

Determination of resultant of system of concurrent coplanar forces - Parallelogram law of forces.

EXPERIMENT 2 **5 Hours**

Determination of moment of inertia - Torsional pendulum.

EXPERIMENT 3 **5 Hours**

Determination of thickness of a thin wire using interference of light - Air wedge method

EXPERIMENT 4 **4 Hours**

Determination of AC frequency using Melde's apparatus

EXPERIMENT 5 **3 Hours**

Determination of thermal conductivity of a bad conductor using Lees disc method

EXPERIMENT 6 **4 Hours**

Wavelength of ultrasonics in a liquid medium

(ii) velocity of ultrasonic waves in the given liquid

(iii) compressibility of the given liquid using the ultrasonic interferometer

EXPERIMENT 7 **4 Hours**

Determination of Young's modulus of a given material- Non uniform bending method

Total: 60 Hours

Course Objectives

- Understand the origin of elements from the universe
- Outline the properties of elements in the periodic table
- Analyse the different types of bonds formed during chemical reactions and its reaction thermodynamics
- Summarize different states of matter based on atomic arrangement

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Resolve the nuclear transmutation reactions that lead to the formation of elements in the universe
2. Assess atomic structure of elements in the periodic table and interpret the periodic trends in properties of elements with its anomaly
3. Apply the conditions for the formation of different types of chemical bonds and predict the minimum energy required for a reaction to occur
4. Analyse endothermic and exothermic processes and exchange of energy during chemical reactions
5. Analyse whether the given matter is a solid, liquid, gas, or plasma and interpret the arrangement of atoms

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	1	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**5 Hours****ORIGIN OF ELEMENTS**

Hydrogen - Elements and Sun - fusion - hypernova - supernova - dying stars - man-made elements

UNIT II**7 Hours****ATOMIC STRUCTURE AND PERIODICITY**

Atomic Structure - Electronic configuration - Periodic Table - Periodic trends in properties of elements
- Anomalous behaviour in periodicity

UNIT III	6 Hours
CHEMICAL BONDING Octet rule & its limitations - types of chemical bonds - bond energy - bond cleavage - activation energy of reactions	
UNIT IV	6 Hours
REACTION THERMODYNAMICS Conservation of energy - Endothermic reactions & exothermic reactions - Exchange of energy involved in chemical reactions	
UNIT V	6 Hours
STATES OF MATTER Solid - liquid - gas - plasma - quantum dots - arrangement of atoms/ions/molecules in different phases	
EXPERIMENT 1 Lab safety rules and guidelines for students - OSHA Guidelines	2 Hours
EXPERIMENT 2 Estimation of dissolved oxygen content in a water sample(s) by Winkler's method	3 Hours
EXPERIMENT 3 Determination of Fe(II) in a sample using a spectrophotometer	4 Hours
EXPERIMENT 4 Estimation of chromium content in a water sample by volumetric analysis	3 Hours
EXPERIMENT 5 Estimation of chloride present in the given water sample by argentometric method	3 Hours
EXPERIMENT 6 Conductometric titration of mixture of acids	3 Hours
EXPERIMENT 7 Estimation of magnesium ions in given solution by EDTA method	4 Hours
EXPERIMENT 8 Preparation of salt of fatty acid by saponification process	4 Hours
EXPERIMENT 9 Recrystallization of aspirin from water/ethanol	4 Hours

Total: 60 Hours

Course Objectives

- Understand the fundamental digital logics behind computations of computer systems.
- Develop simple assembly language programs with respect to arithmetic operations.
- Understand the program execution process and basics of software development methodologies.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Course Outcomes (COs)

1. Execute the hidden languages and inner structures of computer hardware and software through codes and combinations.
2. Implement the organizational and architectural issues of a digital computer with concepts of various data transfer techniques in digital computers and the I/O interfaces.
3. Analyse programming problems and apply assembly instructions to solve simple problems.
4. Analyse the fundamentals of operating system and System programs basics.
5. Apply the software development methodologies to various real-life scenarios.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	2	1	-	-	-	-	-	-	-	-	-	-

UNIT I**8 Hours****CODES AND COMBINATIONS**

Communication using Mores and Braille binary codes - Digitizing letters, numbers and objects using binary codes - Performing simple operations: addition through binary codes.

UNIT II**9 Hours****COMPUTATION USING COMPUTER**

Communication to computing devices through various input sources - Computational operation - flow, functions and controls - communication to output devices - Basic communication protocol.

UNIT III**11 Hours****ASSEMBLY LANGUAGE PROGRAMMING**

Little Man Computing (LMC) Model - Instruction Set - Labels - Calculation -Branching - Input - Output
- Loops - Simple programs.

UNIT IV**9 Hours****OPERATING SYSTEM AND APPLICATION GENERATION**

BIOS - Device Drivers - Resources - Scheduler - Applications Generation and Creation - Stages of
Compilation - Linkers, Loaders and Libraries.

UNIT V**8 Hours****SOFTWARE DEVELOPMENT**

Phases of application life cycle management - Software Development Methodologies - Web Page
development.

Total: 45 Hours**Reference(s)**

Course Objectives

- Heighten awareness of grammar in oral and written expression
- Improve speaking potential in formal and informal contexts
- Improve reading fluency and increased vocabulary
- Prowess in interpreting complex texts
- Fluency and comprehensibility in self-expression
- Develop abilities as critical readers and writers
- Improve ability to summarize information from longer text, and distinguish between primary and supporting ideas

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

Course Outcomes (COs)

1. Express themselves in a professional manner using error-free language
2. Express in both descriptive and narrative formats
3. Interpret and make effective use of the English Language in Business contexts
4. Actively read and comprehend authentic text
5. Express opinions and communicate experiences.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	-	-	-	-	-	-	-	-	2	3	-	2	-	-
5	-	-	-	-	-	-	-	-	2	3	-	2	-	-

UNIT I**15 Hours****SELF-EXPRESSION**

Self-Introduction-Recreating Interview Scenarios (with a focus on verbal communication)-Subject Verb Concord - Tenses - Common Errors in verbal communication Be-verbs Self-Introduction-Recreating interview scenarios-Haptics-Gestures-Proxemics-Facial expressions- Paralinguistic/ Vocalic- Body Language- Appearance-Eye Contact-Artefacts Self-Introduction-Powerful openings and closings at the interview-Effective stock phrases - Modified for spontaneity and individuality-Question tags, framing questions including WH- questions- Prepositions-Listening to Ted talks-Listening for specific information.

UNIT II**15 Hours****CREATIVE EXPRESSION**

Descriptive Expression-Picture Description and Blog Writing -Vocabulary-One-word substitution-Adjectives-Similes, Metaphors, Imagery & Idioms -Link words - Inclusive language Narrative Expression- Travelogue and Minutes of Meeting -Verbal Analogy-Sequence & Time order words - Jumbled paragraph, sentences, Sequencing-Text & Paragraph Completion-Past tense -Using quotation marks.

UNIT III**15 Hours****FORMAL EXPRESSION**

Formal Letters and Emails-Writing: E-mails and Letters of apology, Requisition and Explanation, and Letters to newspapers-Speaking: Tendering verbal apologies, and explanations, persuading a listener/ audience-Hierarchy in Business correspondence- Subject of a mail, Header, Body (Salutation) and Footer of a mail- Conjunctive clause Punctuation-Formal Idioms-Phrases-Articles - Definite & Indefinite-Types of sentences-Modal verbs Precision in comprehension, Summary writing, Selective summary-Reading: Active reading- short paragraphs, excerpts, articles and editorials-Skimming and Scanning Reading comprehension & analysis- Tenses, QP/ PQ approach. Identifying the central themes/ crux-Interpreting tone - formal/informal/semi-formal-Note-taking-Listening: Listening for data, for specific information, for opinion-Active and passive Listening-Transcription-Paraphrasing and summarizing information-Agreeing & disagreeing-Note-taking-Writing: Summary writing, selective summary, paraphrasing, note-making, opinion pieces-Finding synonyms in the context Paraphrasing-Sentence Transformation - simple, compound, complex. Sentence Substitution-Sentence completion- Interpreting paragraphs

Course Objectives

- To understand the basic concepts of electrical charge and its properties
- To interpret the formation of electric field due to electric charges
- To illustrate the concept of magnetic fields due to revolving electron
- To illustrate the force on moving charges in electric and magnetic field
- To understand the energy transfer in electro mechanical conversion

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Course Outcomes (COs)

1. Execute the behaviour of electric charges in different medium using coulombs law.
2. Analyse the electric field due to different charge distributions.
3. Assess the magnetic field intensity due to long conductor, solenoid, toroid and magnetic dipoles.
4. Analyse the force on conductors due to the moving charges.
5. Apply the energy conversion concepts in electromagnetic fields.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	-	-	-	-	-	-	-	-	2	2	-	-

UNIT I**5 Hours****ELECTRIC CHARGE**

Properties of charge, additivity of charges, quantization of charge, conservation of charge, Forces between multiple charges, Electric charge in conductors, Drift of Electrons, Charges in Clouds.

UNIT II**7 Hours****ELECTRIC FIELD**

Electric field due to system of charges, Significance of Electric field line. Electric Dipole and its significance, Continuous charge distribution, Field in infinite long uniform straight conductors, field in uniform charged uniform infinite plane sheet, field due to uniform thin spherical sheet.

UNIT III**7 Hours****MAGNETIC FIELDS**

Concept of magnetic field, magnetic fields in infinitely long straight wire, straight and toroidal solenoids, Magnetic dipole moment of a revolving electron, Magnetic field intensity due to a magnetic dipole (bar magnet) along its axis and perpendicular to axis, Induced Electric field due to changing Magnetic Field.

UNIT IV**6 Hours****FORCE ON CHARGES**

Force on a moving charge in uniform magnetic and electric fields, Force on a current carrying conductor in a uniform magnetic field, Force between two parallel current carrying conductors.

UNIT V**5 Hours****ELECTRO MECHANICAL ENERGY CONVERSION**

Energy transfer in electromagnetic fields, Energy storage in magnetic field, Electromagnetic induction, induced emf, Eddy currents. Self and mutual inductance Linear Momentum and Angular Momentum carried by Electromagnetic Fields.

EXPERIMENT 1**15 Hours**

Analyse and design of Electromechanical energy conversion system.

EXPERIMENT 2**15 Hours**

Develop an electrical machine and analyse its performance with supplied input of AC from 0 V to 230V.

Total: 60 Hours**Reference(s)**

1. Mathew N. O. Sadiku, Principles of Electromagnetics, 6th Edition, Oxford University, 2020.

Course Objectives

- To provide knowledge on fundamentals of engineering drawings and conic sections.
- To impart skill on orthographic projections of points and lines.
- To familiarize on projection of planes and simple solids.
- To provide knowledge on section of solids and development of surfaces of simple solids.
- To impart skill on conversion of isometric view to orthographic projection and vice versa.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Implement the engineering drawing concepts as per industrial standards.
2. Construct orthographic projections of points and lines.
3. Create the projection of planes and simple solids.
4. Create the section of solids and development of surfaces.
5. Create the orthographic projection from isometric view and vice versa.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	1	-	-	-	-	-	-	2	-	2	-	-	2	-

UNIT I**7 Hours****FUNDAMENTALS OF ENGINEERING DRAWING**

Definition - standards - drawing tools - drawing sheets - scales - line and its types. Practices on lettering - numbering - dimension of drawings. Construction of conic sections - ellipse - parabola and hyperbola using eccentricity method.

UNIT II**9 Hours****PROJECTION OF POINTS AND LINES**

Principles of projection - projection of points in four quadrants - first angle projection of straight lines-perpendicular to one plane - parallel and inclined to both planes.

UNIT III**9 Hours****PROJECTION OF PLANES AND SOLIDS**

Projection of simple planes and projection of simple solids - parallel - perpendicular and inclined to one plane using change of position method - inclined to both the planes.

UNIT IV**9 Hours****SECTION OF SOLIDS AND DEVELOPMENT OF SURFACES**

Section of Solids - simple position with cutting plane parallel - perpendicular and inclined to one plane with true shape of section. Development of surfaces - simple and truncated solids.

UNIT V**11 Hours****ORTHOGRAPHIC PROJECTIONS AND ISOMETRIC VIEW**

Orthographic projections and isometric view of components used in engineering applications.

Course Objectives

- To impart and analyse the concepts of differential equations to describe in real-world phenomena.
- To provide basic understanding on differential equation models and vector field models.
- Summarize and apply the methodologies involved in framing the real-world problems related to fundamental principles of complex functions.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Apply the concept of differential equations through mathematical modelling and analyse its applications in engineering
2. Execute the real-world problems as second order linear differential equations and give solutions for the same
3. Create the real-world phenomena with magnitude and direction in the form of vector functions
4. Apply the concept of vector fields and line integrals through mathematical modelling in engineering
5. Resolve complex functions and apply them to formulate problems arising in engineering

Articulation Matrix

5	3	3	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****FIRST ORDER LINEAR DIFFERENTIAL EQUATIONS**

Formation of differential equations- Solutions of first order linear ODE: Leibnitz's and method of separation of variables - Cooling/Heating of an object - A falling object - Modelling of electric circuits: RL and RC circuits - Modelling of population dynamics: Exponential growth and decay - Logistic growth model.

UNIT II**9 Hours****SECOND ORDER LINEAR DIFFERENTIAL EQUATIONS**

Methods of solving second order linear ordinary differential equations - Models for linear oscillators: Simple harmonic motion - Mechanical vibrations with and without damping - Electric circuit system: RLC circuits.

UNIT III**9 Hours****VECTOR DIFFERENTIAL CALCULUS**

Vector and scalar functions - Fields - Derivative of a vector function and geometrical interpretation - Velocity and acceleration - Gradient and its properties - Tangent and normal vectors - Directional derivative - Divergence of a vector field - Curl of a vector field - Projectile motion.

UNIT IV**9 Hours****VECTOR INTEGRAL CALCULUS**

Line integrals of vector point functions - Surface integral of vector point functions - Applications of line and surface integrals - Greens theorem in a plane - Stokes theorem - Gauss divergence theorem.

UNIT V**9 Hours****COMPLEX FUNCTIONS**

Basic concepts of Complex numbers- Geometrical representation of complex number - Analytic functions and its properties - Construction of Analytic functions: Fluid flow and Electric flow - Mapping of complex functions.

22PH202 ELECTROMAGNETISM AND MODERN PHYSICS

2023

Course Objectives

- Understand the principles and mechanisms of electricity and magnetism
- Infer the classification of electromagnetic waves
- Analyse the theory of relativity and energy bands

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Course Outcomes (COs)

1. Execute the principles and mechanism of electrostatics and current.
2. Implement the principles and mechanism of magneto statics.
3. Organize electromagnetic waves and infer the characteristics of visible light.
4. Outline the importance of theory of relativity and analyse the wave nature of particles.
5. Analyze the electrical properties of semiconductor based on the band theory.

Articulation Matrix

5	2	1	-	-	-	-	-	-	2	-	-	-	-	-

UNIT I

6 Hours

ELECTRICITY

Electric monopoles - Electric field - Electric flux - Electric potential - Electrical energy- Capacitor- Conductors and Insulators - Electric dipole and polarization - Electric current - Voltage sources - Resistance

UNIT II

6 Hours

MAGNETISM

Sources of magnetism - Monopoles - Magnetic field and force - magnetic field and current distribution - Magnetic dipole - Magnetic potential energy - Inductor - Electric and magnetic field comparison

UNIT III

6 Hours

ELECTROMAGNETIC WAVES AND LIGHT

Electromagnetism: Basic laws - Electromagnetic energy - radiation. Electromagnetic waves: Origin, nature and spectrum - Visible light. Principle of least time - Geometrical Optics-Human eye - Diffraction - Interference - Polarization - LASER

UNIT IV **6 Hours**

MODERN PHYSICS

Special theory of relativity - Simultaneity and time dilation - Length contraction - Relativistic mass variation. Matter waves - De-Broglie hypothesis - Wave nature of particles

UNIT V **6 Hours**

ENERGY BANDS IN SOLIDS

Band theory of solids - Classification of materials - Semiconductors - Direct and indirect semiconductor - Fermi energy - Intrinsic and extrinsic semiconductor - Carrier concentration - Electrical conductivity

EXPERIMENT 1 **5 Hours**

Analysis of I-V characteristics of a solar cell for domestic applications.

EXPERIMENT 2 **5 Hours**

Investigate the photonic behavior of laser source for photo copier device.

EXPERIMENT 3 **5 Hours**

Implement the principle of stimulated emission of laser for grain size distribution in sediment samples.

EXPERIMENT 4 **4 Hours**

Assess the variation of refractive index of glass and water for optical communication.

EXPERIMENT 5 **3 Hours**

Evaluate the band gap energy of semiconducting materials for display device applications.

EXPERIMENT 6 **8 Hours**

Determine the carrier concentration of charge carriers in semiconductors for automotive applications.

Total: 60 Hours

Course Objectives

- Understand the concept of electrochemistry for determination of electrode potential, pH and applications as energy storage devices
- Outline the chemistry of metal corrosion and analyse the methods of corrosion control
- Understand the role of catalyst in the rate of reaction
- Summarize the variation in properties and reactivity of isotopes.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Course Outcomes (COs)

1. Apply the electrochemical concepts to determine the electrode potential of a metal.
2. Analyse the working of batteries for the energy storage devices.
3. Execute the mechanism of corrosion and suggest a method to control the corrosion.
4. Implement reaction mechanisms and assess the role of catalyst in a chemical reaction.
5. Analyse various types of nuclear transmutation including decay reactions.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	1	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**6 Hours****ELECTROCHEMISTRY**

Origin of potential - Electromotive force - Electrical double layer - Transport of charge within the cell
- Cell description - Prediction of cell potentials

UNIT II**6 Hours****ENERGY STORING DEVICES**

Relation between electrical energy and energy content of a cell - Reversible and irreversible cell - Charging and discharging reactions in a reversible cell - Current challenges in energy storage technologies

UNIT III	6 Hours
METAL CORROSION AND ITS PREVENTION	
Oxidation of metals: Electrochemical origin of corrosion - Electromigration - Electron transfer in the presence and absence of moisture - Galvanic series. Strategies for corrosion control: Galvanic anode and impressed current.	
UNIT IV	6 Hours
CATALYSIS	
Energy profile diagram for a chemical reaction - activation energy - role of catalyst - homogeneous and heterogeneous catalysis - types	
UNIT V	6 Hours
NUCLEAR REACTIONS	
Radioactive and stable isotopes - Variation in properties between isotopes - Radioactive decay (alpha, beta and gamma) - Half-life period - Nuclear reactions - Radiocarbon dating	
EXPERIMENT 1	4 Hours
Measure industrial effluent water pH and assess water quality against allowed standards.	
EXPERIMENT 2	4 Hours
Iron (Fe^{2+}) in Bhavani River water: Potentiometric Analysis & Pollution Assessment (CPCB Standards).	
EXPERIMENT 3	4 Hours
Construct a Zn-Cu electrochemical cell and validate the output by connecting the LED light.	
EXPERIMENT 4	5 Hours
Evaluate the corrosion percentage in concrete TMT bars.	
EXPERIMENT 5	4 Hours
Determination of the percentage of corrosion inhibition in plain-carbon steel using natural inhibitors using natural inhibitors.	
EXPERIMENT 6	4 Hours
Electroplating of copper metal on iron vessels for domestic application.	
EXPERIMENT 7	5 Hours
Determination of acid-catalyzed hydrolysis kinetics in locally sourced fruit extracts.	
Total: 60 Hours

6. U. Hanefeld, L. Lefferts, Catalysis: An Integrated Textbook for Students, Wiley- VCH, 2017.

Course Objectives

- Analyse the algorithm design techniques and development principles in solving the real-life problems.
- Illustrate the different ways of organizing and storing the data in computing systems.
- Understand the basic network configuration and setup connections among different device systems.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Course Outcomes (COs)

- Analyse a problem and formulate algorithms, pseudocodes and flowcharts.
- Create algorithmic solutions to simple computational problems and explore algorithmic approaches to problem solving.
- Design and apply appropriate data structures for solving computing problems.
- Compare the various storage devices used in a computer system.
- Analyse the requirements for a given organizational structure and establish the connection between two or more computers to form a network.

UNIT I**6 Hours****VISUAL PROCESS MODELING**

Scenario decomposition - Logical sequencing - Drawing flowchart - Preparation of visual process model.

UNIT II**12 Hours****ALGORITHMIC DESIGN THINKING**

Analysis - Verification - Brute force - Divide and conquer - Greedy - Backtracking.

UNIT III**12 Hours****DATA ORGANIZATION**

Elementary Data Organization - Abstract Data Types - Fundamentals of Linear and Non-Linear Data Structures.

UNIT IV**7 Hours****DATA STORAGE**

Flat File and Relational database - Data Read & Write in Local Storage, Server Storage and Cloud Storage - Database Query Methods.

UNIT V**8 Hours****NETWORKING ESSENTIALS**

Networking Components and Services - IP Addressing - Configuring and Managing the Campus Network - Network Security - Firewalls.

5. Behrouz A. Forouzan, "Data Communication and Networking", 5th Edition, Tata McGraw-Hill, 2014.

Course Objectives

- To understand the concept of energy transmission through mechanical, electrical and electromagnetic forms.
- To analyse the use of PN Junction Diode and BJT for signal conditioning.
- To apply the working principle of PN Junction Diode and BJT for the design of basic Digital Logic.
- To analyse the working and characteristics of Special Purpose Semiconductor Electronic Devices.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Course Outcomes (COs)

1. Execute the need for electrical and electromagnetic signal transmission.
2. Analyse the working principle and characteristics of PN junction diode.
3. Analyse the working principle and characteristics of Bipolar Junction Transistor.
4. Apply the working principle of PN Junction diode and BJT for designing basic Digital Logic functions.
5. Analyse the energy conversion needs and working principle of Special purpose electronic devices.

5	3	3	3	1	-	-	-	-	-	-	-	-	-	-

UNIT I

6 Hours

ENERGY TRANSFER AND SIGNALS

Energy Transmission through Mechanical, Electrical and Electromagnetic means, Signal as Energy Transmission, Complexity in signal transmission (Volume of Information, Distance and Time taken), Limitations of Mechanical Energy Transmission, Electrical and Electromagnetic Signal Transmission, Need for Conversion between Electrical and Mechanical Signals.

UNIT II **8 Hours**

SIGNAL CONDITIONING USING DIODE

Need for Vacuum Tubes in the Evolution of Electronics, Overview of Vacuum Tubes, Diode and Triode, Limitations of Vacuum Tubes. Semiconductor Group in Periodic Table, Overview of Semiconductor Materials, Flow of electrical energy through PN Junction Diode, Signal Clipping, Signal Clamping and Signal Multiplication using PN Junction Diode, Limitations of PN Junction Diode.

UNIT III **6 Hours**

SIGNAL CONDITIONING USING TRANSISTOR

Need for controlling electrical signals, Principle of Bipolar Junction Transistor operation, Signal Switching and Amplification using BJT, Limitations of BJT, Principle of Field Effect Transistor operation.

UNIT IV **6 Hours**

LOGIC SYNTHESIS USING DIODE AND TRANSISTORS

Overview of Logic Gates, PN Junction and BJT as electronic switches, Digital Logic Synthesis using Diode and Transistor: Diode Logic, Resistor Transistor Logic, Diode Transistor Logic, Transistor Logic.

UNIT V **4 Hours**

DEVICES FOR SPECIAL REQUIREMENTS

Voltage Regulation using Zener Diode, Variable Capacitance using Varactor Diode, Electrical Energy to Light Energy conversion using Light Emitting Diode, Light to Energy to Electrical Energy conversion using Solar Cell.

EXPERIMENT 1 **4 Hours**

Design a voltage multiplier to convert the low voltage from the mains power supply to the high voltage to operate the microwave oven.

EXPERIMENT 2 **14 Hours**

Design and construct regulated DC power supply for Mobile phone charger.

EXPERIMENT 3 **4 Hours**

Design and construct an audio amplifier circuit to play the mobile music in a huge speaker.

EXPERIMENT 4 **4 Hours**

Design and construct Switching circuit for the Pump to control over flow and drain condition for overhead tank using PN junction diode.

EXPERIMENT 5 **4 Hours**

Design and construct BJT based circuit to implement two-way connection for stair case light application.

Total: 60 Hours

6. Behzad Razavi, Microelectronics, Wiley India Pvt. Ltd.; 2nd edition, 2018.

Course Objectives

- Promote entrepreneurial spirit and motivate to build startups
- Provide insights on markets and the dynamics of buyer behaviour
- Train to develop prototypes and refine them to a viable market offering
- Support in developing marketing strategies and financial outlay
- Enable to scale up the prototypes to commercial market offering

Programme Outcomes (POs)

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Course Outcomes (COs)

1. Generate valid and feasible business ideas.
2. Create Business Model Canvas and formulate positioning statement.
3. Create prototypes that fulfills an unmet market need.
4. Implement business strategies and create pitch decks.
5. Choose appropriate strategies for commercialization.

UNIT I**3 Hours****BUSINESS MODELS AND IDEATION**

Startups: Introduction, Types of Business Modes for Startups. Ideation: Sources of Ideas, Assessing Ideas, Validating Ideas, Tools for validating ideas, Role of Innovation and Design Thinking.

UNIT II	3 Hours
UNDERSTANDING CUSTOMERS	
Buyer Decision Process, Buyer Behaviour, Building Buyer Personas, Segmenting, Targeting and Positioning, Value Proposition (Business Model Canvas), Information Sourcing on Markets, Customer Validation	
UNIT III	3 Hours
DEVELOPING PROTOTYPES	
Prototyping: Methods - Paper and Digital, Customer Involvement in Prototyping, Product Design Sprints, Refining Prototypes	
UNIT IV	3 Hours
BUSINESS STRATEGIES AND PITCHING	
Design of Marketing Strategies and Campaigns, Go-To-Market Strategy, Financial KPIs Financial Planning and Budgeting, Assessing Funding Alternatives, Pitching, Preparing Pitch Decks	
UNIT V	3 Hours
COMMERCIALIZATION	
Implementation: Prototype to Commercialization, Test Markets, Institutional Support, Registration Process, IP Laws and Protection, Legal Requirements, Type of Ownership, Building and Managing Teams, Defining role of investors	
EXPERIMENT 1	1 Hour
Analysis of various business sectors	
EXPERIMENT 2	2 Hours
Developing a Design Thinking Output Chart	
EXPERIMENT 3	1 Hour
Creating Buyer Personas	
EXPERIMENT 4	3 Hours
Undertake Market Study to understand market needs and assess market potential	
EXPERIMENT 5	2 Hours
Preparation of Business Model Canvas	
EXPERIMENT 6	15 Hours
Developing Prototypes	
EXPERIMENT 7	2 Hours
Organizing Product Design Sprints	
EXPERIMENT 8	2 Hours
Preparation of Business Plans	
EXPERIMENT 9	2 Hours
Preparation of Pitch Decks

Course Objectives

- Describe the linguistic diversity in India, highlighting Dravidian languages and their features.
- Summarize the evolution of art, highlighting key transitions from rock art to modern sculptures.
- Examine the role of sports and games in promoting cultural values and community bonding.
- Discuss the education and literacy systems during the Sangam Age and their impact.
- Outline the importance of inscriptions, manuscripts, and the print history of Tamil books in preserving knowledge and culture.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Implement the concept of language families in India, with a focus on Dravidian languages.
2. Create the evolution of art from ancient rock art to modern sculptures in Tamil heritage.
3. Execute and differentiate various forms of folk and martial arts in Tamil heritage.
4. Assess the concepts of Flora and Fauna in Tamil culture and literature.
5. Evaluate the contributions of Tamils to the Indian Freedom Struggle.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	-	-	-	-	-	-	-	-	2	3	-	-	-	-
5	-	-	-	-	-	-	-	-	2	3	-	-	-	-

UNIT I**3 Hours****LANGUAGE AND LITERATURE**

Language Families in India - Dravidian Languages - Tamil as a Classical Language- Classical Literature in Tamil- Secular Nature of Sangam Literature- Distributive Justice in Sangam Literature - Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

UNIT II**3 Hours****HERITAGE - ROCK ART PAINTINGS TO MODERN ART- SCULPTURE**

Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils.

UNIT III**3 Hours****FOLK AND MARTIAL ARTS**

Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

UNIT IV**3 Hours****THINAI CONCEPT OF TAMILS**

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas.

UNIT V**3 Hours****CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE**

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India - Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine - Inscriptions & Manuscripts - Print History of Tamil Books.

பாடத்திட்டத்தின் நோக்கம்

1. இந்திய மொழிக்குடும்பத்துள் திராவிட மொழிகள் தனித்து இயங்கும் தன்மையை அதன் சிறப்புகள் வழி அறிதல்.
2. தொன்றுதொட்டு தமிழர், கலையில் அடைந்த வளர்ச்சியை இயம்புதல்.
3. சங்ககால தமிழரின் கற்றல் திறத்தை இலக்கியங்கள் வழி ஆராய்தல்.

கற்றலின் விளைவு

1. இந்திய மொழிக்குடும்பத்துள் திராவிட மொழிகள் தனித்து இயங்கும் தன்மையை அதன் சிறப்புகள் வழி அறிதல்.
2. தொன்றுதொட்டு தமிழர், கலையில் அடைந்த வளர்ச்சியை இயம்புதல்.
3. சங்ககால தமிழரின் கற்றல் திறத்தை இலக்கியங்கள் வழி ஆராய்தல்.
4. தமிழ் மொழியின் சிறப்புகளை அதன் படைப்பிலக்கியங்கள் மூலம் அறிந்து கொள்ளுதல்.
5. கற்காலம் தொடங்கி, இக்காலம் வரை சிறப்பக்கலை அடைந்த வளர்ச்சியை கண்டுகொள்ளல்.
6. தமிழர் தம் வாழ்வில் எங்கனம் இயற்கையை வணங்கி போற்றினர் என்பதை திணை கோட்பாட்டின் வழி தெளிதல்.
7. இந்திய விடுதலை போரில் தமிழர் ஆற்றிய பங்கினை தெரிந்து கொள்ளுதல்.

அலகு I மொழி மற்றும் இலக்கியம்:

3

இந்திய மொழிக் குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துக்கள் - தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றிலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.

அலகு II மரபு - பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை - சிற்பக் கலை:

3

நடுகல் முதல் நவீன சிற்பங்கள் வரை - ஐம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள், பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் - நாட்டுப்புறத் தெய்வங்கள் - குமரிமுனையில் திருவள்ளுவர் சிலை - இசைக் கருவிகள் - மிருதங்கம், பறை, வீணை, யாழ், நாதஸ்வரம் - தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.

அலகு III நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள்: 3
தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் விளையாட்டுகள்.

அலகு IV தமிழர்களின் திணைக் கோட்பாடுகள்: 3
தமிழகத்தின் தாவரங்களும், விலங்குகளும் – தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் – தமிழர்கள் போற்றிய அறக்கோட்பாடு – சங்ககாலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும் – சங்ககால நகரங்களும் துறை முகங்களும் – சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி – கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி.

அலகு V இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு: 3
இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு – இந்தியாவின் பிறப்பகுதிகளில் தமிழ்ப் பண்பாட்டின் தாக்கம் – சுயமரியாதை இயக்கம் – இந்திய மருத்துவத்தில், சித்த மருத்துவத்தின் பங்கு – கல்வெட்டுகள், கையெழுத்துப்படிிகள் – தமிழ்ப் புத்தகங்களின் அச்ச வரலாறு.

TOTAL : 15 PERIODS

TEXT-CUM-REFERENCE BOOKS

1. தமிழக வரலாறு – மக்களும் பண்பாடும் – கே.கே. பிள்ளை (வெளியீடு: தமிழ்நாடு பாடநூல் மற்றும் கல்வியியல் பணிகள் கழகம்).
2. கணினித் தமிழ் – முனைவர் இல. சுந்தரம். (விகடன் பிரசுரம்).
3. கீழடி – வைகை நதிக்கரையில் சங்ககால நகர நாகரிகம் (தொல்லியல் துறை வெளியீடு)
4. பொருளை – ஆற்றங்கரை நாகரிகம். (தொல்லியல் துறை வெளியீடு)

22TT301 TRANSFORMS, PARTIAL DIFFERENTIAL EQUATIONS AND NUMERICAL METHODS

3 1 0 4

Course Objectives

- To understand the concepts of Fourier series, Transforms and formation of partial differential equations, which will enable them to model and analyze the physical phenomena.
- To understand the methods to solve polynomial equations and implement the ideas of numerical interpolation.
- To apply the numerical techniques to offer an approximate solution for the differential equations in a real-world situation.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Apply Fourier series for the periodic functions to formulate as a combination of sine and cosine functions.
2. Analyse different techniques of Fourier transforms for non- periodic functions.
3. Execute the formation of partial differential equations through various methods.
4. Assess the solution of system of linear equations through various numerical techniques.
5. Implement the numerical solution of initial and boundary value problems of differential equations through different methods.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	1	2	-	-	-	-	-	-	-	-	-	-	-	-
5	1	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I

9 Hours

FOURIER SERIES

Dirichlets conditions - General Fourier series - Odd and even functions - Half range cosine and sine series - Root mean square value - Harmonic analysis.

UNIT II

9 Hours

FOURIER TRANSFORM

Fourier Integral Theorem- Fourier Transforms and Inverse Fourier Transform -Fourier Sine and Cosine Transforms - Properties - Transforms of Simple Functions - Convolution Theorem -Parseval's Identity.

UNIT III**9 Hours****PARTIAL DIFFERENTIAL EQUATIONS**

Formation of Partial Differential Equations by eliminating arbitrary constants and functions - Solutions of Standard types of first-order partial differential equations - LaGrange's linear equation - Linear partial differential equations of second order with constant coefficients of homogeneous type.

UNIT IV**9 Hours****NUMERICAL SOLUTION OF SYSTEM OF EQUATIONS, DIFFERENTIATION AND INTEGRATION**

Solution of algebraic and transcendental equations: Newton- Raphson method -Solution of a system of linear equations: Gauss elimination method - Inverse of a matrix: Gauss-Jordan method- Eigenvalues of a matrix by Power method -Interpolation: LaGrange's interpolation formula - Approximation of derivatives using interpolation polynomials - Numerical integration using Simpsons rule.

UNIT V**9 Hours****NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS**

Solution of first-order ordinary differential equations: Eulers method - Fourth-order Runge- Kutta method -Milnes predictor and corrector method - Solution of partial differential equations: Parabolic equations by Crank Nicholson method- Hyperbolic equations by explicit finite difference method - Poisson equations.

Tutorial: 15 Hours**Total: 60 Hours****Reference(s)**

Course Objectives

- To teach the fundamentals of natural and manmade fibres and their properties.
- To impart knowledge on the identification of various natural and manmade fibres.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Select the origin and production of textile fibres
2. Analyse the production of natural fibres and their physical and chemical properties.
3. Outline the production of regenerated fibres and their properties.
4. Analyse the production of PA and PET fibres and their properties.
5. Analyse the production of special fibres and their properties and Identification of fibres.

Articulation Matrix

5	3	2	2	2	-	-	1	-	1	1	2	1	2	-

UNIT I**9 Hours****NATURAL FIBRES I**

Fibre - Staple fibre - Filament - Yarn -Thread - Fabric and Clothing. Classification of Textile Fibres - basic characteristics of Textile Fibre. Cotton: Evolution of cotton varieties - Genetically modified Cotton - Organic Cotton & Coloured Cotton - Cultivation and harvesting - Chemical composition - Chemical structure - Physical properties - Chemical properties and End uses

UNIT II**9 Hours****NATURAL FIBRES II**

Bast Fibres: Varieties and uses - Flax, Ramie, Hemp, Banana. Jute: Cultivation- Retting -Fibre Extraction - Properties. Wool: Types - Rearing - Shearing - Chemical Composition and Structure - Physical and Chemical Properties - uses. Silk: Sericulture-Types - Reeling - Throwing - Chemical Composition and Structure - Physical and Chemical properties - uses. Leaf fibres: Physical properties - Chemical properties and uses. Fruit fibres: - Physical properties - Chemical properties and End uses

UNIT III**9 Hours****REGENERATED CELLULOSIC AND PROTEIN FIBRES**

Viscose rayon: Principle of manufacture - Physical properties - Chemical properties &End uses. Modification of viscose rayon - Bamboo -Tencel - Modal. Principle of manufacture: Casein fibre- Vicara fibre - Ardil fibre - properties.

UNIT IV**9 Hours****SYNTHETIC FIBRES**

Nylon fibre - Physical and chemical properties - End uses -Polyester - Physical and chemical properties - End uses. Acrylic - Physical and chemical properties - End uses. Polypropylene- Physical and chemical properties. - End uses.

UNIT V**9 Hours****SPECIALITY FIBRES AND IDENTIFICATION OF FIBRES**

Classification of Speciality fibres - Aromatic polyamides - Glass Fibre, Carbon fibres, Super absorbent fibres, elastomeric fibres, ultra-fine fibres, electro spun nano fibres Properties and end uses. Feeling Test - Burning test - microscopic test - Chemical test - Density measurement.

EXPERIMENT 1**4 Hours**

Analyse the physical characteristics and identification of cotton, and silk fibres for Men's sutings.

EXPERIMENT 2**4 Hours**

Analyse the physical characteristics and identification of wool, hemp, and silk fibres for Men's shirting.

EXPERIMENT 3**8 Hours**

Analyse the physical and surface characteristics and also identification of Hemp, Wool, Ramie, Flax, and Silk fibres for Medical Textiles.

EXPERIMENT 4**4 Hours**

Analyse the density of cotton, nylon, carbon, glass, and polyester blended fibres for Industrial applications.

EXPERIMENT 5**4 Hours**

Analyze the cellulosic composition and function groups of cotton, jute, and flax fibres for Kitchen textiles.

EXPERIMENT 6

6 Hours

Analyze the keratin, fibroin, sericin, and polymeric side chains of wool, silk, polyester, and nylon fibres for fishing nets and women's sarees.

Total: 75 Hours

Course Objectives

- To understand the processes involved in manufacturing of manmade fibres.
- To understand the post spinning operations of manmade fibres.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Analyse the fundamental requirements of fibre forming polymers.
2. Implement the principles of synthetic fibre formation and their production techniques.
3. Analyse different morphological and fine structures observed in manufactured fibres (melt and solution spun fibres).
4. Outline the need and importance of post spinning processes and their effects on the properties of manufactured fibres.
5. Apply the need, importance of specialty fibres, properties and specific industry application.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	3	1	2	-	-	-	-	-	-	3	3	-

UNIT I**12 Hours****SPINNING OF MAN-MADE FIBRES**

Selection and homogenization of polymers-mechanical and thermal properties and polymer structure-Fibre spinning techniques based on thermoset, thermoplastic polymer-Melt spinning, Solution spinning (Wet, dry, dry jet wet, liquid crystal, and gel spinning) and their features, Zones of spinning process.

UNIT II**12 Hours****STRUCTURE FORMATION DURING SPINNING**

Structure-property relationship in polymers-tacticity-polymer morphology-crystallinity-phase transitions (first and second order)-factors affecting first order and second order transitions. Structure formation: Melt-Solution spun fibres-crystallinity and orientation. Process variables and their influences-Structural changes during high-speed spinning process.

UNIT III**12 Hours****POST SPINNING OPERATIONS**

Spin finishes- Need and composition of spin finish-spin finish application techniques-spin finish for filament-staple fibre production. Drawing- Need for Drawing-Drawing Unit-Spin-draw process-Draw warping. Heat Setting-Need for heat setting- Structural changes during heat setting-Evaluation methods.

UNIT IV**12 Hours****MASS COLOURATION, TEXTURING AND TOW TO TOP CONVERSION**

Mass colouration in solution and melt spinning system: Methods - selection of colouring materials. Effect of additives in structure and properties of fibres. Texturing: Need -Methods - Detailed study of Draw texturing, friction texturing and air jet texturing, Textured yarn characteristics. Tow-to-top conversion methods.

UNIT V**12 Hours****SPECIALITY FIBRES**

Speciality Fibres: Properties and end-uses. Differentially dyeable polyester and nylon. PLA fibre production. Alternative to viscose fibre process. Bi-component and bi-constituent fibres. Non-circular cross sections and hollow fibres.

Total: 60 Hours**Reference(s)**

5. S. P. Mishra, Fibre Science and Technology, New Age International Publication, 2000.

Course Objectives

- To teach the design, constructional features and working principles of spinning preparation machines.
- To educate on the processing of different types of fibres and their blends.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Execute count calculations; select ginning machines and produce quality lint; select blow room machinery and use for the production of quality card feed material.
2. Assess techniques of producing quality card sliver; select process parameters in carding.
3. Outline the techniques of producing quality draw frame sliver; apply "friction field" theory for control of fibres.
4. Evaluate the techniques of producing quality combed sliver; choose process parameters; apply Gegauf's Noil theory for quality combed material.
5. Outline the techniques of producing quality roving with optimum package build.

5	2	2	2	-	3	-	-	-	-	1	1	1	3	1

UNIT I

9 Hours

GINNING

Ginning: Objectives of ginning, Principles of ginning process and Baling. Different types of ginning machineries: on the basis of product type, technology and feeding. Pre and post ginning operations, ginning faults, Latest developments in ginning

UNIT II

9 Hours

BLOWROOM

Blowroom: blowroom line- sequence of machines, different types of mixing and blending, Principles of opening and cleaning, Design, constructional features and working principles of fine cleaning, blending and card feeding machines, working principles of modern blow room machines, Problems /Faults /Defects in blowroom, blowroom cleaning efficiency, Technological developments.

UNIT III

9 Hours

CARDING

Objectives of carding process, Conventional vs. modern carding machine; Design, Constructional Features and working principles of a modern card and card feeding systems. Processing of cotton, manmade fibres and blends. Mechanism of carding: wire point disposition - fibre configuration, blending, levelling, fibre breakage, hook formation - web formation fibre transfer efficiency and factors affecting fibre transfer. Card settings. Card clothing. Card wire grinding. Principles of autolevellers. Reasons and Remedies of Carding Faults in Spinning, cleaning efficiency, Technological developments.

UNIT IV

9 Hours

DRAWFRAME AND COMBER

Objectives of draw frames Roller arrangements in draw frames and fibre control devices. Top and bottom roller arrangements in drafting systems, characteristics and maintenance - Principles of doubling, roller drawing and drafting. Draft distribution, Periodic mass variation in drawn sliver; Draw frame Autoleveller; Defects of Draw Frame, Technological developments. Comber: Comber preparatory processes: Methods of lap preparation - Lap forming machines. Comber: Objectives, types of combers, Combing cycle - Design, constructional features and working principles of comber machine; Process parameters. Charles Gegauf's Noil Theory. Disposition of the hooks, waste removal, Noil percentage, influence of combing operation on quality, Technological developments.

UNIT V

9 Hours

SPEED FRAME

Objectives - Design, constructional features and working principles of speed frame: Creel - drafting system - top and bottom rollers - top arm drafting system - roller settings - roller weighting systems - Types of flyers - false twister- spindle - bobbin rail and spindle rail - drive to the machine - flyer lead and bobbin lead bobbin builder motion. Processing of cotton, manmade fibres and blends. Automatic doffing. Different faults in the speed frame. Technological developments.

EXPERIMENT 1

4 Hours

Analyze the production calculation of cotton ginning operation on the ginning machine.

EXPERIMENT 2

8 Hours

Analyze the process parameters and calculate the production calculation and cleaning efficiency of the cotton fibres in the blow room.

EXPERIMENT 3**8 Hours**

Analyze the process parameters and calculate the production calculation and cleaning efficiency of the cotton fibre in lap form processed in the carding machine.

EXPERIMENT 4**4 Hours**

Analyze the process parameters and calculate the draft calculation, production calculation and cleaning efficiency of the card sliver processed in the draw frame machine.

EXPERIMENT 5**3 Hours**

Analyze the process parameters and calculate the production calculation and Noil% of the Drawframe sliver processed in the comber machine.

EXPERIMENT 6**3 Hours**

Analyze the process parameters and calculate the draft calculation, production calculation of the Drawframe sliver in the speed frame machine.

Total: 75 Hours**Reference(s)**

6. R. Chattopadhyay, Advances in Technology of Yarn Production, NCUTE, IIT Delhi, 2002.

Course Objectives

- To teach the different preparatory processes in weaving.
- To impart thorough knowledge of the concepts involved in weaving processes.
- To educate on the features of machines required for the different processes.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Compare and contrast the different types of warp and weft winding processes in terms of working principles as well as various important settings.
2. Implement the two different types of warping processes in terms of working principles and applications.
3. Apply the sizing recipes for various fabric constructions and analyse the sizing performance.
4. Resolve the primary, secondary and auxiliary motions of weaving.
5. Outline the working principles of shedding (tappet, dobby, Jacquard and drop box mechanisms), picking and beat-up, let-off and take-up mechanisms.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

2	2	2	2	-	3	-	-	-	-	1	1	1	3	1
3	2	2	2	-	3	-	-	-	-	1	1	1	3	1
4	2	2	2	-	3	-	-	-	-	1	1	1	3	1
5	2	2	2	-	3	-	-	-	-	1	1	1	3	1

UNIT I **9 Hours**

WINDING

Winding - objectives, random and precision winders, elements and functions-unwinding accelerator, tension device, yarn clearer, splicer, waxing, anti-patterning, drum type, link coner, automation. Package types, faults-causes and remedies, Calculations. Winding synthetic and blended yarns, winding for colouration. Pirn winding-objectives, elements and functions.

UNIT II **9 Hours**

WARPING AND DRAWING-IN

Warping - objectives, direct and section warping, elements and functions - creel, stop motion, tension device, warper reed, automation. Section warping-section building and traverse, leasing. process control in warping-control of end breaks, hard waste and beam defects, Speed.

UNIT III **9 Hours**

SIZING

Sizing-objectives, size recipe, elements and functions-creel, sow box, drying zone, yarn splitting, automation. Single-end sizing, Calculations. Sizing of filament yarns, energy conservation in sizing. Beam gaiting, tying-in. Process Control in Sizing: Controls - temperature, level, moisture, stretch. Size pick up and end breaks. combined dyeing and sizing, dead loss in sizing

UNIT IV **9 Hours**

PRIMARY MOTIONS IN SHUTTLE WEAVING

Loom types, timing diagram. Shedding-tappet, dobby and jacquard. Shed geometry, shed types, reversing motions. Picking-over pick and under pick, shuttle flight and timing, shuttle checking. Beat-up-sley kinematics and eccentricity.

UNIT V **9 Hours**

SECONDARY AND AUXILLARY MOTIONS

Take up, let off, warp stop, weft stop, warp protector, weft feelers and Pirn change motions, Dropbox motion. Production and efficiency calculations.

EXPERIMENT 1 **4 Hours**

Analyze the yarn fault in cone and cheese packages. to avoid defects in the shirting fabric.

EXPERIMENT 2 **4 Hours**

Analyze the tensile properties of the yarn before and after sized yarn to withstand the tensile strength during using of shirting fabric.

EXPERIMENT 3 **4 Hours**

Analyze the production and efficiency calculation for course yarn and fine yarn.

EXPERIMENT 4 **3 Hours**

Analyze the cone and pirn characteristics before and after inorder to produce a quality shirting fabric.

EXPERIMENT 5 **3 Hours**

Develop a small section in sectional warping for striped fabric.

EXPERIMENT 6**3 Hours**

Develop a small section in sectional warping for checked design.

EXPERIMENT 7**9 Hours**

Dismantling, assembling and setting of picking and take up mechanism used during weaving for weft thread insertion and winding the fabric in roller respectively to produce a suiting fabric.

Course Objectives

- Understand the concept of good values and comprehend the importance of value-based living.
- Recognize the culture of peace through education.
- Identify and apply the practices for value development and clarification.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Assess the importance of human values and ethics in life.
2. Execute the importance of harmonious living in a diverse society.
3. Analyse the sensitivity to the crying needs of society such as ungodliness, corruption, poverty, and suffering, and play a vital role in eradicating them.
4. Create intellectually mature, morally upright, ethically correct, and spiritually inspired decisions.
5. Execute a correct balance between professional excellence and social commitment.

UNIT I **6 Hours**

COURSE INTRODUCTION - NEED, BASIC GUIDELINES AND ANALYSIS

Importance of Human Values & Ethics in the 21st Century - Understanding the theory of basic human values and ethics - Openness to change - Self enhancement - Conservation - Self-transcendence - Schwartz Value Survey: Self-Assessment

UNIT II **6 Hours**

EMBRACING THE COMMON ETIQUETTE

Altruism- Integrity - Freedom - Justice - Honesty - Truthfulness - Responsibility - Compassion

UNIT III **6 Hours**

CONTINUOUS HAPPINESS AND PROSPERITY

An overview on basic Human Aspirations - Understanding and living in harmony at various levels of life - Embracing self-love and wellness - Understanding harmony in the family and society

UNIT IV **6 Hours**

UNIVERSAL HUMAN VALUES AND PROFESSIONAL ETHICS

Reflection on growing global multifold problems: poverty, pollution, hunger, disease, unemployment, caste system, child labour, gender equality, politics and violence. Understanding the challenges in cultural, personal, social, political, and economic environment

UNIT V **6 Hours**

UNDERSTANDING HARMONY IN THE NATURE AND EXISTENCE - WHOLE EXISTENCE AS CO- EXISTENCE

Understanding the harmony in Nature - Holistic perception of harmony at all levels of existence - Practice Exercises and Case Studies will be taken up in Practice Sessions

Total: 30 Hours

22HS005 SOFT SKILLS AND EFFECTIVE COMMUNICATION

0 0 2 1

Course Objectives

- Communicate proficiently in formal discussions at the workplace.
- Describe experiences and events, and briefly give reasons and explanations for opinions and plans.
- Interact with a degree of fluency and spontaneity that results in efficacious communication
- Convey agreement and disagreement in a polite but firm manner
- Communicate with coherence and imagination in both written and spoken formats

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Enhance confidence in expressing thoughts in grammatically proper language and etiquette in waiting for the opportunity to provide input.
2. Effectively communicate in English on formal occasions and proficiency in the use of link words and other discourse markers.
3. Provide constructive feedback and file logical complaints.
4. Analyse the understanding of oral and written communication in real-world situations.
5. Apply the improved spelling and punctuation in writing and heightened understanding of tone, pitch and stress in oral formats.

UNIT I

10 Hours

SELF-EXPRESSION

Group discussion/ Peer discussion - Communicating decisions and opinions - Tone, Pitch, Stress - Agreeing, Disagreeing, Suggesting, Speculating - Comparing and Contrasting - Comparatives and Superlatives - Discourse markers – Interjections - Decision making - Synthesis - Higher order thinking
Group discussion/Peer discussion - Effective Communication Types of communication - Written vs Spoken - Contractions Intonation Stress Active voice - Question tags - Confidence and body language
Guided writing- Outlining Main Points - Group discussion/Peer discussion - Avoiding common errors
Reduction of MTI - Common errors - Barriers to communication Accent

UNIT II**10 Hours****CREATIVE EXPRESSION**

JAM, Debate, Review writing, Social media posts Synonyms - Antonyms Cloze test Phrasal verbs
Spotting errors Collocation - Commonly mispronounced

UNIT III**10 Hours****FORMAL EXPRESSION**

Writing: Giving written feedback, Review writing, and Letter of complaint. Speaking: Giving constructive feedback and offering suggestions, asking for inputs, commenting politely on appropriate phrases - Giving written feedback, Review writing, and Letter of complaint. Critical reasoning - Modal verbs - Polite ways to express negatives.

Total: 30 Hours**Reference(s)**

5. Personality Development & Soft Skills, Barun K. Mitra, Oxford University Press, 2012.
6. Business English by Ken Taylor, Orient Blackswan, 2011.

Course Objectives

- Analyse graffiti on potteries as a form of historical and cultural documentation during the Sangam Age.
- Investigate the building materials and the historical context of Hero stones during the Sangam Age by analysing the details of stage constructions in Silappathikaram and their cultural significance.
- Examine ancient knowledge of oceans and its impact on Tamil society.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

- Implement the significance of the weaving industry during the Sangam Age and its cultural importance.
- Create the significance of dams, tanks, ponds, and sluices in the agricultural and irrigation practices of the Chola Period.
- Analyse the architectural designs and structural construction methods used in household materials during the Sangam Age.
- Implement the art of ship building in ancient Tamil culture and its role in maritime trade and transportation.
- Execute the development of scientific terminology and vocabulary in Tamil language.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	-	-	-	-	-	-	-	-	2	3	-	-	-	-

UNIT I**3 Hours****WEAVING AND CERAMIC TECHNOLOGY**

Weaving Industry during Sangam Age - Ceramic technology - Black and Red Ware Potteries (BRW) - Graffiti on Potteries.

UNIT II**3 Hours****DESIGN AND CONSTRUCTION TECHNOLOGY**

Designing and Structural construction House and designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age - Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple) - Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period

UNIT III**3 Hours****MANUFACTURING TECHNOLOGY**

Art of Ship Building-Metallurgical Studies-Iron Industry-Iron smelting, steel-Copper and gold-Coins as source of history-Minting of Coins-Beads making-industries Stone beads -Glass Beads-Terracotta beads-Shell beads-bone beads-Archaeological evidences-Gem stone types described in Silappathikaram.

UNIT IV**3 Hours****AGRICULTURE AND IRRIGATION TECHNOLOGY**

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoompu of Chola Period, Animal Husbandry-Wells designed for cattle use- Agriculture and Agro Processing-Knowledge of Sea-Fisheries-Pearl-Conche Diving-Ancient Knowledge of Ocean-Knowledge Specific Society.

UNIT V**3 Hours****SCIENTIFIC TAMIL**

Development of Scientific Tamil-Tamil Computing-Digitalization of Tamil Books-Development of Tamil Software-Tamil Virtual Academy-Tamil Digital Library-Online Tamil Dictionaries-Sorkuvai Project.

Total: 15 Hours**Reference(s)**

அலகு I நெசவு மற்றும் பாணைத் தொழில்நுட்பம்:

3

சங்க காலத்தில் நெசவுத் தொழில் - பாணைத் தொழில்நுட்பம் - கருப்பு சிவப்பு பாண்டங்கள் - பாண்டங்களில் கீறல் குறியீடுகள்.

அலகு II வடிவமைப்பு மற்றும் கட்டிடத் தொழில்நுட்பம்:

3

சங்க காலத்தில் வடிவமைப்பு மற்றும் கட்டுமானங்கள் & சங்க காலத்தில் வீட்டுப் பொருட்களில் வடிவமைப்பு சங்க காலத்தில் கட்டுமான பொருட்களும் நடுகல்லும் - சிலப்பதிகாரத்தில் மேடை அமைப்பு பற்றிய விவரங்கள் - மாமல்லபுரம் சிற்பங்களும், கோவில்களும் - சோழர் காலத்துப் பெருங்கோயில்கள் மற்றும் பிற வழிபாட்டுத் தலங்கள் - நாயக்கர் காலக் கோயில்கள் - மாதிரி கட்டமைப்புகள் பற்றி அறிதல். மதுரை மீனாட்சி அம்மன் ஆலயம் மற்றும் திருமலை நாயக்கர் மஹால் - செட்டிநாட்டு வீடுகள் - பிரிட்டிஷ் காலத்தில் சென்னையில் இந்தோ-சாரோசெனிக் கட்டிடக் கலை.

அலகு III உற்பத்தித் தொழில் நுட்பம்:

3

கப்பல் கட்டும் கலை - உலோகவியல் - இரும்புத் தொழிற்சாலை - இரும்பை உருக்குதல். எஃகு - வரலாற்றுச் சான்றுகளாக செம்பு மற்றும் தங்க நாணயங்கள் - நாணயங்கள் அச்சடித்தல் - மணி உருவாக்கும் தொழிற்சாலைகள் - கல்மணிகள், கண்ணாடி மணிகள் - சுடுமண் மணிகள் - சங்கு மணிகள் - எலும்புத்துண்டுகள் - தொல்லியல் சான்றுகள் - சிலப்பதிகாரத்தில் மணிகளின் வகைகள்.

அலகு IV வேளாண்மை மற்றும் நீர்ப்பாசனத் தொழில் நுட்பம்:

3

அணை, ஏரி, குளங்கள், மதகு - சோழர்காலக் குழுவித் தூம்பின் முக்கியத்துவம் - கால்நடை பராமரிப்பு - கால்நடைகளுக்காக வடிவமைக்கப்பட்ட கிணறுகள் - வேளாண்மை மற்றும் வேளாண்மைச் சார்ந்த செயல்பாடுகள் - கடல்சார் அறிவு - மீன்வளம் - முத்து மற்றும் முத்துக்குளித்தல் - பெருங்கடல் குறித்த பண்டைய அறிவு - அறிவுசார் சமூகம்.

அலகு V அறிவியல் தமிழ் மற்றும் கணித்தமிழ்:

3

அறிவியல் தமிழின் வளர்ச்சி - கணித்தமிழ் வளர்ச்சி - தமிழ் நூல்களை மின்பதிப்பு செய்தல் - தமிழ் மென்பொருட்கள் உருவாக்கம் - தமிழ் இணையக் கல்விக்கழகம் - தமிழ் மின் நூலகம் - இணையத்தில் தமிழ் அகராதிகள் - சொற்குவைத் திட்டம்.

TOTAL : 15 PERIODS

TEXT-CUM-REFERENCE BOOKS

1. தமிழக வரலாறு - மக்களும் பண்பாடும் - கே.கே. பிள்ளை (வெளியீடு: தமிழ்நாடு பாடதூல் மற்றும் கல்வியியல் பணிகள் கழகம்).
2. கணினித் தமிழ் - முனைவர் இல. சுந்தரம். (விகடன் பிரசுரம்).
3. கீழடி - வைகை நதிக்கரையில் சங்ககால நகர நாகரிகம் (தொல்லியல் துறை வெளியீடு)
4. பொருறை - ஆற்றங்கரை நாகரிகம். (தொல்லியல் துறை வெளியீடு)
5. Social Life of Tamils (Dr.K.K.Pillay) A joint publication of TNTB & ESC and RMRL - (in print)
6. Social Life of the Tamils - The Classical Period (Dr.S.Singaravelu) (Published by: International Institute of Tamil Studies).
7. Historical Heritage of the Tamils (Dr.S.V.Subatamanian, Dr.K.D. Thirunavukkarasu) (Published by: International Institute of Tamil Studies).
8. The Contributions of the Tamils to Indian Culture (Dr.M.Valarmathi) (Published by: International Institute of Tamil Studies.)
9. Keeladi - 'Sangam City Civilization on the banks of river Vaigai' (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)
10. Studies in the History of India with Special Reference to Tamil Nadu (Dr.K.K.Pillay) (Published by: The Author)
11. Porunai Civilization (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)
12. Journey of Civilization Indus to Vaigai (R.Balakrishnan) (Published by: RMRL) - Reference Book.

Course Objectives

- Interpret the basic concepts of probability and the distributions with characteristics and also two-dimensional random variables.
- Apply different statistical inference techniques in testing of hypothesis in a real time fashion industry.
- Analyse the design in identifying the suitable product by comparing the characteristics of the material in industries.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Implement the basic probability axioms and concepts, Probability distributions of the random variables in designing process.
2. Execute the relationship and properties of two-dimensional random variables using Correlation techniques in textile manufacturing.
3. Implement the basic statistical inference techniques, including confidence intervals and hypothesis testing to science/engineering problems.
4. Design an experiment for an appropriate situation using ANOVA technique.
5. Compare statistical data in quality control by various control chart techniques.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	1	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****PROBABILITY THEORY**

Axioms of probability - Conditional probability - Bayes theorem - Random variable: Probability mass function - Probability density function: Moment Generating Function-Binomial, Poisson and Normal distributions.

UNIT II**9 Hours****TWO DIMENSIONAL RANDOM VARIABLES**

Joint distributions - Marginal and Conditional distributions -Covariance - Correlation and Regression analysis in textile manufacturing.

UNIT III**9 Hours****TESTING OF HYPOTHESIS**

Sampling distributions - Estimation of parameters -Statistical hypothesis - Large sample test based on Normal distribution for single mean and difference of means -Small sample tests: t-test for mean-F- test - Chi-square test for Goodness of fit and Independence of attributes.

UNIT IV**9 Hours****DESIGN OF EXPERIMENTS**

One way and Two-way classifications -Completely randomized design- Randomized block design - Latin square design.

UNIT V**9 Hours****STATISTICAL QUALITY CONTROL**

Control charts for measurements (X and R charts) - Control charts for attributes (p, c and np charts) - Tolerance limits- Acceptance sampling.

22TT402 STRUCTURE AND PROPERTIES OF TEXTILE FIBRES

3 0 0 3

Course Objectives

- To understand the fundamentals of fibre structure and physical characterization methods.
- To relate the fibre properties such as moisture, mechanical, optical, frictional, electrical and thermal properties in terms of structure of the fibres.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Implement a suitable technique for characterization of a given polymer.
2. Analyse the fibres in terms of physical and chemical structure in relation to their properties.
3. Analyse the fibres in terms of physical properties (moisture, mechanical, electrical and thermal properties).
4. Compare different fibres in terms of physical properties.
5. Resolve suitable fibre(s) for a given end use / requirement.

5	2	2	-	-	-	3	-	-	-	-	2	3	3	-

UNIT I

9 Hours

PHYSICAL STRUCTURE OF FIBRES

Requirements for fibre forming polymers. Fine and morphological structure of Cotton-Flax-Jute-Silk-Wool-Viscose -Polyester-Polyamide-Polyacrylonitrile-Polyolefins. Structural models and their limitations. Investigation methods of fibre structure- Microscopic methods: SEM, TEM, AFM. X-ray diffraction methods, Spectroscopic methods: FTIR. Density measurements.

UNIT II**9 Hours****MOISTURE ABSORPTION PROPERTIES OF FIBRES**

Moisture content and regain - hysteresis - Regain curves. Theories of moisture sorption. Measurement methods of regain and their limitations. Equilibrium absorption of moisture by fibres. Factors influencing moisture regain. Differential and integral heat of sorption - Diffusion equations and their limitations - Diffusion coefficient - Conditioning of fibres - Mechanism of conditioning - Swelling of fibres.

UNIT III**9 Hours****MECHANICAL PROPERTIES OF FIBRES**

Definitions: breaking strength, breaking extension, tensile stress, tensile strain, mass specific stress, yield point, initial modulus, secant modulus, work of rupture and work factor. Stress-strain curves for textile fibres and their explanation. Factors influencing tensile properties of fibres. Elastic properties. Mechanical conditioning of fibres. Visco-elastic properties: Time effects - Dynamic mechanical analysis of fibres. Torsional and flexural rigidity - Measurement techniques.

UNIT IV**9 Hours****OPTICAL AND FRICTIONAL PROPERTIES**

Refractive index of fibres - Measurement and factors influencing the results. Birefringence and optical orientation factor. Reflection of light, Lustre index, factors influencing lustre. Absorption of light - dichroism, dichroic ratio. Structural colour. Fibre friction. Measurement of friction and factors influencing fibre friction. Friction in wool - theory of directional frictional effect.

UNIT V**9 Hours****ELECTRICAL AND THERMAL PROPERTIES**

Conduction, dissociation of ion pairs. Measurement of electrical resistance of fibres. Dielectric properties. Static electricity - Thermal properties - Structural changes in fibres on heating. Thermal transitions. Heat setting. Thermal decomposition of fibres.

Total: 45 Hours**Reference(s)**

4. B. P. Saville, Physical Testing of Textiles, Woodhead Publishing Limited, Cambridge, England, 2000.
5. James F. Shackelford and William Alexander, Materials Science and Engineering, CRC Press LLC, New York, 2001.

Course Objectives

- To understand the preparation of fibre, yarn and fabrics dyeing with machinery required.
- To understand the concept of colour measurement and processes involved in the colouration of textile materials.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Outline process parameters for singeing, desizing and scouring.
2. Implement suitable bleaching and mercerizing methods.
3. Assess the concepts of colour science and methods of measurement of colour parameters.
4. Execute the principles of dyeing and dyeing machines.
5. Create dye recipe, choose dyeing parameters and evaluate fastness properties.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

3	3	2	1	1	1	1	1	-	1	-	-	2	-	3
4	2	1	1	1	1	1	1	-	1	-	-	2	-	3
5	3	2	1	1	1	1	1	-	1	-	-	2	-	3

UNIT I**9 Hours****SINGEING, DESIZING AND SCOURING**

Singeing: methods and application-Desizing: methods and application-Scouring: Saponification-emulsification, detergency-Scouring of cotton-Wool: scouring, Crabbing, Milling and carbonization-Silk: Degumming-Scouring of synthetic materials and blends-working principles of kier-Physical and chemical methods of assessing desized & scoured fabrics-Measurement of residual impurities.

UNIT II**9 Hours****BLEACHING AND MERCERIZING**

Bleaching: hypochlorite - hydrogen peroxide - sodium chlorite - Continuous scouring and bleaching process - Combined scouring and Bleaching - Bleaching of Wool, Silk, and blends - Physical and chemical evaluation of bleached materials. Mercerization: Principles and methods - Liquid ammonia treatment - process conditions - Mercerization of cotton / viscose blends - Mercerizing machines - Assessment of mercerized samples.

UNIT III**9 Hours****COLOUR AND MEASUREMENT**

Colour theory, Concepts and communication of colour-Beer-Lambert Law-Colour Primaries and Colour mixing-Eye and Brain system on colour perception-colour vision tests-C.I.E Method of determining the Tristimulus values-Colour difference equation and measurement-Metamerism-Dichroism- Application of C.C.M. in textile industry-Shade sorting Technique-Whiteness and Yellowness Index. Dyes-properties-Auxochrome, chromophore and common dye structure-dye-fibre interactions- Substantivity-Affinity-Adsorption isotherms. Rate of dyeing and half dyeing time.

UNIT IV**9 Hours****DYEING**

Classification-Properties, Mechanism and Application of Direct, Reactive, Acid, Basic, Vat, Disperse, Sulphur, Azoic and Metal complex dyes. Dyeing of PET, Nylon, Acrylic, Triacetate and protein fibres-Dyeing of blends. Sustainable method of dyeing.

UNIT V**9 Hours****DYEING MACHINES AND DYE FASTNESS**

Construction and working of loose stock, hank and package processing machines, J-box-jigger-winch-jet and soft-over-flow machines-continuous dyeing ranges. Drying cylinders, drying range, IR dryers and relax dryer. Assessment of dyed materials: colour fastness to washing-rubbing (wet and dry)- light-perspiration-sublimation.

EXPERIMENT 1**5 Hours**

Assess the weight loss in the given desired and scoured fabric.

EXPERIMENT 2**5 Hours**

Analyze the barium activity number of the given mercerized fabric.

EXPERIMENT 3**4 Hours**

Analyze the whiteness present in the given hydrogen peroxide and sodium hypochlorite bleached fabric.

EXPERIMENT 4**4 Hours**

Analyze the rubbing and perspiration fastness of the given direct dyed and reactive dyed fabric.

EXPERIMENT 5**4 Hours**

Analyze the light fastness of the vat-dyed and Sulphur-dyed fabric.

EXPERIMENT 6**4 Hours**

Analyze the color fastness of the wool and silk-dyed fabric.

EXPERIMENT 7**4 Hours**

Analyze the sublimation fastness of the given polyester fabric dyed with dispersed dyes.

Total: 75 Hours**Reference(s)**

Course Objectives

- To teach the design, constructional details and working principles of spinning machines (ring frames, alternative spinning systems and post spinning machinery).
- To educate the inter-relationship of the process of conversion of fibres to yarns and the related machinery features.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

- Execute construction and working principles of ring, rotor and jet spinning machines.
- Compare and contrast ring spinning with open-end spinning processes.
- Compare the structural features of yarns produced in ring, rotor and jet spinning processes.
- Compare SIRO, SOLO and Core and wrap spinning technologies and applications.
- Analyse design and working of different types of friction spinning systems and post spinning.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	3	1	1	-	1	-	-	-	2	-	-	1	2	-

UNIT I**9 Hours****RING SPINNING**

Objectives-Design constructional features and working principles of ring frame. Processing of cotton, manmade fibres and blends. Compact spinning-Principle of compacting drafted fibre strand-spinning geometry-different methods of compact yarn manufacture-compact yarn properties. Automation: Bobbin transport systems, Automatic doffing, Link coner-Causes of end breakages, Ring Data systems, Modern developments in ring spinning machine.

UNIT II**9 Hours****ROTOR SPINNING**

Principles of twist insertion- real and false twist-principle of break/open spinning. Design and constructional features of rotor spinning machine-Rotor Drive-Fibre flux density-back doubling-wrapper fibre formation-rotor yarn structure and properties-rotor yarn properties. New developments in rotor spinning.

UNIT III**9 Hours****TOW TO TOP, BULK YARN PRODUCTION AND AIR-JET SPINNING**

Tow to sliver stretch breaking-Tow to sliver cutting methods- machines. Acrylic Bulk yarn production machines and methods. Basic principle-Methods of fascinated yarn manufacture (MJS system)- Developments-Raw material requirements Classification of fascinated yarn structure-Yarn properties-Yarn Quality-Process parameters: Air pressure-draft-delivery rate-ribbon width-feed ratio. Advancements in air-jet spinning: Plyfil Spinning-Vortex spinning, Yarn quality, process parameters and applications.

UNIT IV**9 Hours****CORE YARN SPINNING, SIRO AND SOLO SPINNING, WRAP SPINNING**

Principle - Requirements for core yarn spinning -Methods of core yarn production: Core yarn: Ring - rotor - friction -air-jet spinning. Raw materials. Principle - Yarn manufacture - Yarn characteristics - End uses. Principle - Raw materials - Yarn structure -Properties - Spinning limits and applications. Self-Twisting Principle, Repco Spinning.

UNIT V**9 Hours****FRICTION SPINNING, ADHESIVE SPINNING AND POST SPINNING PROCESS**

Types - Principles of yarn formation - Fibre feed - Fibre assembly - Twist insertion - Yarn withdrawal. Yarn structure - Raw material requirements - Influence of process parameters. Adhesive spinning systems: Twilo and Bobtex processes. Yarn conditioning - Doubling - ring doubling - Two for one twister. Process parameters. Reeling: plain reeling and cross reeling. Bundling and Baling. Structure-property relationship in ring, compact, rotor, air-jet and friction spun yarns.

EXPERIMENT 1**4 Hours**

Assess the measurement and calculation of Speed, draft, twist, and production calculations in 30s ring yarn for sportswear.

EXPERIMENT 2**4 Hours**

Assess the effect of ring frame builder motion parameters on different ring yarn package characteristics for a single jersey fabric.

EXPERIMENT 3**4 Hours**

Assess the effect of roller pressure on producing 30's ring yarn quality for saree fabric.

EXPERIMENT 4**4 Hours**

Assess the setting modifications and end breakage studies in the ring frame for 30s count yarn for tablecloths.

EXPERIMENT 5**4 Hours**

Assess the effect of process parameters for producing 10's rotor yarn in rotor-spinning for denim fabric.

EXPERIMENT 6**4 Hours**

Evaluate the measurement and calculation of production and twist calculation of Two-For-One twister for producing 2-ply yarn in (TFO) for bedsheet material.

EXPERIMENT 7**3 Hours**

Assess the effect of process variables of TFO on producing multiple on two-fold yarn quality for home furnishing fabric.

EXPERIMENT 8**3 Hours**

Calculation of Producing three different counts 6s, 10s and 12s in rotor spinning after changing process parameters for carpet fabric.

6. Peter R. Lord, Handbook of Yarn Production, Technology, Science and Economics, CRC Press publication, New York, 2002.

Course Objectives

- To import knowledge and advantages of using the shuttleless loom.
- To study the various shuttleless machine operations and its working principles.
- To give input on selvedge and storage device functions.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select loom parameters of shuttle looms and projectile looms for the fabric production.
2. Choose type of rapier looms and loom parameters for fabric production.
3. Analyse air quality and quantity requirements in air jet weaving; choose air-jet loom parameters for fabric production.
4. Analyse water quality and quantity requirements for water jet weaving; choose water jet loom and multi-phase loom parameters for fabric production.
5. Select the appropriate storage and selvedge devices for shuttleless weaving machines.

Articulation Matrix

5	2	-	2	3	2	-	-	-	2	-	-	2	3	2

UNIT I	9 Hours
AUTOMATIC LOOMS	
Automatic Loom - Different types - Pirn changing mechanism - Temple and eye cutters - Loom Drives. Types of sheds - Tappet shedding - Dobby shedding: Climax - Cam paper - Rotary -Electronic. Jacquard shedding - Single lift - Double lift - Cross-border - Vincenzi Verdol - electronic jacquard.	
UNIT II	9 Hours
PROJECTILE AND RAPIER WEAVING	
Projectile Weaving Machine: Yarn quality requirements for shuttleless looms - Gripper projectile machines - Working elements and weft insertion cycle in projectile machine - Torsion bar picking mechanism. Rapier Weaving Machines: Types: Rigid and flexible, Single and double rapiers. Principle of tip and loop transfer, Weft insertion cycles. Rapier drives - salient features. Timing diagrams.	
UNIT III	9 Hours
AIR JET WEAVING	
Requirements for sley drive in shuttle less weaving - Air-jet machines - Principle of weft insertion, Nozzle types, Weft Insertion cycle, Profile reed, Yarn and Air quality requirements, Air consumption. Weft selection, measuring and storage devices and working principles.	
UNIT IV	9 Hours
WATER JET AND MULTI PHASE WEAVING	
Water-jet machines: Yarn quality requirements - Principle of weft insertion - Weft insertion cycle - Water quality and quantity requirements. Working principle - Shedding and beat-up mechanisms. Multiphase weaving principle and types - Circular and flat multiphase weaving machine. Shed formation, filling insertion, beat-up.	
UNIT V	9 Hours
SPECIAL WEAVING TECHNIQUES	
Carpet weaving mechanism, 3D weaving mechanism and its types, Narrow width weaving. Braiding: Types and mechanisms. Leno weaving mechanism. Selvages: Half cross leno - Full cross leno - Twisted - Tuck-in - Bonded and fused.	
EXPERIMENT 1	4 Hours
Development of Motif design fabric for Saree cloths.	
EXPERIMENT 2	6 Hours
Development of Dobby design fabric for tablecloths.	
EXPERIMENT 3	4 Hours
Development of Jacquard Design fabric, Peg plan, and Draft in Point paper.	
EXPERIMENT 4	4 Hours
Development of Jacquard design fabric for home textiles.	
EXPERIMENT 5	8 Hours
Development of woven fabric in different weave densities for casual wear.	
EXPERIMENT 6	4 Hours
Development of high EPI/ PPI fabric for suiting cloth.	
Total: 75 Hours

Course Objectives

- Understand the interdisciplinary and holistic nature of the environment.
- Identify the significance of natural resources and environment on the quality of life and stimulate the quest for sustainable development.
- Assess the socio-economic, political and ethical issues in environmental science.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Course Outcomes (COs)

1. Resolve the importance of interdisciplinary nature of environment studies, uses and exploitation of natural resources.
2. Analyse the different types of ecosystems and biodiversity, its values and also role of professionals in protecting the environment from degradation.
3. Assess the existing environmental challenges related to pollution and its management.
4. Select suitable strategies for sustainable management of components of environmental science.
5. Compare the impacts of population and human activities on environment.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	-	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**6 Hours****NATURAL RESOURCES**

Forest resources: Use - over exploitation - deforestation - case studies. Water resources: Use - over utilization of surface and ground water - conflicts over water. Mineral resources: Use - exploitation - environmental effects of extracting and using mineral resources - case studies. Food resources: Effects of modern agriculture - fertilizer - pesticide problems (eutrophication, blue baby syndrome, biomagnification). Energy resources - renewable (solar, wind, and hydro).

UNIT II**6 Hours****ECOSYSTEMS AND BIODIVERSITY**

Concept of an ecosystem: Structure and function of an ecosystem - producers - consumers - decomposers - food chains - food webs and ecological pyramids - Types of ecosystems: Introduction - characteristic features: desert ecosystem. Biodiversity - value of biodiversity - threats to biodiversity - endangered and endemic species - Conservation of biodiversity: In-situ and ex-situ conservation of biodiversity.

UNIT III**6 Hours****ENVIRONMENTAL POLLUTION**

Pollution: Definition - causes - effects - control measures of air pollution - Water pollution - Sewage water treatment by activated sludge and trickling filter process - Noise pollution - Thermal pollution. Disaster management - causes - effects - control measures of floods – Earthquake.

UNIT IV**7 Hours****SOCIAL ISSUES AND ENVIRONMENT**

Sustainable development - Definition - Unsustainable to sustainable development - solid waste management - causes - effects - 5R Principles - landfills, incineration, composting. Water conservation - rain water harvesting - watershed management. Climate change - Global warming - acid rain - Ozone layer depletion. E-waste.

UNIT V**5 Hours****HUMAN POPULATION AND ENVIRONMENT**

Human population: Population growth - characteristics - variation among nations - population explosion - value education - HIV / AIDS. Role of information technology in environment and human health - occupational safety and health administration (OSHA).

Total: 30 Hours**Reference(s)**

Course Objectives

- To enable students to achieve proficiency in academic writing.
- Effectively use the language to persuade others.
- Appreciate the nuances of the language and engage an audience.
- Use advanced tools of language to improve communicative competence.
- Prepare for professional demands at the workplace.
- Give concrete expression to the plans and goals.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Infer the clarity in articulating the objectives and aims and improved proficiency in using the English language.
2. Communicate effectively and with good interpersonal skills; speak in public, engage the audience, and lead a group discussion.
3. Critically evaluate the ethics of persuasive appeals and confidence to influence opinion.
4. Analyse a specific piece of information; take in what is read, and use good writing techniques with proper grammar and syntax in all formal situations.
5. Create awareness and empathy to emotional signals in communication.

Articulation Matrix

UNIT I

15 Hours

CREATIVE EXPRESSION

Proposals & Grant applications, Argumentative essays & editorials, Sales Pitches, Campaigning, Commercials/advertisements, effectively answering the famous interview question: 'Why should we hire you?' Sentence and paragraph formation - Rhetorical questions - Emphasis & effective repetition - Empathetic expression, knowing the audience, capturing attention - Creating Memes, Comic Strips, Stand-up comedy, Caption writing, and Limericks, Vocabulary and slang words for comedy - Similes & Metaphors - Homophones, homonyms, alliteration, word play.

UNIT II
FORMAL EXPRESSION

15 Hours

Writing: Action plans, Cover letters, Mind-Mapping, Paragraph writing Logical reasoning - SVA - Advanced level - Style: Clarity, Concision, Coherence, Evocativeness, Efficacious Vocabulary - Conditional Clause - Be verbs- Tenses- advanced - Opening and closing sentences - Action plans, Anecdotal references, order of communication/ narration, complete communication- Wh-questions - Effective beginning and closing - Rhetorical questions - Appraising target audience - Pronunciation, Enunciation, Tone, Pace and Volume. - Writing: SOPs, Research Objectives, Thesis Statement, Indexing, Scholarly Articles, Academic Writing, Executive Summary, Survey Questionnaires, Citations and Bibliography - Reading: Quantitative & qualitative analysis, Analysis and paraphrasing of reference materials Speaking: Commentate live events, give instructions to operate machines/ conduct experiments Listening: Informational listening, Reflective listening, - Discriminative listening - Connective words - Prefixes and Suffixes - Quoting and paraphrasing Proofreading - Directed writing and writing formats - Note taking - Active verbs.

Total: 30 Hours

Course Objectives

- To understand the fundamentals of various production processes in the manufacture of nonwovens.
- To acquire knowledge on the different methods of finishing nonwoven products.
- To understand the various applications of nonwovens.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Resolve the nonwoven manufacturing processes using natural and chemical fibres.
2. Differentiate different bonding methods used in nonwoven manufacturing process.
3. Implement suitable finishing methods of nonwoven meant for different applications.
4. Evaluate the nonwovens in terms of physical properties.
5. Outline the applications of nonwovens for hygiene and household products.

Articulation Matrix

UNIT I**9 Hours****WEB FORMATION**

Definition of Nonwoven - nonwoven manufacturing processes - nonwoven properties and applications including environmental considerations. Raw materials for the production of nonwoven: natural fibres -animal fibres -chemical fibres. Web forming - Lay process - spun laying. Spun bonding web formation.

UNIT II**9 Hours****BONDING**

Needling: principle - needle characteristics - process variables- fabric properties. Loop formation processes: types - Process variables -fabric properties. Hydro-entanglement process: principle - process variables -Fabric properties. Bonding: Hot air - Heat setting - Thermal calendar -Ultrasound -Chemical - saturation - print. Foam and spray bonding.

UNIT III**9 Hours****FINISHING**

Mechanical finishing: splitting and winding - perforating -drying - compressive finishes, Surface finishes: singeing - shearing - flocking - raising - polishing -softening, Wet finishes: washing - colouration -printing - Application of chemical finishes: types - antistatic agents - antimicrobial or biocidal finishes -flameproof finishes - waterproof finishes - softeners- stiffeners. UV stabilizers.

UNIT IV**9 Hours****TESTING**

Sampling and statistics - Testing conditions -Standards and specifications. Testing of raw materials - finished fabrics. Testing process related to end use: hygiene and medical products - household textiles. Protective clothing and filter fabrics.

UNIT V**9 Hours****APPLICATIONS**

Hygiene - medical-safety -cleaning - household products - home textiles - apparels - technical. Re- utilization of nonwovens - recycling of nonwovens. Techno economic in nonwovens.

Total: 45 Hours**Reference(s)**

Course Objectives

- To educate the students on the basics of knit structures and machines.
- To educate the students on single jersey and double jersey knit structure and its derivatives.
- To educate the students on warp knit structure and its derivatives.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Outline the basic operations of knitting machines.
2. Implement and suggest knitting machinery for a given end use.
3. Analyse pattern mechanisms in flat knitting.
4. Differentiate between warp and weft knitting processes.
5. Attribute warp knitting structural models.

Articulation Matrix

5	3	2	2	-	-	1	-	-	-	-	-	2	3	-

UNIT I**9 Hours****KNITTING FUNDAMENTALS**

Introduction to Knitting, classifications. Weft knitting - Circular-flat-V-bed. Mechanical elements of knitting: Needles types - Sinkers - Cams - Cylinder - Feeder - Take-up. Knitting cycle and yarn path- Structural Elements of Weft Knitting. Single knit and double-knit structures.

UNIT II	9 Hours
WEFT KNITTING	
Basic weft knitting machines, needle operation, fabrics and their characteristics: Plain - Rib - Purl - Interlock and derivatives. Notations and needle gaiting. Intelligent yarn delivery systems - open width fabric production - computerized knitting machines. Quality control-Faults in knitted fabrics and their causes and remedies - dimensional parameters such as stitch length, WPI, CPI, stitch density, GSM, Tightness factor-spirality-Production calculations of weft knitting.	
UNIT III	9 Hours
FLAT KNITTING	
Basic principles- Elements- Manual - Mechanical - Derivatives structures. Jacquard knitting- Pattern wheel, Pattern drum, Tape patterning devices, Jacquard knitting- concept, working and structures- Electronic jacquard knitting- sock knitting.	
UNIT IV	9 Hours
WARP KNITTING	
Comparison of Warp knitting and weft knitting. Basic structural elements of warp knitting. Overlap, under lap closed and open lap stitches. Machine classification - Knitting elements: Tricot - Raschel - Simplex - Multibar machines - Pattern Control Mechanisms - Pattern wheels - Chain links.	
UNIT V	9 Hours
WARP KNITTED STRUCTURES	
Basics - Two bar structures - Full tricot - Locknit - Reverse Locknit - Satin - Raised loop - Queen's cord - Shark skin - Double atlas. Fabric geometry: Dimensional parameters. An energy model of plain knitted fabrics - Dynamics of yarn tension on knitting machines. Application of weft and warp knit fabric in Technical Textiles. Seamless knitting; working and advantages. Knitting speciality yarns	
EXPERIMENT 1	6 Hours
Analyze the structure of Single Jersey and its derivatives in Men's T-Shirt.	
EXPERIMENT 2	4 Hours
Analyze the structure of Rib and its derivatives in men's T-Shirt Collar.	
EXPERIMENT 3	4 Hours
Analyze the structure of Rib and its derivatives in men's T-Shirt cuff.	
EXPERIMENT 4	4 Hours
Analyze the structure of Interlock fabric in dress wear.	
EXPERIMENT 5	4 Hours
Analyze the structure of Interlock fabric derivative in women's skirt outerwear fabric.	
EXPERIMENT 6	4 Hours
Analyze the structure of Warp knit Tricot fabric in women's Lingerie.	
EXPERIMENT 7	4 Hours
Analyze the structure of Warp knit Raschel fabric in men's Jacket.	

Total: 75 Hours

Course Objectives

- To understand printing and finishing of textile materials.
- To analyse the design, constructional and operational features of textile Printing and Finishing machinery.
- To acquire the skills related to printing and finishing of textile materials.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select methods, styles of printing and printing ingredients to carry out printing of textile materials.
2. Choose class of dyes according to the type of textile materials.
3. Evaluate finishing operations on textiles.
4. Assess functional finishes on textiles.
5. Evaluate an effluent treatment plant.

Articulation Matrix

4	2	2	3	1	1	1	1	-	1	-	-	2	-	3
5	3	2	3	1	1	1	1	-	1	-	-	2	-	3

UNIT I**9 Hours****BASICS OF PRINTING OF TEXTILE MATERIALS**

Objectives, styles, methods, auxiliary and specialty chemicals-Ingredients of printing paste-their properties and needs. Synthetic binders, Catalyst, Cross-Linking agents. Selection criteria for binders Printing with Direct-Discharge- Resist. Printing-quality control, Printing with Direct- Reactive-Acid-Disperse-Vat dyes and Pigments. Methods, styles, fixation, and after-treatment processes. Transfer Printing- Principles and methods.

UNIT II**9 Hours****PRINTING MACHINES AND TECHNIQUES**

Roller printing machinery. Screen printing: Automatic flat bed screen-Rotary screen. Thermo transfer printing machinery. Garment printing machines. Steamers-Agers-Curing process. Extraction of water: Hydroextractors-Cylinder drying-Stenters-High frequency stenter. Float dryers-Hot flue dryers-Perforated drum dryers-Heating Systems-Steam- Thermic Fluids-Heat requirement Printing with Pigments, Classification of pigments. Pigment printing of PET and blends. Other advanced printing techniques.

UNIT III**9 Hours****FINISHING**

Mechanical and Chemical Finishing-Durable and non-durable finishes-Softening treatment: mechanism-anionic, cationic, non-ionic, amphoteric, reactive softeners, silicone softeners, PE emulsions-Evaluation, and testing methods. Heat setting (stenter)-Calendering-Sanforising. Application of chemical finishes: padding-low wet pick-up methods (foaming, spraying)- coating and laminating. Drying (cylinder, loop, tumble).

UNIT IV**9 Hours****FUNCTIONAL FINISHES**

Flame retardant finish: Mechanism-Assessment methods of FR finish. Water repellent and waterproof finishes-Wetting- Contact Angle-Assessment methods. Soil release finish: mechanism-Evaluation of soil release. Wash and wear finish: mechanism-cross-linking agents (formaldehyde and non-formaldehyde)-Assessment methods. Mechanism and chemistry: Antistatic finish-UV Protection Finish-Antimicrobial finish- Anti odour finish-Enzymatic treatment (biopolishing).

UNIT V**9 Hours****EFFLUENT TREATMENT**

Textile Effluent: Characteristics, BOD, COD, TDS, and pH. Textile Effluent Treatment: Primary, Secondary and Tertiary methods. Membrane technology, Zero Discharge Method.

EXPERIMENT 1**6 Hours**

Preparation of cotton fabric by removing impurities and make it absorbent to pick up dyes and chemicals in dyeing, printing and finishing.

EXPERIMENT 2**6 Hours**

Production of dyed cotton fabric and evaluation of colour fastness properties to ascertain desirable performance in actual use.

EXPERIMENT 3**6 Hours**

Visual quality enhancement of cotton fabric by Tie and Dye technique.

EXPERIMENT 4**6 Hours**

Value addition of cotton fabrics by different chemical finishes with improved performance in wearing.

EXPERIMENT 5**6 Hours**

Bio-polishing of cotton fabrics by different chemical finishes with improved aesthetic appeal and comforts in wearing.

Total: 75 Hours**Reference(s)**

Course Objectives

- To impart knowledge on different types of fabric structure.
- To give an input on fabric structure analysing skill.
- To understand the design concepts of fabric structures.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Construct the Design, Draft and Lifting Plans of basic weaves of woven fabrics.
2. Resolve the construction, properties and applications of different types of specialty weaves.
3. Apply different types of Jacquards and weaving mechanisms to produce ornamental structures.
4. Attribute the design of different types of pile fabrics and stitching methods of double cloth.
5. Choose the colour and pigment theories to create different colour and weave effects in fabrics.

UNIT I**9 Hours****BASIC WEAVES**

Introduction-methods of representing weave-Elements of fabric design: Design, draft, peg plan, repeat. Plain Weave and its Derivatives-Warp rib, Weft rib, and Matt Weave-Regular and Irregular. Twill weave and its derivatives. Satin and Sateen.

UNIT II	9 Hours
SPECIAL WEAVES	
Ordinary and Brighton honeycomb, Huck-a-back, Mock leno, perforated and distorted mock leno, Crepe weaves. Gauze and Leno weaves: Russian Cord-Net Leno, Madras Muslin structures. Bedford cords-Plain and twill faced, Welts and Piques-Wadded Welts and Pique.	
UNIT III	9 Hours
PILE AND EXTRA THREAD FIGURING	
Pile fabrics: Warp pile, Loose wire pile, Fast wire pile, Terry weaves, Terry stripes, and checks, Weft Pile, Plain back and Twill back velveteen, Lashed Pile, Corduroy, Weft plush. Extra warp and Extra weft figuring.	
UNIT IV	9 Hours
DOUBLE CLOTH	
Classification, types of stitches, self-stitched double cloth, wadded double cloth, centre warp, and weft double cloth. Backed fabrics: Warp and weft backed, Reversible and Non-reversible backed fabrics.	
UNIT V	9 Hours
COLOUR THEORY AND DROP DESIGNS	
Colour theory: Light and Pigment theory, Modification of colour, Applications of colour, Colour and weave effects, Spot figuring, Arrangement of figures, Drop design, Half drop bases, Rectangular design, Diamond design, Sateen system of distribution.	
EXPERIMENT 1	5 Hours
Design and Development of Plain weave, and twill weave structures for shirting, drill fabrics, and children's dress material.	
EXPERIMENT 2	5 Hours
Design and Development of Honeycomb and Huck-a-Back weave structures for hand towel application.	
EXPERIMENT 3	4 Hours
Design and Development of Extra Warp and weft fabric structures for home furnishing and saree materials.	
EXPERIMENT 4	4 Hours
Design and Development of pile structures for terry towels and loop pile carpets.	
EXPERIMENT 5	4 Hours
Design and Development of backed fabric structure for lab overcoat materials and screen cloth.	
EXPERIMENT 6	4 Hours
Design and Development of Bedford cord effect fancy fabrics for bed sheets.	
EXPERIMENT 7	4 Hours
Design and Development of double cloth for sofa cover and Decorative curtain fabrics.	

Total: 75 Hours

Course Objectives

- Identify the problem statement and apply the engineering concepts to find the solution.
- Improve the analysing capability of the students.
- Increase the exuberance in finding the solution to various problems.

Programme Outcomes (POs)

PO1. Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2. Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3. Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4. Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5. Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11. Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Formulate a real world problem, identify the requirement and develop the design solutions.
2. Identify technical ideas, strategies and methodologies
3. Utilize the new tools, algorithms, and techniques that contribute to obtaining the solution of the project.
4. Test and validate through conformance of the developed prototype and analysis of the cost-effectiveness.
5. Prepare the report and present oral demonstrations.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	1	2	-	-	2	-	-	2	2	2	-	-	1	1

Course Objectives

- Select suitable sampling technique for fibres, yarns and fabrics; choose instruments and testing methods for fibres and interpret the results.
- Choose instruments and testing methods for yarns, fabrics and interpret the results.
- Demonstrate knowledge of primary and total hand values; interpret the results of KES modules.
- Choose instruments and testing methods for tensile testing of textile materials and interpret the results.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Apply suitable sampling techniques for fibres, yarn and fabrics.
2. Select appropriate method and test the given yarn samples for physical parameters / characteristics.
3. Select appropriate method and test the given fabric samples for physical properties.
4. Analyse the given test results and infer the conclusions suitable for implementation.
5. Implement the principles involved in testing instruments / equipment used in textile industry and factors influencing the test results.

Articulation Matrix

5	2	2	-	-	3	1	-	2	-	-	-	1	3	-

UNIT I	9 Hours
SAMPLING AND FIBRE TESTING Sampling: Sampling techniques. Precautions in sampling; Sampling of fibres, yarns and fabrics. Sampling errors. Standard test atmosphere, measurement of relative humidity. Moisture content and regain of textile materials: Measurement methods, Drying methods, Limitations. Fibre Length Measurement; Fibre Fineness Measurement. Strength measurement, Measurement of cotton fibre maturity, trash and micro dust. High Volume instruments, Advanced fibre information system.	
UNIT II	9 Hours
YARN TESTING Yarn count systems, measuring instruments; Yarn Twist: Single, Ply, Cord, Measurement, Contraction, Crimp rigidity, tensile strength- single yarn strength, CSP, Unevenness: U%, CV%- Imperfections, mass (variation) diagrams, spectrogram, VL curve. Seldom occurring faults: Classification, Measurement, Analysis. Hairiness: Measurement principles, Interpretation.	
UNIT III	9 Hours
FABRIC TESTING Fabric thickness, Areal density, Crimp, Cover factor, and fabric sett. Fabric Tensile Strength, Principles: CRE, CRL, CRT. Breaking load, breaking extension, Influencing Factors, Tear and Bursting Strength: Dynamic tensile testing. Measurement, Applications. Constant tension transport testing. General Calibration of instruments and equipment. Hand: Stiffness, Flexural rigidity, Drape, Crease recovery and resistance, Abrasion, Pilling, Flex, Permeability: Air, Water vapour, Breathability, Thermal Insulation.	
UNIT IV	9 Hours
GARMENT TESTING Button Strength, Seam puckering, Seam strength, Seam Slippage, size fit, spirality, Appearance, dimensional stability, zip fasters, Garment Inspection-Accepted Quality Level-4-point, 10-point, 2.5-point system. Organic standards and certification-GOTS, Organic clothing Certification, Oeko Tex, Global Recycle standard. Sustainability-EKO standard.	
UNIT V	9 Hours
ADVANCED TESTING AND STANDARDS Primary and total hand value. KES and FAST modules. Fabric scanning systems. Friction: Measurement methods for fibre, yarn, and fabrics. Example Standard testing procedures (from AATCC, ASTM, BIS, BS, DIN, ISO). Labelling standards and methods.	
EXPERIMENT 1	4 Hours
Determination of fibre length using baer sorter method.	
EXPERIMENT 2	4 Hours
Determination of count of yarn.	
EXPERIMENT 3	4 Hours
Fibre fineness by Cut-Weight Method.	
EXPERIMENT 4	3 Hours
Determination of twist in double and single yarn.	

EXPERIMENT 5 To measure Yarn Appearance, Hairiness/yarn imperfections.	3 Hours
EXPERIMENT 6 To measure Yarn twist/Count.	3 Hours
EXPERIMENT 7 To measure Fabric weight (GSM).	3 Hours
EXPERIMENT 8 To measure Fabric Count (Ends/pick, Wales/course).	3 Hours
EXPERIMENT 9 Determination of the single yarn strength and elongation at break of the yarns.	3 Hours

Total: 75 Hours

Course Objectives

- To understand the principles of Mechanics as applied to Textile Machinery.
- To apply mechanics for design of Textile Mechanisms.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Select power transmission systems for textile machinery.
2. Evaluate the types and use of epicyclic gear trains in textile machinery.
3. Design cone-drum based speed control systems and cams/tappets used in textile machinery.
4. Analyze energy and power requirements of textile machine sub-systems.
5. Analyze stress levels in power transmission elements and control systems in textile machinery.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	3	2	-	-	-	-	-	-	-	-	-	-	3	-
5	3	2	-	-	-	-	-	-	-	-	-	-	3	-

UNIT I**9 Hours****POWER TRANSMISSION**

Selection of drives, Flexible drives: Belts-Types, analysis of belt tension, optimum belt velocity for maximum power transmission, contact angles, and belt length. Rigid Drives: Gear Trains-Types, nomenclature, velocity ratio of normal gear trains, force analysis in gear drives. Bearing-Types.

UNIT II**9 Hours****DIFFERENTIAL GEARING**

Types, nomenclature, velocity ratio of epicyclic gear trains, force analysis in gear drives. Differential Gearing in Speed Frame and Comber.

UNIT III**9 Hours****DESIGN OF CONE DRUMS AND CAMS**

Design perspectives. Construction of cone drums - Feed regulation in scutcher and builder motion in Speed Frame. Construction of cams-Ring frame builder motion, tappet shedding motion-Design of winder drums.

UNIT IV**9 Hours****MOMENTS, KINETIC / POTENTIAL ENERGY, POWER CONSUMPTION**

Calendar roller loading, top arm loading, Heald shaft lifting-shuttle movement, Bale handling and lifting, power consumption by ring frame traveller, and picking process.

UNIT V**9 Hours****STRESSES IN TRANSMISSION SHAFTS AND DRAFTING ROLLERS**

Material properties, safety factor, tensile, compressive, shear, bending, and torsional stress. Laws of friction, Application of friction -Tension devices, negative let-off motions, brakes, and clutches. Brakes -Band, block, pivoted double block, internal expanding brake. Clutches - Jaw / Toothed, Friction Clutches - Single Plane, Multi-Plane, Cone Clutches. Centrifugal clutch.

Tutorial: 15 Hours**Total: 60 Hours****Reference(s)**

Course Objectives

- To teach principles and practice of apparel manufacturing.
- To impart knowledge on the effect of equipment on product quality and performance.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select the appropriate fabrics and trims for a garment.
2. Create the concepts of pattern making and grading to cut the fabrics as per the specifications.
3. Evaluate sewing machines and sewing threads and give suitable suggestion for making a given garment.
4. Evaluate appropriate apparel production systems for making various garments.
5. Assess pressing and packing techniques in the production of apparels.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	2	2	3	-	-	-	-	-	-	-	-	-	2	2
5	2	2	3	-	-	-	-	-	-	-	-	-	2	2

UNIT I**9 Hours****INTRODUCTION TO APPAREL MANUFACTURING**

Functional divisions of the apparel industry, Material Evaluation of Fabric, Trims, and Accessories: Receiving and inspecting materials. Fabric inspection-4 points, 10 points. AQL, Types of defects. Common fabric problems for apparel manufacturers.

UNIT II**9 Hours****CUTTING**

Basics of Pattern making and grading, Introduction to cutting -Marker planning: requirements - Efficiency Marker making- Cut order planning. Spreading: Requirements-Methods-Nature of fabric package-Machines. Cutting: requirements-Hand shears- Straight knife- Round knife-Band Knife-Computer Control-Die - Laser-Plasma Torch-Water jet-Quality control in cutting- defects and trouble shooting.

UNIT III**9 Hours****SEWING**

Stitches-properties-Classes, Seams-Properties-Classes. Sewing machine fundamentals-Classification-Stitch forming mechanism-Sewing machine- feed mechanisms-Industrial sewing machine working principle. Sewing threads-Types-Characteristics- Thread Size-Ticket number. Types of needles-Sewing problems- Quality control in sewing- Defects and troubleshooting.

UNIT IV**9 Hours****APPAREL PRODUCTION SYSTEMS**

Plant layout Planning, Apparel production systems-Progressing bundle System (PBS)-Unit Production System (UPS)-Modular Production System (MPS)-Flexible Manufacturing-work flow-Line Balancing Techniques.

UNIT V**9 Hours****PRESSING AND PACKING**

Pressing-purpose of pressing-categories of pressing- pressing equipment and methods- pleating-permanent press- the state of pressing. Packing-types of packing-styles of packing. Final inspection. Support materials: Linings-interlinings-waddings - other materials. Closures: Buttons- zippers- hook-and-loop tapes. Trims: labels-threads-laces-embroidery-tapes.

Course Objectives

- To offer the students a broad overview of costing of textile products.
- To teach method of costing in textile industries.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Analyse the concept of preparation of cost sheet, budget and breakeven analysis.
2. Create cost sheet and cost control in yarn production.
3. Create cost sheet and cost control in fabric production.
4. Analyse cost control in wet processing and calculate the cost of capital in dyeing industry.
5. Calculate the garment cost and shipment cost for the exports of goods.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	3	2	1	3	-	-	2	2	2	-	-	2	-

UNIT I**9 Hours****PRINCIPLES OF COSTING**

Costing- objectives- elements- different costs. Methods: Job- process -absorption- marginal- standard. Cost control and reduction- cost sheet- calculation of cost. Budget- budgetary control- Break even analysis. Profit and Loss account and Balance sheet analysis.

UNIT II**9 Hours****YARN COST**

Material- labour - direct expenses. Over heads: factory- office- selling and distribution. Budget- budgetary controls. Variances: material- labour- Over heads. Cost control in yarn production. Preparation of cost sheet in yarn production.

UNIT III**9 Hours****FABRIC COST**

Material- labour- direct expenses. Over heads: factory-office-selling and distribution. Variances: material- labour- over heads. Preparation of cost sheet in fabric production. Cost control measures in fabric production.

UNIT IV**9 Hours****DYEING COST**

Material- labour- direct expenses. Overheads: factory- office- selling and distribution. Variance: material-labour -over heads. Cost control in wet processing- preparation of cost sheet. Cost of capital, IRR, DRC, DSCR, ERR, payback period.

UNIT V**9 Hours****GARMENT COST**

Material- labour - direct expenses (trimmings) over heads factory: office- selling and distribution. Variance: material- labour - overheads. Effects of width, designs and lot size on cost - shipment cost - preparation of cost sheet in garment production, Duty drawback.

3. G. Shanmugam and T. Sivasankaran, Costing in Textile and Garment Industry-NCUTE Publication, 2002.

Course Objectives

- To provide an overview on the application of technical textiles.
- To teach the manufacturing processes of a few important technical textiles.
- To educate on the physical and chemical properties of technical textiles.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Evaluate the different sectors of textile industry and their role in the economy.
2. Assess contribution of various sectors of textile industry to nation's economy.
3. Critique the efforts taken by the Government of India for the growth of Indian Textile Industry.
4. Plan for the utilities in the various sectors of textile Industry.
5. Apply personnel management principles in textile industry.

Articulation Matrix

5	2	2	3	1	1	-	2	-	2	1	-	3	2	3

UNIT I**9 Hours****TECHNICAL FIBRES AND COMPOSITES**

Classification and major applications of technical textiles, Introduction to high performance fibres (organic/inorganic) used for high modulus, thermal and chemical resistance. Market potential of Indian technical textiles in different sectors. Brief idea about technical fibres, role of yarn and fabric construction, composite material, Reinforcement fibres, matrix materials, Classification of textile reinforcement structure.

UNIT II**9 Hours****MEDICAL AND HEALTHCARE TEXTILES**

Classification of medical textiles, Fibres used and Basic requirements for medical textiles. Detailed study and application of textiles in: implantable, non-implantable and extracorporeal devices. Healthcare and hygienic products: face masks, PPE kits, incontinence products etc.

UNIT III**9 Hours****PROTECTIVE TEXTILES**

Brief idea about different types of protective clothing: Waterproof fabrics, breathable fabrics, Chemical protection, Fire protection, Heat and cold protection, Ballistic protective clothing and parachute cloth, Shear Thickening Fluids, Camouflage textiles, NBC protection, Nuclear protective fabrics. Sports and recreation textiles: Functional requirement of different types of products and their construction.

UNIT IV**9 Hours****FILTRATION AND GEOTEXTILES**

Filtration textiles: Definition of filtration parameters, theory of dust collection and solid liquid separation, filtration requirements, concept of pore size and particle size, role of fibre, fabric construction and finishing treatments. Geotextiles: Brief idea about geosynthetics and their uses, essential properties of geotextiles, geotextile testing and evaluation, application examples of geotextiles.

UNIT V**9 Hours****INDUSTRIAL TEXTILES**

Automotive Textiles: Application of textiles in automobiles, requirement and design for different tyres, airbags and belts, Seat belts and liner fabrics. Textiles for aircrafts methods of production and properties of textiles used in these applications. Functional requirements and types of textiles used for paper making, agricultural, electronics, power transmission belting, hoses, canvas covers and tarpaulins. Sewing threads, cords and ropes: Types, method of production and applications, functional requirements, structure and properties.

Total: 45 Hours

6. Jarmila Svedova, Industrial Textiles, Elsevier Science Publishing Co Inc. New York, 2001.

Course Objectives

- Work in teams to propose, formulate, and solve a challenging open-ended design problem of significant scope, depth, and breadth.
- Understand and incorporate engineering standards and multiple realistic constraints, within realistic design time, budget, and performance objectives.
- Develop a prototype of the proposed design and demonstrate the prototype in accordance with the specifications.
- Effectively communicate information relating to all aspects of the design process in written, oral, and graphical form.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Formulate a real world problem, identify the requirement and develop the design solutions.
2. Identify technical ideas, strategies and methodologies.
3. Utilize the new tools, algorithms, techniques that contribute to obtain the solution of the project.
4. Test and validate through conformance of the developed prototype and analysis the cost effectiveness.
5. Prepare a report and present the oral demonstrations.

5	2	2	-	-	2	-	-	3	3	3	-	2	3	3

Course Objectives

- Command over the English language for day-to-day transactions.
- Improve listening and reading skills.
- Increase ability to comprehend complex content.
- Enhance confidence in expressing with clarity and elegance.
- Enthusiastic and reflective use of the language through sufficient and focused practice.
- Articulate fluently and confidently in challenging situations.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Course Outcomes (COs)

1. Engage with the English language in functional contexts.
2. Express in both descriptive and narrative formats.
3. Interpolate and make effective use of the English Language in Business contexts.
4. Actively read and comprehend authentic text.
5. Express opinions and communicate experiences.

UNIT I**15 Hours****SELF-EXPRESSION**

Personal Goals and Values - Being a Team Player-Expressing strengths and weaknesses-Abstract nouns - Adjectives-Active Listening Skills-Note making -Pronunciation and Accent. Personal goals and values - Reading for Gist and Details-Professional Ethics-Reported Speech-Conjunctions. Reading skills - phonemics, word/phrase recognition, sight words. Personal Goals and Values-Conditional clauses-Hypothetical questions and answers-Sentence Structure-Simple Present Tense-Perfect tense.

UNIT II**15 Hours****CREATIVE EXPRESSION**

Instructive and Expository Expression - Creating brochures, catalogues, and manuals for products/ services, Giving directions, Process writing, Sequencing experiments, Concept Explanation-Reported speech-Voice Sentence Equivalence-Proof reading.

UNIT III**15 Hours****FORMAL EXPRESSION**

Notices and Announcements-Writing: Creating notices and circulars for events, announcing college tours and lost and found-Variety Vocabulary - Gender Sensitive Vocabulary, Non-discriminatory Vocabulary, Concise Vocabulary-Paragraph writing - Effective titles, topics and supporting sentences, calling in registrations and queries. Effective communication- Understanding purpose, reach and target audience, achieving complete communication. Punctuation - Capitalization, Numeration, Use of proper nouns and articles-Spelling-Reading: Analysing and interpreting notices and circulars-Understanding the gist of short real-world notices, and messages. Culling out keywords. Information words vs Supporting Words-Interpreting Abbreviations, Acronyms and Short-forms-Listening: Analysing and interpreting announcements. Decoding - Screening for salient points-Note Making-Raising queries for clarification-Speaking: Announcements-Giving complete information-Pronunciation and Enunciation. Pace, Intonation, and Pitch-Conducting Events-Speaking: Master of ceremonies, short speeches - welcome speech, the vote of thanks/ valedictory speech, award-acceptance speech. Writing: Invitations, Preparation of script/draft after interviewing someone. Adjectives-Pronunciation/ Punctuation, Precision and Concision-Politeness markers.

Total: 45 Hours**Reference(s)**

5. Wiggins, Grant P., and Jay McTighe. Understanding by Design. Association for Supervision and Curriculum Development, 2008.

Course Objectives

- To help students acquire the basics of Hindi.
- To teach them how to converse in Hindi on simple day- to -day situations.
- To help students understand a simple technical text in Hindi.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions

Course Outcomes (COs)

1. Construct simple sentences and use vocabulary required for day- to -day conversation.
2. Distinguish and understand the basic sounds of Hindi language.
3. Apply appropriate grammar to write and speak in Hindi language.
4. Comprehend the conversation and give correct meaning.
5. Take up Hindi examinations conducted by Dakshin Bharat Hindi Prachar Sabha.

Articulation Matrix

5	-	-	-	-	-	-	-	-	3	3	-	-	-	-

UNIT I**9 Hours****VOWELS AND CONSONANTS**

Hindi Alphabet: Introduction (Self-introduction) - Vowels - Consonants - Plosives - Fricatives - Nasal sounds - Vowel Signs - Chandra Bindu & Visarga -Table of Alphabet -Vocabulary.

UNIT II**9 Hours****NOUNS**

Nouns: Genders -Masculine & Feminine -Reading Exercises.

UNIT III**9 Hours****PRONOUNS AND TENSES**

Pronouns and Tenses - Categories of Pronouns - Personal Pronouns - Second person (you & honorific) - Definite & Indefinite pronouns - Relative pronouns - Present tense - Past tense - Future tense - Assertive & Negative Sentences - Interrogative Sentences.

UNIT IV**9 Hours****CLASSIFIED VOCABULARY**

Classified Vocabulary: Parts of body -Relatives Spices Eatables -Fruit & Vegetables -Clothes - Directions -Seasons Professions.

UNIT V

9 Hours

CONVERSATIONS

Speaking -Telling the times -Saying the Numbers from 1 to 50. Speaking practice for various occasions.

Total: 45 Hours

2. Hindi Prachar Vahini – 1.
3. Videos, Stories, Rhymes and Songs.

Course Objectives

- To help students appear for the A1 level Examination.
- To teach them how to converse fluently in German in day-to-day scenarios.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Listen and identify individual sounds of German.
2. Use basic phonemes and words while speaking.
3. Read and understand short passages on familiar topics.
4. Use basic sentence structures while writing.
5. Illustrate basic grammar and appropriate vocabulary in completing language tasks.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	-	-	-	-	-	-	-	-	3	3	-	-	-	-

UNIT I**9 Hours****INTRODUCTION**

Introduction to the German Language-Alphabets-Numbers Greetings -Days and Seasons-Working with Dictionary.

UNIT II**9 Hours****LANGUAGE AND ITS COMMON USE**

Nouns -articles-Speaking about oneself-Listening to CD supplied with books-paying special attention to pronunciation.

UNIT III**9 Hours****TECHNICAL DEUTSCHE**

Regular &Irregular verbs -Personal pronouns-family-Introduction to types of sentences.

UNIT IV**9 Hours****INTERROGATION**

Question words -Types of Questions -Nominative Case-Verb Conjugation -country –nationalities.

UNIT V**9 Hours****IMPLEMENTATION**

Verbs to be & to have -conjugation -Hobbies -Framing basic Questions and answers.

Total: 45 Hours**Reference(s)**

Course Objectives

- To train students for N5 Level Examination.
- To teach them use basic Japanese sentences in day-to-day conversation.
- To make students familiar with the Japanese cultural facets and social etiquette.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Recognize and write Japanese alphabet.
2. Speak using basic sounds of the Japanese language.
3. Apply appropriate vocabulary needed for simple conversation in Japanese language.
4. Apply appropriate grammar to write and speak in Japanese language.
5. Comprehend the conversation and give correct meaning.

5	-	-	-	-	-	-	-	-	3	3	-	-	-	-

UNIT I**9 Hours****SELF INTRODUCTION / DEMONSTRATIVES / NOUN MODIFIERS**

Introduction to Japanese- Japanese script - Pronunciation of Japanese (Hiragana (Katakana) Long vowels - Pronunciation of in, tsu, ga -Letters combined with ya, yu, yo - Daily Greetings and Expressions -Numerals. Speaking: Self-Introduction - Listening: Listening to Greetings, Listening to specific information: Numbers, Time.

UNIT II**9 Hours****TIME EXPRESSION / VERBS - PAST**

Introduction to time -Introduction of verbs -Listening to specific information.

UNIT III**9 Hours****ADJECTIVES**

Word Sentence -Introduction to Adjectives -Technical Japanese Vocabulary -Pair Activity Day to day situational conversation.

Listening to Japanese Alphabet Pronunciation -Simple Conversation.

UNIT IV**9 Hours****CONJUGATION OF II ADJECTIVE**

Past tense of Noun sentences and Na adjective sentences -Past tense of ii adjective sentences -houga adjective desu -Technical Japanese Vocabulary -Individual Activity - Listening to conversation with related particles.

UNIT V**9 Hours****CONJUGATION OF VERBS - TE FORM / TA FORM / NAI FORM / PLAIN FORM**

N gahoshidesu - V masu form tai desu - Verb te form - Technical Japanese Vocabulary -Listening to different Counters, simple conversations with verbs and adjectives.

Total: 45 Hours**Reference(s)**

2. Minna no Nihongo Japanese for Everyone Elementary Main Textbook 1-2 Goyal Publishers and Distributors Pvt. Ltd., Delhi, 2007.

Course Objectives

- To prepare the students for DELF A1 Examination.
- To teach them to converse fluently in French in day-to-day scenarios.

Programme Outcomes (POs)

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Course Outcomes (COs)

1. Help students acquire familiarity in the French alphabet & basic vocabulary.
2. Listen and identify individual sounds of French.
3. Use basic sounds and words while speaking.
4. Read and infer short passages on familiar topics.
5. Interpret and use basic grammar and appropriate vocabulary in completing language tasks.

Course Objectives

- To understand the fundamental knowledge of colour science and colour measurement.
- To understand the basics of kinetics and thermodynamics related to dyeing.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Use the principles of colour and colour vision for textile applications.
2. Apply colour order systems in textile finishing operations.
3. Use colour measurement systems.
4. Apply principles of kinetics and thermodynamics in the dyeing of textiles.
5. Select software tools for quality control in colouration.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	-	2	1	2	-	-	-	-	-	-	-	-	2

UNIT I**9 Hours****COLOUR AND COLOUR VISION**

Fundamentals of colour science: Eye and colour perception - Colour blindness - colour theory - Tests for defective colour vision. Metamerism, Dichroism, warm and cool colours

UNIT II**9 Hours****COLOUR ORDER SYSTEM**

Munsell system - Ostwald system - CIE matching functions - Determination of Tri-stimulus value - Linear and non-linear transformation - industrial colour tolerance limit and calculations - Concept of K-M theory for colour matching - Derivation of KM equation and its application.

UNIT III**9 Hours****COMPUTER COLOUR MATCHING**

Sample preparation for colour matching: Determination of optical data of dyes - Recipe formulation and correction - Detailed study about colour measuring instruments - Spectro photometer - limitations of CCM technique - Sequence of colour matching in industry - invariant and conditional matching. 555 Shade sorting technique.

UNIT IV**9 Hours****KINETICS AND THERMODYNAMICS OF DYEING**

Dyeing properties related to the inherent physical structure of the fibre - Interaction between dyes and fibre forming polymers - Study about types of adsorption isotherms - Absorption and desorption technique to determine the dyeing equilibrium - Derivation of affinity equation - determination of dyeing rate - theory of dyeing for different fibres.

UNIT V**9 Hours****QUALITY CONTROL OF COLOUR**

Colour difference equation - factors responsible for colour difference - yellowness and whiteness measurement with AATCC and ASTM standards - online colour measurement for textiles - database preparation for colour matching - colour control system and development of colour software.

Course Objectives

- To understand texturing technology and textured yarn.
- To prepare technological solutions for the challenges in the area of texturing.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Select texturing technique based on the raw materials and end-uses.
2. Outline process parameters and the structure of false-twist textured yarn.
3. Outline process parameters and the structure of air jet textured yarn.
4. Outline process parameters and the structure of BCF textured yarn.
5. Assess chemo-mechanical and thermo-mechanical method of texturing yarns.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	1	2	2	1	-	-	-	-	1	-	-	3	-

UNIT I**9 Hours****CONCEPTS OF TEXTURING**

Purpose, Types of textured yarns, Classification of process, Comparison of textured with other types of yarns and fabrics, suitability of POY, LOY and UDY for texturing, Role of spin finish on textured yarns.

UNIT II**9 Hours****FALSE TWIST TEXTURING**

Basics of false-twist texturing, machine variables, process variables, Draw texturing, simultaneous and sequential draw texturing - Twisting devices. Structure and properties of FT textured yarns. Applications of false-twist textured yarns.

UNIT III**9 Hours****AIR JET TEXTURING**

Basics of air jet texturing, types of yarns produced, machine variables, process variables, Air texturing jet, structure and properties of Air jet textured yarns. Applications of air-jet textured yarns.

UNIT IV**9 Hours****BCF PROCESS**

Basics of BCF Process, BCF Draw texturing machine, machine parameters, process variables, structure and properties of BCF textured yarns. Applications of BCF textured yarns.

UNIT V**9 Hours****OTHER METHODS OF TEXTURING**

Stuffer box and edge crimping methods: Principles, limitations and applications. Knit-de-knit and gear crimping methods, texturing of polypropylene, Chemo-mechanical and thermo-mechanical texturing. Testing of Textured Yarns: Measurement of shrinkage force, Crimp contraction - dye uniformity.

Total: 45 Hours**Reference(s)**

3. Hassan Mohamed Behery Ali Demir, Synthetic Filament Yarn: Texturing Technology, Prentice Hall, 1997.
4. R. S. Gandhi, Textured yarns, MANTRA, 1998.
5. D. K. Wilson and T. Kollu, The Production of Textured Yarns by the False Twist Technique, Textile Progress, Vol. 21, No.3, Textile Institute, Manchester, U.K., 1991.

Course Objectives

- To teach the underlying theoretical principles of various processes that takes place during spinning.
- To impart knowledge on the mechanisms of yarn formation.
- To instill an attitude for fundamental research in spinning technology.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Analyse requirements of blending to optimize spun yarn quality.
2. Outline opening, cleaning and carding actions used in spinning line.
3. Justify the need of doubling and drafting to improve yarn quality.
4. Evaluate fibre properties and process parameters for control of yarn quality.
5. Analyse fibre properties and material flow to control evenness and hairiness of yarns.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	2	1	1	-	1	-	-	-	-	-	-	-	2	-
2	2	1	1	-	1	-	-	-	-	-	-	-	2	-
3	2	1	1	-	1	-	-	-	-	-	-	-	2	-
4	2	1	1	-	1	-	-	-	-	-	-	-	2	-
5	2	1	1	-	1	-	-	-	-	-	-	-	2	-

UNIT I**9 Hours****BLENDING**

Blending requirements, Principles, Blending delay time, Blend proportion, Perfect blend, Blending deficiencies, Optimum blending. Mixing: Optimization, linear programming, goal programming, Index of blend irregularity. Waste recycling.

UNIT II**9 Hours****OPENING, CLEANING AND CARDING**

Intensity of opening. Opening and cleaning principles: tearing, picking, plucking, beating, combing, tossing. Processing of cotton, manmade fibres and blends. Degree of cleaning, carding and doffing disposition, Centrifugal forces. Action between feed roller and Licker-in, three licker-in theory, main cylinder and flats wide-width theory, autoleveller, periodic mass variation Fibre transfer, mechanism of elimination of neps. Effect of stationary flats on the opening and cleaning.

UNIT III**9 Hours****DOUBLING AND DRAFTING**

Principle, Perfect draft, Actual draft, Law of Doubling, Addition of irregularity, Roller Drafting, Apron drafting, Double apron system, Drafting by opening roller. Periodic variations, Roller nip movements, Roller speed variation, stick-slip curve. Drafting force, Piecing irregularity in combing, influence of combing on overall quality.

UNIT IV**9 Hours****YARN FORMATION**

Mechanism of twist, Fibre migration phenomena: Obliquity, coherence curve. Twist insertion techniques: False, Flyer, Ring and traveller twisting, up twisting - down twisting - Cabling. two-for-one twister. Open-end, Self-twisting, balancing of twist. Roving bobbin and cop build Tension variation. Traveller lag. end breakages. Balloon Theory.

UNIT V**9 Hours****EVENNESS**

Random fibre distribution. Feed and regulation: blow room, carding, Chute feed system, draw frame, comber, roving, yarn regularity. Hairiness.

Total: 45 Hours**Reference(s)**

5. Anindhaya Ghosh and R. S. Rengasamy, Predictive Model for Strength of Spun Yarns: An over view, AUTEX Research Journal, March 2005.

Course Objectives

- To understand the structure and manufacturing methods for high performance fibres.
- To understand the physical and chemical properties of high-performance fibres.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Compare and contrast HP fibres with apparel grade fibres in terms of structure and properties.
2. Outline the structure, properties and manufacturing methods of non-polymeric fibres.
3. Outline the structure, properties and manufacturing methods of inorganic fibres.
4. Compare manufacturing methods of polymeric high technology fibres.
5. Evaluate the properties of chemical and thermal resistance fibres.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

2	3	2	2	1	2	-	-	-	2	1	-	3	3	3
3	3	2	3	1	1	-	-	-	1	2	-	3	2	2
4	3	2	3	1	1	-	-	-	1	2	-	3	1	3
5	3	2	3	2	2	-	-	-	1	1	-	3	2	3

UNIT I**9 Hours****STRUCTURE AND PROPERTIES**

Limitations of conventional fibres. Classifications of high-performance fibres and its applications. Structure and properties of high-performance fibres: Micro and fine structural features. Physical properties: tensile, compression and bending properties, fracture morphology.

UNIT II**9 Hours****NON-POLYMERIC FIBRES**

Carbon fibres: Classification, conversion of precursors to carbon fibres: PAN, rayon and pitch-based carbon fibres. Structural aspects of PAN based and pitch-based carbon fibres. Glass fibres: Types and compositions, Manufacturing processes, fibre structure, properties, applications and limitations.

UNIT III**9 Hours****INORGANIC FIBRES**

Ceramic fibres, Classification of silicon carbide fibres. Aluminium Oxide fibres, Compositions of Aluminium Oxide fibres. Manufacturing process, Fibre structure, properties, applications. Lead fibres, preparation of Lead fibre, Structure and properties of lead fibres, applications, Radiation Shielding Materials

UNIT IV**9 Hours****POLYMERIC HIGH-PERFORMANCE FIBRES**

Aramids: spinning, structure and properties, liquid crystal structure, applications. Comparison of para and meta-aramids. Gel spun high performance PE fibres: difference between HMPE, UHMWPE and other polyethylene fibres, manufacturing and applications.

UNIT V**9 Hours****CHEMICAL AND THERMAL RESISTANT FIBRES**

Need for chemically and thermally resistant fibres. Chlorinated and fluorinated fibres: manufacturing and properties. Thermally resistant fibres: additives, types of additives and concentration. PEK, PEEK, PPS, PEI, PBI fibres, structure and properties, fibre formation and applications.

Total: 45 Hours**Reference(s)**

1. J. W. S. Hearle, High Performance Fibres, Woodhead Publishing Ltd., 2001.
2. S. K. Mukhopadhyay, High Performance Fibres, Textile Progress Vol. 25, The Textile Institute, Manchester, 1993.
3. Menachem Lewin, Jack Preston, High Technology Fibres, Part A, B, C, Marcel Dekkar Inc, 1993.

Course Objectives

- To acquire the fundamental understanding of weaving motion.
- To develop an attitude to carry out fundamental research in weaving technology.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Analyse principles of shedding motions and shedding operations in a loom.
2. Evaluate picking motions from the perspectives of design and operations.
3. Resolve the critical components involved in beat-up mechanism.
4. Assess projectile and rapier looms from design and operation perspectives.
5. Evaluate air-jet, water jet and multi-phase looms for design and operations.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	3	1	3	2	2	-	-	-	-	2	1	-	3	2
2	3	2	3	2	2	-	-	-	-	1	1	-	3	2
3	3	2	3	1	2	-	-	-	-	2	1	-	3	2
4	3	3	3	1	2	-	-	-	-	1	1	-	3	2
5	3	1	3	2	2	-	-	-	-	1	1	-	3	2

UNIT I **9 Hours**

THEORY OF SHEDDING

Geometry of warp shed -Types of shed, Characteristics of different sheds, Design of cams, Design of Heald reversing motion. Matched cam shedding, Factors that limits the size of repeat, Mechanics of dobby shedding, Lever, Cam dobby. Electronic dobby - Geometry of Jacquard shedding. Fine Pitch Jacquard.

UNIT II **9 Hours**

THEORY OF PICKING

Dynamics of shuttle movement in the shuttle box, Elastic properties of the picking mechanism, Retardation of shuttle, Rest position of shuttle, Shuttle flight.

UNIT III **9 Hours**

MECHANICS OF BEAT UP

Types of Beat-up mechanisms - 4 link and 6 link beat up - Cam beat up - Sley speed and acceleration - Beat up theory - Beat up time. Sley eccentricity and its effects - Dwell period - Warp and cloth control: Bumping conditions - disturbed weaving conditions - causes for variation in pick spacing Weft Measurement; Weft accumulation systems - Pick length measurement - Weft tensioning - Weft unwinding for individual pick.

UNIT IV **9 Hours**

WEFT INSERTION IN PROJECTILE AND RAPIER

Weft velocity in shuttleless looms, Rate of weft insertion, Weft insertion cycle, Projectile flight through the warp. Types of Rapier weaving machines, Weft insertion in loop form, Tip transfer system, Rapier guide control in the warp sheet, Rapier speeds.

UNIT V **9 Hours**

WEFT INSERTION - AIR JET, WATER JET, MULTI PHASE

Air jet loom -Jet guides - Design concepts of air jet picking - Theory of air jet picking - Timing diagram - Weft motion through the shed - relay nozzles - Textile dust remover. Water jet loom - Tractive force in the weft thread - Jet and weft thread velocity - Braking of the weft thread - Timing diagram for weft insertion. Multiphase weaving: Technological problems in multiphase weaving.

Total: 45 Hours

4. P. R. Lord and M. H. Mohamed, Conversion of Yarn to Fabric, Woodhead Publishing Limited, 1992.

Course Objectives

- To acquire knowledge of textiles from the perspective of human-clothing interface.
- To acquire knowledge on the effects of fibre, yarn, fabrics on garment appearance, comfort, durability, protection and care.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select the transmission characteristics for the development of end-use specific garments.
2. Apply transformation characteristics of textiles to produce functional and aesthetic textiles.
3. Resolve fabric hand, fit and size parameters for clothing comfort.
4. Choose component and materials for apparels based on the principles of clothing science.
5. Create apparels for specific end uses.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	2	2	1	2	2	1	-	-	-	1	-	-	-	2
5	2	3	2	1	2	2	-	-	-	2	-	-	-	2

UNIT I **9 Hours**

HUMAN PHYSIOLOGY ON CLOTHING

Need and selection of clothing. Definition of comfort. Human physiological aspect of comfort. Various aspects of clothing comfort. Comfort variables. Comfort properties of fibres, yarns and fabric structures. Psychological comfort of fabrics and garments.

UNIT II **9 Hours**

FIBRE AND FABRIC PROPERTIES ON CLOTHING

Effect of fibre properties, yarn structure, fabric design, fabric construction and treatments on the fabric properties such as air permeability, breathability, moisture transport -wetting and wicking. Study of factors that affect Hygral expansion, relaxation shrinkage, swelling shrinkage, felting shrinkage.

UNIT III **9 Hours**

FABRIC HANDLE AND COMFORT

Bending - Compression- Tensile - Shear - surface friction - Bias extension - Formability – Tailorability - Objective evaluation of fabric handle by KES and FAST Fabric parameters and its influence on fabric comfort. Garment fit and size on comfort.

UNIT IV **9 Hours**

TACTILE COMFORT AND FIT COMFORT

Tactile Comfort-Tactile comfort sensations, Fabric characteristics and tactile attributes, Fabric parameters influencing tactile sensation. Clothing Fit and Comfort. Body dimensions and pattern. Garment fit and comfort relationship. Factors related to clothing fit.

UNIT V **9 Hours**

DEVELOPMENTS AND IMPROVEMENTS IN CLOTHING

Fit analysis for various end uses: Winter - summer wear - innerwear - Sports - Casual - Swim wear. Functional and quality requirements. Different approaches for improving thermal comfort in apparel and Improving moisture management in apparel- Sensing and responding textiles, Fabric with pore size gradient, Fibres with nano-structured surface, Mixture of hydrophilic and hydrophobic fibres.

Total: 45 Hours

5. Miller, Textiles: Properties and Behaviours in Clothing Use, The Textile Institute, 1998.

Course Objectives

- To offer the students a broad overview of costing of textile products and teach principles of financial management.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

- Implement the cost accounting, and financial management.
- Execute the concept of process costing, marginal costing and cost accounting.
- Apply the principles and evaluation of capital budgeting techniques.
- Analyse the cost of capital, capital structure and financial leverage in capital budgeting.
- Apply the principles and determinants involved in working capital management.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	2	3	-	-	3	-	-	2	1	2	1	-	2	-
5	2	3	-	-	3	-	-	2	2	2	2	-	2	-

UNIT I **8 Hours**

BASICS OF COSTING AND FINANCIAL MANAGEMENT

Introduction to cost accounting-Cost ledgers: Reconciliation between cost and financial accounting - Costing methods -Product Costing, Job, order, Batch and Contract costing- Cost Sheet. Introduction Financial Management: Functions, Goals, Organization of Finance Function, Time Value of Money, Future Value and Present Value of Money. Real and Nominal Interest Rate.

UNIT II **8 Hours**

PROCESS COSTING AND ACCOUNTING

Process costing-operation costing -unit costing, multiple costing -Marginal costing -Throughput accounting -ABC -integration of standard costing with marginal cost -Transfer Pricing-Treatment of special expenses -Accounting and control of waste, scrap, spoilage, defective etc.

UNIT III **10 Hours**

PRINCIPLES OF CAPITAL BUDGETING

Principles and Nature of Capital Budgeting, Evaluation Techniques: Payback Period, Accounting Rate of Return, Net Present Value, Internal Rate of Return, Profitability Index. Project selection under Capital Rationing.

UNIT IV **10 Hours**

CAPITAL BUDGETING

Cost of Capital and Capital Structure Concept of Cost of Capital, Measurement of Specific Costs and Overall Cost of Capital, Factors Determining Capital Structure, Operating and Financial Leverage.

UNIT V **9 Hours**

WORKING CAPITAL MANAGEMENT

Principles of Working Capital, Principles and Determinants of Working Capital, Operating Cycle, Estimation of Working Capital, Policies for Financing Current Assets, GWC vs. NWC.

Total: 45 Hours

Course Objectives

- To impart the knowledge in settings and maintenance schedule for various machinery in textile mills.
- To teach the activities in the machinery audit.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Organize maintenance schedules for various textile machines.
2. Analyse procedures involved in maintaining textile machines.
3. Analyse the performance of machines in terms of efficiency.
4. Select appropriate lubricants for various machine parts.
5. Evaluate the activities involved in maintenance records.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	1	-	2	-	-	-	2	-	-	-	2	-

UNIT I**9 Hours****CONCEPTS**

Maintenance: Objectives - Types - Organizational structure - Duties - personnel. Systems and procedures: Planning - Scheduling - Controlling - Implementation of planned maintenance - Backlogs - Rescheduling. Housekeeping - Cleanliness - Machinery Audit. Maintenance Records: Maintenance Ledger - Machine cards - Maintenance cost control. Safety Accidents - Causes and prevention - safety in material handling, maintenance.

UNIT II**9 Hours****SPINNING PREPARATION**

Maintenance schedules - Frequency - manpower - Time required - Special tools - Gauges. Maintenance of Card Clothing: Wire inspection - Grinding procedure - Burnishing - Flat end milling - Aprons - Flyer - Bottom roller - Top roller - Cots: selection - mounting - Buffing frequency - Grinding - Berkolising - Acid treatment - Cot life - Top roller greasing- machine setting.

UNIT III**9 Hours****SPINNING AND POST SPINNING**

Maintenance schedules - Frequency - manpower - Time required - Special tools - Gauges. Roller Eccentricity and its control - Tolerances for drafting rollers. Maintenance schedules: Cone winding - Reeling - Bundling Baling Lubrication: Spindle oil topping - Replenishing.

UNIT IV**9 Hours****WEAVING**

Maintenance schedules for cone winding - pirn winding -warping -sizing- auto and non-auto weaving machines. Weaving machinery layout - material handling and equipment. Weaving machinery audit. Dobby, jacquard maintenance, allocations of machines.

UNIT V**9 Hours****WEAVING ACCESSORIES MAINTENANCE**

Shuttle care - selection - seasoning - life of shuttle. Maintenance of reed. Drop wires maintenance. Maintenance of picker - picking bands - Healds - Heald frames - pirns - shuttleless loom accessories. Maintenance of Utilities: Maintenance of Powerhouse: Electrical powerhouse - equipment - motors - starters - lighting. Humidification plant - compressors - air lines - generators.

Course Objectives

- To impart knowledge on the fundamental principles of management as applied to the textile industry.
- To educate the students on the interaction of government and society with the textile industry and its effect and their management.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Attribute the different sectors of textile industry and their role in the economy.
2. Assess contribution of various sectors of textile industry to nations economy.
3. Critique the efforts taken by the Government of India for the growth of Indian Textile Industry.
4. Plan for the utilities in the various sectors of textile Industry.
5. Apply personnel management principles in textile industry.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	1	-	-	2	2	2	-	2	-	-	2	-

UNIT I**9 Hours****TEXTILE INDUSTRY**

Global scenario, Indian textile Industry, Indian Textile Policy, Trade policy, Fiscal policy, NTC, STC, Textile committee, National Hand loom Development Corporation, Mills association, Research Institutions, Technical Textile Units, Current five-year Plan: Targets and achievements; statistics on global and national fibre, yarn and fabric production, consumption, exports and imports.

UNIT II**9 Hours****CENTRAL AND STATE GOVERNMENT SCHEMES**

Production Linked Incentive (PLI), PM Mega Integrated Textile Region & Apparel (PM MITRA), Comprehensive Handicrafts Cluster Development Scheme (CHCDS), Technology Up-gradation Fund Scheme (TUFS), Textile Workers Rehabilitation Fund Scheme, Group Work Shed Scheme, Comprehensive Power loom Cluster Development Scheme, Group Insurance scheme, Scheme for Integrated Textile Parks, Hank Yarn Obligation (HYO); Yarn Bank Scheme. Technology Missions for Technical textiles. Centre of Excellence.

UNIT III**9 Hours****MILL ORGANIZATION AND PLANNING**

Organizational Structure and Functioning of Centralized and Decentralized Sectors: Spinning, Weaving, Composite mill, Chemical processing Units. ERP, MIS, Cotton Purchase Practices, Inventory control, Spin plan, Weave plan, Product costing, Managerial responsibilities. Selection of site for textile mills, Various types of buildings. Upgradation of plant and production equipment, Capital investment proposals and feasibility.

UNIT IV**9 Hours****UTILITIES**

Power requirements for spinning, weaving, Knitting and Garment machinery, Amenities required, Ventilation, Humidification systems, RH and temperature of various departments. Lighting types, Intensity requirements.

UNIT V**9 Hours****PERSONNEL AND MARKETING MANAGEMENT**

Planning, Selection, Training, Welfare safety, Factory act, Industrial dispute act, Trade union act, Bonus act, ESI, wage structure in textiles and apparel industry, Categories of operatives in textile mills, HOK, OHS. Labour handling techniques. Marketing channel, Physical distribution, Roles and responsibility of personal department in a textile industry.

Total: 45 Hours**Reference(s)**

1. V. D. Dudeja, Management of Textile Industry, Textile Trade Press, Ahmedabad 1990.
2. A. Ormerod, Textile Product Management, The Textile Institute, Manchester 1992.
3. Handbook of Import and Export Procedures, Textile Commissioner, Office Reports, Government of India, Ministry of Textiles, Government of India Publications (2005, 2010).

Course Objectives

- To familiarize with fundamentals of utilities engineering.
- To understand the operational aspects of utilities in textile mills.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Evaluate elements and operations of Air Engineering in a Textile Industry context.
2. Analyse electrical layout design, selection of cables, power billing and power management.
3. Assess the requirements of back-up power, size DG Sets and prepare maintenance schedules.
4. Assess water quality needs of industries; understand the methods of Primary, Secondary and Tertiary effluent treatment.
5. Select boilers, air compressors and safety equipment for a factory environment.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	1	1	2	2	-	1	-	-	-	-	1	2	1	2
5	1	1	2	2	-	1	-	-	-	-	2	3	2	2

UNIT I**9 Hours****AIR ENGINEERING**

Humidification: Need for Humidification - Supply air - measurement of required Air changes - Motor Power - CFM output. Air washer plants: Nozzles system- Fog system- Eliminators and Louvers- Exhaust Air- measurement of required air changes - Water quality - Diffuser material - Duct material - Air filters. Sizing of Humidification plant and heat load. Operational aspects of Humidification plants in a textile mill.

UNIT II**9 Hours****ELECTRICAL INSTALLATIONS**

Design of electrical distribution system for textile plants, powerhouse, transformer capacity, distribution network, cable size calculations, capacitor calculations, power factor maintenance, power quality, sourcing electrical power, issues in power billing, lighting installations, economic aspects of power management.

UNIT III**9 Hours****CAPTIVE POWER GENERATION**

Generator set selection, load calculations, fuel efficiency, power factor effects, Generator set location, exhaust system, and Maintenance practices. Unconventional energy sources like wind power, solar power.

UNIT IV**9 Hours****STEAM MANAGEMENT**

Boilers, Types, steam distribution systems, fuel and air preheating, boiler blow down, pressure drop and pipe design, pipe fittings and lagging, Thermic fluid heating devices.

UNIT V**9 Hours****COMPRESSORS AND PNEUMATIC SYSTEMS, SAFETY**

Compressors, types, calculation of capacities, operational features, maintenance, safety, pneumatic lines, hoses, pneumatic pistons. Fire Fighting and Safety -Firefighting equipment, safety devices, accident prevention.

Total: 45 Hours**Reference(s)**

1. G. Shanmugham, T. Sivasankaran and D. Saravanan, Engineering Aspects of Textile Mills, Module No 5, BIT, NCUTE Publications, 2002.
2. Steam Consumption Norms for Textile Processes Houses, BTRA, Mumbai, 2007.

Course Objectives

- To impart the fundamental principles of Industrial Engineering as applied to textile field.
- To make the students familiar with the techniques of work study with practical textile examples.

Programme Outcomes (POs)

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Implement remedial actions for low productivity.
2. Analyze work assignments by work and method study.
3. Assess measures to improve labour productivity by conducting motion study and time study.
4. Create alternative layouts by studying existing layout and constraints.
5. Analyze difficulties in existing material handling methods and ambience; suggest modifications to improve labour productivity.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

3	-	1	2	3	-	2	2	1	-	2	2	2	3	2
4	-	2	2	2	-	1	1	2	-	1	1	3	3	2
5	-	2	2	1	-	3	1	2	-	1	1	3	3	1

UNIT I**9 Hours****PRODUCTIVITY**

Scope of Industrial Engineering. Industrial engineering concepts. Productivity indices. Workloads: work assignments - Work content - added work content - reduction of work content - ineffective time - improving productivity - causes for low productivity in Spinning, Weaving, Wet Processing and Garment industries.

UNIT II**9 Hours****WORK AND METHOD STUDY**

Work Study: Definition - Purpose - Techniques of work study - Procedure for work study Method Study: Definition - Procedure. Process charts: Symbols - Process Sequence chart - Outline process chart - Flow process charts (man type, material type, equipment type) - Charts using time scale - multiple activity charts. Diagrams: string diagram - cycle graph - chrono-cycle graph - travel chart. Textile and Garment industry examples.

UNIT III**9 Hours****MOTION AND TIME STUDY**

Motion Study: Operation analysis - motion analysis - motion economy - two handed process chart - micro motion study - Therbligs - SIMO chart. Textile and Garment industry examples. Time Study: Procedure - Equipment. Techniques of time study - Stop watch method. Predetermined Motion Time Standards (PMTS) - Rating. Allowances: Standard Time - Standard data. Textile and Garment industry case studies.

UNIT IV**9 Hours****FACTORY LAYOUTS**

Layout: Layout planning. Types of layouts: Process, Product, Combination and Fixed. Line Balancing: Line Balancing Objectives - Procedure - Techniques. Applications in Textile and Garment units.

UNIT V**9 Hours****MATERIAL HANDLING AND WORK ENVIRONMENT**

Material Handling: Objectives - principles of material handling - relationship of material handling to plant layout -material handling equipment - Descriptions and characteristics - Specialized material handling equipment for Textile and garment units. Work Environment and Services: Lighting - Ventilation - Temperature Control and Humidity Control - Noise Control - Safety - Ergonomics.

Total: 45 Hours

Course Objectives

- Select suitable raw material and machinery set-up for the manufacturing of the yarn and fabrics with required quality.
- Outline the parameters for the satisfactory performance of various intermediate processes involved in spinning and weaving.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Select suitable raw materials for the manufacturing of the yarn with required quality.
2. Choose the machinery and process parameters for manufacturing of yarn with required quality and propose measures for trouble shooting in spinning process.
3. Select the machinery and process parameters for the manufacturing of fabrics with required quality.
4. Choose the parameters for manufacturing of fabric with required quality and remedial measures for trouble shooting in weaving process.
5. Analyse parameters for satisfactory performance of intermediate processes in spinning and weaving.

Articulation Matrix

5	2	2	2	2	2	2	1	-	-	-	-	-	2	-

UNIT I**9 Hours****RAW MATERIALS AND SPINNING PREPARATORY PROCESSES**

Cotton Mixing quality- Fibre Quality Index (FQI) and its applications -prediction of spinnability and yarn quality- Selection of manufactured fibres (polyester, viscose rayon, acrylic and nylon): Fibre parameters according to end use requirements including blended yarn production. Bale Management Techniques- blending irregularity. Causes of nep generation - nep removal in carding and combing machines. Cleaning efficiency of blowroom and cards, Trash % in card sliver, waste extraction in blowroom and cards. Deviation rate in yarns. On line nep monitoring, hooks & hooks removal. Contamination & its control-Online monitoring of contamination-Stickiness: causes, effect & control strategies. Process control strategies for organic cotton processing.

UNIT II**9 Hours****YARN QUALITY CONTROL**

Cleaning and control of wastes - yarn realisation. Within and between bobbin count variations, control of count variations in preparatory machines and ring frame, yarn unevenness and imperfections, causes for unevenness and imperfections, Analysis and interpretation spectrograms. Yarn faults, causes and methods to reduce faults. Causes and remedial measures for variability in strength. Measures for control of hairiness. Control end breaks in spinning. Norms for spinning yarn quality.

UNIT III**9 Hours****PROCESS CONTROL IN WEAVING PREPARATION**

Yarn quality requirements for shuttle and shuttleless looms, Quality and performance in winding, warping, pirn winding, sizing and beam gaiting, Quality of package and package density, weaving package defects, causes and remedies, choice of size recipe, control of size pick up, size encapsulation, selection of weaving accessories.

UNIT IV**9 Hours****PROCESS CONTROL IN WEAVING**

Fabric defects, causes, control measures. Inspection standards, cloth realization, value loss. Snap study in loom shed, Process performance studies and norms (including preparatory sections).

UNIT V**9 Hours****PRODUCTIVITY IN SPINNING AND WEAVING**

Factors affecting productivity in spinning and weaving, productivity indices, Loom efficiency: factors influencing loom efficiency, maximizing production and productivity in spinning and weaving.

Total: 45 Hours

6. W. Klein, Manmade Fiber and their Processing, The Textile Institute, Manchester, U.K.1994.

Course Objectives

- To understand the advancements in the chemical processing of textile materials.
- To evaluate the alternative processes using enzymes in preparation and finishing.
- To acquire knowledge on energy conservation and pollution control measures.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Analyse process parameters involved in fabric preparatory processes.
2. Resolve dye recipes for textile materials for different depths employing latest developments.
3. Evaluate the concepts involved in textile finishes.
4. Assess the issues involved in the operation and maintenance of effluent treatment plants.
5. Select suitable printing machines and techniques.

Articulation Matrix

5	3	2	2	2	2	2	-	-	-	-	-	-	-	3

UNIT I**9 Hours****ADVANCES IN PREPARATORY PROCESSES**

Combined preparatory processes - Single bath desizing, scouring and bleaching - Bio-scouring and its limitations - Bio-bleaching and combined enzyme assisted processes - Solvent scouring Process - Preparatory process for blends, application of enzymes in textile processing.

UNIT II**9 Hours****DYEING**

Developments in the application of direct, reactive, disperse dyes to textile materials using batch wise and continuous methods - Salt free dyeing of reactive dyes - Dyeing of wool blends - Concept of Right First- Time dyeing - Developments in E-control dyeing machines - Low liquor and Low wet pickup techniques, super critical carbon dioxide dyeing.

UNIT III**9 Hours****FINISHING**

Micro and Nano encapsulation and its application in finishing of textile materials - Finishing of technical textiles - Formaldehyde-free crease recovery finishing. Problems and remedies in the flame-retardant finishing of polyester and its blends. Bio-polishing - Influence of biopolishing on dyeability and physical properties of fibres and fabrics - developments of new fibres using Bio technology.

UNIT IV**9 Hours****ENERGY CONSERVATION AND POLLUTION CONTROL**

Energy conservation steps in chemical processing - causes and remedies for water and air pollution - Detailed study about characteristic of textile effluent and its norms - Developments in membrane techniques in the effluent treatment. Bio-technology in textile effluent treatment.

UNIT V**9 Hours****PRINTING**

Developments in rotary printing machine, Developments in pigment printing: foam, plastic, foil, rubber, glitter and transparent print. Synthetic thickeners for latest printing techniques - Digital printing - 3D printing- Transfer printing.

**22TT014 PROCESS AND QUALITY CONTROL IN
TEXTILE CHEMICAL PROCESSING**

3 0 0 3

Course Objectives

- To acquire knowledge on quality and process control in chemical processing.
- To apply and use norms and standards applied to chemical processing.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Organize process control measures in preparatory process.
2. Assess process control measures in dyeing.
3. Evaluate process control measures in printing.
4. Analyse process control measures in mechanical finishing process.
5. Evaluate process control measures in chemical finishing process.

UNIT I **9 Hours**

PROCESS CONTROL IN PREPARATORY

Overview of process and quality control in textile chemical processing. Machine and process parameters influencing the process performance and quality of preparatory processes. Desizing - Scouring – Bleaching -Souring - Mercerization. Quality evaluation of preparatory processed material.

UNIT II **9 Hours**

PROCESS AND QUALITY CONTROL IN DYEING

Machine and process parameters influencing dyeing of fibre, yarn and fabrics made from various fibres with different dyeing techniques. Quality evaluation of dyed material.

UNIT III **9 Hours**

PROCESS AND QUALITY CONTROL IN PRINTING

Machine and process parameters influencing the printing of fabrics made from various fibres with different printing techniques. Quality evaluation of printed material.

UNIT IV **9 Hours**

PROCESS AND QUALITY CONTROL IN FINISHING

Machine and process parameters influencing the Mechanical finishing of fabrics made from various fibres with different finishing techniques. Quality evaluation of mechanically finished textile material.

UNIT V **9 Hours**

PROCESS AND QUALITY CONTROL IN FINISHING

Machine and process parameters influencing the chemical finishing of fabrics made from various fibres with different finishing techniques. Quality evaluation of chemically finished textile material.

Total: 45 Hours

Course Objectives

- To acquire knowledge on environmental aspects in textile chemical processing.
- To apply different dyeing techniques to reduce chemicals for ecofriendly chemical processing.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Resolve the mechanism and applications in textile processing industry.
2. Implement environmental standards to control the usage of dyes in chemical processing.
3. Analyse various techniques in the area of dyeing and printing.
4. Analyse pollution control and decolouration of textile dye effluent in textile dyeing.
5. Apply suitable physical, chemical and biological treatment for waste minimization and dye effluent process in textile processing industry.

Articulation Matrix

5	3	3	3	-	2	3	3	-	-	-	-	-	-	2

UNIT I**9 Hours****DYEING AND TEXTILE INDUSTRY**

Dyes- properties - Mechanism and Applications in textile industry: fibre, yarn and fabric dyeing, Process parameters, quality evaluation.

UNIT II**9 Hours****ENVIRONMENTAL CONCERN**

European legislation relating to textile dyeing; Environmental legislation USA, Dangerous substances in textiles, Eco labelling, waste water, Air, water framework directive, globally harmonized system, Future trends.

UNIT III**9 Hours****ENVIRONMENTAL DYEING TECHNIQUES**

Toxicology of textile dyes, pigments; Genotoxicity, mutagens and carcinogens, Sustainable dye application, exhaustion dyeing, continuous, semi-continuous dyeing, Air-dye technology, Plasma technology, foam dyeing, spraying, microwave, ultrasonic wave dyeing technology, Ozone, electro chemical, bio-based technology and digital screen printing.

UNIT IV**9 Hours****TEXTILE DYEING AND DECOLOURISATION OF TEXTILE DYE EFFLUENT**

Supercritical fluid textile dyeing technology; High performance fibre dyeing, Market scenario, Future trends, Pollution abatement and waste minimization in textile dyeing; Decolourisation of textile dye effluent and re-use of spent dye bath; Resource management practices.

UNIT V**9 Hours****PHYSICAL, CHEMICAL AND BIOLOGICAL TREATMENT OF DYE EFFLUENT PROCESS**

Waste minimization, ozonisation, activated carbon, biomass, UV gamma, electron beam, filtration, Reverse osmosis, electrochemical, Chemical treatment of textile dye effluent; Biotechnological treatment of textile dye effluent.

Total: 45 Hours**Reference(s)**

3. Knittel D, Saus W and Schollmeyer E, Application of supercritical carbon dioxide in finishing processes, J Text Inst, 84, 2019.
4. Senthil Kumar, P., & Yaashika, P. R. Sustainable dyeing techniques. In Sustainable innovations in textile chemical processes, Springer, Singapore, 2018.

Course Objectives

- To understand the need to control the effluents arising from wet processing.
- To suggest different methods of treating the textile effluents.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Attribute textile effluents.
2. Attribute colour and turbidity of textile effluents.
3. Assess the water quality using standard procedures.
4. Resolve inputs for the design of an effluent treatment plant.
5. Analyse suitable methods to reduce the effluent load in textile processing.

Articulation Matrix

5	3	3	2	-	1	2	1	-	-	1	1	2	-	3

UNIT I**9 Hours****SOURCES AND CHARACTERISTICS OF POLLUTION**

Characteristics and treatment of effluents: Preparatory process - Colouration - Finishing - Combined effluents. Problem of colours. Synthetic and woollen textile processing effluents: Spin bath components - Wool scouring wastes: Solids - Liquids.

UNIT II**9 Hours****COLOUR AND TURBIDITY**

Primary treatment: Screening - sedimentation - Equalization - Neutralization - Coagulation - Floatation. Secondary biological treatments: Activated sludge - Trickling filtration - Aerated lagoons - Secondary sedimentation - Oxidation ponds - Anaerobic digestion - Sludge disposal. Tertiary treatment: Multimedia filtration - chemical coagulation - chemical precipitation - hyper filtration: Ultra filtration - Nano filtration - Reverse osmosis. Dialysis- Chlorination.

UNIT III**9 Hours****WATER AND EFFLUENT ANALYSIS**

Water analysis - Colour - Acidity - Alkalinity - Dissolved solids - Suspended solids - Total hardness (Calcium & Magnesium). Methods: EDTA Titrimetric - Total iron-thiocyanate - Determination of Alkalinity - Chlorides - Dissolved oxygen - Surfactants - Methylene blue - Corrosivity - BOD-COD - TDS Toxicity.

UNIT IV**9 Hours****EFFLUENT TREATMENT PLANTS**

Design of effluent treatment plant: Individual Unit- Common effluent treatment- Collection of samples - Quality assurance programmes in ETP: Audit- Assessment- Recording - Monitor - Re-evaluation. Sludge Management: Source reduction- Bio-elimination - Solid separation - Government Regulations- Norms for treated water.

UNIT V**9 Hours****REDUCTION OF POLLUTION AND WATER REQUIREMENT**

Waste segregation - recovery - reuse - substitution of low polluting chemicals - process modification - economy in water use. Quality requirement of water for processing: Cotton - Synthetics - Wool - Silk - Boiler - Humidification.

Total: 45 Hours**Reference(s)**

4. P. Vankar, Textile Effluent, NCUTE Publication, New Delhi, 2002.

Course Objectives

- To acquire the knowledge of advanced technologies in knitting.
- To understand the mechanisms involved in advanced knitting machines.
- To analyse the latest developments in knitted fabric structures.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Compare the contrast warp and weft knitted structures.
2. Select tricot and raschel knitting machines for production of knitted fabrics.
3. Analyse features of flat knitting machine to produce flat knit structures.
4. Outline the loop geometry and loop formation in a knitted fabric.
5. Select yarn preparation machines and methods for warp knitting.

Articulation Matrix

UNIT I **9 Hours**

WEFT KNITTING

Needle Selection Techniques in weft knitting - Storage and positive feeding devices - Patterning for multitrack machines.

UNIT II **9 Hours**

KNITTING DYNAMICS

Yarn tension and knitting forces - Effect of cam shape, increase in number of feeders and increase in linear speed - needle breakages.

UNIT III **9 Hours**

FABRIC GEOMETRY AND DEVELOPMENTS IN CIRCULAR KNITTING

Tightness factor- Dimensional properties -Spirality-Relaxation- Shrinkage. Ring and rotor yarn quality requirements for weft knitting- High Pile and Socks Knitting Machines.

UNIT IV **9 Hours**

WARP KNITTING AND FABRIC GEOMETRY

Tricot & Rachel Two, Three & Multibar Machines -Pattern Control Mechanisms - Pattern Wheels and Chain Links. Dimensional characteristics of warp knits, Warp knitted fabric geometry - relation between loop length and construction - fabric relaxation and shrinkage.

UNIT V **9 Hours**

SPECIALITY WARP KNITS

Weft insertion- co-we-nit - cut presser - Laying-in - fall plate - double needle bar warp knitting machines-Jacquard knitting. Warp knitted technical textiles. Testing and Quality Control of Weft and Warp knitted fabrics. Various defects in knitting.

Total: 45 Hours

Course Objectives

- Compute the production rates of spinning machines and parameters of limit irregularity, yarn twist and moisture of fibres, intermediate products and yarns.
- Prepare yarn realization; spin plan and productivity reports in spinning department.
- Compute the production parameters in weaving preparatory processes.
- Estimate yarn requirements, productivity, yarn-fabric reconciliation in weaving and knitting.
- Compute liquor ratios in textile chemical processing and consumption of utilities; assess degradation due to chemical processing; evaluate whiteness.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

Course Outcomes (COs)

1. Calculate production rates of spinning and weaving machines.
2. Calculate parameters of limit irregularity, yarn twist and moisture of fibres, intermediate products and yarns.
3. Organize yarn realization; spin plan and productivity reports in spinning department.
4. Evaluate yarn requirements and prepare reports related to weaving productivity, yarn-fabric reconciliation and knitting.
5. Calculate liquor ratios in textile chemical processing and consumption of utilities and evaluation of fabrics for quality.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	3	2	-	-	-	-	-	-	2	3	1	1	3	-
5	3	2	-	-	-	-	-	-	2	2	2	2	3	-

UNIT I**9 Hours****SPINNING**

Linear density (count): Tex, English, Denier, Metric, Woollen, Worsted, count conversions, count control (wrapping). Yarn diameter. Index of irregularity, Moisture calculations: Invoice weight. Production, time, speeds and efficiency for all the machines in short-staple spinning including post-spinning operations, Material content (length and mass) in all spinning containers and packages.

UNIT II**9 Hours****SPINNING**

Twist and twist multipliers in Tex, Ne and Metric systems, Yarn twist contraction. Cleaning efficiency and wastes; Yarn realization, Wastes: soft, hard, invisible loss/gain; Raw material requirements for a given product mix, raw material-yarn production reconciliation; Spin plan: production balancing in spinning. Productivity calculations: Production per spindle, HOK, Conversion to 40s, productivity in winding, worker complement in spinning.

UNIT III**9 Hours****FABRIC FORMATION**

Beam count, Production, time, speeds and efficiency for all the machines in weaving processes, Material content (length and mass) in weaving processes, Sectional warping: number of sections, cone angle. Size recipe, size pick-up. Fabric parameters: constructional details, crimp and contraction, Reed count, width in reed, denting. Cover factor: warp, weft, and cloth. Take-up (loom), pick wheels.

UNIT IV**9 Hours****FABRIC FORMATION**

Hard waste: theoretical and actual, Areal density (GSM), Yarn requirements for a given product mix, yarn-fabric reconciliation. Weave plan: production balancing, Weaving productivity measures, labour complement in weaving. Weaving snap study. Optimization of package sizes: warpers and weavers beams. Knitting production: circular, flat bed and warp, loop length, tightness factor, stitch density, yarn requirements.

UNIT V**9 Hours****TEXTILE CHEMICAL PROCESSING**

Expression of volumes of liquids: w/w, w/v and v/v. Density of salt / chemical solution, 0°Be to °Tw to g/cc, Normality, Molarity - Molality. Lab-to-shop floor calculations for preparation, colouration and finishing. Estimation of degradation in Preparatory Processes: Calculation of Copper Number, carboxyl group content. Dye exhaustion to the fabric in padding process. Colour difference, shade sorting, CIE Whiteness Index, ASTM Yellowness Index. Utilities consumption.

Course Objectives

- To understand the concepts in production planning and control.
- To understand the material management and their movement in the production.
- To apply the various techniques in production planning and control.
- To understand the material management and their movement in the production.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Evaluate the benefits of planning and controlling of different production systems adopted in apparel industry.
2. Assess product and process planning with respect to different levels of apparel industry.
3. Create schedules for material loading, production flow in order to control various processes.
4. Analyze the stocks in different inventory with integrated planning systems.
5. Evaluate aggregate planning and related issues and strategies for an apparel industry.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	1	3	-	-	-	-	-	-	2	1	3	1	2	2

UNIT I**9 Hours****INTRODUCTION**

Objectives and benefits of planning and control-Functions of production control-Types of production systems -job- batch and continuous-Product development and design-Marketing aspect - Functional Aspects-Operational Aspect-Durability and dependability aspect- aesthetic aspect. Profit consideration-Standardization, Simplification & Specialization- Break even analysis-Economics of a new design.

UNIT II**9 Hours****PRODUCT PLANNING AND PROCESS PLANNING**

Product planning - Extending the original product information-Value Analysis-Problems in lack of product planning- Process planning and routing-Pre requisite information needed for process planning-Steps in process planning-Quantity determination in batch production-Machine capacity, balancing-Analysis of process capabilities in a multi-product system.

UNIT III**9 Hours****PRODUCTION SCHEDULING**

Production Control Systems- Loading and scheduling-Master Scheduling-Scheduling rules-Gantt Charts- Perpetual Loading-Basic scheduling problems - Line of balance - Flow production scheduling-Batch production scheduling- Product sequencing - Production Control systems- Periodic batch control-Material requirement planning kanban - Dispatching-Progress reporting and expediting-Manufacturing lead time- Techniques for aligning completion times and due dates.

UNIT IV**9 Hours****INVENTORY CONTROL AND RECENT TRENDS IN PPC**

Inventory control - Purpose of holding stock - Effect of demand on inventories-Ordering procedures. Two bin system - Ordering cycle system - Determination of Economic order quantity and economic lot size - ABC analysis - Recorder Procedure-Introduction to computer integrated production planning systems - elements of JIT - Fundamentals of MRP II and ERP.

UNIT V**9 Hours****AGGREGATE PLANNING**

Aggregate Units of production, Issues of aggregation- smoothing, bottle neck problem, planning horizon, treatment of demand; Cost in aggregate planning; Aggregate in chase strategy, constant workforce, and mixed strategies and additional strategies; Disaggregating aggregate plans.

Course Objectives

- To impart knowledge on human body measurements and creating pattern from the measurements.
- To develop commercial pattern with design aspect by manipulating the basic pattern.
- To fabricate patterns of different sizes by grading the basic pattern.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Design and develop patterns based on figure analysis and by choosing suitable measurement technique.
2. Design and develop patterns for the basic blocks of garment.
3. Execute and prepare patterns for the body components of sleeve, cuff and collars.
4. Implement and prepare patterns for the body components of yokes and pockets.
5. Create pattern grading for basic body components to various sizes.

Articulation Matrix

5	2	2	2	-	-	-	-	-	-	1	1	2	2	2

UNIT I**9 Hours****HUMAN ANTHROPOMETRICS AND SIZING SYSTEMS**

Garment manufacturing process flow chart, Measurements and its importance, land mark terms, sequence of taking body measurements-vertical measurements and horizontal measurements-Anthropometrics research. Sizing system: size categories in men's wear, women's wear and children's wear, international sizing, ASTM standard size chart. Proportion and disproportion of human figure.

UNIT II**9 Hours****PATTERN MAKING**

Pattern making tools, pattern making terms, basic blocks, pattern details, dart, notches, grain line, drill hole marks, ease allowance, seam allowance, style lines, types of patterns, techniques of pattern making - drafting, draping and flat pattern, blending and trueing, Interpretation of design and specification sheet, tolerance, different types of patterns produced during sampling and production.

UNIT III**9 Hours****DRAFTING**

Principles of pattern drafting, Drafting patterns for basic bodice, sleeve, skirt, types of sleeves, collars, yokes, cuffs. shirt and trouser. Skirts - length variation, skirt foundations, styles pleated, tiers, godets, gored, circular, cowl, pegged, skirts with yoke, uneven hem lines, peplums, wrap skirt, cascade wrap, Pants: foundations, culottes, jean, hip hugger, jump suits, Bermudas, pedal pushers, capri.

UNIT IV**9 Hours****FLAT PATTERN TECHNIQUES AND FIT**

Dart manipulation methods - pivot, slash & spread and measurement method. Single and double dart series, conversion of dart into style lines, yokes, gathers and multiple darts. Pattern alterations: Fit-importance, standards, influence of clothing fit, importance of altering patterns, principles of pattern alterations, common pattern alterations in various garments, alteration of patterns for irregular figures.

UNIT V**9 Hours****PATTERN GRADING**

3D body scanning, principles, operations and advantages of body scanning technologies. Principles of pattern grading, types of draft grading and track grading, two dimensional and three-dimensional grading, grading of bodice, sleeve, skirt, trouser, and collar, computerized pattern grading. Types of layouts, laying patterns on different types of fabric, marker planning for different types of garments.

22TT021 GARMENT PRODUCTION MACHINERY AND EQUIPMENT

3 0 0 3

Course Objectives

- To acquire knowledge on the design, construction and operational features of garment production machinery and equipment.
- To understand the details of garment machinery and equipment with focus on the means of exploiting the features built in the garment machinery and equipment.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

- Organize the operational parameters of spreading, cutting machines and evaluate the performance.
- Assess sewing machine and its components for their use in apparel manufacture.
- Evaluate single needle lock stitch machine for apparel manufacture.
- Select appropriate overlock sewing machines for apparel manufacture.
- Select appropriate work aids in apparel manufacture.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	3	-	2	-	1	-	-	-	-	2	2	-	3	2

UNIT I**9 Hours****SPREADING AND CUTTING MACHINES**

Spreading machines: Spreading table - stationary-portable -fixed machines - travelling spreaders - manual - semi-automatic - automatic. Cutting machines: Vertical blade reciprocating - rotary blade - band knife - die cutter - clickers and presses - shears - hand knives - short knives - table sword knives - notches - drills - computer-controlled cutting knives - machines using laser, water, plasma and ultrasonic waves.

UNIT II**9 Hours****SEWING MACHINE**

History of sewing machines - classification according to bed types - major parts of sewing machinery and functions. Adjustment of major parts of single needle lock stitch machine: non-UBT: stand height, pedal, presser foot, and height of needle bar, needle to hook relationship, height of feed dog, normal and reverse feed stitch length, feed timing, presser foot pressure, needle and bobbin thread tension, bobbin winding assembly, belt tension.

UNIT III**9 Hours****SEWING MACHINE ADJUSTMENT (SNLS)**

Sewing needle and sewing thread, thread consumption, thread routing. Adjustment on SNLS-UBT: Needle stop position, wiper, thread timing sequence, timing of thread trimmer cam, positioning the moving knife, installation, sharpening, replacing moving knives.

UNIT IV**9 Hours****SEWING MACHINE ADJUSTMENT (OVERLOCK)**

Parts, functions and adjustments of over lock: Needle height, feed dog height, differential feed ratio, tilt of the feed dog, position of the upper and lower knives, sharpening of knife and looper.

UNIT V**9 Hours****WORK AIDS**

Work-aids and attachments, functions of pullers, guides and folders compensating presser foot left, right, double; feller, hemmer, etc. Collar turning machines, folding machinery, fusing and pressing machinery.

Total: 45 Hours**Reference(s)**

Course Objectives

- To understand the managing aspects the apparel industry.
- To understand the basics of managing a garment production factory.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Construct organization charts for various sizes of woven, knitted or leather apparel industry.
2. Organize appropriate layout for optimum utilization of resources.
3. Evaluate apparel market structure and market operations.
4. Create project report for an apparel start-up.
5. Organize export documentation according to rules and regulations.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

2	1	2	1	-	2	-	-	-	-	2	3	1	3	2
3	2	2	3	-	2	-	-	-	-	2	3	1	2	3
4	1	2	2	-	1	-	-	-	-	1	3	1	3	2
5	1	2	1	-	1	-	-	-	-	2	3	1	2	1

UNIT I**9 Hours****ENTREPRENEURSHIP**

Entrepreneurship development skills -concept of small-scale industry - advantages of SSI units. Classification of Garment Units: Woven - knitted - lingerie - leather garment - sportswear - outer wear - under garments - hospital wear. Costing: Garment cost elements - cost calculations (numerical problems).

UNIT II**9 Hours****SETTING UP A GARMENT UNIT AND LABOUR LAWS**

Study of land - Norms of SA-8000 - capital - labour - market demand - preparing a project - large scale industry - advantages over SSI - Bank assistance. Government Schemes. Labour - Study of labour laws - factory act - labour laws - welfare measures - safety act.

UNIT III**9 Hours****PRODUCTION MANAGEMENT**

Production planning and control - production systems - material flow control - optimization of work place arrangement for higher productivity. Types of production layouts: Process oriented - Product oriented. Case study.

UNIT IV**9 Hours****MARKETING**

Market structure: Domestic - International-Wholesale - Retail. Buying seasons: Spring - Summer - Autumn -Winter - Holiday. Advertising - different media - trade fare - display - exhibition - buyer - seller meet.

UNIT V**9 Hours****EXPORTS SCENARIO**

Exports policy - trade documentation and quota policy - AEPC and its role in the garments industry. Export Documentation. Payment terms.

Total: 45 Hours**Reference(s)**

1. R. K. Sharma, Development Banks and Entrepreneurship Promotion in India, Mittal Publications, New Delhi, 2001.
2. O. P. Khanna, Industrial Engineering and Management, Dhanpat Rai Publications (p) Ltd., New Delhi, 1999.
3. Ruth E Glock, Grace I Kunz, Apparel Manufacturing - Sewn Product Analysis - 3rd Edition, Prentice Hall Inc., 2000.
4. Jacob Solinger, Apparel Manufacturing Handbook - Analysis Principles and Practice, Bobbin Blenheim Media Corp; 2nd edition, 1988.

Course Objectives

- To teach the activities of marketing and merchandising in the apparel industry
- To teach the commercial and sourcing aspects of the garment industry.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Construct organization charts for industrial units of varying sizes; plan for realizing export incentives.
2. Organize and implement marketing strategies and goals.
3. Organize production, visual merchandising, product development and line presentation.
4. Generate materials requirement plan for a given order and identify sourcing resources.
5. Outline export documentation and its procedures.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

3	1	1	-	-	-	2	-	-	2	1	3	2	3	2
4	1	2	-	-	-	2	-	-	2	2	3	2	3	2
5	1	2	-	-	-	1	-	-	2	2	3	1	3	1

UNIT I**9 Hours****ORGANIZATION OF THE APPAREL BUSINESS**

Introduction to apparel industry - Organization of the apparel industry - Types of exporters - Business concepts applied to the apparel industry - International trade. WTO: Functions and objective. GSP. Export incentives: Duty drawback - DEPB - Import - Export.

UNIT II**9 Hours****MARKETING**

Functional organization of an apparel firm. Responsibilities of a marketing division - Marketing objectives and strategies - Marketing research, Consumer research, Product research - Types of markets: Retails and wholesale strategies for merchandise distribution - Retailers- Sourcing flows and practices - Marketing plan.

UNIT III**9 Hours****MERCHANDISING**

Definition - functions. Role and responsibilities of merchandiser - Apparel Merchandising and Visual merchandizing, different types of buyers - communications with the buyers - Role of Buying office - awareness of current market trends - Product development, Line planning - Line presentation- Line development.

UNIT IV**9 Hours****SOURCING**

Need for sourcing- Role of merchandiser in sourcing-Sourcing Process-Sourcing materials-manufacturing resources planning- principles of MRP- methods of sourcing- sourcing strategies. Supply chain and demand chain analysis- Materials management for quick response - JIT Technology.

UNIT V**9 Hours****DOCUMENTATION**

Order confirmation, Export documents, BoM, FOB, FAB, C&F value (Cost &Freight), CIF (Cost, insurance & freight), letter of credit, Shipping Bill /Bill of Export, Customs Declaration Form, Dispatch Note, Commercial invoice, Consular Invoice, Customs Invoice, Legalized/ Visaed Invoice, Certified Invoice, Packing List, Certificate of Inspection, Black List Certificate, Manufacturer's Certificate, Shipping Order-Pre-shipment post-Shipment Documentation-Terms of sale- Payment-Shipment.

Total: 45 Hours**Reference(s)**

1. Ruth E Glock, Grace I Kunz, Apparel Manufacturing - Sewn Product Analysis - 3rd Edition, Prentice Hall Inc., 2000.
2. V. R. Sampath, P. Perumalraj and M. Vijayan, Apparel Marketing and Merchandising, Kalaiselvam Pathippakam, Coimbatore, 2007.
3. R. Rathinamoorthy, R. Surjit, Apparel Merchandising., Woodhead Publishing India private limited, 2017.
4. Grace I. Kunz, Merchandising: Theory, Principles and Practice, Fairchild Books, 2005.
5. V. Ramesh Babu, A. Arunraj, Fashion Marketing Management, Woodhead Publishing, India private Limited, 2019.

Course Objectives

- To teach the overview of sustainability within the textiles and fashion industry.
- To teach the slow and fast fashion to the supply chain, new design processes and material selection.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Outline the key sustainability challenges and opportunities during garment production, apparel use and end-of-use.
2. Resolve the sustainability innovation in production and designing fabrics and garments.
3. Analyse how to contribute to improved sustainability performance with textile waste management strategies and design processes.
4. Evaluate innovative fashion ideas with an environmental and humanitarian focus in sustainable fashion and textile industries.
5. Compare and utilize sustainable design terminology, concepts and theories in fashion and textile industries.

Articulation Matrix

4	2	2	-	-	2	2	3	-	-	1	3	2	3	2
5	1	1	-	-	2	2	2	-	-	2	3	1	3	2

UNIT I**9 Hours****NATURAL AND SYNTHETIC FIBRES AND ITS SUSTAINABILITY IMPACTS**

Material Diversity-Market in Textiles-Background to sustainability impacts-Review of Natural and manufactured fibres - Fibre comparisons and assessments- Fibre Alternatives-Organic Cotton-Low-chemical cotton-Low water use cotton-Fair Trade Cotton-Organic wool-Hemp-Wild (Tussah or peace) silk-Poly (lactic acid)- Lyocell-Bamboo-Soya-Naturally Coloured Fibre-Recycled fibre.

UNIT II**9 Hours****SUSTAINABILITY INNOVATION IN FIBRE AND FABRIC PRODUCTION AND DESIGNING FABRICS AND GARMENTS**

Background to sustainability innovation in production-Best practice in fibre and fabric processing-Spinning, weaving and knitting-Fabric finishing-Specialist fabric finishing-Cut-make-trim-Modelling the industry as a whole system-Use Matters- relative impact of textile products throughout life-Innovating to reduce the impact of the use phase-Process focus-more efficient laundering practices-Product focus-designing fabrics and garments that cause less impact as they are laundered-Consumer focus-designing clean clothes.

UNIT III**9 Hours****TEXTILE WASTE MANAGEMENT STRATEGIES**

Introduction to textile waste- Reuse, Recycling and Zero Waste- Waste management strategies-Design for recycling and disassembly-Critique of waste management strategies-Industrial Ecology-Cradle-to-cradle.

UNIT IV**9 Hours****SUSTAINABLE FASHION AND TEXTILE SYSTEMS**

Sustainable Fashion and Textile Systems-Fashion, Needs and Consumption-Value-free fashion-Fashion and clothes-A new fashion ethic-A new aesthetic -Reversing the escalators of consumption-Local and Light-Bio-Mimicry-Locally made, globally relevant-Local and connected-Local Wisdom-Distinctiveness- Light-Lightweight materials and structures-Nega Demand-Sharing-Services.

UNIT V**9 Hours****SUSTAINABLE PASSIVE FASHION AND DURABILITY OF NEW PROJECTS**

Speed and rhythms in nature and culture-Durability-Appropriateness-Understanding patterns of use-Slow design- Slow fashion-The Lifetimes Project-User Maker-Passive fashion-New model of action - Open- source design-Matrushka-Updatable.

Total: 45 Hours

Course Objectives

- To analyse textiles-based products used in homes and their selection.
- To acquire knowledge on manufacture of home textiles.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Assess the characteristics of home furnishing textile materials.
2. Select floor coverings according to specific needs.
3. Assess suitability of curtains and draperies according to customer needs.
4. Analyse bed linen requirements in technical terms.
5. Select technical parameters for bath towel applications.

UNIT I

9 Hours

HOME FURNISHING

Textile Furnishing: Woven and Nonwoven. Factors affecting selection of Home Furnishings, Selection of: Fibers, Colours, Designs. Kitchen Textiles: Apron-Dish cloth, Bread Bag, Pot Holders. Table textiles: Table Mats - Table cloths, Types - Materials. Upholstery: Materials - Fixed upholstery, Non-stretch loose covers, Stretch covers - Cushion covers. Developments in Textile Furnishing.

UNIT II

9 Hours

FLOOR COVERINGS

Hard floor covering: Resilient -Soft floor coverings -Soft Rugs -Cushions-Pads. Carpet manufacture: Wilton - Axminster - Knitted, Stitch bonding- Flocking. Types: Tufted - Needle felt - Woven- Hand tufted. Recent Developments in manufacturing of floor coverings.

UNIT III

9 Hours

CURTAINS AND DRAPERIES

Choice of Fabrics used for curtains and draperies, Curtains-Developments in Finishing of Draperies. Draperies - Tucks and pleats-use of Drapery Rods, Hooks, Tape Rings, Pins. Textile wall hanging and its methods. Advances in Home decoration.

UNIT IV

9 Hours

BED LINEN

Bed Linen: Types: Sheets, Blankets, Blanket Covers, Comforters, Comforter Covers, Bed Spreads, Mattress - Mattress Covers, Pads, Pillows. Made-ups in hospitals, Textiles care labelling. Testing of home textiles: Colour fastness, Shrinkage, Abrasion - Flammability. Developments in living room furnishing.

UNIT V

9 Hours

TOWELS

Types: Bath robes, Bath towels, Napkins. Construction: Weave- Pile height - Pattern - Dyeing and Finishing, Absorption tests. Velour, Types of Velvet, Construction of velvet fabrics.

Total: 45 Hours

4. Irsak.C, Nonwoven Textiles, Textile Institute, Manchester, 2000.

Course Objectives

- To understand the technological aspects of medical textiles.
- To acquire knowledge on the implantable, non-implantable and extracorporeal devices.
- To innovate biomaterials based on the healthcare and hygiene products.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Execute the textile fibres, yarns and fabric structures used in biomaterials applications.
2. Assess functional requirements, types and evaluation of wound dressings, bandages, vascular grafts, and sutures for medical textile applications.
3. Resolve the processes, functional requirements, characterization and evaluation of blood vessel, tendons, ligaments and scaffolds for tissue engineering applications.
4. Outline the textile material used for hygiene and health care applications.
5. Choose appropriate techniques and processes for the production of medical textiles and products.

Articulation Matrix

UNIT I MEDICAL TEXTILES- AN OVERVIEW Medical Textiles -basics, fibres used, classification. Biomaterials in medical textiles. Textile fibres and yarn - introduction, classification, chemical and physical properties. Manufacturing process - fibre and yarn. International standards. Fabric structures: Woven, Knitted, Nonwoven fabrics.	9 Hours
UNIT II IMPLANTABLE AND NON-IMPLANTABLE MATERIALS Bandaging, pressure garments and wound care materials Implantable biomedical devices: Vascular grafts, Sutures, Heart valves- basic manufacturing process and evaluation methods.	9 Hours
UNIT III EXTRACORPOREAL DEVICES Scaffolds for Tissue engineering, Rapid prototyping, Cartilages, Liver, Blood Vessel, Kidney, Urinary bladder, Tendons, Ligaments, Cornea- materials, function, evaluation techniques.	9 Hours
UNIT IV HEALTHCARE AND HYGIENE PRODUCTS Application of nonwovens in healthcare and hygiene sectors- Surgical Gowns, masks, wipes, Antibacterial Textiles, Super absorbent polymers. Medical textiles in infection control.	9 Hours
UNIT V ADVANCES IN MEDICAL TEXTILES Electro spinning, Plasma technology, Micro/nano encapsulation, Thin film technology, Ultrasonic sealing, Laser technology, Molecular Imprinting technology. Modelling methods of physiological system for medical textiles -basics. Fundamental aspects of legal and ethical issues involved within the medical textiles supply chain, Future of medical textiles and products.	9 Hours

Total: 45 Hours

Course Objectives

- To acquire the knowledge of various manufacturing and processing technologies for composite materials.
- To understand mechanical characterization and applications of textile composites.
- To acquire knowledge of ASTM, ISO, BSI standards used in composite materials.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Organize the composite materials and evaluate the role of reinforcement and matrix in a composite.
2. Analyse physical and chemical properties of high-performance reinforcements and matrix materials and the methods to improve inter facial bonding.
3. Outline methods of manufacturing advanced composite preforms for designing composite materials
4. Analyse composite manufacturing techniques for selective end-use applications.
5. Evaluate the mechanical properties of composite materials employing standard test methods.

5	3	2	3	1	2	-	1	2	2	2	2	3	2	2

UNIT I

9 Hours

INTRODUCTION TO COMPOSITE MATERIALS

Classification: fibre - particulate -laminar composites. Constituents of composite materials- functions of fibre and matrix - Properties of fibres and matrix materials- Critical fibre length - Aligned and random fibre composites - property prediction - rule of mixtures- simple problems.

UNIT II

9 Hours

COMPOSITE MATERIALS

Types of high-performance fibres and their properties-Types of matrix materials -Properties of Thermoset and Thermoplastics properties, fibre matrix interface coupling agents- Coupling of interfaces and interfacial reaction in fibre composites.

UNIT III

9 Hours

TEXTILE STRUCTURAL COMPOSITE REINFORCEMENTS

Textile Structural Composite, Reinforcements used for textile structural composite. Introduction to manufacturing techniques - property requirements. Textile preforms - weaving, knitting braiding, filament winding, pultrusion.

UNIT IV

9 Hours

COMPOSITES PROCESSING TECHNIQUES

Prepregs - Introduction, manufacturing techniques, property requirements, compaction and applications - Advantages and disadvantages of prepreg materials. Vacuum bagging - compression moulding - injection moulding - pultrusion - thermoforming - resin transfer moulding (RTM), VARTM, SMC, and BMC.

UNIT V

9 Hours

MECHANICAL CHARACTERISATION OF COMPOSITES

Introduction to structural material characterization standards- ASTM, ISO, BSI. Testing of composites materials- Fibre volume fraction - tensile- shear - compression - Impact-Fatigue -- flexural properties - Damage Tolerance assessment- Non-Destructive testing of composites.

Total: 45 Hours

Course Objectives

- To understand the technological aspects of specialty textiles.
- To acquire knowledge on the applications of specialty textiles.
- To innovate specialty textiles based on the requirements.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select fancy yarns for a given application.
2. Outline the manufacturing processes and applications of narrow fabrics.
3. Resolve the processes, techniques and applications of industrial webbings.
4. Outline the production processes of braided materials, machines and their applications.
5. Choose appropriate machines and processes for the production of carpets with the given specifications.

5	1	2	2	1	1	-	-	-	-	-	2	2	2	2

UNIT I**9 Hours****FANCY YARNS**

Slub Yarns - Crimp Yarn - Diamond Yarn - Boucle Yarn - Loop Yarn - Snarl Yarn - Mock Chenille Yarn - Knop Yarn - Stripe Yarn - Grandrelle yarn - Neppy yarn or Flaggy yarn - Button Yarn - Fascinated yarn - melange yarn. Methods for the production of fancy yarns in Ring spinning, Rotor spinning and Air Jet spinning. Applications of fancy yarns.

UNIT II**9 Hours****NARROW FABRICS**

Fibre and Yarn types, Fabrics. Preparation process for narrow fabric production-Winding, Warping, Sizing, Drawing-in, Tenting-in. Woven narrow fabrics and their construction- structure of narrow fabrics woven on shuttleless looms. Conventional shuttle loom, unconventional shuttle looms and shuttleless looms for narrow fabrics production. End use. Industrial tapes: Slide fastener tapes - Insulating tapes - Book binder tapes - Labelling Tapes - Border Tapes, Elastic Pleated lingerie ribbing. Features and application of narrow fabrics.

UNIT III**9 Hours****INDUSTRIAL WEBBINGS**

Manufacture of spindle drive webbing- Print webbings - Webbings for automobile safety belts. Industrial nets: Knotted netting and applications.

UNIT IV**9 Hours****INDUSTRIAL BRAIDS**

Classification of braids - Trimmed braids, Flat braids and Circular Braids, Hollow braids. Production techniques. Properties and Application.

UNIT V**9 Hours****CARPETS**

Non-pile carpet weaves and their looms, Pile surfaced carpet weaves and their looms. Embossing, singeing, drying. Needle felt floor coverings.

Total: 45 Hours**Reference(s)**

6. Crew AH and Arahamsen H Carpets: Back to Front"", Textile Progress, Vol.19, No.3, The Textile Institute, Manchester, 1987.

Course Objectives

- To acquire knowledge on the science and technology of coating and lamination of textile materials.
- To understand the applications of coated and laminated textiles.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Select polymers and resins for coating applications.
2. Assess textile fibres and structures for coating applications.
3. Select construction parameters for manufacturing coated fabrics.
4. Select coated textile-structure-based materials for specific end-uses.
5. Attribute coated and laminated textile materials.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	3	3	2	-	2	1	2	-	-	-	1	3	2	2

UNIT I**9 Hours****MATERIALS**

Commercial and technical scope of coated and laminated textiles. Materials for coating: Plastic materials - natural and synthetic rubbers, Polyvinyl Chloride, Acrylic polymers. Materials for lamination: Films - polyurethane foam -polyolefin foam.

UNIT II**9 Hours****MATERIALS AND RHEOLOGY**

Adhesives: Solvent-based and water-based. Textile Substrate: Requirements of textile substrates for coating, Selection of textile fibres and fabric structure. Rheological behaviour of fluids, Rheology of Plastisols: Apparent viscosity of Plastisols, Polymer size and size distribution, Plasticizer and Additives, Viscosity change during fusion.

UNIT III**9 Hours****COATING AND LAMINATION METHODS**

Coating and Lamination Methods: Calendaring coating - Knife coating - Roller coating - Nip and Dip coating - Spray coating - Foam coating - Powder coating-Slot die extruder-Flame lamination - Hot melt lamination.

UNIT IV**9 Hours****PRODUCTS**

Protective Clothing - the spacesuit - garment interlinings - Tarpaulins - Conveyor belts - PTFE coated belts - Hot air balloons - Exhibition board coverings - Labels -Tyres and hoses -applications: Automotive - Marine - Buildings and Architecture -Household products.

UNIT V**9 Hours****QUALITY EVALUATION**

Adhesion test -Flexing Test -Abrasion resistance - Fabric handle, drape and stiffness - Fabric strength - Bursting strength - Dimensional stability - Thermal comfort -Flammability testing.

Total: 45 Hours**Reference(s)**

Course Objectives

- To understand the concept of nanotechnology and its application in textiles.
- To evaluate the production methods of nanofibers.
- To acquire knowledge on nanocomposites and their properties.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Assess nanofibers produced by electrospinning technique.
2. Evaluate and characterize carbon nanotubes and nanocomposites.
3. Create polymer layered silicate nanocomposites.
4. Assess surface modification of textile materials for functional application.
5. Analyse hybrid polymer nanolayers for smart textiles.

Articulation Matrix

UNIT I**9 Hours****NANO FIBRES**

Fundamentals of nanotechnology, Basic properties of nanomaterial, Fabrication of nanomaterial, Top down and Bottom-up approaches. Outline of Various methods of synthesis of nanomaterial. Process: Electro spinning - properties -improvement - fibre morphology - fibre alignment.

UNIT II**9 Hours****NANO TUBES AND NANO COMPOSITES**

Carbon nano tubes: synthesis -characterization techniques- nano tubes-Polymer fibres- structures-production process- properties-fibre morphology. Nanocomposites, Polymers with CNTs: synthesis and their application, Polymer-Nanoclay composites fabrication and application, Principles of Polymer/Inorganic-inorganic nano composites in various Textile applications.

UNIT III**9 Hours****NANOFILLER POLYPROPYLENE FIBRES**

Polymer layered silicate nano composites: structure and properties -Nano composites Dyeing of Polypropylene- Modified propylene for improved dyeability. Properties of polymer relevant to electrospinning, Polymer Crystallinity, Polymer Molecular Weight, Glass Transition Temperature (T_g), Solution properties-Surface tension and Viscosity, polymer solubility, evaporation, basics of electrostatics and conductivity of solutions.

UNIT IV**9 Hours****NANO COATING OF TEXTILES**

Surface modification techniques - anti- adhesive nano coating of fibre and textiles - Water and oil repellent coating - Self-cleaning. Functional textiles: Protection - Various applications of Nanofibres and nanofibre coated textile fabrics such as in filtration, scaffolds, composites, dye sensitized solar cells, catalysis etc. Outline of the characterization methods.

UNIT V**9 Hours****HYBRID POLYMER NANOLAYERS**

Thin hybrid film - Smart textiles - Polymer to polymer hybrid layers - Polymer to particles hybrid layers. Nano fabrication of thin polymer fibre - "Grafting from" and "Grafting to" techniques for synthesis of polymer films, synthesis of smart switchable coatings. Nanofinishes such as antimicrobial finishes, soil release finishes, flame retardants, antistatic, fluoro chemical, Nanotechnology based finishes for personal protection, such as bacteria, virus, toxic gas and chemicals, chemical warfare agents (CWA).

6. Mangala Joshi, Nanotechnology in textiles-Advances and Developments in Polymer Nanocomposites, Jenny Stanford Publishing Private Limited, 2020.

Course Objectives

- To teach the importance of energy management systems in the textile industry.
- To teach the energy conservation and industrial safety aspects in the textile industry.

Programme Outcomes (POs)

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Construct organization charts for industrial units of varying sizes; plan the energy level utilizations
2. Organize production and power utilization systems in an effective manner to meet market demand.

ENERGY MANAGEMENT IN TEXTILE INDUSTRY

15 Hours

Power requirements and consumptions for spinning, weaving, Knitting, and Garment machinery, Amenities required, Ventilation, Humidification systems, RH, and temperature of various departments. Lighting types, Intensity requirements. Energy efficiency, Energy management in various textile sectors, Importance of energy efficiency, recent trends in energy efficient transformers, motors, compressors, and lighting systems. Energy generation and pollution effects in various textile sectors, CO₂ emission, and Carbon footprints.

Course Objectives

- To teach the importance of recycling in the textile and apparel industry
- To teach the commercial and sourcing aspects of the recycling industry

Programme Outcomes (POs)

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO1: Demonstrate the knowledge and understanding of the processes and systems related to textile manufacturing and solve the problems related to production and quality of fibres, yarns and fabrics.

PSO2: Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

1. Construct organization charts for industrial units of varying sizes; plan for realizing export incentives.
2. Organize production, visual merchandising, product development, and line presentation.

Articulation Matrix

RECYCLING OF TEXTILE MATERIALS**15 Hours**

Importance of textile and apparel recycling process. Sorting process. The pyramid models. Textile recycling constituents. Life cycle of textile products. Recycling Issues and Technology- Designing of easily recyclable textile products. Systems planning for carpet recycling. Reuse of Polymer and Fibre Waste - Introduction. Utilization of PET/ Nylon waste. Manufacturing nonwovens and other products using recycled fibres containing spandex. Recycling of industrial fibres. Recycled products available in the market and their manufacturing methods.

Course Objectives

- To learn the eco-friendly dyeing techniques used in the textile industry.
- To learn the eco-friendly safety standards in dyeing techniques used in the textile processing industry.

Programme Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2.Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

The students will be able to,

1. Execute the mechanism and applications in the textile processing industry.
2. Implement environmental standards to control the usage of dye treatments in chemical processing.
3. Apply suitable physical, chemical, and biological treatment for waste minimization, and dye effluent processes in the textile processing industry.

Course Objectives

- To learn the sustainable denim processing and finishing techniques used in the textile industry.
- To teach the overview of sustainability in denim processing, preparation of stock solution for dyeing, and denim finishing treatments used in the textile industry.

Programme Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2.Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

The students will be able to,

1. Assess the key sustainability challenges and opportunities during denim processing and finishing treatments used in the textile industry.
2. Apply sustainable process parameters, concepts, and theories of denim dyeing and finishing treatments in the textile industry.
3. Analyse the sustainability innovation in denim dyeing and finishing techniques.

Course Objectives

- To teach the method of producing eco-friendly home textile products in the textile industry.
- To teach the eco-standard importance of home textile products.

Programme Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2.Develop new designs (Woven / Printed / Dyed) and products (Knitted / Woven / Nonwoven) for apparel and technical applications.

Course Outcomes (COs)

The students will be able to,

1. Attribute the eco-friendly processes and develop home textile samples with eco-friendly certified products.
2. Organize production and product development processes for an eco-friendly environment.

Articulation Matrix

ECO-FRIENDLY HOME TEXTILE PRODUCTS**15 Hours**

Home textile definition and requirements. Kitchen linen types & Specifications, Bedlinen types & Specifications, Furnishing Fabrics, Floor coverings and Wall coverings, Decoration fabrics. Non-pile carpet weaves and their looms. Needle felt floor coverings. Global eco standards and eco-labels. Eco-mark scheme of India. Concept of eco-management, Eco-audit, certification, and labeling of eco-friendly textiles. Concept of Sustainable Textiles, Approach and Alternative methods/chemicals in Pretreatments, Eco-friendly dyes and dyeing, Eco-Friendly Finishing – formaldehyde free finishing, Comfort and Hygiene Finishing using natural agents like Neem - Aloe vera – Chitosan for antimicrobial finishing.

4. Miraftab M and Horrocks A R, "Eco Textiles", Woodhead Publishing Ltd., Cambridge, 2007.

Course Objectives

- To develop an understanding and analyze the energy data of industries.
- To carryout energy accounting and balancing.
- To conduct energy audit and suggest methodologies for energy savings.
- To utilize the available resources in optimal ways.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Course Outcomes (COs)

1. Assess and characterize the various energy utilization techniques.
2. Implement suitable technique to provide an energy efficient system.
3. Assess the need for thermal systems with latest technologies.
4. Choose suitable techniques doe conserving energy with respect to emerging trends.
5. Analyse the impact of economics on the conservation of energy.

UNIT I

9 Hours

INTRODUCTION

Energy - Power – Past & Present scenario of World; National Energy consumption Data – Environmental aspects associated with energy utilization – Energy Auditing: Need, Types, Methodology and Barriers. Role of Energy Managers. Instruments for energy auditing.

UNIT II

9 Hours

ELECTRICAL SYSTEMS

Components of EB billing – HT and LT supply, Transformers, Cable Sizing, Concept of Capacitors, Power Factor Improvement, Harmonics, Electric Motors - Motor Efficiency Computation, Energy Efficient Motors, Illumination – Lux, Lumens, Types of lighting, Efficacy, LED Lighting and scope of Encon in Illumination.

UNIT III**9 Hours****THERMAL SYSTEMS**

Stoichiometry, Boilers, Furnaces and Thermic Fluid Heaters – Efficiency computation and Encon measures. Steam: Distribution & Usage: Steam Traps, Condensate Recovery, Flash Steam Utilization, Insulators & Refractories.

UNIT IV**9 Hours****ENERGY CONSERVATION IN MAJOR UTILITIES**

Pumps, Fans, Blowers, Compressed Air Systems, Refrigeration and Air Conditioning Systems – Cooling Towers – D.G. sets

UNIT V**9 Hours****ECONIMICS**

Energy Economics – Discount Rate, Payback Period, Internal Rate of Return, Net Present Value, Life Cycle Costing –ESCO concept .

Total: 45 Hours**Reference(s)**

6. Murphy. W.R. and G. Mc KAY, “Energy Management”, Butterworths, London 1987.

Course Objectives

- To understand the concepts of Object-Oriented Programming.
- To study the concepts of objects and classes.
- To familiarize in the types of constructors.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

Course Outcomes (COs)

1. Assess the characteristics and data types of C++ language.
2. Create programs using objects and classes for real world applications.
3. Construct programs to implement operator overloading and inheritance techniques.
4. Apply Polymorphism and File streams concepts to develop C++ program.
5. Design applications using templates and apply exception handling mechanisms.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	1	2	3	-	3	-	-	-	-	-	-	-	-	-
5	1	2	3	-	3	-	-	-	-	-	-	-	-	-

UNIT I**8 Hours****INTRODUCTION**

Need for object-oriented programming - Procedural Languages vs. Object oriented approach - Characteristics Object oriented programming - C++ Programming Basics: Basic Program Construction - Output Using cout - Input with cin - Data types- Variables and Constants - Operators - Control Statements-Manipulators - Type conversion. Function Prototyping- call by reference, return by reference- Inline function- Default arguments - Function overloading.(sona).

UNIT II **8 Hours**
OBJECTS AND CLASSES

Objects and Classes Simple Class - C++ Objects as Physical Objects - C++ Object as Data types-CONSTRUCTORS: Parameterized Constructors - Multiple Constructors in a Class - Constructors with Default Arguments - Dynamic Initialization of Objects - Copy and Dynamic Constructors - Destructors(PSG) - Structures and Classes - Arrays and Strings.

UNIT III **9 Hours**
OPERATOR OVERLOADING AND INHERITANCE

Operator Overloading and Inheritance Need of operator overloading- Overloading Unary Operators-Overloading binary Operators - Overloading Special Operators - Data Conversion Inheritance: Derived Class and Base Class - Derived Class Constructors-Overriding Member Functions-Class Hierarchies- Public and Private Inheritance-Levels of Inheritance-Multiple Inheritance.

UNIT IV **10 Hours**
POLYMORPHISM AND FILE STREAMS

Polymorphism and File Streams Virtual Function - Friend Function - Static Function-Assignment and Copy Initialization- Memory Management: new and delete Pointers to Objects, this Pointer-Streams - String I/O - Character I/O - Object I/O - I/O with Multiple Objects - File Pointers - Disk I/O with Member Functions- Error Handling in File I/O.

UNIT V **10 Hours**
TEMPLATES AND EXCEPTION HANDLING

Templates: Introduction - Function Templates - Overloading Function Templates-, user defined template arguments(sona) - Class Templates - Exception Handling - Syntax, multiple exceptions, exceptions with arguments.

Total: 45 Hours

5. E.Balagurusamy, Object Oriented Programming with C++, Tata McGraw Hill Publishing.

Course Objectives

- Implement applications based on core Java Concepts with examples.
- Construct application using inheritance, packages and exception handling for real time problems.
- Integrate the Java I/O concepts to handle input and output operations.
- Develop programs to perform string manipulation in java.
- Design GUI with Java for event handling and database applications.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

Course Outcomes (COs)

1. Execute applications based on core Java Concepts with examples.
2. Construct application using inheritance, packages and exception handling for real time problem.
3. Implement the Java I/O concepts to handle input and output operations.
4. Create programs to perform string manipulation in Java.
5. Apply GUI with Java for event handling and database applications.

5	2	2	2	-	2	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****BASICS OF JAVA**

The Genesis of Java - Overview of Java - Data Types, Variables, and Arrays - Operators – Control Statements - Introducing Classes - Methods and Classes.

UNIT II **9 Hours**

INHERITANCE, PACKAGES AND EXCEPTIONS

Inheritance: Basics - Using Super - Creating a Multilevel Hierarchy - Method overriding - Using Abstract Classes - Packages and Interfaces: Packages - Access Protection - Importing Packages- Interfaces Definitions and Implementations - Exception Handling: Types - Try and Catch - Throw.

UNIT III **9 Hours**

EXPLORING JAVA I/O

I/O Basics - Reading Console Input -Writing Console output - Native Methods - I/ O Classes and Interfaces - File - The Byte Streams - The Character Streams - Using Stream I/ O - Serialization.

UNIT IV **9 Hours**

JAVA STRINGS

String Handling: Special String operations and Methods - String Buffer - Exploring java. Lang: Simple type Wrappers - System - Math - Collections Framework: Collections Interfaces and Classes – Utility Classes: String Tokenizer - Date and Time.

UNIT V **9 Hours**

GUI WITH JAVA

Applet Basics - Applet Architecture - Applet Display Methods - Parameter Passing - Event Handling Mechanisms - Event Classes - Event Listener - Working with Windows, Graphics, Colors and Fonts - AWT Controls - Layout Managers and Menus – JDBC.

Total: 45 Hours

22OCS03 KNOWLEDGE DISCOVERY IN DATABASES

3 0 0 3

Course Objectives

- Introduce the basic concepts of data warehousing.
- Impart knowledge about the data mining functionalities.
- Assess the strengths and weaknesses of association mining and cluster analysis.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

Course Outcomes (COs)

1. Implement the concepts of Data Warehousing architecture and business analysis process.
2. Execute the process of Data Mining and preprocessing techniques for data cleansing.
3. Apply the association rules for mining the various kinds of data.
4. Analyze Classification and Clustering algorithms for various problems with high dimensional data.
5. Analyse various data mining techniques on complex data objects.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

3	2	2	2	-	-	-	-	-	-	-	-	-	-	-
4	3	2	2	2	-	-	-	-	-	-	-	-	-	-
5	2	2	2	2	-	-	-	-	-	-	-	-	-	-

UNIT I

9 Hours

DATA WAREHOUSING AND BUSINESS ANALYSIS

Data warehousing Components -Building a Data warehouse -Data Warehouse and DBMS-Metadata-Multidimensional data model - Data Extraction, Cleanup and Transformation Tools - Reporting, Query tools and Applications - OLAP vs OLTP - OLAP operations - Data Warehouse Schemas: Stars, Snowflakes and Fact constellations.

UNIT II **8 Hours**
INTRODUCTION TO DATA MINING

Introduction - Steps in knowledge discovery from databases process - Architecture of a Typical Data Mining Systems - Data Mining Functionalities - Classification of Data Mining Systems - Data mining on different kinds of data - Different kinds of pattern - Task Primitives - Integration of a Data Mining System with a Data Warehouse - Major issues in Data mining.

UNIT III **9 Hours**
ASSOCIATION RULE MINING

Market Basket Analysis- Frequent Item Set Mining methods: Apriori algorithm - Generating Association Rules - A Pattern Growth Approach- Pattern mining in multilevel and multidimensional space - Mining Various Kinds Of Association Rules - Association Analysis to Correlation Analysis - Constraint Based Association Mining.

UNIT IV **9 Hours**
CLASSIFICATION AND CLUSTERING

Decision Tree Induction - Bayesian Classification - Rule Based Classification - Classification by Back propagation - Support Vector Machines - Clustering: Types of data - Partitioning methods: k-means, k- medoid - Hierarchical Methods: distance based agglomerative and divisible clustering, BIRCH – Density Based Method: DBSCAN - Grid Based Method: STING.

UNIT V **10 Hours**
DATA MINING APPLICATIONS

Mining complex data objects - Text Mining - Graph mining - Web mining - Spatial Data mining -Application and trends in data mining - Social impacts of Data mining.

Total: 45 Hours

- 4 Margaret H.Dunham, Data Mining: Introductory and Advanced Topics, Pearson Education 2003.

Course Objectives

- Understand the technologies involved in e-learning.
- Gain the fundamentals of e-learning techniques.
- Determine the characteristics of Teaching-Learning Process.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Course Outcomes (COs)

1. Assess knowledge about the basic concepts of e-learning.
2. Implement the technology mediated communication in e-learning
3. Outline the concept of e-learning and content the process management.
4. Analyze the teaching and learning processes in e-learning environment.
5. Assess the various applications of e-learning.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	2	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****INTRODUCTION**

Evolution of Education - Generations of Distance Educational Technology - Role of E-Learning - Components of e-learning: CBT, WBT, Virtual Classroom - Barriers to e-Learning Roles and Responsibilities: Subject Matter Expert - Instructional Designer - Graphic Designer - Multimedia Author - Programmer - System Administrator - Web Master.

UNIT II**9 Hours****TECHNOLOGIES**

Satellite Broadcasting - Interactive Television - Call Centers - Whiteboard Environment - Teleconferencing: Audio Conferencing - Video Conferencing -Computer Conferencing. Internet: E-mail, Instant Messaging, Chat, Discussion Forums, Bulletin Boards, Voice Mail, File Sharing, Streaming Audio and Video.

UNIT III **9 Hours**

MANAGEMENT

Content: E-Content, Dynamic Content, Trends - Technology: Authoring, Delivery, Collaboration - Services: Expert Service, Information Search Service, Knowledge Creation Service - Learning Objects and E-Learning Standards. Process of E-Learning: Knowledge acquisition and creation, Sharing of knowledge, Utilization of knowledge - Knowledge Management in E-Learning.

UNIT IV **9 Hours**

TEACHING-LEARNING PROCESS

Interactions: Teacher-Student - Student-Student - Student-Content - Teacher- Content - Teacher-Teacher - Content-Content Role of Teachers in E-Learning - Blended Learning -Cooperative Learning - Collaborative Learning - Multi Channel learning -Virtual University - Virtual Library.

UNIT V **9 Hours**

APPLICATIONS

Customer service training - Sales training - Customer training - Safety training - IT training – Product training - Healthcare training.

Total: 45 Hours

Course Objectives

- Understand the basic ideas of Text mining.
- Analyze the methods and approaches used in analytics.
- Gain knowledge on various types of analytics like web, social network, and social media.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

Course Outcomes (COs)

1. Create the concepts and applications of text mining.
2. Execute the content analysis and sentiment analysis.
3. Implement web analytics with a suitable model.
4. Analyse social network analytics with suitable example.
5. Analyse social media analytics with suitable example.

Articulation Matrix

5	2	3	-	2	3	-	-	-	-	-	-	-	-	-

UNIT I**7 Hours****TEXT MINING**

Introduction, Core text mining operations, Preprocessing techniques, Categorization, Clustering, Information extraction, Probabilistic models for information extraction, Text mining applications.

UNIT II**9 Hours****METHODS**

Content Analysis-Natural Language Processing-Clustering & Topic Detection-Simple Predictive Modeling-Sentiment Analysis; Sentiment Prediction.

UNIT III **9 Hours**
WEB ANALYTICS

Web analytics tools-Clickstream analysis-A/B testing, online surveys-Web search and retrieval-Search engine optimization-Web crawling and Indexing-Ranking algorithms-Web traffic models.

UNIT IV **10 Hours**
SOCIAL NETWORK ANALYTICS

Social contexts: Affiliation and identity - Social network analysis - Social network and web data and methods. Graphs and Matrices - Basic measures for individuals and networks.

UNIT V **10 Hours**
SOCIAL MEDIA ANALYTICS

Information visualization - Making connections: Link analysis - Random graphs and network evolution.

Total: 45 Hours

Course Objectives

- To understand the process of generating 3D Computer Aided Design (CAD) model by different method.
- To explain the constructional features and develop simple program for CNC lathe and Milling machines.
- To provide an exhaustive knowledge on various generic process and benefits of Additive Manufacturing.
- To familiarize about materials and process parameters of liquid and solid based AM techniques.
- To educate powder-based methodology and emerging trends with case studies, applications of AM techniques.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PSO1. Design, analyse and evaluate the performance of mechanical systems.

PSO2. Choose the appropriate methodology, materials, tools and machinery to manufacture quality products at economical cost.

Course Outcomes (COs)

1. Design a 3D model from the 2D data.
2. Create a CNC program for simple components.
3. Generate still file and manipulate parameters of AM machine.
4. Implement appropriate liquid or solid materials-based AM process to the respective application.
5. Select appropriate process to fabricate a functional/prototype for aerospace, automotive, electronics, manufacturing and medical applications.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

5	2	2	2	-	2	-	-	-	-	-	-	-	1	2	-

UNIT I**9 Hours****CAD MODELING**

Introduction - Design process - Stages. CAD - Input and Output devices, Modelling methods - Wire frame modelling, Surface modelling, Solid modelling - Constructive Solid Geometry and Boundary Representation Techniques. CAD/CAM data exchange - IGES, STEP. Product Life cycle management (PLM).

UNIT II**10 Hours****AUTOMATION AND CNC MACHINES**

Introduction to Automation - Definition, types, reasons for automating. CNC Machines - Principles, types, features, advantages, applications. CNC Machine structure - Linear motion bearings, Recirculating ball bearings, drive system, and control system. CNC Lathe and Milling programming - Linear and circular interpolation, threading and drilling programs.

UNIT III**7 Hours****ADDITIVE MANUFACTURING**

Introduction - Impact of Additive Manufacturing (AM) and Tooling on Product Development - Distinction between AM and CNC Machining - The Generalized AM Process chain - CAD Model - Input file formats - Generation and Conversion of STL file - File Verification and Repair - Build File Creation - Part Construction - Part Cleaning and finishing - AM Benefits - Classification of AM process

UNIT IV**8 Hours****LIQUID AND SOLID MATERIAL BASED SYSTEMS**

Stereo lithography Apparatus (SLA), Digital Light Processing (DLP), Fused Deposition Modelling (FDM) and Laminated Object Manufacturing (LOM) - Working Principle, Construction, Process, Materials and Applications

UNIT V**11 Hours****POWDER BASED PROCESSES AND APPLICATIONS OF ADDITIVE MANUFACTURING**

Selective Laser Sintering (SLS), Color Jet Printing (CJP), Electron Beam Melting (EBM) and Laser Engineered Net Shaping (LENS) - Working Principle, Construction, Process Variables, Materials and Applications. Reverse Engineering using 3D scanner. Application of Additive Manufacturing in Medical field, Manufacturing, Automotive industries, Aerospace and Electronics and Retail industries.

Course Objectives

- To impart the knowledge on production planning methodologies and layout design.
- To learn about production planning and its control methods.
- To provide the knowledge of work study, process charts and ergonomic condition.
- To impart the knowledge on inventory control and material handling.
- To learn about system analysis and different types of maintenance processes.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO11.Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PSO2. Choose the appropriate methodology, materials, tools and machinery to manufacture quality products at economical cost.

Course Outcomes (COs)

1. Select proper plant layout for the required production system.
2. Plan the resources required for the production and to perform the control methods.
3. Apply work study method, prepare charts to outline the process and develop ergonomic condition suitable for the processes.
4. Analyze the inventory required based on production needs and material handling.
5. Execute system analysis and use different types of maintenance process for smooth operations.

Articulation Matrix

5	2	3	1	-	2	-	-	-	-	-	-	-	-	2	-

UNIT I**9 Hours****INDUSTRIAL ENGINEERING AND PRODUCTION SYSTEM**

Industrial engineering - Concept, History and development, Applications, Roles of Industrial engineer- Production management, Industrial engineering versus production management, operations management. Plant layout, Criteria for good layout, Types of layouts - Process layout, Product layout, Combination layout and fixed position layout, Flow (material movement) pattern, Workstation Selection and design.

UNIT II**10 Hours****PROCESS PLANNING AND PRODUCTION CONTROL**

Introduction to Process Planning-Definition, Procedure, Process selection, Machine capacity, Process sheet. Process analysis - Group technology, classification and coding system, formation of component family - Production planning, loading, scheduling. Production control -dispatching, routing - Progress control bar, curve, Gantt chart, route and schedule chart.

UNIT III**8 Hours****WORK STUDY AND ERGONOMICS**

Work study - Definition, Need, Advantages, objectives of method study and work measurement, method study procedure, Process chart - symbols, outline process chart, flow process chart, principles of motion economy, ergonomics- applications of ergonomic principles in the shop floor- work benches- seating arrangement, Industrial physiology.

UNIT IV**10 Hours****INVENTORY MANAGEMENT**

Inventory control, classification, management, objectives, functions. Economic order quantity, Economic batch quantity, inventory models, ABC analysis, Material Requirement Planning(MRPI), Manufacturing Resource Planning (MRPII), Operating cycle, lean manufacturing, Supply chain management - Material handling.

UNIT V**8 Hours****SYSTEM ANALYSIS AND MAINTENANCE**

System concept - system analysis, systems engineering, value engineering, value control, types of values. Plant maintenance - objectives, importance. Maintenance engineer - duties, functions and responsibilities. Types - breakdown, scheduled, preventive and predictive - Plant maintenance schedule, Condition monitoring.

Total: 45 Hours**Reference(s)**

1. Khanna O.P., Industrial Engineering and management, Dhanpat Rai Publications., 2010.
2. Martand T. Telsang, Industrial Engineering and Production Management, S Chand Publishers, 2006.
3. Panneerselvam R., Production and operations management, Heritage Publishers, 2006.
4. Ravi Shankar, Industrial Engineering and Management, Golgotia Publications Pvt. Ltd., New Delhi, 2009.

Course Objectives

- To understand the principles, objectives and importance of maintenance adopted in industry for successful progress.
- To introduce different maintenance categories, its merits and types of lubrication.
- To expose the idea of condition monitoring, methods and instruments used for allied measurements.
- To learn about failure analysis and repair methods for few mechanical elements.
- To promote computerization in maintenance and inventory management.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO2. Choose the appropriate methodology, materials, tools and machinery to manufacture quality products at economical cost.

Course Outcomes (COs)

1. Implement the principles, objectives and importance of maintenance adopted in industry.
2. Select the suitable maintenance category and lubrication type.
3. Apply the appropriate methods and instruments for condition monitoring.
4. Analyze the failures of mechanical systems and select suitable repair methods.
5. Apply computers in maintenance and inventory management.

UNIT I**9 Hours****PRINCIPLES OF MAINTENANCE PLANNING**

Basic principles of maintenance planning - Objectives and principles of planned maintenance activity - Importance and benefits of sound maintenance systems - Maintenance organization - Maintenance economics.

UNIT II**9 Hours****MAINTENANCE CATEGORIES AND LUBRICATION**

Maintenance categories - Comparative merits of each category - Preventive maintenance, Maintenance schedules, Repair cycle - Total Productive Maintenance - Principles and methods of lubrication.

UNIT III**9 Hours****CONDITION MONITORING**

Condition based maintenance - Cost comparison with and without Condition Monitoring - Methods and instruments for condition monitoring - Noise, vibration, wear and temperature measurement.

UNIT IV**9 Hours****FAILURE ANALYSIS AND REPAIR METHODS**

Failure analysis - Failures and their development - Role of Non-Destructive Testing in failure analysis - Repair methods for bearings, cylinder block, fuel pump, shaft.

UNIT V**9 Hours****COMPUTER AIDED MAINTENANCE MANAGEMENT**

Approach towards Computerization in maintenance - computer-aided maintenance management system (CAMMS) - Advantages of CAMMS - spare parts and inventory centre performance reporting.

Total: 45 Hours**Reference(s)**

2. Mishra R.C, Pathak K, Maintenance Engineering and Management, second edition, Prentice Hall India Learning Pvt. Ltd., 2012.
3. Keith Mobley R, Lindley R. Higgins and Darrin J. Wikoff, Maintenance Engineering Handbook, Seventh edition, McGraw-Hill Professional, 2008.
4. Davies A, Handbook of Condition Monitoring: Techniques and Methodology, Springer, 2012.
5. Otegui Jose Luis, Failure Analysis, Fundamentals and Applications in Mechanical Components, Nineteenth edition, Springer, 2014.

Course Objectives

- To study the principles of safety management system.
- To introduce the provisions contained in the industrial laws.
- To provide knowledge on safety requirements for engineering industry.
- To learn safety requirement for chemical industry.
- To study the various safety measures adopted in construction industries.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1. Design, analyse and evaluate the performance of mechanical systems.

PSO2. Choose the appropriate methodology, materials, tools and machinery to manufacture quality products at economical cost.

PSO3. Address all the fluid flow and heat transfer related problems of mechanical systems.

Course Outcomes (COs)

1. Assess safety management system of an industry.
2. Implement the provisions of acts and rules in industries.
3. Implement and review the safety performance followed in various industries.
4. Evaluate safety appraisal in chemical industries.
5. Generate safety reports on construction industries.

UNIT I SAFETY MANAGEMENT Concepts - Evolution, International Labour Organization (ILO), National Safety Council, Techniques - Job Safety Analysis (JSA), Safety survey, Safety inspection, Safety Sampling, Accident Reporting and Investigation - Concept of an accident, Accident causation models, cost of accident, investigation, Safety Performance Monitoring - Safety indices.	8 Hours
UNIT II SAFETY AND LAW Factory Act 1948-Safety and Health chapters, Tamil Nadu Factories Rules- Safety and Health chapters, Environment and Pollution Laws, Building and other construction works act 1996, Electricity Rules.	10 Hours
UNIT III SAFETY IN ENGINEERING INDUSTRIES Safety in machine shop - Principles of machine guarding - Personal protective equipment- Safety in handling industrial gases - Safety in cold forming and hot working of metals- Safety in finishing, inspection and testing, heat treatment, electro plating, leak test, radiography.	10 Hours
UNIT IV SAFETY IN CHEMICAL INDUSTRIES Safety in process design, unit operations, pressure vessel, heat exchanger, safety valves -Plant commissioning and inspection, pressure vessel, Plant maintenance and emergency planning, management of maintenance HAZOP study.	9 Hours
UNIT V SAFETY IN CONSTRUCTION INDUSTRY Construction regulations, contractual clauses, permit to work, - Education and training-Hazards of construction and prevention- excavation, scaffolding, dismantling, road works, construction of high-rise buildings - Working at heights, -Working on fragile roofs, work permit systems-Construction machinery, cranes, chain pulley blocks, earth moving equipment, conveyors- Manual handling, Safety in demolition work, - Safety in confined spaces	8 Hours

Total: 45 Hours

Course Objectives

- To understand and explore the scope of biofuels the most efficient renewable source of energy.
- To develop the expertise in the technology pertaining to their generation and employment in order to surrogate the existing conventional fuels and hence strives towards sustainable development
- To give way to the bolster green technology and incline towards more eco-friendly options.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO3. Conceive Plan and Deploy bio-resources for the benefit of society and environment.

Course Outcomes (COs)

1. Apply the bioresources that can be used for the production of biofuels.
2. Analyze the physical and chemical properties of the biodiesel.
3. Analyze the mechanisms of improvising the quality and performance of engines using biofuels
4. Analyze the bio-fuel conversion technologies and their environmental attributes
5. Evaluate the designing aspects of major unit processes/operations of an integrated bio-refinery

5	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-

UNIT I**9 Hours****CLASSIFICATION AND RESOURCES**

Introduction, biofuel as a renewable energy, classification of biofuels - First, second, third and fourth generation biofuels, different plant sources as biofuel feedstocks, Biogases, physical and chemical characteristics of vegetable oils - iodine number, hydroxyl, acid values, rancidity, hydrogenolysis and hydrolysis, Food vs energy.

**UNIT II
BODIESEL****9 Hours**

Definition, basics and chemistry of biodiesel, vegetable oils in biodiesel production, Trans esterification: Chemical methods, enzymatic methods and types of catalysts, separation and purification, physical properties and characterization of biodiesel - Cloud point, pour point, cold filter plugging point, flash point, viscosity and cetane number.

**UNIT III
QUALITY BODIESEL AND ENVIRONMENT****9 Hours**

Producing Quality Biodiesel, quality control, test methods, ASTM specifications. Oxidative and thermal stability, estimation of mono, di, triglycerides and free glycerol, engine performance test, blending of ethanol with biodiesel, blending of biodiesel with high-speed diesel (HSD) and their combustion properties.

**UNIT IV
BIOETHANOL AND BIOGASES****9 Hours**

Ethanol as a fuel, microbial and enzymatic production of ethanol from biomass - lignocellulose, sugarcane, sugar beet, corn, wheat starch, purification - wet and dry milling processes, saccharification-chemical and enzymatic. Production of bio methane and bio hydrogen.

**UNIT V
BIOREFINERIES****9 Hours**

Definition and types of biorefineries, co-products of biorefineries-oil cake and glycerol, purification of glycerol obtained in biodiesel plant; anaerobic and thermal gasification of biomass, economics of biorefineries.

Total: 45 Hours**Reference(s)**

Course Objectives

- Understand the importance of traditional foods and food habits.
- Know the traditional processing of snack, sweet and dairy food products.
- Infer the wide diversity and common features of traditional Indian foods and meal patterns.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

Course Outcomes (COs)

1. Justify the processing methods of traditional foods in terms of its health benefits.
2. Assess the production methods of traditional sweets, snacks and dairy products.
3. Differentiate Traditional fermented foods products based on its raw material.
4. Implement a large-scale production of tradition foods for its increased consumption.
5. Compare the health aspects of traditional foods with modern foods.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	-	-	-	-	-	-	-	2	-	-	-	-	-	-

UNIT I**9 Hours****TRADITIONAL METHODS OF FOOD PROCESSING**

Introduction - food culture -geographical features and food. Traditional methods of milling grains - rice, wheat and corn - equipment and processes as compared to modern methods. Equipment and processes for edible oil extraction- comparison of traditional and modern methods. Energy costs, efficiency, yield, shelf life and nutrient content comparisons. Traditional methods of food preservation - sun-drying, osmotic drying, brining, pickling and smoking.

UNIT II**9 Hours****TRADITIONAL SWEETS, SNACKS AND DAIRY PRODUCTS**

Production, formulation, preparation and processing of Indian traditional sweet and snack food products: -Rasgolla, Gulab jamun; formulation and preparation of namkeen, potato chips, banana chips. Acid coagulated and fermented dairy products- paneer, dahi, shrikhand, lassi - processing conditions, defects etc. Fat rich products- Butter, ghee and its processing.

UNIT III**9 Hours****TRADITIONAL FERMENTED FOOD PRODUCTS**

Idli, Soya sauce, fish pickle, dry fish, meat and vegetable fermented products. Various alcohol-based products. Ways to increase nutritional quality of food such as enrichment, fortification, fermentation and mutual supplementation. Best cooking and processing methods to retain nutrients.

UNIT IV**10 Hours****COMMERCIAL PRODUCTION OF TRADITIONAL FOODS**

Commercial production of traditional breads, snacks, ready-to-eat foods and instant mixes, frozen foods -types marketed, turnover; role of SHGs, SMES industries, national and multinational companies; commercial production and packaging of traditional beverages such as tender coconut water, neera, lassi, buttermilk, dahi. Commercial production of intermediate foods - ginger and garlic pastes, tamarind pastes, masalas (spice mixes), idly and dosa batters

UNIT V**8 Hours****HEALTH ASPECTS OF TRADITIONAL FOODS**

Comparison of traditional foods with typical fast foods / junk foods - cost, food safety, nutrient composition, bioactive components; energy and environmental costs of traditional foods; traditional foods used for specific ailments /illnesses.

Total: 45 Hours**Reference(s)**

4. Aneja. R.P, Mathur.BN, R.C. Chandan, and Banerjee.A.K. Technology of Indian Milk Products. Dairy India Year Book, 2009.

Course Objectives

- Introduce the concept of food hygiene, importance of safe food and laws governing it.
- Learn common causes of food borne illness - viz. physical, chemical and biological and identification through food analysis.
- Understand food inspection procedures employed in maintaining food quality.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

Course Outcomes (COs)

1. Analyse the food safety strategies and nutritional quality of the food.
2. Assess the food regulatory mechanism and mandatory laws for food products.
3. Resolve the national and international regulatory agencies.
4. Execute and apply the voluntary regulatory standards.
5. Assess the implementation of food safety for a food processing industry.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

2	-	1	-	-	-	1	2	1	-	-	-	-	-	-
3	-	1	-	-	-	-	-	-	-	-	-	-	-	-
4	1	2	-	-	-	-	-	-	-	-	-	-	-	-
5	1	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**10 Hours****INTRODUCTION**

Introduction, concept of food safety and standards, food safety strategies. Food hazards and contaminations - biological (bacteria, viruses and parasites), chemical (toxic constituents / hazardous materials) pesticides residues / environmental pollution / chemicals) and physical hazards. Preventive food safety systems - monitoring of safety, wholesomeness and nutritional quality of food. Prevention and control of physical, chemical and microbiological hazards. Principles of food safety - Establishment: design and facilities - emergency preparedness - Maintenance cleaning and sanitation - personal hygiene - packaging and labelling - transportation - traceability - recall procedure - visitor policy. Adulteration: Intentional and unintentional - Preservatives - antioxidants, sweeteners, flavours, colours, vitamins, stabilizers - indirect additives - organic residues - inorganic residues and contaminants.

UNIT II**10 Hours****FOOD LAWS**

Indian and Food Regulatory Regime (Existing and new), PFA Act and Rules, Food Safety and Quality Requirements, Additives, Contaminants and Pesticide Residue. Food Safety and Standards Act, 2006, FSSAI roles and responsibilities, Essential Commodities Act, 1955, Global Scenario, Codex Alimentarius, WHO/FAO Expert Bodies (JECFA/ JEMRA/JMPR) WHO/FAO Expert Bodies (JECFA/ JEMRA/JMPR). Food safety inspection services (FSIS) and their utilization.

UNIT III**10 Hours****REGULATIONS**

Introduction to OIE & IPPC, Other International Food Standards (e.g. European Commission, USFDA etc). WTO: Introduction to WTO Agreements: SPS and TBT Agreement, Export & Import Laws and Regulations, Export (Quality Control and Inspection) Act, 1963. Role of Agricultural and Processed Food Products Export Development Authority (APEDA), Customs Act and Import Control Regulations, Other Voluntary and mandatory product specific regulations, Other Voluntary National Food Standards: BIS Other product specific standards; AGMARK. Nutritional Labelling, Health claims.

UNIT IV**10 Hours****STANDARDS**

Voluntary Quality Standards and Certification GMP, GHP, HACCP, GAP, Good Animal Husbandry Practices, Good Aquaculture Practices ISO 9000, ISO 22000, ISO 14000, ISO 17025, PAS 22000, FSSC 22000, BRC, BRCIOP, IFS, SQF 1000, SQF 2000. Role of NABL, CFLS.

UNIT V**5 Hours****IMPLEMENTATION AND RISK ASSESSMENT**

Implementation of food safety for a desired food processing industry. Risk assessment studies: Risk management, risk characterization and communication.

Total: 45 Hours**Reference(s)**

1. Singal RS (1997). Handbook of indices of food quality and authenticity. Woodhead Publishing Cambridge, UK.

22OFD03 POST HARVEST TECHNOLOGY OF FRUITS AND VEGETABLES

3 0 0 3

Course Objectives

- To understand the importance and different methods of post-harvest handling and storage of fruits and vegetables.
- To gain knowledge on different preservation methods of fruits and vegetables
- To familiarize with the value-added products from fruits and vegetables

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Course Outcomes (COs)

1. Implement the different post-harvest handling practices for the storage of fruits and vegetables.
2. Analyze the suitable preservation method (sugar, salt or dehydration) to produce value added products from fruits and vegetables.
3. Evaluate the requirement of low temperature and irradiation methods to preserve specific fruits and vegetables.
4. Apply the concentration and fermentation methods to preserve fruits and vegetables.
5. Implement the canning method to preserve fruits and vegetables.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	1	2	1	-	-	1	-	-	-	-	-	-	-
2	1	1	-	-	-	-	-	-	-	-	-	-	-	-
3	1	2	-	-	-	-	-	-	-	-	-	-	-	-
4	1	-	1	-	-	-	-	-	-	-	-	-	-	-
5	2	1	1	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****POST-HARVEST PRACTICES AND PROCESSING**

Maturity indices for harvesting; pathological spoilage's during storage, ripening and control measures, post-harvest handling, sorting & grading, packaging, storage, transportation, Methods of pre-cooling, post-harvest treatments to hasten and delay ripening; Methods of storage at farm level - cold storage, controlled/modified atmosphere storage, Quality management, export requirements, Nutritive value, nutraceutical properties

UNIT II**9 Hours****PRESERVATION AND VALUE ADDITION**

General principles and methods of fruit and vegetable preservation. Preservation using sugar: Principle and Preparation of jam, jelly, marmalade, squash, RTS, carbonated beverages, crush, nectar, cordial, fruit bar, preserves, candies and carbonated fruit beverages. Processing using salt: Principle - Brining - Preparation of pickles, chutney and sauces, ketchup.

UNIT III**9 Hours****PRESERVATION BY LOW TEMPERATURE AND IRRADIATION**

Preservation by low temperature: definition, principle, methods - Refrigeration, freezing. Methods of freezing- changes during freezing. Preparation of frozen foods. Minimal Processing of Fruits and Vegetables - techniques involved - Preservation by irradiation: definition- principle, application, irradiation unit.

UNIT IV**9 Hours****PRESERVATION BY DRYING**

Machineries involved in processing of fruits and vegetables products. Drying and dehydration: definition, principle, Types of driers: Solar, cabinet, spray drier, drum drier, fluidized bed drier. Preparation of product for dehydration. Dehydration principles and equipment. Preparation of fruits - powder production. Problems related to storage of dehydrated products.

UNIT V**9 Hours****PRESERVATION BY CANNING**

Canning: principles, Types of cans, packing of canned products-preparation of canned products - general considerations in establishing a commercial fruit and vegetable cannery, machineries involved in canning and bottling unit- spoilage of canned foods. Bottling of fruit and vegetable. Precautions in canning operations.

22OFD04 CEREAL, PULSES AND OIL SEED TECHNOLOGY

3 0 0 3

Course Objectives

- Understand the application of scientific principles in the processing technologies specific to the materials
- Understand the storage methods and handling techniques followed for cereals, pulses and oil seeds
- Develop the knowledge in the area of Cereals, pulses and oil seed processing and technology

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PSO2. Practical and research training imparted to the students will pave the way for introducing novel technologies in food processing sectors for global sustenance.

Course Outcomes (COs)

1. Assess the specific processing technologies employed for cereals.
2. Analyse the composition of millets and their nutritional importance.
3. Apply the compositional changes and processing methods of pulses and legumes.
4. Create the competence in processing of oilseeds technology.
5. Execute the storage processing of food grains with quality aspects.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	-	2	-	3	-	-	-	-	-	-	-	-

UNIT I**9 Hours****CEREALS**

Cereal Grains- Basic agricultural aspects, structure and composition; Storage, Insect control; Processing: Wheat- milling, (Atta and Maida), quality aspects of flour, wheat proteins and their function, rheology of flour; wheat based baked products - Bread, Biscuit, Cakes, Extruded products, Pizza, Chapatis, malting and malt products; Rice-Milling, Parboiling, Quick cooking rice, Traditional Indian Products- Puffed Rice, flaked rice, Idli/Dosa/vada mixes and other savouries; Corn- Wet and dry milling, Corn Products - Corn flakes, Corn starch, canned corn products, puffed product; Oats-Milling, Oat Products - Steel cut, rolled oats, quick cooking; Traditional and Fermented cereal products.

UNIT II**9 Hours****OTHER CEREALS AND MILLETS**

Sorghum, Pearl Millet, Finger millet, Foxtail Kodo Millet - Basic agricultural millet, aspects, structure and composition; storage, insect control; processing - pearling, Milling, Malting, Malt based foods, flaked and fermented products; Traditional and Nutritional products based on finger millet.

UNIT III**9 Hours****PULSES AND LEGUMES**

Basic agricultural aspects, structure, composition, storage, insect control, processing Milling/splitting, dhal milling, products - puffed, flakes, flour, legume-based traditional products, flour based Indian sweets and savouries, soya milk, soy protein Isolate, soya paneer

UNIT IV**9 Hours****OIL SEEDS AND NUTS**

Basic agricultural aspects structure, composition, Storage, Insect control; processing: traditional and modern methods of oil extraction, refining, bleaching, deodorizing, hydrogenation; oil blends; applications of different oils and fats in food processing & products.

UNIT V**9 Hours****STORAGE AND HANDLING**

Bag Storage - Advantages and Disadvantages, Cover Plinth Storage Structures, CAP storage (Cover and Plinth Storage). Protection against Rodents, Fungi, Pests and Mites. Fumigation Processes for bag storage piles. Bulk Storage in silos and large Bins. Conveyors and Elevators for feeding and discharging.

Course Objectives

- To impart theoretical and practical knowledge about various handi-craft techniques
- To enhance innovative skills on hand crafts.
- To build confidence on doing handicrafts.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10.Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1.Interpret trends, decipher fashion movements, apply the knowledge of elements of design and Gestalt theory of visual perception; and incorporate sustainable decisions into their design artworks, fashion products and accessories.

Course Outcomes (COs)

1. Outline the classification, techniques and criteria for selecting raw materials for making various handicraft materials and produce textile-based handicrafts. Produce various decorative and appealing products.
2. Design and construct various wall hangings and fashion accessories.
3. Design and construct toys and accessories.
4. Design and construct head accessories, home furnishings and paintings.
5. Design and construct various decorative and appealing products for interiors.

Articulation Matrix

UNIT I**9 Hours****TECHNIQUES OF HANDICRAFT MATERIALS**

Definition of Handicraft, Classification: Reusable, Non reusable, Raw materials used in various craft materials: printed, embroidered, stitched and handmade, Criteria for selection of raw materials: material types and end uses.

UNIT II**9 Hours****DECORATIVE AND APPEALING PRODUCTS - INTERIORS**

Designing and Construction procedures for following various decorative and appealing products: Wall hangings - String Art on plywood, Pressed Flower Art frames.

UNIT III**9 Hours****DECORATIVE AND APPEALING PRODUCTS - ACCESSORIES**

Designing and Construction procedures for following various decorative and appealing products: Handbags, Hats, footwear.

UNIT IV**9 Hours****DECORATIVE AND APPEALING PRODUCTS - ORNAMENTS**

Designing and Construction procedures for following various decorative and appealing products: Stone necklace using Macrame Technique, Tribal Jewellery using woollen threads, Floral Jewellery using Resin Technique, Fabric Jewellery using Tie and Dye Technique.

UNIT V**9 Hours****DECORATIVE AND APPEALING PRODUCTS - FANCY ITEMS**

Designing and Construction procedures for following various decorative and appealing products: Jewellery Box, Utility Holder, Gift items. Lampshade decors from cardboard, Driftwood Frames for pictures and Mirrors.

Total: 45 Hours**Reference(s)**

Course Objectives

- To impart knowledge on interior design.
- To improve the design skills, sustainable with socially-conscious designs

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PSO1. Interpret trends, decipher fashion movements, apply the knowledge of elements of design and Gestalt theory of visual perception; and incorporate sustainable decisions into their design artworks, fashion products and accessories.

Course Outcomes (COs)

1. Assess the elements of interior design concepts and resolve the personality requirements.
2. Create graphical representations of interior design concepts.
3. Resolve the space planning requirements of residential home as per CPWD guidelines.
4. Analyse the aesthetic requirements of interior design components.
5. Evaluate the roles and responsibilities of interior designer.

Articulation Matrix

5	3	2	-	-	2		-	3	-	-	-	-	3	-

UNIT I**9 Hours****INTRODUCTION**

Interior designing - definition, importance, requirements and types - Structural design, Decorative Design -Designing interiors, Good taste; Design themes, types and application. Personality of the Home - Art elements - Line: types, characteristics and importance; form: size and shape, characteristics; Colour - sources, qualities, emotional effects, colour wheel and schemes.

UNIT II**9 Hours****GRAPHICAL PRESENTATIONS**

3D composition; Isometric and Axonometric- Still life- Furniture Sketching- Object Drawing with colour rendering - Interior elements, Lighting, plants. Perspective, Axonometric Isometric drawing. Orthographic Projection - Lifts and escalators.

UNIT III**9 Hours****SPACE PLANNING**

Space planning concepts- interiors, circulation. Definition, application of ergonomic principals in interiors. Residential house space planning case study- CPWD guidelines. Lighting for different locations and activities, measurement, ventilation and indoor air quality, noise control methods.

UNIT IV**9 Hours****INTERIOR COMPONENTS**

Application of colour in interiors; Texture - types and significance; Pattern: types and effects; Light - importance. Importance of Furniture Design for Interiors- Ancient Age / Middle Age / Contemporary. Doors, Windows, Staircase designs, False Ceiling, Partitions, Wall Panelling, Comics, Mosaic, Cladding- Flooring and Wall Cladding

UNIT V**9 Hours****ROLES AND RESPONSIBILITIES OF INTERIOR DESIGNER**

Role of an Interior Designer- Responsibility towards society and need of an Interior Designer to better the environment- Ethics and Code of Conduct- Responsibility towards client, contractor and supplier, Estimation. Professional Fees- Work of an Interior Designer- Making of portfolio, JD Annual Design Awards.

Course Objectives

- To familiarize the students about the various techniques of surface embellishment with relevance to garment embellishments.
- To aware of various types of embroidery and methods of producing it.
- To make the students confident about doing surface embellishment work.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO8.Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PSO1. Interpret trends, decipher fashion movements, apply the knowledge of elements of design and Gestalt theory of visual perception; and incorporate sustainable decisions into their design artworks, fashion products and accessories.

PSO2. Articulate design aesthetics, communicate product values, collaborate across disciplines as member and leader; and envision solutions in fashion systems: design, technology, production and management.

Course Outcomes (COs)

1. Analyze the raw material requirements for surface ornamentation and its application.
2. Implement hand embroidery stitches on fabric and show the stitch development procedure in diagrammatic representations.
3. Apply the machine and computerized embroidery stitches.
4. Analyze the surface embellishment techniques and its application.
5. Assess the quality maintenance parameters of all embroidered products and analyze the six traditional embroidery techniques.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	2	2	2	-	-	-	-	-	2	-	-	-	2	2
5	2	2	2	-	-	-	-	-	2	-	-	-	-	2

UNIT I**9 Hours****INTRODUCTION TO SURFACE ORNAMENTATION**

Introduction, Definition, Need, Types, Raw materials, Importance of surface ornamentation, Selection of needle, thread and fabric for hand embroidery and machine embroidery. various methods of surface embellishment- embroidery and surface ornamentation.

UNIT II**9 Hours****HAND EMBROIDERY**

General rules for hand embroidery. Types of hand embroidery stitches-Running, Couching, Button hole, Satin, Long & Short, Wheat, Chain, Stem, Herringbone, Cross stitch, Knotted stitches, Fish bone, Fly stitch, Braids, Back, Hem, Seed, Needle weaving, Whip stitches.

UNIT III**9 Hours****MACHINE EMBROIDERY**

General rules for machine embroidery. Types of frames and methods of transferring the designs. Attachments to sewing machines for embroidery, Types of machine embroidery stitches- Eyelet work, Cut work, patch work, Mirror work, Applique, Shaded embroidery, Shadow work, Bead and Sequins work, Vermicelli, Zigzag, Granite stitch. Computerized embroidery machine- Concept of design and development, software used in embroidery machines, process of designing, method and types of stitch application, punching and digitizing.

UNIT IV**9 Hours****EMBELLISHMENT TECHNIQUES**

Materials used and Applications. Types of embellishment techniques- fabric painting-hand, Stencil-dabbing and Spraying. Dyeing and printing-advanced tie and dye techniques, batik and block printing. Trimmings and decorations-Laces, Pompons, Fringes, Tassels, Tucks, Show buttons, Crocheting.

UNIT V**9 Hours****TRADITIONAL EMBROIDERIES OF INDIA AND CARE**

Care and maintenance of embroidered articles-care and maintenance methods for embroidered apparel, pressing. Traditional Embroideries of India-Phulkari, Kasuti, Kashmiri embroidery, Kutch work, Chikkankari, Kantha.

Course Objectives

- Impart knowledge on Nanoscience.
- Explore different techniques of producing nanomaterials.
- Create expertise on the applications of nanomaterials in various fields.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Analyse the origin and advance of nanomaterials and its classification.
2. Compare the different types of methods adopted for synthesizing nanomaterials.
3. Analyze the characterization techniques for analyzing nanomaterials.
4. Assess the physical properties exhibited by nanomaterials.
5. Organize the nanomaterials developed for advanced technological applications.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	1	1	-	-	-	-	-	-	-	-	-	-	-	-
5	2	3	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****NANO SCALE MATERIALS**

Introduction-Feynman's vision-national nanotechnology initiative (NNI) - past, present, future - classification of nanostructures, nanoscale architecture - effects of the nanometer length scale - changes to the system total energy, and the system structures- effect of nanoscale dimensions on various properties -differences between bulk and nanomaterials and their physical properties.

UNIT II**9 Hours****NANOMATERIALS SYNTHESIS METHODS**

Top-down processes - mechanical milling, nanolithography and types based on radiations - Bottom-up process physical method: physical vapour deposition, RF sputtering, CVD- chemical method: colloidal and sol-gel methods - template based growth of nanomaterials - ordering of nanosystems, self-assembly and self-organization.

UNIT III**9 Hours****CHARACTERIZATION TECHNIQUES**

General classification of characterization methods - analytical and imaging techniques - microscopy techniques - electron microscopy, scanning electron microscopy, transmission electron microscopy, atomic force microscopy - diffraction techniques - X-ray spectroscopy - thermogravimetric analysis of nanomaterials.

UNIT IV**9 Hours****SEMICONDUCTOR NANOSTRUCTURES**

Quantum confinement in semiconductor nanostructures - quantum wells, quantum wires, quantum dots, super lattices-epitaxial growth of nanostructures-MBE, metal organic VPE, LPE - carbon nano tubes-structure, synthesis and electrical properties -applications- quantum well laser- quantum efficiency of semiconductor nanomaterials

UNIT V**9 Hours****NANOMACHINES AND NANODEVICES**

Microelectromechanical systems (MEMS) and Nanoelectromechanical systems (NEMS)-fabrication, actuators-organic FET- principle, description, requirements, integrated circuits- single electron transistor - organic photovoltaic cells- spintronics

Course Objectives

- Impart knowledge in physical properties of semiconducting materials.
- Analyze the factors affecting the operation of semiconductor devices.
- Apply the physics of semiconductors to develop semiconductor devices.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Execute the band gap, drift and diffusion current densities due to carrier transport in semiconductors.
2. Analyze the energy band diagram in thermal equilibrium and space charge width of PN junction.
3. Create the operation of Bipolar Junction transistor at different modes and different configurations.
4. Analyse the operation of metal oxide field effect transistor and their memory devices.
5. Execute the working mechanism of opto-electronic devices.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	1	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****ENERGY BANDS AND CARRIER TRANSPORT PROPERTIES**

Energy Bands: Formation of energy bands - doping effects - energy levels - electron and hole concept in semiconductor. Carrier transport: Carrier drift-drift current density - conductivity- diffusion current density - total current density.

UNIT II**9 Hours****P-N JUNCTION**

Basic structure and fabrication process of p-n junction - current - voltage characteristics - energy band diagram - equilibrium Fermi levels - depletion region - junction breakdown phenomena - Zener - avalanche breakdown.

UNIT III**9 Hours****BIPOLAR JUNCTION TRANSISTOR**

The basic transistor action - operation in the active mode - current gain - static characteristics - carrier distribution in emitter, base and collector region - modes of operation - current - voltage characteristics of common base and emitter configuration - frequency response and switching of bipolar transistor.

UNIT IV**9 Hours****MOSFET**

The ideal MOS diode - basic fundamentals and characteristics - types - CMOS and BiCMOS - CMOS inverter - MOSFET on insulator - thin film transistor (TFT) - silicon on insulators (SOI) devices - MOS Memory structures - DRAM and SRAM

UNIT V**9 Hours****PHOTONIC DEVICES**

Radiative transitions and optical absorption-light emitting diodes-organic LED - infrared LED - semiconductor laser - temperature effect - photo detector - photo diode - silicon and compound semiconductor solar cells - efficiency

Course Objectives

- Impart knowledge on laser science
- Explore different strategies for producing lasers
- Create expertise on the applications of lasers in various fields

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Analyse the transition mechanisms and the components of a laser system.
2. Compare the different types of lasers based on pumping method, active medium and energy levels.
3. Compute the rotation of earth, velocity and distance using lasers and apply the same for day today applications.
4. Analyze the role of lasers in surgical and endoscopy applications.
5. Apply the laser techniques in industrial applications.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

4	2	1	-	-	-	-	-	-	-	-	-	-	-	-
5	1	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****LASER FUNDAMENTALS**

Introduction - principle - absorption and emission of light - thermal equilibrium - Einstein's prediction - Einstein's relations - A and B coefficients - condition for large stimulated emission - spontaneous and stimulated emission in optical region - light amplification - condition for light amplification - population inversion- Components of lasers - pumping methods - pumping mechanisms - optical resonator.

UNIT II**9 Hours****LASER BEAM CHARACTERISTICS AND TYPES**

Characteristics of laser - Classification of lasers - principle, construction, working, energy level diagram and applications of molecular gas laser (CO₂ laser) - liquid laser (dye laser) - excimer laser - Solid state laser (Nd: YAG laser) - semiconductor laser (homojunction laser).

UNIT III**9 Hours****LASERS IN SCIENCE**

Introduction - Harmonic generation (SHG) - Stimulated Raman emission - lasers in chemistry - laser in nuclear energy - lasers and gravitational waves - rotation of the earth - measurement of distance - Light detection And Ranging (LIDER) - velocity measurement – holography.

UNIT IV**9 Hours****LASERS IN MEDICINE AND SURGERY**

Light induced biological hazards: Eye and skin - Eye laser surgery - photocoagulations - homeostasis - dentistry - laser angioplasty - different laser therapies - advantages & disadvantages - laser endoscopy.

UNIT V**9 Hours****LASERS IN INDUSTRY**

Applications in material processing: laser welding - hole drilling - laser cutting - Lasers in electronics industry: information storage - bar code scanner- Lasers in defence: laser based military weapons - laser walls.

Total: 45 Hours**Reference(s)**

6. A. Sennaroglu, "Solid-State Lasers and Applications", CRC Press, 2006.

Course Objective:

- To understand the light-matter interaction in biological cells or tissues by using the principles of optics and lasers.
- To apply the properties of biological cells or tissues in biomedical applications by various optical imaging, sensing and activation techniques.
- To analyze the concepts of Modern optical measurement techniques and devices in early detection of disease and cure them.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

Course Outcomes (COs)

1. Implement the laws of optics and lasers to interpret the biological cells and tissues.
2. Evaluate the properties of different optical instruments in biological systems to represent their behavior in structure and design of detection engineering instruments.
3. Use laser tweezers techniques to infer the activities of cells (tissues) and explain the single molecule detection processes in medical diagnosis.
4. Outline the properties of ultra short laser pulses and tissue engineering to rectify the affecting factors in biological cells.
5. Compare the various types of bio-imaging methods to detect the infected cells and molecules in biological science.

Articulation Matrix

4	3	2	2	2	1	-	-	-	-	-	-	-	-	-
5	3	2	2	2	1	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****INTRODUCTION TO BIOPHOTONICS**

Light as Photon Particles – Coherence of light - lasers – classification of lasers – Mechanisms of Non-linear Optics (NLO) processes associated with Biophotonics - Light scattering mechanisms: Rayleigh scattering, Miescattering, Brillouin Scattering, Raman Scattering -Different light sources – Quantitative description of light: Radiometry.

UNIT II**9 Hours****PHOTOBIOLOGY**

Interaction of light with cells and tissues – Light – Tissue Interaction Variables – Light –Tissue Interaction Theory: Radiative Transport Theory – Photo process in biopolymers – In Vivo Photoexcitation – photo-induced physical, chemical, thermal and mechanical effects in biological systems – Optical biopsy – Single molecule detection

UNIT III**9 Hours****BIO-NANO-PHOTONICS**

Laser Microtools, Semiconductor quantum dots for bioimaging, Metallic nanoparticles and nanorods for biosensing – Optical biosensors: Fibre-Optic, evanescent wave, surface Plasmon resonance (SPR) based biosensors – biomaterials for photonics – Principle and design of laser tweezers – laser trapping and dissection for biological manipulation.

UNIT IV**9 Hours****TISSUE ENGINEERING WITH LIGHT**

Basics of tissue optics: Light absorption and scattering in tissues, Wavelength effects and spectra– the therapeutic window, Light penetration in tissues – Absorbing agents in tissues and blood –Skin optics, response to the UV radiation, Optical parameters of tissues – tissue welding – tissue contouring – tissue regeneration – Femto laser surgery – low level light therapy and photo dynamic therapy

UNIT V**9 Hours****BIO-IMAGING TECHNIQUES AND ITS APPLICATIONS**

An overview of optical imaging – Fluorescence Microscopy – Scanning Microscopy – In vivo Confocal Microscopy – Multi photon Microscopy – Optical Coherence Tomography (OCT) – Fluorescence Resonance Energy Transfer (FRET) imaging – fluorescence lifetime imaging Microscopy (FLIM) – Nonlinear optical imaging – Coherent Anti-stokes Raman Scattering –Bioimaging Applications.

Course Objectives

- To recognize the properties of soft matter and hard matter.
- To understand the fundamental interactions of colloids and gels.
- To explain the structure and phase behaviour of liquid crystals and supramolecules.
- To summarize the soft matter properties of structures and components of life.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Analyse the salient features of soft matter and hard matter.
2. Implement the fundamental interactions and stability of colloids and gels.
3. Analyse the structure and properties of liquid crystals.
4. Outline the aggregation and phase behaviour of surfactants, polymers, copolymers and block copolymers.
5. Analyze the soft matter behaviour of nucleic acids, proteins, polysaccharides and membranes.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	2	2	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I**9 Hours****CONDENSED MATTER**

Intermolecular forces-Condensation and freezing-mechanical response: Hookean solid-Newtonian liquid-viscoelasticity. Glasses: relaxation time-viscosity- glass forming liquids. Soft matter: length scales-fluctuations and Brownian motion.

UNIT II**9 Hours****COLLOIDAL DISPERSIONS & GELS**

Forces between colloidal particles: Vander Waals forces-electrostatic double layer forces-steric hindrance-depletion interactions. Stability and phase behaviour: Crystallization-strong colloids-weak colloids. Physical and chemical gels-classical theory of gelation-elasticity of gels.

UNIT III**9 Hours****LIQUID CRYSTALS**

Liquid crystal phases-distortions and topological defects-electrical and magnetic properties-polymer liquid crystals-Fredricks transition and liquid crystal displays

UNIT IV**9 Hours****SUPRAMOLECULAR SELF ASSEMBLY**

Aggregation and phase separation-types of micelles- bilayers and vesicles. Phase behaviour of concentrated surfactant solutions-phase separation in polymers, copolymers and block copolymers

UNIT V**9 Hours****SOFT MATTER IN NATURE**

Components and structures of life-Nucleic acids-proteins-interaction between proteins-polysaccharides-membranes

Total: 45 Hours**References**

Course Objectives

- Analyse the loss incurred due to corrosion in different sectors and terminologies related to corrosion.
- Identify forms and types of corrosion with suitable mechanism.
- Apply various methods of corrosion control, corrosion testing and monitoring.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Course Outcomes (COs)

1. Analyse if corrosion can occur under specific operating conditions in a given equipment or construction and indicate regions of immunity, corrosion and passivity of a metal.
2. Compare different corrosion types on metals when exposed to air, water and at high temperatures ($> 100^{\circ}\text{C}$).
3. Implement the corrosion mechanism on steel, iron, zinc and copper metal surfaces.
4. Calculate the rate of corrosion on metals using electrochemical methods of testing.
5. Execute the correct materials, design and operation conditions to reduce the likelihood of corrosion in new equipment and constructions.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	3	3	-	-	-	-	1	-	-	-	-	-	-	-

UNIT I

9 Hours

CORROSION

Importance of corrosion - spontaneity of corrosion - units of corrosion rate (MDD and MPY) - direct and indirect damage by corrosion - importance of corrosion prevention in industries - Pilling Bedworth ratio and its significance - passivation - area relationship in both active and passive states of metals - Pourbaix diagrams of Mg, Al and Fe and their advantages and disadvantages.

UNIT II

7 Hours

TYPES OF CORROSION

Eight forms of corrosion: uniform, galvanic, crevice corrosion, pitting, intergranular corrosion, selective leaching, erosion corrosion and stress corrosion-Catastrophic oxidation corrosion.

UNIT III**9 Hours****MECHANISM OF CORROSION**

Hydrogen embrittlement - corrosion fatigue - filiform corrosion - fretting damage and microbes induced corrosion. Corrosion mechanism on steel, iron, zinc and copper metal surfaces.

UNIT IV**10 Hours****CORROSION RATE AND ITS ESTIMATION**

Rate of corrosion: Factors affecting corrosion. Electrochemical methods of polarization: Tafel extrapolation polarization and linear polarization. Weight loss method - testing for intergranular susceptibility and stress corrosion. Non-destructive testing methods: Visual testing - liquid penetrant testing - magnetic particle testing - Ultrasonic monitoring, and eddy current testing.

UNIT V**10 Hours****CORROSION CONTROL METHODS**

Fundamentals of cathodic protection - types of cathodic protection (sacrificial anodic and impressed current cathodic protection). Stray current corrosion, problems and its prevention. Protective coatings: Metal coatings: Hot dipping (galvanizing, tinning and metal cladding) - natural inhibitors. Selection of suitable design for corrosion control.

Course Objectives

- Explain the properties of different polymers with its mechanism.
- Select the appropriate polymerization techniques to synthesize the polymers.
- Identify suitable polymers for various industrial applications.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

Course Outcomes (COs)

1. Evaluate the types of mechanism of polymerization reactions and analyze the natural and synthetic polymers.
2. Implement the suitable polymerization techniques to synthesize the high-quality polymers.
3. Resolve the structure, thermal, and mechanical properties of polymers for different applications.
4. Apply the polymer processing methods to design polymer products.
5. Analyze the polymers used in electronic and biomedical applications.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

5	1	3	2	-	-	-	-	-	-	-	-	-	-	-

UNIT I**10 Hours****POLYMERS AND ELASTOMERS**

Classification of polymers - Mechanism: Addition polymerization - free radical, cationic, anionic and co-ordination (Ziegler-Natta) polymerization - copolymerization - condensation polymerization (nylon-6,6) -ring opening polymerization (nylon-6). Elastomers: Natural rubber and synthetic rubber: styrene-butadiene rubber (SBR), butyl, neoprene, thiocol rubbers. High performance polymers: polyethers, polyether ether ketone (PEEK), polysulphones and polyimides.

UNIT II**8 Hours****POLYMERIZATION TECHNIQUES**

Homogeneous and heterogeneous polymerization - bulk polymerization (PMMA, PVC) - solution polymerization - polyacrylic acid, suspension polymerization (ion-exchange resins) - emulsion polymerization (SBR) - advantages and disadvantages of bulk and emulsion polymerization. Melt solution and interfacial poly-condensation.

UNIT III**8 Hours****CHARACTERIZATION AND TESTING**

Characterization of polymers by Infrared Spectroscopy (IR) and Nuclear Magnetic Spectroscopy (NMR) - Thermal properties: TGA and DSC - Testing tensile strength - Izod impact - Compressive strength - Rockwell hardness - Vicot softening point - water absorption.

UNIT IV**9 Hours****POLYMER PROCESSING**

Moulding: Compression - injection - extrusion and blow mouldings. Film casting - calendaring. Thermoforming and vacuum formed polystyrene - foamed polyurethanes. Fibre spinning: melt, dry and wet spinning. Fibre reinforced plastics fabrication: hand-layup - filament winding and pultrusion

UNIT V**10 Hours****SPECIALITY POLYMERS**

Preparation and properties of heat resistant and flame-retardant polymers. Polymers for electronic applications: liquid crystalline, conducting and photosensitive polymers – E waste management. Polymer for biomedical applications: artificial organs, controlled drug delivery, Scaffolds in tissue Engineering –waste management.

Course Objectives

- Compare the energy density of commercialized primary and secondary batteries.
- Classify the fuel cells and compare their efficiency in different environmental conditions.
- Demonstrate the various energy storage devices and fuel cells.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

Course Outcomes (COs)

1. Apply the parameters required for operation of a cell to evaluate the capacity of energy storage devices.
2. Analyse the electrodes, electrolyte and cell reactions of different types of primary, secondary batteries and infer the selection criteria for commercial battery systems with respect to commercial applications.
3. Differentiate fuel cells based on its construction, production of current and applications.
4. Compare different methods of storing hydrogen fuel and its environmental applications.
5. Organize the solar cell based on the materials used in it for various applications.

Articulation Matrix

5	3	3	-	-	-	-	1	-	-	-	-	-	-	-

UNIT I**6 Hours****BASICS OF CELLS AND BATTERIES**

Components - classification - operation of a cell - theoretical cell voltage - capacity - specific energy - energy density of lithium and lead acid battery - charge efficiency- charge rate - charge retention - closed circuit voltage - open circuit voltage current density - cycle life - discharge rate-over charge-over discharge.

UNIT II**10 Hours****BATTERIES FOR PORTABLE DEVICES AND ELECTRIC VEHICLES**

Primary batteries: zinc-carbon - magnesium, and mercuric oxide - recycling/safe disposal of used cells. Secondary batteries: lead acid - nickel-cadmium - lithium-ion batteries - rechargeable zinc alkaline battery. Reserve batteries: Zinc-silver oxide - lithium anode cell - photo galvanic cells. Battery specifications for cars and automobiles. Extraction of metals from battery materials.

UNIT III**10 Hours****TYPES OF FUEL CELLS**

Importance and classification of fuel cells: Description, working principle, components, applications and environmental aspects of the following types of fuel cells: alkaline fuel cells - phosphoric acid - solid oxide - molten carbonate and direct methanol fuel cells.

UNIT IV**10 Hours****HYDROGEN AS A FUEL**

Sources and production of hydrogen: Electrolysis and photocatalytic water splitting. Methods of hydrogen storage: High pressurized gas - liquid hydrogen type - metal hydride. Hydrogen as engine fuel - features, application of hydrogen technologies in the future – limitations.

UNIT V**9 Hours****ENERGY AND ENVIRONMENT**

Future prospects of renewable energy and efficiency of renewable fuels - economy of hydrogen energy. Solar Cells: First, second, third and fourth generation solar cell - photo biochemical conversion cell.

Course Objectives

- This course comprehends the graphs as a modelling and analysis tool in computer science & Engineering.
- It introduces the structures such as graphs & trees and techniques of counting and combinations, which are needed in number theory-based computing and network security studies in Computer Science.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

Course Outcomes (COs)

1. Differentiate the basic ideas of graph and its characteristics.
2. Assess the characteristics of trees and its properties.
3. Apply the colouring of graphs and its applications in the respective areas of engineering.
4. Execute the permutations and combinations in the engineering field.
5. Implement the types of generating functions and their applications in engineering.

Articulation Matrix

5	3	3	-	-	-	-	-	-	-	-	-	-	-	-	-

UNIT I

9 Hours

INTRODUCTION

Graphs - Introduction - Isomorphism - Sub graphs - Walks, Paths, Circuits - Connectedness - Components - Euler graphs - Hamiltonian paths and circuits - Trees - Properties of trees - Distance and centers in tree - Rooted and binary trees.

UNIT II

9 Hours

TREES, CONNECTIVITY

Spanning trees - Fundamental circuits - Spanning trees in a weighted graph - cut sets - Properties of cut set - All cut sets - Fundamental circuits and cut sets - Connectivity and separability - Network flows - 1-Isomorphism - 2-Isomorphism - Combinational and geometric graphs - Planer graphs - Different representation of a planer graph.

UNIT III**9 Hours****MATRICES, COLOURING AND DIRECTED GRAPH**

Chromatic number - Chromatic partitioning - Chromatic polynomial - Matching - Covering - Four colour problem - Directed graphs - Types of directed graphs - Digraphs and binary relations - Directed paths and connectedness - Euler graphs.

UNIT IV**9 Hours****PERMUTATIONS**

Fundamental principles of counting - Permutations and combinations - Binomial theorem - combinations with repetition - Combinatorial numbers - Principle of inclusion and exclusion - Derangements - Arrangements with forbidden positions.

UNIT V**9 Hours****GENERATING FUNCTIONS**

Generating functions - Partitions of integers - Exponential generating function - Summation operator - Recurrence relations - First order and second order - non-homogeneous recurrence relations - Method of generating functions.

Total: 45 Hours**Reference(s)**

Course Objectives

- To develop cognizance about importance of management principles.
- Extract the functions and responsibilities of managers.
- To study and understand the various HR related activities.
- Learn the application of the theories in an organization.
- Analyze the position of self and company goals towards business.

Programme Outcomes (POs)

PO9. Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO11. Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

Course Outcomes (COs)

1. Evaluate the basic concepts of Management.
2. Implement some basic knowledge on planning process and its Tools & Techniques.
3. Apply the management concept of organizing and staffing.
4. Execute the management concept of directing.
5. Apply the management concept of controlling.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

5	-	-	-	-	-	-	-	-	2	-	2	-	-	-	-

UNIT I**9 Hours****INTRODUCTION TO MANAGEMENT AND ORGANIZATIONS**

Definition of Management Science or Art Manager Vs Entrepreneur-types of managers - Managerial roles and skills Evolution of Management Scientific, Human Relations, System and Contingency approaches Types of Business organization - Sole proprietorship, partnership, Company - public and private sector enterprises - Organization culture and Environment Current Trends and issues in Management.

UNIT II**9 Hours****PLANNING**

Nature and purpose of planning - Planning process - Types of planning – Objectives - Setting objectives - Policies - Planning premises - Strategic Management - Planning Tools and Techniques - Decision making steps and process.

UNIT III**9 Hours****ORGANISING**

Nature and purpose – Formal and informal organization - Organization chart - Organization Structure Types - Line and staff authority - Departmentalization - Delegation of authority - Centralization and decentralization - Job Design - Human Resource - Management - HR Planning, Recruitment, Selection, Training and Development, Performance Management, Career planning and management.

UNIT IV**9 Hours****DIRECTING**

Foundations of individual and group behaviour - Motivation-Motivation theories - Motivational techniques - Job satisfaction - Job enrichment - Leadership-types and theories of leadership - Communication-Process of communication - Barrier in communication Effective Communication-Communication and IT.

UNIT V**9 Hours****CONTROLLING**

System and process of controlling - Budgetary and non-Budgetary control techniques - Use of Computers and IT in Management control - Productivity problems and management - Control and Performance-Direct and preventive control - Reporting.

Course Objectives

- Learn the basics and scope of the Entrepreneurship.
- Understand the generation of ideas of the Entrepreneurship.
- Evolve the legal aspects of the business.
- Learn to analyze the various business finance.
- Learn the basics of the Operations Management.

Programme Outcomes (POs)

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Course Outcomes (COs)

1. Analyze the role of entrepreneurship in economic development.
2. Execute the types of ideas that to be used for entrepreneurship development.
3. Evaluate the legal aspects of business and its association.
4. Evaluate the sources of business and its analysis.
5. Analyse the different modes of operation management.

UNIT I**9 Hours****BASICS OF ENTREPRENEURSHIP**

Nature, scope and types of Entrepreneurships, Entrepreneur Personality Characteristics, Entrepreneurship process. Role of entrepreneurship in economic development

UNIT II**9 Hours****GENERATION OF IDEAS**

Creativity and Innovation, Lateral Thinking, Generation of Alternatives, Fractional, Reversal Method, Brain Storming, Analogies

UNIT III**9 Hours****LEGAL ASPECTS OF BUSINESS**

Contract act-Indian contract act, Essential elements of valid contract, classification of contracts, sale of goods act- Formation of contract of sale, negotiable instruments- promissory note, bills and cheques, partnership, limited liability partnership (LLP), companies act-kinds, formation, memorandum of association, articles of association.

UNIT IV**9 Hours****BUSINESS FINANCE**

Project evaluation and investment criteria (cases), sources of finance, financial statements, break even analysis, cash flow analysis.

UNIT V**9 Hours****OPERATIONS MANAGEMENT**

Importance – functions - deciding on the production system - facility decisions: plant location, plant layout (cases), capacity requirement planning - inventory management (cases) - lean manufacturing, Six sigma.

Course Objectives

- Evolve the marketing mix for promotion the product / services.
- Handle the human resources and taxation.
- Learn to analyze the taxation.
- Understand the Government industrial policies and supports.
- Preparation of a business plan.

Programme Outcomes (POs)

PO6.The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and Teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Course Outcomes (COs)

1. Evaluate the strategies and plans in marketing management.
2. Analyse the cases involved in human resource management.
3. Organize the direct and indirect taxes in business.
4. Analyze the supports given by government for improving the business.
5. Evaluate the various steps involved in preparing the business plan.

Articulation Matrix

Course Objectives

- To understand the importance of National Integration, Patriotism and Communal Harmony.
- To outline the basic awareness about the significance of soft skills in professional and inter-personal communications and facilitate an all-round development of personality.
- To analyze the different types of responsibility role of play for the improvement of society.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO12.Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Course Outcomes (COs)

1. Execute religio-cultural diversity of the country and its impact on the lives of the people and their beliefs.
2. Implement a sense of responsibility, smartness in appearance and improve self-confidence.
3. Create the sense of self-less social service for better social & community life.
4. Apply the importance of Physical and Mental health and structure of communication organization and various mode of communication.
5. Execute awareness about the various types of weapon systems in the Armed Forces.

Articulation Matrix

UNIT I

9 Hours

NATIONAL INTEGRATION

Importance & Necessity, Factors Affecting National Integration, Unity in Diversity. Threats to National Security. Water Conservation and Rain Harvesting, Waste Management and Energy Conservation. Leadership Capsule-Traits-Indicators-Motivation-Moral Values-Honor Code-Case Studies: Shivaji, Jhansiki Rani, Case Studies–APJ Abdul kalam, Deepa Malik, Maharana Pratap, N Narayan Murthy Ratan Tata Rabindra Nath Tagore, role of NCC cadets in 1965 war.

UNIT II**9 Hours****PERSONALITY DEVELOPMENT AND LEADERSHIP**

Intra & Interpersonal skills - Self-Awareness- & Analysis, Empathy, Critical & creative thinking, Decision making and problem solving, Communication skills, Group Discussion – coping with stress and emotions, changing mindset, Public Speaking, Time Management, Social skills, Career counselling, SSB procedure and Interview skills.

UNIT III**9 Hours****SOCIAL SERVICE, COMMUNITY DEVELOPMENT AND ENVIRONMENTAL AWARENESS**

Basics of social service and its need, Types of social service activities, Objectives of rural development programs and its importance, NGO's and their contribution in social welfare, contribution of youth and NCC in Social welfare. Protection of children & women safety, Road/ Rail Travel Safety, New initiatives, Cyber and mobile security awareness. Disaster management Capsule-Organization-Types of Disasters-Essential Services-Assistance-Civil Defence Organization

UNIT IV**9 Hours****HEALTH, HYGIENE AND COMMUNICATION**

Sanitation, First Aid in Common Medical Emergencies. Health, Treatment and Care of Wounds. Yoga- Introduction, Definition, Purpose, Benefits. Asanas-Padmasana, Siddhasana, Gyan Mudra, Surya Namaskar, Shavasana, Vajrasana, Dhanurasana, Chakrasana, Sarvaangasana, Halasana etc.

Obstacle Training Contact: Obstacle training - Intro, Safety measures, Benefits, Straight balance, Clear Jump, Gate Vault, Zig Zag Balance, High Wall etc.

Communication: Basic Radio Telephony (RT) Procedure-Introduction, Advantages, Disadvantages, Need for standard- Procedures-Types of Radio Telephony Communication-Radio telephony procedure, Documentation.

UNIT V**9 Hours****ARMED FORCES AND NCC GENERAL**

Introduction to Digital Signal Processors- Basic Classification-Features TMS320C6713 Architecture-Functional Unit-Pipelining- Addressing Modes -Instruction set Simple Assembly Language Program.

Total: 45 Hours**Reference(s)**

1. Director General NCC Website: <https://indiancc.nic.in/ncc-general-elective-subject-course-design/>.
2. Grooming Tomorrow's Leaders, published by DG, NCC. <https://indiancc.nic.in/>.
3. Youth in Action, published by DG, NCC. <https://indiancc.nic.in/>.
4. The Cadet, Annual Journal of the NCC. <https://indiancc.nic.in/>.
5. Précis Issued by respective Service Headquarters on specialized subject available to PI Staff as reference material. <https://indiancc.nic.in/>.

Course Objectives

- To learn the basics of data science and statistical inference.
- To understand the concept of data pre-processing.
- To visualize the processed data using visualization techniques.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PSO1. Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

PSO2. Ability to identify and use appropriate analytical tools and techniques on massive datasets to extract information.

Course Outcomes (COs)

1. Apply the basics of data science and exploratory data analysis.
2. Execute the useful information using mathematical skills.
3. Implement the usage of statistical inference and regression models.
4. Assess various data operations for cleaning and grouping of data.
5. Implement the visualization of data using visualization tools.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

5	3	3	3	3	3	-	-	-	-	-	-	-	3	3	-

UNIT I**9 Hours****INTRODUCTION**

Need for data science – benefits and uses – facets of data – data science process – setting the research goal – retrieving data – cleaning, integrating, and transforming data – exploratory data analysis – build the models – presenting and building applications.

UNIT II **9 Hours**

DESCRIPTIVE STATISTICS I

Frequency distributions – Outliers – relative frequency distributions – cumulative frequency distributions – frequency distributions for nominal data – interpreting distributions – graphs – averages – mode – median – mean – averages for qualitative and ranked data – describing variability– range – variance – standard deviation – degrees of freedom – interquartile range.

UNIT III **9 Hours**

DESCRIPTIVE STATISTICS II

Normal distributions – z scores – normal curve problems – finding proportions – finding scores – more about z scores – correlation – correlation coefficient for quantitative data – computational formula for correlation coefficient – regression – regression line – least squares regression line – standard error of estimate – interpretation of r^2 .

UNIT IV **9 Hours**

PYTHON FOR DATA HANDLING

Basics of Numpy arrays – aggregations – computations on arrays – comparisons, masks, boolean logic – fancy indexing – structured arrays – Data manipulation with Pandas – data indexing and selection – operating on data – missing data – hierarchical indexing – combining datasets – aggregation and grouping.

UNIT V **9 Hours**

DATA VISUALIZATION

Types of data visualization: Exploratory, Explanatory, visualization with matplotlib – line plots – scatter plots – visualizing errors – density and contour plots – histograms, binnings, and density – three-dimensional plotting– geographic data – data analysis using statmodels and seaborn – graph plotting using Plotly - Visualization Tools: Tableau.

Course Objectives

- Understand the algorithms and techniques used in image formation.
- Implement the motion computation and 3D vision to generate 3-Dimensional images of an object.
- Develop computer vision tools to assist surgeons during procedures, providing real-time feedback and guidance.

Program Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization for the solution of complex engineering problems.

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5.Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PSO1. Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

Course Outcomes (COs)

1. Apply the image processing techniques for computer vision.
2. Implement the image pre-processing techniques.
3. Create 3D vision and motion related techniques.
4. Evaluate computer vision for physical rehabilitation and training.
5. Analyse of Medical Image for Predictive Analytics and Therapy.

Articulation Matrix

UNIT I **10 Hours**
COMPUTER VISION FOUNDATIONS

History of Computer Vision – Basics of Image Processing, Machine Learning – Information Retrieval – Neuroscience – Robotics – Speech – Cognitive Sciences – Algorithms, Systems and Theory .Image Processing - Colour - Linear Algebra Primer - Pixels and Filters – Edge Detection - Features and Fitting - Feature Descriptors - Image Resizing - Segmentation - Semantic Segmentation - Clustering - Object recognition - Dimensionality Reduction - Face Identification - Visual Bag of Words - Object Detection from Deformable Parts - Semantic Hierarchies and Fine Grained Recognition - Motion - Tracking - Deep Learning

UNIT II **10 Hours**
IMAGE FORMATION AND IMAGE PRE-PROCESSING

Geometric primitives and transformations – Photometric image formation – The digital camera – Point operators – Linear Filtering – More neighbourhood operators – Fourier transforms – Pyramids and wavelets – Geometric transformations – Global optimization. Feature detection and matching – Segmentation – Edge detection - 2D and 3D feature based alignment – Pose estimation – Geometric intrinsic calibration – Triangulation – Two-Frame Structure from motion – Factorization – Bundle adjustment – Constrained Structure and Motion – Dense motion estimation.

UNIT III **7 Hours**
3D VISION

Methods for 3D Vision - 3D reconstruction – Image based rendering, Image Recognition – Object Detection – Space, Instance and Category Recognition – Recognition Databases and test sets.

UNIT IV **9 Hours**
COMPUTER VISION FOR ASSISTING HEALTHCARE APPLICATIONS

Computer Vision to see - Computer Vision for Cognition - Computer Vision for physical rehabilitation and training - Computer Vision for CAD systems in surgery - Computer Vision for human-machine interaction - Computer Vision for Ambient Assisted Living - Egocentric (first person) vision.

UNIT V **9 Hours**
HEALTH CARE APPLICATIONS AND CONTEMPORARY ISSUES

Analysis of Medical Image - Computer Vision for Predictive Analytics and Therapy - Fundamental Algorithms for Medical Images - Machine Learning Algorithms for Medical Images – Deep learning approaches for healthcare applications - Contemporary issues.

Total: 45 Hours

6. Forsyth D A and Ponce J, "Computer Vision: A Modern Approach", Prentice Hall, 2003.

Course Objectives

- To understand the major concepts in deep neural networks.
- To apply Convolutional Neural Network architectures for any real-life applications.
- To analyse the key computations underlying deep learning to build and train deep neural networks for various tasks.

Program Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization for the solution of complex engineering problems.

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PSO1. Ability to design and develop Artificial Intelligence algorithms, tools and techniques for solving real world problems.

Course Outcomes (COs)

1. Apply convolution neural network for any suitable applications.
2. Analyze the various classifiers of Single-layer perceptron.
3. Apply convolutional neural networks and its variants for any suitable applications.
4. Analyze the single-layer feedback networks with its mathematical foundation.
5. Analyze the various categories of associative memory with its case studies.

5	2	2	1	-	3	-	-	-	-	-	-	-	2	-	-

UNIT I**9 Hours****INTRODUCTION**

Fundamental concepts and Model: Models of artificial Neural Networks, Neural processing, Learning and Adaptation, Neural network Learning rules- Hebbian rule, Perceptron rule, Delta rule.

UNIT II**9 Hours****SINGLE LAYER PERCEPTRON MODEL**

Single-layer perceptron classifiers: Classification model, Features and decision regions, Discriminant functions, Linear machine and Minimum distance classification, Non-parametric training concept, Training and Classification using the Discrete perceptron: algorithm and example, Single layer continuous Perceptron networks for linearly separable classifications.

UNIT III**9 Hours****MULTI LAYER FEED FORWARD NETWORKS**

Multilayer feed forward Networks: Linearly separable Pattern classification, Delta learning rule for Multi-perceptron model, Generalized Delta learning rule, Feed forward recall and error back propagation training.

UNIT IV**9 Hours****SINGLE LAYER FEEDBACK NETWORKS**

Single-layer Feedback Networks: Basic concepts of dynamic systems, Mathematical foundations of Discrete-time Hopfield Networks, Mathematical foundations of Gradient type Hopfield networks, Associative memories: Basic concepts, Linear Associator.

UNIT V**9 Hours****ASSOCIATIVE MEMORY**

Bidirectional associative memory - associative memory for spatio-temporal patterns - Case study: Implementation of NN in any simulator. Self-Learning: Bidirectional Associative memory.

Course Objectives

- To know about Occupational safety and health (OSH).
- To discuss about risks faced by emergency responders during disease outbreaks and other emergencies.
- To create awareness on necessary strategies for managing OSH in emergency situations.

Programme Outcomes (POs)

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4.Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO12. Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO2. Critically analyze the current healthcare systems and develop innovative solutions effectively through problem specific design and development using modern hardware and software tools.

Course Outcomes (COs)

1. Execute the occupational safety measures by the scientific knowledge to overcome the risks faced by emergency responders.
2. Apply appropriate strategies and tools in Occupational safety and healthcare.
3. Analyze common risks for safety and health in emergencies.
4. Implement appropriate occupational safety practices in chemical accidents.
5. Create occupational safety measures in radiation incidents.

UNIT I

9 Hours

MANAGEMENT ASPECTS

Management system approach to occupational safety and health hazards and risks – rights, duties and responsibilities of employers and workers during outbreaks and emergencies – Emergency responders health monitoring and surveillance.

UNIT II**9 Hours****STRATEGIES AND TOOLS**

International Health Regulations, 2005 – Incident command system for managing outbreaks and emergencies – Occupational safety and health controls – Strategies for infection prevention and control.

UNIT III**9 Hours****COMMON RISKS FOR SAFETY AND HEALTH IN EMERGENCIES**

Vector-borne diseases, water and food-borne diseases, Vaccine-preventable diseases – Heat stress - Slips, trips and falls - Road traffic injuries – Ergonomic hazards - Violence – Psychological stress during outbreaks and injuries.

UNIT IV**9 Hours****OCCUPATIONAL SAFETY AND HEALTH IN CHEMICAL INCIDENTS**

Emergencies caused by chemical incidents – occupational safety and health hazards and risks of chemicals – Personal Protective Equipment – Decontamination of emergency response personnel – medical surveillance of emergency responders

UNIT V**9 Hours****OCCUPATIONAL SAFETY AND HEALTH IN RADIATION INCIDENTS**

Sources and scenarios of radiation incidents – guidance for protection of emergency responders - Occupational health surveillance of persons occupationally exposed to radiation in emergencies

22OBM02 AMBULANCE AND EMERGENCY MEDICAL SERVICE MANAGEMENT

3 0 0 3

Course Objectives

- To understand the ambulance & transport management and allied services.
- To compare the ambulance design and equipment, transportation and corporate Profit.
- To carry-out various acts governing transport management.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PSO1.Apply knowledge on foundation in Life Science, engineering, mathematics and current biomedical engineering practices with an ability to demonstrate advanced knowledge of a selected area within Biomedical Engineering.

PSO2. Critically analyze the current healthcare systems and develop innovative solutions effectively through problem specific design and development using modern hardware and software tools.

Course Outcomes (COs)

1. Implement ambulance services, types and allied services.
2. Create minimum ambulance rescue equipment and developing a transportation strategy.
3. Execute the emergency response team, transportation interfaces, transportation service characteristics and regulatory reforms involved.
4. Resolve ambulance services, types and allied services.
5. Create minimum ambulance rescue equipment and developing a transportation strategy.

Articulation Matrix

UNIT I

9 Hours

INTRODUCTION

Introduction-Transportation ambulance types-Advanced Life Support Ambulance-Basic Life Support Ambulance-Patient Transport Ambulance-Emergency Services-Ambulances-Allied services-telephone management

UNIT II

9 Hours

AMBULANCE DESIGN AND EQUIPMENT

Design and Equipment of Ambulances -Minimum Ambulance Rescue Equipment-Emergency drugs medicines Recruitment validation Training to handle in house Ambulance emergency procedures Checklist measures Roles of paramedics, midwives, community nurses, hospice workers in emergency handling via ambulance.

UNIT III**9 Hours****TRANSPORTATION REGULATION FOR EMERGENCY MEDICAL SERVICE**

Crisis Management-Anxiety and Stress Management-the Emergency response team-police assistance- Information handling & processing-Establishing customer service levels - Developing and Reporting customer service standards - Impediments to an Effective customer Service strategy - Improving customer Service Performance Transportation.

UNIT IV**9 Hours****AMBULANCE PREVENTIVE MAINTENANCE**

Legal obligations Switch Console Front, Main Electrical, Patient Compartment Climate Oxygen System On Board Suction system 110/12 VOLT system, Modular Body, Medical Equipment - Cot & Stretcher, safety belts-driver(s), passenger, Patients-child restraint device-incubator.

UNIT V**9 Hours****THE MOTOR VEHICLE ACT**

The Motor Vehicle Act, 1988- Rules of the road Regulations 1989- Overall Dimensions of Motor Vehicles (Prescription of conditions for exemption) Rules 1991-Use of Red light on the top front of the vehicle.

Course Objectives

- To introduce the concepts of hospital systems and need for central monitoring.
- To exemplify the power generation, utility and protection systems.
- To apply the distributed and central monitoring functions in hospital environment.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PSO1.Apply knowledge on foundation in Life Science, engineering, mathematics and current biomedical engineering practices with an ability to demonstrate advanced knowledge of a selected area within Biomedical Engineering.

PSO2. Critically analyze the current healthcare systems and develop innovative solutions effectively through problem specific design and development using modern hardware and software tools.

Course Outcomes (COs)

1. Assess the factors in central power generating and monitoring systems.
2. Analyze the sensors and actuators for the automation systems.
3. Organize the equipment types and its applications.
4. Apply software tools and digital computer for monitoring of parameters and medical data handling.
5. Execute central monitoring station for hospitals for control and surveillance applications.

Articulation Matrix

5	3	-	-	-	-	-	-	-	-	-	-	-	-	2	-

UNIT I**9 Hours****AUTOMATION IN HEALTHCARE**

Introduction to automation Role of automation in healthcare Remote Patient Monitoring Maximizing resources on patient care Reducing variability, Automating clinician and patient interactions through products.

UNIT II**9 Hours****POWER GENERATION AND MEDICAL GAS PRODUCTION**

Power generator, Battery: Maintenance and troubleshooting, energy conservation and monitoring system - Automation in dryer, compressor, air conditioning, lighting, heating systems.

UNIT III**9 Hours****AUTOMATION IN PIPING**

Monitoring of flow and pressure of medical gas System components Vacuum control unit's Automatic changeover system - Types of Outlets - Leakage test- Prevention and safety automation.

UNIT IV**9 Hours****INSTRUMENTATION SYSTEMS**

Optical sensors, Pressure Sensors - Ultrasonic Sensors - Tactile Sensors - Thermal sensors -Biosensor - Linear Actuators, Central monitoring station - Alarm system - Regulation and standards.

UNIT V**9 Hours****APPLICATIONS**

Business intelligence & executive dashboards - Radio-Frequency Identification (RFID)- based patient and asset tracking solutions - Tablet-based applications for bed side access to doctors/nurses - Healthcare CRM for patient relationship management - Patient kiosk, tele-health - HIS integration.

Course Objectives

- To understand the basic concepts such as Abstract Data Types, Linear and Non-Linear Data structures
- To analyze the performance of algorithms using time and space complexity.
- To understand the behavior of Linear and Non-Linear data structures
- To choose the appropriate data structures for a specified application
- To write programs in C++ to solve problems using various data structures.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO1: Design and develop cost effective, secure, reliable IT, network and web-based solutions with professional expertise in the domains including banking and healthcare and communications.

Course Outcomes (COs)

1. Analyze the performances of the sorting and searching algorithms.
2. Apply linked list linear data structures operations using dynamic memory allocation.
3. Apply stack and Queue data structure operations to solve computational problems.
4. Design tree data structures and hashing techniques for effective searching of data.
5. Create algorithms for solving real world problems using Graph data structure.

UNIT I**8 Hours****INTRODUCTION**

Introduction to data structures-types of data structures- Pseudo code - Abstract data types - ADT Implementations performance analysis- time complexity and space complexity- basics of OOPS concepts.

UNIT II	9 Hours
SORTING AND SEARCHING TECHNIQUES	
Searching methods: Linear and binary search methods, Sorting techniques: Insertion Sort - Selection Sort - Bubble Sort - Merge sort - Quick sort.	
UNIT III	11 Hours
LINEAR DATA STRUCTURES	
Stack operation - Stack ADT - Applications of stack - Queues operations - Queue ADT - Queue applications – Linked List - Circular - Doubly linked list.	
UNIT IV	11 Hours
TREE	
Basic Tree concepts - Binary Trees - Tree Traversals - Binary Search Trees – B Tree - Heap concepts - Heap ADT.	
UNIT V	6 Hours
GRAPHS	
Introduction – types of graphs- Shortest Path Algorithms: Unweighted Shortest Paths - Dijkstra's Algorithm. Minimum Spanning Tree: Prim's Algorithm - Kruskal's Algorithm- graph search methods DFS, BFS	

Total: 45 Hours

Course Objectives

- To understand the concept of Object-Oriented Programming.
- To apply the Object-Oriented concepts to solve problems using C++.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PSO1.Design and develop cost effective, secure, reliable IT, network and web-based solutions with professional expertise in the domains including banking and healthcare and communications.

Course Outcomes (COs)

1. Implement C++ programs using classes and objects.
2. Create C++ programs using the concept of Inheritance.
3. Design applications using virtual functions.
4. Implement the concept of operator overloading.
5. Create GUI applications using C++ library classes.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	2	-	-	2	-	-	-	-	-	-	-	-	-
2	1	2	-	-	2	-	-	-	-	-	-	-	-	-
3	1	3	2	-	2	-	-	-	-	-	-	-	2	-
4	1	3	1	-	2	-	-	-	-	-	-	-	2	-
5	1	3	3	-	2	-	-	-	-	-	-	-	3	-

UNIT I**5 Hours****BASICS OF C++ PROGRAMMING**

C++ Program Structure, Character Set and Tokens, Data Type, Type Conversion, Preprocessor Directives, Namespace, Input/output Streams and Manipulators, Dynamic Memory Allocation with new and delete, Control Statements. Functions: Function Overloading, Inline Functions, Default Argument, Pass by Reference, Return by Reference, Scope and Storage Class. Pointers: Pointer variables declaration & initialization, Operators in pointers, Pointers and Arrays, Pointer and Function.

UNIT II**6 Hours****CLASSES & OBJECTS**

A Simple Class and Object, accessing members of class, Initialization of class objects: (Constructor, Destructor), Default Constructor, Parameterized Constructor, Copy Constructor, The Default Copy Constructor, Objects as Function Arguments, Returning Objects from Functions, Structures and Classes, Memory allocation for Objects, Static members, Member functions defined outside the class.

UNIT III	7 Hours
OPERATOR OVERLOADING & INHERITANCE	
Fundamental of operator overloading, Restriction on operator overloading, Operator functions as a class member, Overloading unary and binary operator, Introduction to inheritance, Derived Class and Base Class, Access Specifiers (private, protected, and public), Types of inheritance.	
UNIT IV	6 Hours
VIRTUAL FUNCTION & POLYMORPHISM	
Concept of Virtual functions, Late Binding, Abstract class and pure virtual functions, Virtual Destructors, Virtual base class, Friend function and Static function, Assignment and copy initialization, Copy constructor, This pointer, Concrete classes, Polymorphism and its roles.	
UNIT V	6 Hours
FUNCTION TEMPLATES AND EXCEPTION HANDLING	
Function templates, Function templates with multiple arguments, Class templates, templates and inheritance, Exceptional Handling (Try, throw and catch), Use of exceptional handling.	
EXPERIMENT 1	3 Hours
Introduction to Object Oriented Programming- Classes and Objects.	
EXPERIMENT 2	5 Hours
Programs using Constructor, Destructor	
EXPERIMENT 3	4 Hours
Programs on operator overloading.	
EXPERIMENT 4	5 Hours
Programs on Inheritance	
EXPERIMENT 5	3 Hours
Programs on Virtual Function	
EXPERIMENT 6	3 Hours
Programs on Friend Function	
EXPERIMENT 7	3 Hours
Programs on exception handling	
EXPERIMENT 8	4 Hours
Programs on Function and Class Templates	
Total	60 Hours

5. K R Venugopal, Rajkumar and T Ravishankar, Mastering C++, Tata McGraw Hill Publishing, New Delhi, 2010.	

Course Objectives

- To understand the concept of Object-Oriented Programming
- To develop console applications using Java.
- To develop GUI applications using Java library classes.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5.Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.

PSO1.Design and develop cost effective, secure, reliable IT, network and web-based solutions with professional expertise in the domains including banking and healthcare and communications.

Course Outcomes (COs)

1. Implement Java programs using classes and objects.
2. Execute Java programs using the concept of Inheritance.
3. Design applications using functions, files and exceptions.
4. Create console applications using Java OOPS.
5. Create GUI applications using Java library classes.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	2	-	-	2	-	-	-	-	-	-	-	-	-
2	1	2	-	-	2	-	-	-	-	-	-	-	-	-
3	1	3	2	-	2	-	-	-	-	-	-	-	2	-
4	1	3	1	-	2	-	-	-	-	-	-	-	2	-
5	1	3	3	-	2	-	-	-	-	-	-	-	3	-

UNIT I**6 Hours****INTRODUCTION TO OOP AND JAVA FUNDAMENTALS**

Object Oriented Programming - Abstraction - objects and classes- Encapsulation- Inheritance- Polymorphism- OOP in Java - Characteristics of Java - The Java Environment -Java Source File -Structure - Compilation. Fundamental Programming Structures in Java - Defining classes in Java - constructors, methods -access specifiers - static members -Comments, Data Types, Variables, Operators, Control Flow, Arrays, Packages- JavaDoc comments.

UNIT II**6 Hours****INHERITANCE AND INTERFACES**

Inheritance -Super classes- sub classes –Protected members - constructors in sub classes- the Object class - abstract classes and methods- final methods and classes - Interfaces - defining an interface, implementing interface, differences between classes and interfaces and extending interfaces - Object cloning -inner classes, Array Lists - Strings.

UNIT III	6 Hours
EXCEPTION HANDLING AND I/O	
Exceptions - exception hierarchy - throwing and catching exceptions - built-in exceptions, creating own exceptions, Stack Trace Elements. Input / Output Basics - Streams -Byte streams and Character streams - Reading and Writing Console - Reading and Writing Files	
UNIT IV	6 Hours
MULTITHREADING AND GENERIC PROGRAMMING	
Differences between multi-threading and multitasking, thread life cycle, creating threads, synchronizing threads, Inter-thread communication, daemon threads, thread groups. Generic Programming - Generic classes - generic methods -Bounded Types - Restrictions and Limitations.	
UNIT V	6 Hours
EVENT DRIVEN PROGRAMMING	
Graphics programming - Frame - Components -working with 2D shapes - Using colour, fonts, and images - Basics of event handling -event handlers -adapter classes -actions - mouse events -AWT event hierarchy- Introduction to Swing- layout management - Swing Components -Text Fields, Text Areas -Buttons- Check Boxes -Radio Buttons -Lists- choices- Scrollbars -Windows -Menus - Dialog Boxes.	
EXPERIMENT 1	4 Hours
Introduction to Object Oriented Programming- Classes and Objects.	
EXPERIMENT 2	5 Hours
Programs using inheritance and polymorphism	
EXPERIMENT 3	5 Hours
Programs on operator overloading.	
EXPERIMENT 4	5 Hours
Programs on exception handling	
EXPERIMENT 5	5 Hours
Programs on multi-threading in java	
EXPERIMENT 6	6 Hours
Programs on java swing	
Total 60 Hours

Course Objectives

- To enhance the awareness about water resources management and conservation
- To acquire knowledge about water harvesting techniques and their implementation.
- To practice the design aspects of sustainable rainwater harvesting solutions for communities.

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3.Design/ Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO7.Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PSO2. Improve technologies to minimize the crop loss from field damage during harvesting, sorting, processing, and packaging.

Course Outcomes (COs)

1. Assess the sources, availability and challenges in water resources management.
2. Assess various water harvesting systems in practice.
3. Execute design considerations for comparing surface runoff harvesting methods.
4. Compare the characteristics and impacts of flood water harvesting techniques.
5. Evaluate various rainwater harvesting methods for groundwater recharging.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	-	-	-	-	-	3	-	-	-	-	-	-	1
2	2	1	-	-	-	-	-	-	-	-	-	-	-	2
3	1	1	3	-	-	-	2	-	-	-	-	-	-	1
4	1	2	3	-	-	-	2	-	-	-	-	-	-	1
5	1	1	3	-	-	-	2	-	-	-	-	-	-	1

UNIT I**8 Hours****WATER RESOURCES AND CONSERVATION CHALLENGES**

Global water distribution – primary and secondary sources of water – technical, social and cultural aspects; Global challenges in water and climate – water scarcity – water pollution – Indian scenario; Water resources management – public participation – integrated approach; Water governance – water sharing plans – policy, schemes and concerns.

UNIT II**10 Hours****WATER RESOURCES**

Principles of water harvesting for rural and urban – collection at micro and macro levels, flow control, storage and uses; Rainwater harvesting systems – traditional and contemporary – groundwater recharge; Water resources inventory – site analysis – database collection – water allocation principles based on demand and supply; Traditional water harvesting systems – practices in India – references in old texts – reasons for their deterioration – way forward; Watershed-based approach – project planning at micro and macro levels – community participation – rain centres.

UNIT III**9 Hours****SURFACE RUNOFF HARVESTING**

Short-term and micro-level harvesting techniques for runoff – terracing and bunding – rock and ground catchments; Long-term and macro-level harvesting techniques for runoff – farm ponds – percolation ponds and nala bunds; Design considerations – site selection – selection of runoff coefficients – computation of rainwater runoff volume – hydrograph analysis – cost estimation; Design of storage structures – storage capacity – selection of component – methods of construction.

UNIT IV**9 Hours****FLOOD WATER HARVESTING**

Floods – causes of urban floods and droughts – characteristics of water spread – impacts; Flood water harvesting – permeable rock dams – water spreading bunds – flood control reservoir; Design considerations – computation of flood water quantity; Trenching and Diversion Structures – types – site selection – design criteria – most economic section – design consideration of ditch system.

UNIT V**9 Hours****GROUNDWATER HARVESTING**

Rooftop rainwater harvesting – recharge pit – recharge trench – tube well – recharge well; artificial recharge – gully plug – dug well – percolation tank – nala bunds – recharge shaft; Groundwater harvesting – aquifer characteristics – subsurface techniques – infiltration wells – recharge wells – groundwater dams; Design of drainage system – types – design criteria – filter design – causes of failures

Course Objectives

- To understand the concept of value engineering in order to reduce cost of product or process or service.
- To implement creative and innovative techniques using FAST diagram.
- To study benefits of Value Engineering for various industries.

Programme Outcomes (POs)

PO10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11. Project Management and Finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12. Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PSO1. Design, analyze, and evaluate the performance of real-world problems in the field of Electrical and Electronics using contemporary tools

PSO2. Apply knowledge skills and attitude to conduct experiments and interpret data to solve complex engineering problems in the power systems network, power electronics, electric drives and develop control strategies by considering economic and environmental constraints.

Course Outcomes (COs)

1. Apply the concepts of value and value engineering to prepare a job plan.
2. Analyze the cost and worth of a product/service using the principles of economics.
3. Evaluate the value of a product/service to take managerial decisions.
4. Apply the soft skills in understanding team building, team work and report writing.
5. Assess the functions and values of product/services in industries using case studies.

Articulation Matrix

5	-	-	-	-	-	-	-	-	-	2	3	1	-	2

UNIT I**8 Hours****INTRODUCTION TO VALUE ENGINEERING**

Historical perspective of Value Engineering, Aims and objectives of Value Engineering, Concept of Value, Value Engineering concerned with Economic Value, Value Engineering Job plan.

UNIT II**9 Hours****FUNCTIONAL ANALYSIS**

Function-Cost-Worth analysis: Function Analysis System Technique (FAST); Review of principles of engineering economics.

UNIT III**10 Hours****EVALUATION OF VALUE ENGINEERING**

Evaluation of function, Problem setting system, problem solving system, setting and solving management - decision - type and services problem, evaluation of value.

UNIT IV**9 Hours****HUMAN ASPECTS IN VALUE ENGINEERING**

Team building; Life cycle costing; Managing Value Engineering Study; Value Engineering Report writing; Presentation Skill - Individual and Team Presentations; Implementation and follow-up.

UNIT V**9 Hours****BENEFITS OF VALUE ENGINEERING**

Classification of hazardous zones-intrinsically safe and explosion proof electrical apparatus-increase safe Value Engineering Case studies in the Industries like Manufacturing; Construction; Health Care; Process.

Total: 45 Hours**Reference(s)**

Course Objectives

- To provide knowledge on basics of electrical fire and statutory requirements for electrical safety.
- To understand the causes of accidents due to electrical hazards.
- To know the various protection systems in Industries from electrical hazards.
- To know the importance of earthing.
- To distinguish the various hazardous zones and applicable fire proof electrical devices.

Programme Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO6. The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7. Environment and Sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PSO1. Modeling, design and Analysis of Electrical and Electronic Systems using design principles and software tools.

PSO2. Apply the core knowledge and technical skills to develop reliable and sustainable solutions to real world problems.

Course Outcomes (COs)

1. Analyze the basic concepts in electrical circuit and hazards involved in it.
2. Analyze the electrical hazards in the workplace and its impacts.
3. Evaluate the operation of various protection systems from electrical hazards.
4. Analyze the various safety procedures involved in the industries.
5. Evaluate the different hazardous zones in Industries and their safety measures.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	1	-	-	-	2	1	-	-	-	-	-	2	-
2	1	1	-	-	-	1	2	2	-	-	-	-	1	2
3	1	1	-	-	-	2	-	2	1	-	-	-	2	1
4	1	1	-	-	-	2	1	-	-	-	-	-	1	-
5	1	1	-	-	-	2	1	2	1	-	-	-	2	1

UNIT I**9 Hours****INTRODUCTION**

Objectives of safety and security measures - Hazards associated with electric current and voltage - principles of electrical safety - working principles of major electrical equipment - Typical supply situation - Indian electricity act and rules - statutory requirements from electrical inspectorate-International standards on electrical safety.

UNIT II**9 Hours****ELECTRICAL HAZARDS**

Primary and secondary hazards-shocks, burns, scalds, falls-human safety in the use of electricity- Energy leakage-clearances and insulation-classes of insulation-voltage classifications-excess energy- current surges-over current and short circuit current-heating effects of current- Lightning, hazards, lightning arrestor, - national electrical safety code ANSI.

UNIT III**9 Hours****ELECTRICAL SAFETY EQUIPMENT**

Fuse, circuit breakers and overload relays - safe distance from lines - capacity and protection of conductor joints and connections, overload and short circuit protection - earth fault protection. FRLS insulation - insulation and continuity test - system grounding - equipment grounding - earth leakage circuit breaker (ELCB) - ground fault circuit interrupter - electrical guards - Personal protective equipment.

UNIT IV**9 Hours****ELECTRICAL SAFETY OPERATION AND MAINTENANCE**

Role of environment in selection - protection and interlock - discharge rod and earthing devices - safety in the use of portable tools - preventive maintenance - installation – earthing, specifications, earth resistance, earth pit maintenance - Fire Extinguishers - CO2 and Dry Powder schemes.

UNIT V**9 Hours****HAZARDOUS AREAS**

Classification of hazardous zones-intrinsically safe and explosion proof electrical apparatus-increase safe equipment-their selection for different zones-temperature classification-grouping of gases-use of barriers and isolators-equipment certifying agencies – electrical safety standards. (IS, API and OSHA standards).

Course Objectives

- To Understand functional components of the Database Management System
- To Understand need for concurrency and transaction property
- To compare and contrast various indexing strategies in different database systems.

Programme Outcomes (POs)

PO1.Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2.Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9. Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PSO1. Design and develop cost effective, secure, reliable IT, network and web-based solutions with professional expertise in the domains including banking and healthcare and communications.

Course Outcomes (COs)

1. Analyze the essential concepts and key issues involved in the design of a relational database.
2. Apply the concepts of normalization and ER model to guarantee an efficient database.
3. Analyze the concurrent execution of transaction process and various recoveries from failures
4. Apply indexing and query optimization techniques for a database design.
5. Analyze the various advanced database systems for efficient data storage and NOSQL concepts.

UNIT I

6 Hours

RELATIONAL DATABASES

Purpose of Database System - Views of data - Data Models - Database System Architecture - Introduction to relational databases - Relational Model - Keys - Relational Algebra - SQL fundamentals - Advanced SQL features.

UNIT II DATABASE DESIGN Entity-Relationship model - E-R Diagrams - Enhanced-ER Model - ER-to-Relational Mapping - Functional Dependencies - First, Second, Third Normal Forms, - Boyce/Codd Normal Form- Multivalued Dependencies and Fourth Normal Form	6 Hours
UNIT III TRANSACTION Transaction Concepts - ACID Properties - Schedules - Serializability - Concurrency Control -Need for Concurrency - Locking Protocols - Two-Phase Locking - Deadlock - Transaction Recovery - Save Points - Isolation Levels.	6 Hours
UNIT IV FILE AND QUERY PROCESSING RAID - File Organization - Organization of Records in Files - Indexing and Hashing -Ordered Indices - Static Hashing - Dynamic Hashing - Query Processing Overview - Algorithms for SELECT and JOIN operation.	6 Hours
UNIT V ADVANCED DATABASES Distributed Databases: Architecture, Data Storage, Transaction Processing - Object-based Databases: Object Database Concepts, Object-Relational features, ODMG Object Model, ODL, OQL - Graph Database.	6 Hours
EXPERIMENT 1 Data Definition Commands, Data Manipulation Commands for inserting, deleting, updating and retrieving Tables with suitable examples.	5 Hours
EXPERIMENT 2 Implementation of different types of operators in SQL. <ul style="list-style-type: none"> • Arithmetic Operators • Logical Operators • Comparison Operator • Special Operator • Set Operation 	5 Hours
EXPERIMENT 3 Database Querying - Simple queries, Nested queries, Sub queries & Joins.	3 Hours
EXPERIMENT 4 Implement <ul style="list-style-type: none"> • Group By & having clause • Order by clause • Indexing 	3 Hours
EXPERIMENT 5 Create a student database table currently stored as a single table. Normalize these structures to meet the 3NF requirements and draw ER model Diagram	4 Hours
EXPERIMENT 6 Implementation of Database Backup & Recovery commands, Rollback, Commit & Save point.	5 Hours
EXPERIMENT 7 Develop database for a Book Publishing Company	5 Hours
Total	60 Hours

Course Objectives

- To enable the students to understand the fundamentals of international business.
- To provide competence to the students on making international business decisions.
- To enable the students to understand the financial and promotional assistance available for exporters

Programme Outcomes (POs)

PO1.Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO7.Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO9.Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

Course Outcomes (COs)

1. Evaluate the role and importance of digital marketing in today's rapidly changing business environment.
2. Create the techniques to help organizations to utilize social media for digital marketing.
3. Analyse the key elements and campaign effectiveness of E-mail marketing and mobile marketing.
4. Evaluate the effectiveness of a digital marketing campaign using Google Analytics.
5. Apply advanced practical skills to plan, predict and manage digital marketing campaign.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

UNIT I**9 Hours****INTRODUCTION**

Definition, Drivers of International Business, Domestic Vs. International Business, Trade and Investment Theories: Interventionist Theories, Free Trade Theories, Theories Explaining Trade Patterns: PLC Theory, The Porter Diamond, Factor Mobility Theory.

UNIT II**9 Hours****GLOBALIZATION**

Globalization: Implications, Challenges - Protectionism: Tariff Barriers, Non-Tariff Barriers- Forms of Integration, Role of WTO and IMF in International Business, Economic, Political, Cultural and Technological Environments.

UNIT III**9 Hours****INTERNATIONAL BUSINESS STRATEGIES**

Market Entry Strategies, Multinational Strategy, Production Strategy, Marketing Strategy, Human Resource Strategy.

UNIT IV**9 Hours****FOREIGN EXCHANGE**

Foreign Exchange Market – Functions, Theories of Exchange Rate Determination, Exchange Rate Forecasting, Convertibility of Currency, Risks associated with Foreign Exchange.

UNIT V**9 Hours****EXPORTS AND ETHICS IN INTERNATIONAL BUSINESS**

Exports – Risks, Management of Exports, Regulatory frameworks, Export financing, Countertrade, Ethics – Issues, Dilemma and Theory.

SUGGESTED SELF-STUDY TOPICS:

Liberalization, GATT, Standardization Vs. Differentiation, FEMA, EXIM Policy

Total: 45 Hours**References:**

Course Objectives

- To introduce fundamental quantitative techniques, including linear programming, PERT/CPM, and optimization models, for effective cost management.
- To develop analytical skills for solving transportation and assignment problems to enhance resource allocation and cost efficiency.
- To apply learning curve theory in project planning and cost estimation to improve productivity and financial forecasting.
- To enable the use of quantitative decision-making tools for optimizing project scheduling, budgeting, and overall cost control.

Programme Outcomes (POs)

PO1 Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2 Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3 Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations

PO6 Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO11. Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments

PSO1 Graduates will be able to demonstrate technical skills with inter-disciplinary approach for executing Infrastructural projects ensuring safety, cost-effectiveness and sustainability.

Course Outcomes (COs)

1. Analyze the cost concepts to support decision-making and operational control through a structured cost database.
2. Analyze stakeholder roles to optimize project performance and mitigate cost overruns.
3. Analyze project execution and cost control techniques to support strategic decision-making and optimize project financial performance.
4. Evaluate costing strategies and budgetary control techniques in the service sector.
5. Apply quantitative techniques to optimize cost management and decision-making in projects.

Articulation Matrix

CO No	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
1	1	-	-	-	-	2	-	-	-	-	1	-	-	-
2	1	2	2	-	-	2	-	-	-	-	-	-	-	1
3	1	2	-	-	-	-	-	-	-	-	2	-	-	1
4	1	2	1	-	--	1	-	-	-	-	2	-	-	1
5	1	2	-	-	-	1	-	-	-	-	2	-	-	1

UNIT I**9 Hours****INTRODUCTION TO COSTING CONCEPTS**

Objectives of a Costing System; Cost concepts in decision-making; Relevant cost, Differential cost, Incremental cost and Opportunity cost; Creation of a Database for operational control.

UNIT 2**9 Hours****INTRODUCTION TO PROJECT MANAGEMENT**

Project: meaning, Different types, why to manage, cost overruns centres, various stages of project execution: conception to commissioning. Project execution as a conglomeration of technical and nontechnical activities, Detailed Engineering activities, Pre project execution main clearances and documents, Project team: Role of each member, Importance of the Project site: Data required with significance, Project contracts

UNIT 3**9 Hours****PROJECT EXECUTION AND COSTING CONCEPTS**

Project execution, Project cost control, Bar charts and Network diagram, Project commissioning: mechanical and process, Cost Behavior and Profit Planning Marginal Costing; Distinction between Marginal Costing and Absorption Costing; Break-even Analysis, Cost-Volume-Profit Analysis, Various decision-making problems, Pricing strategies: Pareto Analysis, Target costing, Life Cycle costing.

UNIT 4**9 Hours****COSTING OF SERVICE SECTOR AND BUDGETARY CONTROL**

Just-in-time approach, Material Requirement Planning, Enterprise Resource Planning, Activity Based Cost Management, Bench Marking; Balanced Score Card and Value-Chain Analysis, Budgetary Control: Flexible Budgets; Performance budgets; Zero-based budgets.

UNIT 5**9 Hours****QUANTITATIVE TECHNIQUES FOR COST MANAGEMENT**

Just-in-time approach, Material Requirement Planning, Enterprise Resource Planning, Activity Based Cost
